Commonwealth of Massachusetts.

ADJUTANT-GENERAL'S OFFICE, BOSTON, }
December 31, 1861. }

To His Excellency JOHN A. ANDREW, *Governor and Commander-in-Chief.*

SIR,—I have the honor to submit to your Excellency the Report of the Adjutant-General's Department for the year ending December 31, 1861, together with the Reports of the Quartermaster-General, Surgeon-General, Commissary-General, and Master of Ordnance.

With the highest respect,
I have the honor to be,
Your Excellency's ob't servant,

WM. SCHOULER, *Adjutant-General.*

ANNUAL REPORT.

ADJUTANT-GENERAL'S OFFICE, BOSTON, }
December 31, 1861. }

To His Excellency JOHN A. ANDREW, *Governor and Commander-in-Chief.*

SIR :—At the commencement of the present year, the duties of Adjutant-General, Quartermaster-General, Inspector-General of the Militia, and “Keeper of the public magazines, munitions of war, entrenching tools, and other implements of war belonging to the Commonwealth,” devolved upon me. Events transpired in the early part of the year which rendered a division of these duties a necessity. That necessity still exists. A narrative of these events will constitute the burden of my Report. They have a local and a national interest. Related without extravagance, and in a plain and truthful form, they will do no discredit to our ancient Commonwealth, and in that form I shall endeavor to present them.

The storm of rebellion which broke upon our peaceful land in April last, was foreseen months before by your Excellency and by the Legislature of the Commonwealth, and wise and liberal provision was made to meet and if possible avert it.

In the Report which I had the honor to make a year ago to your distinguished predecessor, Governor Banks, occurs this passage :

“Since this Report was in the printer's hands, events have transpired in some of the Southern States and at Washington, which have awakened the attention of the people of Massachusetts in a remarkable degree to the perpetuity of the Federal Union, and which may require the active militia of the Commonwealth

to be greatly augmented. Should our worst fears be realized, and this nation be plunged into the horrors of civil war, upon Massachusetts may rest, in no inconsiderable degree, the duty of staying the effusion of blood and of rolling back the black tide of anarchy and ruin. She did more than her share to achieve the independence of our country and establish the Government under which we have risen to such unparalleled prosperity, and become the great Power of the American Continent, and she will be true to her history, her traditions and her fair fame.

“Should it become necessary to increase the number of her active militia to a war footing, the present organization offers an easy and a good means. The present companies could be filled to their full complement of men, and the regiments to their full complement of companies. New regiments of Infantry, new battalions of Riflemen, new companies of Artillery and Cavalry could be formed with which to fill the several Brigades and make our present Divisions five thousand men each, with proper apportionment of the several military arms. This, of course, would require a large outlay of money, which would doubtless be cheerfully met by our people if their honor and the welfare of their country demand it of them.

“In the meantime, I would suggest that a General Order be issued calling upon commanders of the companies of the active force to forward to Head-Quarters the names of the persons composing their commands, also their places of residence, so that a complete roll of each company may be on file in this department.

“The companies that have not their full quota of men should be filled by new enlistments to the number fixed by law, and whenever new enlistments are made or discharges given, the names of the persons enlisted and discharged, should be forwarded immediately to Head-Quarters and placed on file.”

The worst fears of our people have since been realized, and the evidence now afforded by the living and dead of our true, loyal and gallant sons of Massachusetts, at home and on the battle-field, proves that this Commonwealth has been “true to her history, her traditions and her fair fame.”

Inquiry has been frequently made how it was that Massachusetts was able to send forward so promptly the troops which first took part in the present struggle for the maintenance of the Government. In my judgment, the reasons to be assigned are these :

1st. The excellent system for the organization and discipline of a militia force, which has so long distinguished this Commonwealth, and has received the constant attention and approval of the Legislature.

2d. The promulgation of General Order No. 4, by your Excellency's direction, on the 16th of January last, so that we ascertained with accuracy the number of officers and men of the Volunteer Militia who would respond instantly to any call which might be made upon them by the President of the United States. Opposition was made to this Order at first, but events soon proved the wisdom of issuing it. Those who could not respond as required received their discharges, and their places were immediately filled by others ready for any emergency.

3d. The sagacity and foresight which induced the legislature to pass the bill approved by your Excellency on the 3d of April, appropriating \$25,000, and authorizing the Adjutant-General to contract for overcoats, blankets, knapsacks, 200,000 ball cartridges, &c., for two thousand troops. Our militia soldiers had uniforms of their own, and had in their several armories over three thousand Springfield rifled muskets of the best pattern.

Thus when the attack upon the heroic band of Union patriots at Fort Sumter on the 12th of April extinguished the last hope of peace, and its fall aroused the mighty energy of our people to maintain their national existence, Massachusetts was ready to push forward her regiments, armed and equipped, to defend the flag and save Washington, in the hour of peril, from capture and spoliation.

For three months previous, our Volunteer Militia, in anticipation of some great traitorous movement in the South, had been drilling almost nightly in their several armories, so that when the summons came from the President on the 15th of April, the "Fiery Cross" was sent over the Commonwealth, and in obedience to the call the men came forth, as in the

brave days of old, leaving the workshop and the plough, their nets and barges, homes and kindred, inspired by love of country and the rights of mankind.

On the very day when Fort Sumter was attacked, I had the honor to write by your Excellency's direction the following letter to the Secretary of War:—

ADJUTANT-GENERAL'S OFFICE, BOSTON, }
April 13th, 1861. }

SIR,—I am directed by His Excellency the Governor to request of you, if consistent with law and the policy of your Department, to allow me to draw two thousand rifled muskets from the United States Arsenal at Springfield, in advance of our annual quota, becoming due.

We have five thousand infantry, now armed and equipped and properly officered. Only about three thousand of them, however, are armed with rifled muskets; the others have the old smooth bores, all of which have been changed from flint locks to the percussion. If you will permit us to draw two thousand more of the new rifled muskets, we will have five thousand as well armed, drilled and officered infantry as ever handled a musket.

I would also suggest that a couple of regiments of the volunteers be ordered by the President to garrison Forts Warren and Independence in Boston Harbor. They are now without men, and might be taken by lawless men and turned against the government.

I believe that our troops would like to do garrison duty, until called upon by the President for active service. The regiments might alternate every four or six weeks, and thus they would learn much that would be of service to them, and hold the forts against attack or surprise.

With great respect I have the honor to be

Your obedient servant,

WILLIAM SCHOULER.

Hon. SIMON CAMERON,

Secretary of War, Washington.

The two thousand rifled muskets could not be procured, nor permission granted to garrison the forts. We afterwards obtained, however, five thousand of the most improved smooth bore muskets from Springfield, and four thousand Windsor rifles (without bayonets) from the United States Arsenal at Watertown, by orders from Major General Wool, U. S. A., then in command of this Department, who had moved his Head-Quarters from Troy to New York city. I quote this letter to show

that if some of our regiments have gone to the seat of war with smooth bore muskets, and our forts have not been continually garrisoned, it has been through no neglect on the part of the Executive of this Commonwealth.

The first call for troops was by a telegram from Senator Wilson dated at Washington, April 15th, requesting twenty companies to be sent immediately to Washington and there mustered into service. In the course of the day were received formal requisitions by telegraph from the Secretary of War and Adjutant-General of the United States for two full regiments of the Massachusetts Militia. In compliance therewith, Special Order No. 14 was issued on the same day, directing Colonel Jones of the Sixth Regiment, Colonel Packard of the Fourth, Colonel Wardrop of the Third, and Colonel Munroe of the Eighth, to muster their respective commands on the Boston Common forthwith "in compliance with a requisition made by the President of the United States." This order was sent by mail and by special messengers to the Colonels, who severally resided at Lowell, Quincy, New Bedford, and Lynn. The companies were scattered through the cities and towns of Plymouth, Bristol, Norfolk, Essex and Middlesex Counties.

In obedience to orders nearly every company in the above regiments arrived in Boston the next day. The first were three infantry companies from Marblehead, under Captains Martin, Phillips and Boardman. They arrived at the Eastern depot at nine o'clock, A. M., and were welcomed by a large multitude of people, who cheered the gallant and devoted men as they marched to their quarters at Faneuil Hall, through rain and sleet, to the music of "Yankee Doodle." During the entire day the troops arrived at Boston by the different railroad trains.

A despatch from Senator Wilson on this day (April 16th) stated that Massachusetts was to furnish immediately four regiments, making one brigade, with one Brigadier General. Brigadier General Benjamin F. Butler, Third Brigade, Second Division, M. V. M., was ordered on the 17th to take command of the troops. On the same day the following Order was issued, showing the destination of the Third, Fourth and Sixth Regiments, and detailing certain militia companies for service with them :

HEAD-QUARTERS, BOSTON, April 17, 1861.

[SPECIAL ORDER, No. 22.]

Brigadier General Benjamin F. Butler, of Third Brigade, Second Division, is ordered to detail the following troops for the following services :

Colonel David W. Wardrop, of Third Regiment of Infantry, Second Brigade and First Division, is hereby ordered forthwith to report himself and his command for active service.

Company C, Fifth Regiment, Third Brigade and Second Division, commanded by Captain Richardson, will be added to the command as a part of said regiment.

He will with these troops proceed *forthwith* to Fortress Monroe, in Virginia, by steamer to be provided, and there report himself to Colonel Abner B. Packard, of Fourth Regiment, Second Brigade, First Division, or to such officer of the United States as may be in command of that Fortress, there to enter into the service of the United States as United States Militia, and await and abide such further orders as may be received.

In case Fortress Monroe shall be inaccessible, or in the possession of an enemy, Colonel Wardrop will exercise his own discretion as to the disposition of his command, until he shall join Colonel Packard, or shall receive further orders from the War Department of the United States Government at Washington, and whatever orders he may receive from that Department he will obey, whether the same be given by telegraph or otherwise, provided he be satisfied of their genuineness.

Colonel Abner B. Packard, of the Fourth Regiment, Second Brigade, First Division, is hereby ordered to report himself and his command for active service. He will, with his command, proceed forthwith to the same duty as that ordered to be performed by the troops under Colonel David W. Wardrop, and upon being joined by Colonel Wardrop and his troops, he will take command of them also, and act as to them also conformably to the above orders.

Colonel Edward F. Jones, commanding the Sixth Regiment of Infantry in the Third Brigade, and Second Division, is hereby ordered to report himself and his command *forthwith* for active service.

Company C, of the Seventh Regiment, Fourth Brigade and Second Division, Captain Dike,

Company C, of First Regiment, First Brigade and First Division, Captain Sampson,

Company B, of Third Battalion of Infantry, Fifth Brigade and Third Division, Captain Pratt, will be detailed from their respective commands, and for the purposes of this service will be added to the regiment of Colonel Jones. He will with these troops proceed to the depot of the

Boston and Worcester Railroad Company, at six o'clock this evening, and thence by the most practicable route *via* New York city to Washington, where he will report himself and his troops to Brigadier-General Benjamin F. Butler, and in his absence to the Adjutant-General of the United States at Washington; said troops are to enter into the service of the United States as militia, and there await and obey such further orders as may be received.

By order of His Excellency JOHN A. ANDREW, *Governor and Commander-in-Chief.*

(Signed.)

WILLIAM SCHOULER, *Adjutant-General.*

Captain Pratt, in command of the Worcester Company, received his order to join the Sixth Regiment late in the afternoon of the 16th, and he was in Boston with his full command early on the morning of the 17th. It was nine o'clock in the evening of the 16th before your Excellency decided to attach the commands of Captains Sampson and Dike to the Sixth Regiment. A messenger was despatched to Stoneham, with orders for Captain Dike. He reported to me at 8 o'clock the next morning, that he found Captain Dike at his house in Stoneham, at 2 o'clock in the morning, and placed your Excellency's orders in his hands; that he read them, and said: "Tell the Adjutant-General that I shall be at the State House with my full company by 11 o'clock to-day." True to his word, he reported at the time, and that afternoon, attached to the Sixth, the company left for Washington. Two days afterwards, on the 19th of April, during that gallant march through Baltimore, which is now a matter of history, Captain Dike was shot down while leading his company through the mob. Several of his command were killed and wounded, and he received a wound in the leg, which will render him a cripple for life.

The orders to the captains of the other detached companies were received with equal alacrity and promptly obeyed; as were also orders issued on the 17th to Captain Briggs, of Pittsfield, to join the Eighth Regiment on their way to Washington, and to Brigadier-General Ward, Fifth Brigade M. V. M., to have Company B, Third Battalion of Rifles, (Worcester,) in readiness for service.

Arrangements having been completed, on the evening of the 17th, the Third and Fourth Regiments left for Fortress Monroe, Virginia, the former by the steamer Spaulding, lying at Central

wharf, Boston, and the latter by railroad to take the steamer at Fall River. The Sixth Regiment also left for Washington, *via* New York, Philadelphia and Baltimore. Thus while one of our Massachusetts regiments was fighting its way to the national capital, two others were on the sea, hastening to the protection of a most important military post.

By Special Order No. 30, General Butler was ordered, on April 18th, to proceed with the Eighth Regiment to Washington. Company A, Seventh Regiment M. V. M., under Captain Arthur F. Devereux, was attached to this regiment for service. The Eighth reached Washington by way of Annapolis, repairing bridges and railroads which had been destroyed, and thus opening communication with the capital. Captain Devereux's company assisted in bringing the United States frigate *Constitution* from Annapolis to New York.

Soon after this regiment reached Washington, Colonel Munroe resigned, and received an honorable discharge; Lieutenant-Colonel Hinks was commissioned as his successor.

On the 19th of April, Colonel Samuel C. Lawrence, Fifth Regiment, Third Brigade, Second Division, was ordered to report with his regiment for active duty, and the following companies were detailed from the Seventh Regiment to form part of his command:

Company B, Captain Peirson; Company E, Captain Locke; Company F, Captain Bailey; Company G, Captain Messer; Company H, Captain Danforth.

The orders were obeyed with despatch, except by Company F, Seventh Regiment, which was disbanded. A new company raised by Captain Wardwell, who had been authorized to raise it the day previous, was at once attached to the command of Colonel Lawrence. At four o'clock on the morning of the 20th, Major Asa F. Cook was ordered to have his company of Light Artillery in readiness to proceed to Washington with Colonel Lawrence's command, and at ten o'clock he reported that his company was ready to march. On the same day all these troops proceeded to Washington. Before the Fifth Regiment returned to their homes, they had performed service in the battle of Bull Run, and acquitted themselves honorably.

The Third Battalion of Rifles, Fifth Brigade, Third Division, under Major Charles Devens, of Worcester, was also detailed at this time for service, and proceeded to Washington in accordance with orders from this office. Captain Albert Dodd's company, recently formed in Boston, was sent by the steam propeller Cambridge, on the 1st of May, to join this battalion. I take the liberty of publishing Captain Dodd's sealed instructions, which I may add were implicitly followed by him.

ADJUTANT-GENERAL'S OFFICE, BOSTON, }
May 1st, 1861. }

To Captain Albert Dodd :

SIR:—You are to go on board the steam propeller Cambridge this afternoon, with your command, and proceed at once to Fort Monroe, where the troops on board the Cambridge, belonging to the Third and Fourth Regiments, will be landed, to join their respective companies now there.

The Cambridge will then depart from Fort Monroe, and proceed to Washington by the Potomac River. Should the ship be attacked, you will use your utmost exertions to defend and protect her, and endeavor to have her make the passage of the Potomac, and arrive at Washington.

When you arrive at Washington, you will report yourself to General Butler, who is to attach you and your command to the Battalion of Rifles, under command of Major Devens. Your command will be known as Company D, of that battalion.

Should the Cambridge fail to get to Washington by the Potomac River,—though there is no such word as fail known to Massachusetts men,—the ship will proceed to Annapolis, where you will report yourself to General Butler, and if he is not there, to Major Devens, and be attached to his battalion. You are to guard and protect the ship while you are on board of her, and to report yourself so as to be attached to Major Devens' command when you land, always holding yourself subject to superior officers, who are expected and instructed to carry forward the purport of these instructions. It is the earnest desire of His Excellency, the Commander-in-Chief, that the ship Cambridge shall reach Washington, and demonstrate that a Massachusetts ship, manned with Massachusetts men, shall be the first ship to arrive by that route, as our Sixth Regiment was the first to arrive at Washington through the hostile city of Baltimore. You will confer with the captain of the ship, and you and he will act in unison.

By order of His Excellency JOHN A. ANDREW, *Governor and Commander-in-Chief.*

WILLIAM SCHOULER, *Adjutant-General.*

I append tables, showing the regiments, battalions and companies engaged in the United States service as three months volunteers under the President's proclamation.

THIRD REGIMENT OF INFANTRY.

FIELD AND STAFF.

<i>Colonel</i> ,	David W. Wardrop, New Bedford.	
<i>Lieutenant-Colonel</i> , . .	Charles Raymond, Plymouth.	
<i>Major</i> ,	John H. Jennings, New Bedford.

The Third and Fourth Regiments reached Fortress Monroe on or about the twentieth of April. The Third, shortly after its arrival, was ordered on board the United States war vessel Pawnee, and conveyed that evening to Norfolk, where the men took an active part in destroying the Navy Yard, to prevent it from falling, with its valuable stores, into the hands of the rebels. Colonel Wardrop's report to your Excellency, giving a full account of this expedition, and of the conduct of our troops, was never received, being unfortunately lost on its way hither.

The Fifth Regiment was stationed near Washington. It behaved gallantly at the battle of Bull Run, on the 21st of July. Colonel Lawrence was slightly wounded. The following is a list of the killed and missing in the Regiment:—

Killed.—Hiram S. Collins, Haverhill, Company D; Sergeant William H. Lawrence, Medford, Company E; Sergeant Charles W. Cassebourne, Thomas Kettle, Isaac M. Low, Stephen O'Hara, Cyrus T. Wardwell, and Edward J. Williams, all of Boston, Company F; Sergeant William S. Rice, Concord, Company G; George A. Thompson, Salem, Company H.

Missing, (probably prisoners.)—Henry T. Briggs and Samuel O. Kate, Salem, Company A; Sergeant George W. Aborn, James H. Griggs, and Frank L. Tibbetts, all of South Reading, Company B; Edward Foster, Charlestown, Company

C; James O. Shaw, Haverhill, Company D; John H. Hoyt, Medford, Company E; Bernard McSweeney, Boston, Company F; Sergeant Cyrus Hosmer, William C. Bates, Edward S. Wheeler, and Henry L. Wheeler, all of Concord, Company G; George W. Dow, William R. Barry, and William Shanley, all of Salem, Company H; Edward F. Hannaford, Somerville, Company I; Henry A. Angier, Cornelius A. Babcock, Samuel E. Chandler, George T. Childs, and Sumner Fish, all of Charlestown, Company K.

The Sixth Regiment, after its passage through Baltimore on the 19th of April, reached Washington the same night. On the 22d, Colonel Jones made the following report to General Butler's Adjutant, Major William H. Clemence, a copy of which was sent to these head-quarters.

HEAD-QUARTERS 6TH REG'T, 3D BRIGADE, 2D DIV., M. V. M. }
CAPITOL, WASHINGTON, April 22, 1861. }

Brigade Major WILLIAM H. CLEMENCE:—

In accordance with Special Order No. 6, I proceeded with my command toward the city of Washington, leaving Boston on the evening of the 17th April, arrived in New York on the morning of the 18th, and proceeded to Philadelphia, reaching that place on the same evening. On our way John Brady, of Company H, Lowell, was taken insane, and deeming it unsafe to have him accompany the Regiment, I left him at Delanco, New Jersey, with I. C. Buck, with directions that he should telegraph Mayor Sargeant, of Lowell, as to the disposition of him; and we proceeded thence to Baltimore, reaching that place at noon on the 19th. After leaving Philadelphia, I received intimation that our passage through the city of Baltimore would be resisted. I caused ammunition to be distributed and arms loaded, and went personally through the cars and issued the following Order, viz.:

“The Regiment will march through Baltimore in column of sections, arms at will. You will undoubtedly be insulted, abused, and perhaps assaulted, to which you must pay no attention whatever, but march with your faces square to the front, and pay no attention to the mob even if they throw stones, bricks, or other missiles; but if you are fired upon and any one of you are hit, your officers will order you to fire. Do not fire into any promiscuous crowds, but select any man whom you may see aiming at you, and be sure you drop him.”

Reaching Baltimore, horses were attached the instant that the locomotive was detached, and the cars were driven at a rapid pace across the city. After the cars containing seven companies had reached the

Washington depot, the track behind them was barricaded and the cars containing Band and the following companies, viz.: Company C, of Lowell, Captain Follansbee, Company D, of Lowell, Captain Hart, Company I, of Lawrence, Captain Pickering, and Company C, of Stoneham, Captain Dike, were vacated by the Band, and they proceeded to march in accordance with orders, and had proceeded but a short distance before they were furiously attacked by a shower of missiles which came faster as they advanced. They increased their step to double-quick, which seemed to infuriate the mob, as it evidently impressed the mob with the idea that the soldiers dared not fire or had no ammunition, and pistol shots were numerous fired into the ranks, and one soldier fell dead. The order, Fire, was given, and it was executed; in consequence several of the mob fell, and the soldiers again advanced hastily. The Mayor of Baltimore placed himself at the head of the column beside Captain Follansbee, and proceeded with them a short distance, assuring him that he would protect them, and begging him not to let the men fire; but the Mayor's patience was soon exhausted, and he seized a musket from the hands of one of the men and killed a man therewith, and a policeman who was in advance of the column also shot a man with a revolver.

They at last reached the cars, and they started immediately for Washington. On going through the train, found there were about one hundred and thirty missing, including the Band and Field Music. Our baggage was seized, and we have not as yet been able to recover any of it. I have found it very difficult to get reliable information in regard to the killed and wounded, but believe there were only three killed,* viz.:

James Keenan,	Company C, Stoneham.
Daniel Stevens,	" D, Lowell.
Edward Coburn,	" D, "

WOUNDED.

Captain J. H. Dike, . . .	Stoneham, dangerous, doing well.
Andrew Robbins, . . .	" " " "
A. H. Needham, . . .	Lawrence, " " "
Michael Green, . . .	" flesh wound, " "
D. B. Tyler, . . .	Lowell, condition unknown.
Edwin Colley, . . .	" "
H. W. Danforth, . . .	Stoneham, " "
William R. Patch, . . .	Lowell, " "

* The list in this letter is of course inaccurate. James Keenan is a cripple. Sumner H. Needham, of Lawrence, and Addison O. Whitney and Luther C. Ladd, of Lowell, were the killed.—ADJ'T GEN'L.

Captain Dike is in the hands of some Brother Masons, and to the Order he owes his life. The others are supposed to be at Baltimore Infirmary.

The following were brought with us and sent to the Hospital here :

Gordon Reed,	.	.	.	Company A,	since discharged.
Alonzo Joy,	.	.	.	"	I, doing well.
G. G. Durrell,	.	.	.	"	I, since discharged.

As the men went into the cars, I caused the blinds to the cars to be closed, and took every precaution to prevent any shadow of offence to the people of Baltimore ; but still the stones flew thick and fast into the train, and it was with the utmost difficulty that I could prevent the troops from leaving the cars and revenging the death of their comrades. After a volley of stones, some one of the soldiers fired and killed a Mr.

Davis, who, I have since ascertained by reliable witnesses, threw a stone into the car. Yet that did not justify the firing at him, but the men were infuriated beyond control. On reaching Washington we were quartered at the Capitol in the Senate Chamber, and are all in good health and spirits.

I have made every effort to get possession of the bodies of our comrades, but have not yet succeeded. Should I succeed I shall forward them to Boston if practicable, otherwise shall avail myself of a kind offer of George Woods, Esq., who has offered me a prominent lot in the Congressional Burying Ground for the purpose of interment.

We were this day mustered into the United States service, and will forward the rolls at first opportunity after verification.

EDWARD F. JONES,

Colonel Sixth Regiment, M. V. M., in service of United States.

The Sixth was stationed near the Relay House, about ten miles from Baltimore, during most of its term of service, and performed important duty.

Major Cook's battery was also stationed at that point, and reflected much credit upon the Commonwealth for its efficiency and good conduct.

The Eighth Regiment endured much hard labor and suffering on its way to Washington. Communication with the Federal Capital by the way of Baltimore had been cut off, and a way was opened through Annapolis by General Butler.

A letter dated April 21st, received from Major P. Adams Ames, then at Philadelphia, aiding in the transportation of our troops, enclosed a despatch from General Butler, who had left Philadelphia the day previous, for Annapolis. He had delayed his departure twelve hours, in the hope of inducing Colonel Lefferts of the New York Seventh Regiment to accompany him. The following is the despatch referred to:—

Memorial of plan and reasons for proceeding to Annapolis.

I have detailed Captain Devereux and Captain Briggs with their commands supplied with one day's rations and twenty round of ammunition, to take possession of the ferry-boat at Havre de Grace, for the benefit of this expedition. This I have done with the concurrence of the present master of transportation of the road. The Eighth Regiment will remain at quarters, that they may get a little solid rest, after their fatiguing march. I have sent to know if the Seventh Regiment will go with me. I propose to march myself at the hour of seven o'clock in the

morning, to take the regular eight and a quarter o'clock train to Havre de Grace. The citizens of Baltimore, at a large meeting this evening, denounced the passage of Northern troops. They have exacted a promise from the president of the Baltimore and Ohio Railroad, not to send troops over that road through Baltimore, so that any attempt to throw troops into Baltimore entails a march of forty miles, and an attack upon a city of two hundred thousand inhabitants at the beginning of the march. The only way, therefore, of getting communication with Washington for troops from the North, is over the Baltimore and Ohio Railway, or marching from the west. Commodore Dupont, at the Navy Yard, has given me instructions of the fact in accordance with these general statements upon which I rely. I have, therefore, thought I could rely upon these statements as to time it will take to proceed in marching from Havre de Grace to Washington. My proposition is to join with Colonel Lefferts of the Seventh Regiment of New York. I propose to take the fifteen hundred troops to Annapolis, arriving there to-morrow about four o'clock, and occupy the Capital of Maryland, and thus call the State to account for the death of Massachusetts men, my friends and neighbors. If Colonel Lefferts thinks it more in accordance with the tenor of his instructions to wait rather than go through Baltimore, I still propose to march with this Regiment. I propose to occupy the town, and hold it open as a means of communication. I have then but to advance by a forced march of thirty miles to reach the Capital, in accordance with the orders I at first received, but which subsequent events in my judgment vary in their execution, believing from the telegraphs that there will be others in great numbers to aid me. Being accompanied by officers of more experience, who will be able to direct the affair, I think it will be accomplished. We have no light batteries; I have therefore telegraphed to Governor Andrew to have the Boston Light Battery put on shipboard at once, to-night, to help me in marching on Washington. In pursuance of this plan, I have detailed Captains Devereux and Briggs with their commands, to hold the boat at Havre de Grace.

Eleven, A. M. Colonel Lefferts has refused to march with me. I go alone at three o'clock, P. M., to execute this imperfectly written plan. If I succeed, success will justify me. If I fail, purity of intention will excuse want of judgment, or rashness.

B. F. BUTLER.

HIS EXCELLENCY GOVERNOR ANDREW.

The plan conceived and executed by General Butler, was successful. The railroad track between Annapolis and Washington had been torn up in many places; bridges had been

destroyed, and locomotives injured. It was necessary to repair these, and among the soldiers of the Eighth were found competent mechanics. In a few days the road was in good order, and the troops passed safely to Washington.

The Battalion of Rifles under Major Devens, shortly after arriving at Washington, was ordered to garrison Fort McHenry in the harbor of Baltimore. It remained in this important position until the expiration of its term of service.

On the 30th of May, Brigadier-General Ebenezer W. Pierce, 2d Brigade, 1st Division M. V. M., was detailed for active duty in place of Brigadier-General Butler, who had been promoted for his gallant conduct, and he proceeded at once to Fortress Monroe. The disastrous affair at Big Bethel has brought upon this brave and patriotic officer much obloquy, which I believe to be cruelly unjust. He has succeeded in raising two companies for the 29th Regiment, and is now on his way to Fortress Monroe to assume command of the regiment, where he will doubtless, if opportunity occurs, make manifest all that his friends believe of him as a gallant officer, and put to silence the clamor of his enemies.

It would far exceed the limits of this Report, to recount in detail the brave acts of our three months troops during their term of service. I have given only a bare outline. It is sufficient, perhaps, to say that they were the first to respond to the call of the president, the first to march through Baltimore to the defence of the capital, the first to shed their blood for the maintenance of our government, the first to open the new route to Washington by way of Annapolis, the first to land on the soil of Virginia, and hold possession of the most important fortress in the Union, the first to make the voyage of the Potomac and approach the Federal city by water, as they had been the first to reach it by land. They upheld the good name of the State during their entire term of service, as well by their good conduct and gentlemanly bearing as by their courage and devotion to duty in the hour of peril. They proved the sterling worth of our volunteer militia. Their record is one which will ever redound to the honor of Massachusetts, and will be prized among her richest historic treasures. These men have added new splendor to our Revolutionary annals, and the brave sons who were shot down in the streets of Baltimore on the 19th of

April, have rendered doubly sacred the day when the green-sward of Lexington Common was drenched with the blood of their fathers.

From the 13th of April to the 20th of May one hundred and fifty-nine applications were granted at the Adjutant-General's office to responsible parties for leave to raise companies. In nearly every instance the application was signed by the requisite number of men for a company. These applications came from every part of the Commonwealth and represented all classes, creeds and nationalities. The authorities of the several cities and towns acted with patriotic liberality toward these companies, furnishing good accommodations for drilling, and providing for the families of the men. In addition to these companies, organizations for drill purposes and home guards sprung up at once in every part of the State, and numerous applications were received for loans of muskets to these parties that they might perfect themselves in the manual. This spirit of patriotism was encouraged to its full extent by the means at the disposal of the Adjutant-General. From the 13th of April to the 20th of May, about two thousand seven hundred old muskets were distributed to forty of these organizations. In every instance good security was required and given for the safe keeping of these arms and their return to the State when called for ; generally from the selectmen of the towns making application. When the office of Master of Ordnance was created by your Excellency, on the 27th of May, the papers and vouchers relating to the arms were transferred from this Department, and the report of the Master of Ordnance, which accompanies this, will show the exact amount and condition of our ordnance material at that time.

About the first of May an association of Massachusetts men forming a company in Cincinnati made an urgent request for arms. Their committee had applied at New York and Philadelphia without success, and at length came to Massachusetts. As we had just received five thousand new smooth bore muskets from the Springfield Armory, I sold them one hundred, for which they paid thirteen hundred dollars, the government price. The money was deposited in the State Treasury, and doubtless the muskets are now in the hands of men who are doing good service in the Union Army of Kentucky.

The sudden change in the condition of our Militia at home and the wants of our continually increasing force in the field, rendered a division of the labors of this office an absolute necessity. Quartermaster's, Subsistence, and Medical Departments were required at once, with proper officers at the head of each.

On the 20th of April, Lieutenant-Colonel John H. Reed, of Boston, was commissioned Quartermaster-General, with the rank of Brigadier-General.

Dr. William J. Dale, of Boston, was commissioned Surgeon-General, and Elijah D. Brigham, of Boston, Commissary-General, severally with the rank of Colonel, on the 13th of June.

General Ebenezer W. Stone, of Roxbury, was commissioned Master of Ordnance, with the rank of Colonel, on the 25th of May, which office he held until the 3d of October. On the 7th of October Charles Amory, Esq., of Boston, was commissioned as his successor.

Albert G. Browne, Jr., of Salem, was commissioned as Military Secretary to the Commander-in-Chief May 27, 1861; rank, Lieutenant-Colonel.

Charles H. Dalton, of Boston, commissioned May 23, 1861, with the rank of Colonel; William P. Lee and Waldo Adams, of Boston, both commissioned June 14, 1861, with the rank of Lieutenant; and Frank E. Howe, of New York, commissioned August 23, 1861, with the rank of Lieutenant-Colonel, were appointed Assistant-Quartermasters.

William Brown, of Boston, was commissioned October 29, 1861, as Assistant-Adjutant-General, with the rank of Colonel.

On the 3d of May the President of the United States issued a proclamation, calling for a force of volunteers to serve for three years, unless sooner discharged. At that time a great number of companies had been organized in the various cities and towns of this Commonwealth. On the 22d of May the following General Order was issued by command of your Excellency:

HEAD-QUARTERS, BOSTON, May 22, 1861.

GENERAL ORDERS, No. 12.

The President of the United States, by his Proclamation of the third day of May current, having called into the service of the United States, to aid in the enforcement of the laws and the suppression of insurrection, a Force of Volunteers to serve for a period of three years, unless sooner

discharged, and to be enrolled and organized in a manner to be made known through the Department of War; and the plan of organization adopted for this Force, in accordance with the Proclamation of the President, having been published in General Orders No. 15 from the Adjutant-General's Office, in Washington, of the fourth day of May current, and His Excellency the Governor and Commander-in-Chief having been this day notified that the quota of these Volunteers to be furnished by the Commonwealth of Massachusetts, is fixed at Six Regiments of Infantry, to be organized as prescribed in said General Orders No. 15 from the War Department, so much of said Orders as relates to the Regiments of Infantry to be organized under them is directed to be printed for general information.

PLAN OF ORGANIZATION.

Each Regiment of Infantry will consist of ten Companies, and each Company will be organized as follows:—

<i>Minimum Strength.</i>	<i>Maximum Strength.</i>
1 Captain.	1 Captain.
1 First Lieutenant.	1 First Lieutenant.
1 Second Lieutenant.	1 Second Lieutenant.
1 First Sergeant.	1 First Sergeant.
4 Sergeants.	4 Sergeants.
8 Corporals.	8 Corporals.
2 Musicians.	2 Musicians.
1 Wagoner.	1 Wagoner.
64 Privates.	82 Privates.
<hr/> 83 Aggregate.	<hr/> 101 Aggregate.

And each Regiment will be organized as follows:—

<i>Minimum Strength.</i>	<i>Maximum Strength.</i>
830 Co. Officers and enlisted men.	1,010 Co. Officers and enlisted men.
1 Colonel.	1 Colonel.
1 Lieutenant-Colonel.	1 Lieutenant-Colonel.
1 Major.	1 Major.
1 Adjutant, (a Lieutenant.)	1 Adjutant, (a Lieutenant.)
1 Reg. Quartermaster, (a Lieut.)	1 Reg. Quarterm'r, (a Lieut.)
1 Assistant-Surgeon.	1 Assistant-Surgeon.
1 Sergeant-Major.	1 Sergeant-Major.
1 Reg. Quartermaster-Sergeant.	1 Reg. Quarterm'r-Sergeant.
1 Reg. Commissary-Sergeant.	1 Reg. Commissary-Sergeant.
1 Hospital Steward.	1 Hospital Steward.
2 Principal Musicians.	2 Principal Musicians.
24 Musicians for Band.	24 Musicians for Band.
<hr/> 866	<hr/> 1,046

The commissioned officers in each Company *will be appointed by the Governor of the State furnishing it*, the non-commissioned officers, until the Company shall be embodied in a Regiment, *will be appointed by the Captain*; afterwards by the Colonel, on recommendation of the Captain.

The field officers of each Regiment *will be appointed by the Governor of the State furnishing it*.

The Adjutant and Regimental Quartermaster will be selected from the Company officers of the Regiment by the Colonel, and may be re-assigned to companies at his pleasure.

The non-commissioned staff will be selected by the Colonel from the non-commissioned officers and privates of the Regiment, and the vacancies so created will be filled by appointment, as prescribed above.

This Force will be organized into three Divisions of from three to four Brigades.

Each Brigade will consist of four Regiments, and

One Brigadier-General,

One Aide-de-Camp, (a Lieutenant,)

One Assistant-Adjutant-General, (a Captain,)

One Surgeon,

One Assistant Quartermaster, (a Captain,)

One Commissary of Subsistence, (a Captain.)

All of the above officers will be appointed by the President, by and with the advice and consent of the Senate, except the Aide-de-Camp, who will be selected by the Brigadier-General from the company officers, and who may be re-assigned to his company at the pleasure of the Brigadier-General.

Each Division will consist of three or more Brigades, and of

One Major-General,

Two Aides-de-Camp, (Captains or Lieutenants,)

One Assistant Adjutant-General, (a Major.)

The above officers will be appointed and selected as prescribed above, for the additional officers of a Brigade.

These volunteers will be subject to the laws and regulations governing the army of the United States.

The officers, non-commissioned officers, and privates, organized as above set forth, will, in all respects, be placed on the footing, as to pay and allowances, of similar corps of the regular army; PROVIDED, that their allowances for clothing, shall be \$2.50 per month, for Infantry.

Every volunteer non-commissioned officer, private, musician and artificer, (excepting Cavalry volunteers,) who enters the service of the United States under this plan, shall be paid at the rate of fifty cents for every twenty miles of travel from his home to the place of muster—the distance to be measured by the shortest usually travelled route—and

when honorably discharged, an allowance at the same rate, from the place of his discharge to his home; and in addition thereto, the sum of one hundred dollars.

The Bands of the Regiments will be paid as follows: one-fourth of each will receive the pay and allowances of Sergeants of Engineer soldiers; one-fourth, those of Corporals of Engineer soldiers; and the remaining half, those of privates of Engineer soldiers of the first-class.

The wagoners will receive the pay and allowances of Corporals of Cavalry.

The Regimental Commissary-Sergeant will receive the pay and allowances of a Regimental Sergeant-Major.

There will be allowed to each Regiment, one Chaplain, who will be appointed by the Regimental Commander on the vote of the Field Officers and Company Commanders, on duty with the Regiment at the time the appointment is to be made. The Chaplain so appointed, must be a regularly ordained minister of some Christian denomination, and will receive the pay and allowances of Captain of Cavalry.

Two-thirds of the Company officers of the Regiments to be raised under this plan will be appointed at the commencement of the organization of each Regiment, and the remaining one-third, when the Regiment shall have its full complement of men, will be appointed from the ranks, to be taken from among the Sergeants on the recommendation of the Colonel of the Regiment approved by the General commanding the Brigade.

After the completion of the organization of a Regiment, one-half of all the vacancies which may occur in the lowest grade of commissioned officers, by promotion or otherwise, will be appointed, as above, from the ranks.

Corporals will be taken from the Privates; Sergeants from Corporals. The First Sergeant will be taken from the other Sergeants of the Company by the Captain.

The Regimental Non-Commissioned Staff will be appointed from the Sergeants of the Regiment by the Colonel.

The volunteers called for, and to be organized under the above Proclamation and General Orders, while serving under the same, *will form no part of the militia of the State.*

All Companies of the Massachusetts Volunteer Militia which may desire to volunteer to serve as part of the above force, will make immediate application in writing to the Commander-in-Chief, through the Adjutant-General. Such application must state the name of the city or town in which such Company is located; whether the Company is attached to any Regiment, Brigade, and Division, or not, and to what Regiment, Brigade, and Division it is attached, if any—the names and ranks of the present officers of the company—the number of its officers, non-commissioned officers, and privates, with their occupations—also, any

particulars descriptive of the Company, or its condition, or which may be thought to give it a claim to be selected, which may be thought material.

From the Companies of the Massachusetts Volunteer Militia thus applying, a sufficient number will be selected to form the six Regiments assigned to this State, and the companies so selected will be designated in special orders.

Every Company selected for this service will be required to be filled up to the maximum strength prescribed in the above plan of organization, before it is mustered into the service of the United States; but no Company volunteering will be allowed to exceed in its aggregate the maximum strength established by the laws of the State for Companies of Infantry of the Volunteer Militia, (viz., of seventy-nine officers, non-commissioned officers, musicians and privates,) until it has been designated for this service by Orders. And as the number of companies of the Volunteer Militia far exceeds the number now assigned to this State as her quota—the Companies so selected and designated will be required to fill up their ranks to the maximum strength established in the above United States plan of organization, from the ranks of such other Companies volunteering as it may not be possible to accept—and the Companies from which they are to fill up their ranks will be designated in the Special Orders.

All Companies accepted for this service will receive with their Orders blank forms of an enlistment list, to be signed by every member volunteering, by which they will bind themselves to serve in the Volunteer Force called for by the President, for the time, and in the terms, and under the organization set forth in the above Proclamation and General Orders.

As soon as each Company selected and designated shall have been raised to its maximum strength of men thus enlisted, the Governor will appoint two-thirds of its commissioned officers; and as soon as ten such Companies, so filled up and officered, shall have been sent off to form a Regiment, the field officers and the remaining third of the Company officers will be appointed as above prescribed; and the Colonel will at once appoint the staff and non-commissioned staff, enlist his band, and call a meeting of the field officers and Company Commanders on duty with the Regiment to vote for a Chaplain.

The duty and responsibility of appointing the officers required for this Force having been imposed upon the Governor, he cannot be bound by commissions already issued to officers of Companies volunteering to re-appoint these officers, but must exercise his own discretion. The Governor will, however, give full weight to the fact that these officers have been elected to commissions in the Volunteer Militia, as indicative of the wishes of the men and their confidence in these officers.

As soon as the Regiment shall have been completely organized, it will be designated as one of the six to be mustered into the United States service.

This Order will be transmitted by the Adjutant-General direct to Commanders of Companies in the Volunteer Militia.

By order of His Excellency JOHN A. ANDREW, Governor and Commander-in-Chief.

WILLIAM SCHOULER, *Adjutant-General.*

The demand upon Massachusetts at this time was for six regiments. These were soon organized, and five more were ordered into camp in the State, under the provisions of an act of the Legislature, by General Order No. 16, issued June 1. On the 17th of June, ten more regiments were requested by the General Government, and others were accepted from time to time; so that Massachusetts has now about thirty thousand men serving as three years troops.

As the Third and Fourth Regiments of Militia, stationed at Fortress Monroe, were deficient in companies and men, it was decided to fill them up with three years men. Accordingly, on the 9th of May, a company raised in Lynn, by Captain William D. Chamberlain, and one raised by Captain J. K. Tyler, in Boston and vicinity, were sent from Boston to Fortress Monroe in the steamer Pembroke, and on the 22d of May, a company raised in Lowell, by Captain P. A. Davis, and one raised in Boston, by Captain Thomas W. Clarke, were sent by the same steamer. On the 18th of May, four companies proceeded to Fortress Monroe by the steamer Cambridge: one raised in Bridgewater, under Captain Lebbeus Leach, one raised in East Boston, under Captain Joseph H. Barnes, one raised in Sandwich, under Captain Charles Chipman, and one raised in Plymouth, under Captain S. H. Doten. These eight companies were enlisted for three years, and were attached to the Third and Fourth Regiments. At the expiration of their term of service, the three months men returned home, and the three years men remained. The company under Captain Davis was attached permanently to Fortress Monroe. The others composed an infantry battalion, and remained as such until three more companies were raised and added to the battalion; the whole composing to-day the Twentieth-Ninth Infantry Regiment of Massachusetts Volunteers.

I shall proceed to speak of the regiments now at the seat of war, comprising the Massachusetts Volunteers for three years.

FIRST REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	Robert Cowdin, Boston.
<i>Lieutenant-Colonel,</i> . .	George D. Wells, Boston.
<i>Major,</i>	Charles P. Chandler, Boston.
<i>Adjutant,</i>	—————, ———.
<i>Quartermaster,</i>	William C. Johnston, Boston.
<i>Chaplain,</i>	Rev. Warren H. Cudworth, Boston.
<i>Surgeon,</i>	Richard H. Salter, Boston.
<i>Assistant-Surgeon,</i> . .	F. Le Baron Monroe, Medway.
<i>Sergeant-Major,</i> . . .	James W. Hall.
<i>Quartermaster-Sergeant,</i> .	Joseph H. Dalton.
<i>Commissary-Sergeant,</i> .	Harrison Hinkley.
<i>Hospital Steward,</i> . . .	Alfred C. Dana.
<i>Band Master,</i>	J. H. Proctor.
<i>Sutler,</i>	Edward Pearl.

Companies A, B, C, Boston; D, Roxbury; E, F, G, Boston; H, Chelsea; I, Boston; K, Roxbury.

Captains.

Edward A. Wild, Brookline.	Sumner Carruth, Chelsea.
Gardner Walker, Boston.	Charles E. Rand, Boston.
Ebenezer W. Stone, Jr., Roxbury.	A. G. Chamberlain, Roxbury.
Clark B. Baldwin, Boston.	George H. Smith, Boston.
Alfred W. Adams, Boston.	Francis H. Ward, Boston.

First Lieutenants.

William L. Candler, Brookline.
Joseph Hibbert, Jr., Boston.
Charles M. Jordan, Boston.
George H. Johnston, Boston.
William H. Lawrence, Boston.
Albert S. Austin, Chelsea.
Charles E. Mudge, Boston.
William H. Sutherland, Roxbury.
George E. Henry, Boston.
Charles S. Kendall, Boston.

Second Lieutenants.

Charles L. Chandler, Brookline.
D. G. E. Dickinson, Cambridge.
Oliver Walton, 2d, Boston.
Miles Farwell, Boston.
Francis W. Carruth, Roxbury.
William P. Cowie, Boston.
Henry Parkinson, Boston.
Forrester A. Pelby, Cohasset.
John McDonough, Roxbury.
Henry Hartley, Williamsburg, N. Y.
Horatio Roberts, Chelsea.

This regiment is made up chiefly of the First Massachusetts Regiment of Volunteer Militia, and was recruited in Boston and its immediate vicinity. The regiment left Camp Cameron, Cambridge, for the seat of war June 15th, last. It was present at the battle of Bull Run, where both officers and men acquitted themselves with honor. Colonel Cowdin was for many years one of our most active militia officers. The regiment is now in General Hooker's Division on the Lower Potomac, under the

immediate command of Lieutenant-Colonel Wells, and Colonel Cowdin is acting Brigadier-General.

SECOND REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	George H. Gordon, Boston.
<i>Lieutenant-Colonel,</i> . .	George L. Andrews, Boston.
<i>Major,</i>	Wilder Dwight, Boston.
<i>Adjutant,</i>	Charles Wheaton, Jr., Boston.
<i>Quartermaster,</i>	R. Morris Copeland, Roxbury.
<i>Surgeon,</i>	Francis Leland, Milford.
<i>Assistant-Surgeon,</i> . .	Lincoln R. Stone, Salem.
<i>Chaplain,</i>	_____.
<i>Band Master,</i>	Peter Kalkman.

Companies A, Lowell; B, Boston; C, Salem; D, Boston; E, Medway; F, G, H, I, K, Boston.

Captains.

Edward G. Abbott, Lowell.
 William Coggsell, Salem.
 James Savage, Jr., Boston.
 Samuel M. Quincy, Boston.
 Richard Cary, Boston.

Francis H. Tucker, Boston.
 Adin B. Underwood, Boston.
 Richard C. Goodwin, Boston.
 Charles R. Mudge, Boston.
 William B. Williams, W. Roxbury.

First Lieutenants.

Charles F. Morse, Roxbury.
 William D. Sedgwick, Lenox.
 Henry S. Russell, Boston.
 T. Lawrence Motley, Roxbury.
 Marcus M. Hawes, Boston.
 George P. Bangs, Boston.
 Robert G. Shaw, Jr., Boston.
 James Francis, Lowell.
 Charles P. Horton, Boston.

Second Lieutenants.

Robert B. Brown, Salem.
 Ochran H. Howard, Ware.
 Thomas R. Robeson, Cambridge.
 Anson D. Sawyer, Boston.
 Rufus Choate, Boston.
 Stephen G. Perkins, Milford.
 Fletcher M. Abbott, Lowell.
 J. Ingersoll Grafton, Boston.
 Eugene E. Shelton, Boston.
 Henry B. Dalton, Boston.

This regiment was recruited by Colonel Gordon, with permission of the Secretary of War, in May last. It was in camp from May to July 8th, when it received marching orders. The camp of the Second was at Camp Andrew, in West Roxbury. Both the Colonel and Lieutenant-Colonel are graduates of West Point Academy. The regiment is now in the Department of the Upper Potomac, and is in excellent condition.

SEVENTH REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	Joseph H. Wheelock, Boston.
<i>Lieutenant-Colonel,</i> . .	Charles Raymond, Plymouth.
<i>Major,</i>	Franklin P. Harlow, Abington.
<i>Adjutant,</i>	—————
<i>Quartermaster,</i>	Daniel Edson, Jr., Dighton.
<i>Chaplain,</i>	—————
<i>Surgeon,</i>	S. A. Holman, Taunton.
<i>Assistant-Surgeon,</i> . .	Z. B. Adams, Boston.
<i>Sergeant-Major,</i> . . .	Edward L. Langford, Fall River.
<i>Quartermaster-Sergeant,</i> .	Daniel Packard, Abington.
<i>Commissary-Sergeant,</i> .	—————
<i>Hospital Steward,</i> . . .	Horace P. Sherman, Boston.

Companies A, B, Fall River; C, Raynham; D, Taunton; E, Dorchester and Milton; F, Taunton; G, Mansfield; H, Easton; I, Attleborough; K, Taunton, (So.)

Captains.

Joseph B. Leonard, Taunton.	Othaniel Gilmore, Raynham.
Hiram A. Oakman, Marshfield.	Edgar Robinson, Raynham.
Zeba F. Bliss, Taunton.	George W. Reed, Abington.
John R. Whitcomb, Mansfield.	George F. Holman, Cambridge.
Ward L. Foster, Easton.	William B. Stall, Taunton.

First Lieutenants.

Jesse F. Eddy, Fall River.
 William W. Carsley, Dorchester.
 James M. Lincoln, Taunton.
 John W. Rogers, Mansfield.
 Augustus W. Lothrop, Easton.
 Abijah L. Mayhew, Abington.
 Chas. B. Des Jardines, Attleborough.
 Daniel Packard, Abington.
 William R. Mathewson, Taunton.
 Jesse D. Bullock, Fall River.
 William M. Hall, Taunton.

Second Lieutenants.

William H. Nye, Fall River.
 Edward F. Langford, Fall River.
 David C. Bancroft, Taunton.
 Munroe F. Williams, Easton.
 William H. Gurney, Abington.
 Prentiss M. Whiting, Attleborough.
 John B. Burt, Fall River.
 Edward F. Hopkins, Milton.
 Frank B. Hayden, Fall River.
 Thomas High, Mansfield.

This regiment was raised under the auspices of Colonel Couch, of Taunton, a West Point graduate. It is composed chiefly of Bristol County men, who are worthy of their origin. It was ordered to Camp Old Colony, near Taunton, on the 20th of May, and left for Washington, July 11th. Shortly after the arrival of the regiment at the Federal Capital, Colonel Couch was appointed a Brigadier-General. Colonel Wheelock, who has recently been appointed to its command, is a West Point graduate. The regiment is at or near Washington.

NINTH REGIMENT.

FIELD AND STAFF.

<i>Colonel</i> ,	Thomas Cass, Boston.
<i>Lieutenant-Colonel</i> , .	Robert Peard, Milford.
<i>Major</i> ,	Patrick R. Guiney, Boston.
<i>Adjutant</i> ,	William Strachn, Boston.
<i>Surgeon</i> ,	Stephen Watson Drew, Woburn.
<i>Assistant-Surgeon</i> , .	Francis M. Lincoln, Boston.
<i>Chaplain</i> ,	Thomas Scully, Boston.
<i>Quartermaster</i> , . .	Thomas Mooney, Boston.
<i>Sergeant-Major</i> , . .	Michael Flynn, Boston.
<i>Commissary-Sergeant</i> , .	William B. Maloney, Boston.
<i>Band Master</i> , . . .	Michael O'Connor.

Companies A, B, C, D, E, Boston; F, Salem; G, Marlborough; H, Milford; I, Boston; K, Stoughton.

Captains.

James E. Gallagher, Boston.	George W. Dutton, Stoughton.
William Madigan, Boston.	James E. McCafferty, Boston.
John R. Teague, Boston.	Patrick T. Hanley, Boston.
John Carey, Marlborough.	Timothy O'Leary, Salem.
Jeremiah O'Neil, Milford.	John W. Mahan, Boston.

First Lieutenants.

Michael Scanlan, Boston.
 John M. Tobin, Boston.
 Thomas R. Roache, Milford.
 James F. McGunigle, Stoughton.
 John H. Walsh, Boston.
 Patrick Walsh, Boston.
 Philip E. Redmond, Salem.
 John H. Rafferty, Cambridge.
 Edward McSweeney, Boston.
 John C. Willey, Cambridge.

Second Lieutenants.

Michael F. O'Hara, Boston.
 Archibald Simpson, Boston.
 Timothy Burke, Milford.
 Richard P. Nugent, Boston.
 ————
 Patrick W. Black, Portland, Me.
 Michael Phalen, Salem.
 Nicholas C. Flaherty, Boston.
 Michael Flynn, Boston.
 Edward Finnotty, Boston.

This regiment is one of the best this Commonwealth has sent to the field. It is composed almost entirely of men of Irish birth, and their immediate descendants. Many changes have taken place in its officers, since the regiment left for the seat of war. Colonel Cass has been with it from the first, and has made of raw material a splendid command. It was ordered into camp, May 3d, at Long Island, in Boston Harbor, and was ordered to Washington, June 24th. It was taken by water from Long Island to the Federal City, in the steamer Ben De Ford. It is now stationed in Virginia, about ten miles from Washington, and has the honor of being the "outpost" regiment.

TENTH REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	Henry S. Briggs, Pittsfield.
<i>Lieutenant-Colonel,</i> . .	Jefford M. Decker, Lawrence.
<i>Major,</i>	William R. Marsh, Northampton.
<i>Surgeon,</i>	Cyrus N. Chamberlain, Northampton.
<i>Assistant-Surgeon,</i> . .	William Holbrook, Palmer.
<i>Adjutant,</i>	Oliver Edwards, Springfield.
<i>Chaplain,</i>	Frederick A. Barton, Springfield.
<i>Quartermaster,</i>	John W. Howland, Pittsfield.
<i>Quartermaster-Sergeant,</i> .	Edward B. Whittlesey, Pittsfield.
<i>Band Master,</i>	W. D. Hodge.
<i>Hospital Steward,</i> . . .	Charles C. Wells, Northampton.

Companies A, Great Barrington ; B, Adams, (No.) ; C, Northampton ; D, E, Pittsfield ; F, Springfield ; G, Greenfield ; H, Shelburne ; I, Holyoke ; K, Westfield.

Captains.

Ralph O. Ives, Great Barrington.	Hosea C. Lombard, Springfield.
Elisha Smart, Adams.	Edwin E. Day, Greenfield.
Joseph B. Parsons, Northampton.	Ozro Miller, Shelburne.
Thomas W. Clapp, Pittsfield.	Lucius B. Walkley, Westfield.
Frederick Barton, Springfield.	Joseph R. Newell, Holyoke.

First Lieutenants.

Flavel Shurtleff, Northampton.
 Samuel C. Traver, Adams.
 James H. Wetherell, Northampton.
 Charles Wheeler, Dalton.
 Byron Porter, Springfield.
 Hiram A. Keith, Springfield.
 George Pierce, Greenfield.
 Chandler J. Woodward, Shelburne.
 David M. Chase, Westfield.
 Joseph H. Bennett, W. Springfield.

Second Lieutenants.

David W. Wells, Adams.
 George Hager, Pittsfield.
 Wallace A. Putnam, Springfield.
 George W. Bigelow, Springfield.
 Lorenzo L. Remington, Greenfield.
 Benjamin F. Leland, Shelburne.
 Edwin T. Johnson, Westfield.
 Allen S. Mansir, Monterey.
 Homer P. Gilmore, Springfield.
 Charles H. Brewster, Northampton.

This regiment is made up almost exclusively of men living in the five western counties. Its Colonel is a son of the late Ex-Governor Briggs. He has been active in our volunteer militia, and has held several commissions. When the rebellion broke out, Colonel Briggs commanded a company of infantry at Pittsfield, and was among the first to offer the services of himself and command. He was ordered with his company to Washington, and was attached to the Eighth, which did such gallant service. Before the expiration of his three months term, he was appointed to the command of the regiment formed in the western counties for three years service. On

the 31st of May, the Tenth went into camp at Springfield. Previous to its departure, this regiment came to Boston, and after remaining in camp for a few days at Medford sailed on the 25th of July for Washington, where it is now stationed.

ELEVENTH REGIMENT.

FIELD AND STAFF.

<i>Colonel</i> ,	William Blaisdell, Boston.
<i>Lieutenant-Colonel</i> , . .	George F. Tileston, Boston.
<i>Major</i> ,	Porter D. Tripp, Boston.
<i>Adjutant</i> ,	Brownell Granger, Boston.
<i>Quartermaster</i> ,	J. Frank Lakin, Boston.
<i>Surgeon</i> ,	Dr. Ira Russell, Natick.
<i>Assistant-Surgeon</i> , . .	Dr. John W. Foye, Boston.
<i>Chaplain</i> ,	Elisha F. Watson, Boston.
<i>Sergeant-Major</i> , . . .	William B. Mitchell.
<i>Quartermaster-Sergeant</i> , .	George Forrest, Boston.
<i>Commissary-Sergeant</i> , .	Peter H. Haskell.
<i>Band Master</i> ,	A. B. Brigham.
<i>Hospital Steward</i> , . . .	R. E. Jameson, Woburn.

Companies A, B, C, D, E, F, G, H, Boston; I, Charlestown; K, Dorchester.

Captains.

John H. Davis, Boston.
James R. Bigelow, Boston.
Leonard Gordon, Boston.
William C. Allen, Boston.
Selden Page, Leominster.

Benjamin Stone, Jr., Dorchester.
James W. McDonald, Woburn.
Edwin Humphrey, Hingham.
Luther Dame, Newburyport.

First Lieutenants.

Malcolm Graham, Boston.
Charles H. Colburn, Boston.
John C. Robertson, Charlestown.
William V. Munroe, Dorchester.
John H. Whitten, Boston.
William E. Farwell, Boston.
Walter N. Smith, Lowell.
Simon P. Currier, Boston.
Timothy Teaffe, Boston.
Joseph P. Myers, Boston.
Alonzo Coy, Boston.

Second Lieutenants.

George W. Calef, Boston.
Albert M. Gammell, Charlestown.
John Munn, Boston.
Henry Page, Boston.
Charles C. Rivers, Boston.
Frank K. Josselyn, Lynn.
David A. Granger, Boston.
Thomas A. McLellan, Boston.
William H. Roberts, Lynn.
William H. H. Joy, Boston.

This regiment was at the battle of Bull Run, and sustained considerable loss in killed, wounded, and prisoners. It was raised under the superintendence of Colonel Clark, Lieutenant-Colonel Blaisdell, and Major Tileston, who are well known as good officers in our militia service. The regiment was recruited in Boston and vicinity. It was ordered to Fort Warren, May

4th, and on the 24th of June left Boston for Washington. Colonel Clark, who commanded the regiment at Bull Run, received a sun-stroke, and his health being seriously affected, he afterwards resigned. He was succeeded by Colonel Blaisdell, an excellent officer. The regiment is now on the Lower Potomac, in the same brigade with our First Regiment.

T W E L F T H R E G I M E N T .

FIELD AND STAFF.

<i>Colonel,</i>	Fletcher Webster, Marshfield.
<i>Lieutenant-Colonel,</i> . .	Timothy M. Bryan, Jr., Newton.
<i>Major,</i>	Elisha M. Burbank, Woburn.
<i>Adjutant,</i>	Thomas P. Haviland, Newton.
<i>Quartermaster,</i>	David Wood, Boston.
<i>Chaplain,</i>	Edward L. Clark, Andover.
<i>Surgeon,</i>	Jedediah H. Baxter, Boston.
<i>Assistant-Surgeon,</i> . .	J. McLean Hayward, Boston.
<i>Sergeant-Major,</i> . . .	Gerald Fitzgerald.
<i>Quartermaster-Sergeant,</i> .	Loring W. Muzzey.
<i>Commissary-Sergeant,</i> .	Charles W. Thompson, Boston.
<i>Hospital Steward,</i> . . .	C. C. Hutchins.
<i>Band Master,</i>	William J. Maitland.
<i>Sutler,</i>	Seth Gage, Boston.

Companies A, B, C, D, E, Boston ; F, North Bridgewater ; G, Abington ; H, Weymouth ; I, Stoughton : K, Gloucester.

Captains.

Richard H. Kimball, Boston.	Alexander Hichborn, N. Bridgewater.
George W. Murch, Boston.	Ira Blanchard, Abington.
Daniel G. Handy, Boston.	James L. Bates, Weymouth.
Nathaniel B. Shurtleff, Jr., Boston.	John Ripley, Stoughton.
Edward C. Saltmarsh, Boston.	David Allen, Jr., Gloucester.

First Lieutenants.

William G. White, Boston.
 Frederick R. Shattuck, Boston.
 Edward T. Pearce, Gloucester.
 J. Otis Williams, Boston.
 Alph. K. Harmon, N. Bridgewater.
 Edward P. Reed, Abington.
 Charles W. Hastings, Weymouth.
 Chester Clark, Stoughton.
 Benjamin F. Cook, Gloucester.
 Samuel Appleton, Boston.

Second Lieutenants.

George W. Orne, Boston,
 Charles T. Packard, N. Bridgewater.
 Harlan P. Bennett, Boston.
 Erastus L. Clark, Lynn.
 Hiram W. Copeland, N. Bridgewater.
 Lysander F. Cushing, Abington.
 Francis B. Pratt, Weymouth.
 Warren Thompson, Stoughton.
 Gilman Saunders, Gloucester.
 Charles G. Russell, Boston.

This regiment is familiarly known as "the Webster Regiment," its commander being Colonel Fletcher Webster. It was ordered

to Fort Warren, May 3d, and left Boston for Washington, July 23d. This regiment is composed of excellent material, and is among the best that have left the State. Great praise is due to those friends of the regiment who devoted their time and money to render it an honor to the name it bears, but no less to Colonel Webster and his officers for its good discipline and efficiency. This regiment is in Major General Banks' Division, and is stationed near Frederick, Md.

THIRTEENTH REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	Samuel H. Leonard, Boston.
<i>Lieutenant-Colonel,</i> . .	N. Walter Batchelder, Boston.
<i>Major,</i>	Jacob P. Gould, Stoneham.
<i>Adjutant,</i>	David H. Bradlee, Boston.
<i>Surgeon,</i>	Allston W. Whitney, Boston.
<i>Assistant-Surgeon,</i> . .	J. Theodore Heard, Boston.
<i>Chaplain,</i>	Noah M. Gaylord, Boston.
<i>Quartermaster,</i>	George E. Craig.
<i>Quartermaster-Sergeant,</i> .	T. R. Wells.
<i>Commissary-Sergeant,</i> . .	Melville Smith.
<i>Sergeant-Major,</i>	_____.
<i>Band Master,</i>	Thomas C. Richardson.
<i>Hospital Steward,</i>	John H. White, Boston.

Companies A, B, C, D, Boston; E, Roxbury; F, Marlborough; G, Stoneham; H, Natick; I, Marlborough; K, Westborough.

Captains.

James A. Fox, Boston.	Eben W. Fiske, Stoneham.
Joseph S. Carey, Boston.	William L. Clark, Boston.
Augustine Harlow, Boston.	Charles H. R. Schreiber, Boston.
Charles R. M. Pratt, Roxbury.	William H. Jackson, Boston.
Henry Whitcomb, Marlborough.	Charles H. Hovey, Boston.

First Lieutenants.

Samuel N. Neat, Boston.
 John G. Hovey, Boston.
 Joseph Colburn, Roxbury.
 Abel H. Pope, Marlborough.
 Loring S. Richardson, Stoneham.
 P. D. Chamberlain, Natick.
 Moses P. Palmer, Marlborough.
 William B. Bacon, Worcester.
 John W. Sanderson, Westborough.
 _____.

Second Lieutenants.

George Bush, Boston.
 Augustus N. Sampson, Boston.
 Walter H. Judson, Boston.
 William H. Carey, Boston.
 Edwin R. Frost, Roxbury.
 Charles F. Morse, Marlborough.
 John Foley, Stoneham.
 Francis Jenks, Natick.
 David L. Brown, Marlborough.
 Charles B. Fox, Boston.

The Fourth Battalion of Rifles formed the nucleus of this fine command. It was ordered, June 25th, to garrison Fort

Independence, and while there was made a regiment, and on the 30th of July proceeded to Washington. The regiment was stationed on the Upper Potomac, where it has since remained. Detachments have several times met the enemy, and always with bravery and success. The limits of this Report will not permit me to speak at length of the fights and skirmishes in which this regiment has taken a part. Its officers had no previous military experience, except in the Volunteer Militia service, and they have reflected honor upon it. This regiment is also in General Banks' Division.

FOURTEENTH REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	.	.	.	William B. Greene, Haverhill.
<i>Lieutenant-Colonel,</i>	.	.	.	Samuel C. Oliver, Salem.
<i>Major,</i>	.	.	.	Levi P. Wright, Lawrence.
<i>Surgeon,</i>	.	.	.	David Dana, Jr., Reading.
<i>Assistant-Surgeon,</i>	.	.	.	Samuel K. Towle, Haverhill.
<i>Adjutant,</i>	.	.	.	Charles F. Simmons, Boston.
<i>Quartermaster,</i>	.	.	.	Andrew Washburn, Newton.
<i>Chaplain,</i>	.	.	.	Stephen Barker, Andover.
<i>Sergeant-Major,</i>	.	.	.	Amos Henfield, Salem.
<i>Commissary-Sergeant,</i>	.	.	.	Arthur L. Drew, Haverhill.
<i>Quartermaster-Sergeant,</i>	.	.	.	W. C. Glass, Boston.
<i>Band Master,</i>	.	.	.	George H. Hodgdon.
<i>Drum-Major,</i>	.	.	.	William Giddings.

Companies A, Ipswich; B, Methuen; C, Lynn; D, Salem; E, Amesbury; F, Lawrence; G, Marblehead; H, Andover; I, Danvers; K, Lawrence.

Captains.

Nathaniel Shatswell, Ipswich.	Benjamin Day, Marblehead.
Leverett Bradley, Methuen.	Horace Holt, Andover.
Alonzo G. Draper, Lynn.	Frank A. Rolfe, Lawrence.
Joseph W. Sargent, Amesbury.	Seth S. Buxton, Salem.
Samuel Langmaid, Lawrence.	Jeremy B. Wardwell, Methuen.

First Lieutenants.

Milton B. Shattuck, Ipswich.
 Archelaus C. Wyman, Lynn.
 William F. Martins, Amesbury.
 Joseph W. Kimball, Lawrence.
 Charles P. Noyes, Marblehead.
 Charles H. Poor, Andover.
 William Preston, Lawrence.
 James Pope, Salem.
 Christopher S. Heath, Methuen.
 William J. Roome, Danvers.

Second Lieutenants.

Benjamin C. Atkinson, Amesbury.
 Richard P. Cushman, Haverhill.
 Benjamin F. Martin, Marblehead.
 Moses W. Clement, Andover.
 Albert A. Davis, Lawrence.
 Frank W. Taggard, Danvers.
 George S. Follansbee, Lawrence.
 Jonathan B. Hanson, Danvers.
 James M. Osgood, Haverhill.
 William H. Gwinn, Ipswich.

Colonel Greene, who commands this regiment, is a graduate of West Point. He was in Paris with his family when this rebellion broke out, and was among the first to tender his services to his native State. Acting on this patriotic impulse, he returned home at once, and was placed in command of this regiment, then (June 25th) at Fort Warren, on garrison duty. On the 7th of August the regiment left Boston for Washington. Many of the other officers of the Fourteenth, have been prominent in the Volunteer Militia. Lieutenant Colonel Oliver is a son of General Oliver, now Treasurer of the Commonwealth. This regiment is stationed on the Virginia side, a few miles from Washington.

FIFTEENTH REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i> Charles Devens, Jr., Worcester.
<i>Lieutenant-Colonel,</i>	. George H. Ward, Worcester.
<i>Major,</i> John W. Kimball, Fitchburg.
<i>Adjutant,</i> ————
<i>Surgeon,</i> Joseph N. Bates, Worcester.
<i>Assistant-Surgeon,</i> .	. S. Foster Haven, Jr., Worcester.
<i>Chaplain,</i> William G. Scanlan, Grafton.
<i>Quartermaster-Sergeant,</i>	. William R. Steele.
<i>Sergeant-Major,</i> . .	. F. A. Walker, North Brookfield.
<i>Commissary-Sergeant,</i>	. William G. Waters.
<i>Quartermaster,</i> . .	. Church Howe, Worcester.
<i>Band Master,</i> N. P. Goddard.
<i>Hospital Steward,</i> .	. Henry Deering.
<i>Drum-Major,</i> Paul Bauer.

Companies A, Leominster; B, Fitchburg; C, Clinton; D, Worcester; E, Oxford; F, Brookfield; G, Grafton; H, Northbridge; I, Webster; K, Blackstone.

Captains.

George W. Rockwood, Leominster.	Sardus S. Sloan, Brookfield.
Clark S. Simonds, Fitchburg.	Walter Forehand, Grafton.
Henry Bowman, Clinton.	Chase Philbrick, Northbridge.
John M. Studley, Worcester.	George C. Joslin, Webster.
Charles H. Watson, Oxford.	Leonard Wood, Leominster.

First Lieutenants.

Joseph M. Goddard, Fitchburg.	Edward B. Staples, Blackstone.
Edwin P. Woodward, Worcester.	Amos Bartlett, Worcester.
Jeremiah E. Green, Brookfield.	George W. Baldwin, Worcester.
Newell K. Holden, Grafton.	Richard Derby, Salem.
Henry S. Taft, Northbridge.	Thomas J. Spurr, Worcester.

Second Lieutenants.

Frank W. Polley, Leominster.	Stephen L. Carney, Grafton.
Charles H. Eager, Fitchburg.	John S. Hall, Worcester.
James N. Johnson, Clinton.	Frank S. Corbin, Dudley.
Bernard B. Vassell, Oxford.	I. Harris Hooper, Boston.
L. H. Ellenwood, Brookfield.	Hans P. Jorgeusen, Leominster.

This is a Worcester County regiment. Its Colonel had commanded the rifle battalion of three months' men, raised in the same county. The Fifteenth bore the brunt of the disastrous fight at Ball's Bluff on the Upper Potomac in October last, and lost in killed, wounded and prisoners, 308 men: 14 killed, 64 wounded and 230 missing. Captain Bowman of Company C was taken prisoner, and is one of the victims selected for execution, and confined in Richmond jail. The unflinching courage of the Fifteenth, and the admirable military qualities which Colonel Devens and his officers displayed at Ball's Bluff, have made it one of the marked regiments of Massachusetts.

This regiment was ordered into Camp Lincoln, Worcester, on the 25th of July, and left for the seat of war on the 8th of August. It is stationed near Frederick, Md., in General Banks' Division.

SIXTEENTH REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	Powell T. Wyman, Boston.
<i>Lieutenant-Colonel,</i>	George A. Meacham, Cambridge.
<i>Major,</i>	Daniel S. Lamson, Weston.
<i>Adjutant,</i>	Waldo Merriam, Boston.
<i>Quartermaster,</i>	Edward M. Livermore, Cambridge.
<i>Surgeon,</i>	Charles C. Jewett, Holliston.
<i>Assistant-Surgeon,</i>	Edward A. Whiston, Framingham.
<i>Chaplain,</i>	Arthur B. Fuller, Watertown.
<i>Quartermaster-Sergeant,</i>	Ira A. Merritt.
<i>Commissary-Sergeant,</i>	Isaac H. Pinkham.
<i>Sergeant-Major,</i>	J. E. Sharp.
<i>Hospital Steward,</i>	William R. Wills, Waltham.

Companies A, Cambridge; B, Holliston; C, Groton; D, Lowell; E, South Reading; F, Lexington; G, Lowell; H, Waltham; I, Newton; K, Watertown.

Captains.

Samuel W. Richardson, Cambridge.	Thomas O'Hare, Lowell.
James M. Mason, Milford.	Gardner Banks, Boston.
Leander G. King, Groton.	Henry C. Lindley, Watertown.
John Wiley, 2d, South Reading.	Matthew Donovan, Lowell.
Charles R. Johnson, Lexington.	Henry T. Lawson, Newton.

First Lieutenants.

Samuel McKeever, Cambridge.
 William A. Amory, West Roxbury.
 James R. Darracott, Boston.
 Charles H. Mayo, Roxbury.
 Alex. J. Dallas, Cambridge.
 John B. Brown, Ipswich.
 Stephen E. Meserve, Watertown.
 Frank W. Hilton, Watertown.
 William A. Smith, Waltham.
 George H. Howard, Cambridge.

Second Lieutenants.

Cassander Flagg, Holliston.
 William Metcalf, Westford.
 David Roche, Lowell.
 James Oliver, South Reading.
 Payson E. Tucker, Cambridge.
 James B. Thompson, Lowell.
 F. P. H. Rogers, Waltham.
 John Eaton, South Reading.
 Joseph S. Hills, Boston.
 James E. Sharp, Watertown.

This regiment is composed of companies raised in Middlesex County. It was ordered to Camp Cameron, Cambridge, June 25th, and left for the seat of war August 17th. It is stationed at Fortress Monroe. Colonel Wyman is a graduate of West Point, and has served with distinction in the regular army. At the beginning of our national struggle he was in Europe, but returned home immediately, and tendered his services to the State to command a regiment. His offer was accepted, and he was placed in command of this regiment. One of the companies in the Sixteenth is commanded by a brother of Major-General Banks.

SEVENTEENTH REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	Thomas J. C. Amory, Boston, Capt. U. S. A.
<i>Lieutenant-Colonel,</i>	John F. Fellows, Chelsea.
<i>Major,</i>	Jones Frankle, Haverhill.
<i>Adjutant,</i>	B. N. Mann, Chelsea.
<i>Quartermaster,</i>	Levi P. Thompson, Cambridge.
<i>Surgeon,</i>	Isaac F. Galloupe, Lynn.
<i>Assistant-Surgeon,</i>	W. H. W. Hinds, Boston.
<i>Chaplain,</i>	William D. Haley, Rochester.
<i>Quartermaster-Sergeant,</i>	Horace Dexter, Cambridgeport.
<i>Commissary-Sergeant,</i>	Henry T. Merrill.
<i>Sergeant-Major,</i>	— — — — —

Companies A, Newburyport; B, South Danvers; C, Danvers; D, Salisbury; E, F, Haverhill; G, Danvers; H, Boston; I, Lawrence; K, Malden.

Captains.

David F. Brown, Newburyport.	Luther Day, Haverhill.
Enoch F. Tompkins, Haverhill.	George W. Kenny, Danvers.
Nehemiah P. Fuller, Danvers.	John K. Lloyd, Boston.
George H. Morrill, Salisbury.	Thomas Weir, Lawrence.
Michael C. McNamara, Haverhill.	Joseph R. Simonds, Melrose.

First Lieutenants.

Thomas W. Foster, Newburyport.
 William W. Smith, Danvers.
 Jeremiah A. Greeley, Salisbury.
 Henry Splane, Haverhill.
 Ruel B. Pray, Danvers.
 John S. Hammond, Boston.
 Michael Burns, Lawrence.
 Ivory N. Richardson, Malden.
 William H. Turner, Haverhill.
 John E. Mallally, South Danvers.

Second Lieutenants.

Thomas W. Goodwin, Newburyport.
 Charles O. Fellows, Chelsea.
 Henry Poor, Stoneham.
 Benjamin F. Chesley, Haverhill.
 James Maroney, Haverhill.
 Alfred M. Channel, Rockport.
 Archibald Bogle, Melrose.
 Henry W. Oliver, Malden.
 Thomas F. Newton, Haverhill.
 Ezekiel F. Mann, Boston.

This regiment was recruited at Camp Schouler, Lynnfield, and is composed of eight companies from Essex County, one from Middlesex, and one from Suffolk. It left for the seat of war, August 23d. This regiment has been instrumental in subduing the rebels in Northampton and Accomac Counties on the eastern shore of Virginia, and re-establishing in those counties the rule of the Government. Since then it has returned to its old quarters near Baltimore, where it now remains. Colonel Amory is a West Point graduate, and holds a captain's commission in the regular army. He is an able and popular officer.

EIGHTEENTH REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	.	.	.	James Barnes, Springfield.
<i>Lieutenant-Colonel,</i>	.	.	.	Timothy Ingraham, New Bedford.
<i>Major,</i>	.	.	.	Joseph Hayes, Boston.
<i>Adjutant,</i>	.	.	.	G. Foster Hodges, Roxbury.
<i>Quartermaster,</i>	.	.	.	Sanford Almy, New Bedford.
<i>Surgeon,</i>	.	.	.	David P. Smith, Springfield.
<i>Assistant-Surgeon,</i>	.	.	.	Orlando Brown, Wrentham.
<i>Chaplain,</i>	.	.	.	Benjamin F. De Costa, Charlestown.
<i>Sergeant-Major,</i>	.	.	.	_____.
<i>Quartermaster-Sergeant,</i>	.	.	.	John D. Isbel, Springfield.
<i>Hospital Steward,</i>	.	.	.	Vestulan R. Stone, Dana.

Companies A, Bridgewater; B, Taunton; C, Carver; D, Middleborough; E, Duxbury; F, Dedham; G, Hanover; H, Plymouth; I, Wrentham; K, Quincy.

Captains.

Lewis N. Tucker, Boston.	William B. White, Abington.
George C. Ruby, Taunton.	Joseph W. Collingwood, Plymouth.
William S. McFarlin, Carver.	Frederick D. Forrest, Wrentham.
Stephen Thomas, Middleborough.	John L. Spalding, Boston.
Thomas Weston, Middleborough.	Charles W. Carroll, Dedham.

First Lieutenants.

Joseph C. Ayer, Boston.
 Cyrus M. Wheaton, Somerset.
 George M. Barnard, Jr., Boston.
 W. R. Howes, Mattapoisett.
 William H. Winsor, Kingston.
 Fisher A. Baker, Dedham.
 James N. Sparrell, South Scituate.
 Charles H. Drew, Plymouth.
 Alvin E. Hall, Foxborough.
 Benjamin F. Meservey, Quincy.

Second Lieutenants.

James D. Orne, Springfield.
 Warren D. Russell, Brighton.
 William V. Smith, Boston.
 Charles F. Edson, Middleborough.
 John E. Bird, Boston.
 Edward M. Onion, Dedham.
 William G. Hewins, Boston.
 Horatio N. Dallas, Boston.
 Samuel H. Bugbee, Wrentham.
 Pardon Almy, Jr., Cambridge.

This regiment was recruited at Camp Brigham, Readville. The companies are from Norfolk, Bristol, and Plymouth Counties, and are of good material. The regiment left for Washington on the 24th of August. It is stationed about eight miles from Washington on the Virginia side of the Potomac. Colonel Barnes graduated at West Point, in the same class with Jeff. Davis, and is probably one of the most competent officers commanding a regiment in the Union service.

NINETEENTH REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	.	.	.	Edward W. Hinks, Lynn.
<i>Lieutenant-Colonel,</i>	.	.	.	A. F. Devereux, Salem.
<i>Major,</i>	.	.	.	Henry J. How, Haverhill.
<i>Adjutant,</i>	.	.	.	John C. Chadwick, Salem.
<i>Surgeon,</i>	.	.	.	J. Franklin Dyer, Rockport.
<i>Assistant-Surgeon,</i>	.	.	.	Josiah N. Willard, Boston.
<i>Quartermaster,</i>	.	.	.	Levi Shaw, Rockport.
<i>Chaplain,</i>	.	.	.	Ezra D. Winslow, Rockport.
<i>Sergeant-Major,</i>	.	.	.	Samuel Baxter, Newburyport.
<i>Quartermaster-Sergeant,</i>	.	.	.	Oliver F. Briggs, Boston.
<i>Commissary-Sergeant,</i>	.	.	.	— — — — —
<i>Hospital Steward,</i>	.	.	.	William E. Barrows, Andover.
<i>Band Master,</i>	.	.	.	Louis Rimbach, Boston.

Companies A, West Newbury; B, Newbury; C, Rowley; D, E, Boston; F, Cambridge; G, Lowell; H, Roxbury; I, K, Boston.

Captains.

Elijah P. Rogers, Newbury.
 J. Scott Todd, Rowley.
 James D. Russell, Boston.
 Andrew Mahoney, Boston.
 Edmund Rice, Cambridge.

H. G. O. Weymouth, Lowell.
 Charles U. Devereux, Salem.
 Jonathan F. Plympton, Boston.
 Ansel D. Wass, Boston.
 Charles M. Merritt, Lynn.

First Lieutenants.

Isaac H. Boyd, West Newbury.
 John Hodges, Jr., Salem.
 George W. Batchelder, Salem.
 Morcena Dunn, Boston.
 David Lee, Boston.
 James H. Rice, Brighton.
 Albert Thorndike, Beverly.
 Henry A. Hale, Salem.
 Edward P. Bishop, Boston.
 John P. Reynolds, Jr., Salem.

Second Lieutenants.

Samuel S. Prime, Rowley.
 George M. Barry, Boston.
 James G. C. Dodge, Boston.
 Oliver F. Briggs, Boston.
 Charles B. Warner, South Danvers.
 Elisha A. Hinks, Orrington, Me.
 Dudley C. Mumford, Lowell.
 William L. Palmer, Salem.
 Lysander J. Hume, Calais, Me.
 Samuel Butler, Newburyport.

The Nineteenth is largely composed of Essex County men, and was organized and recruited at Camp Schouler, Lynnfield. This regiment left for Washington on the 28th of August. It is stationed on the Upper Potomac, and forms part of General Lander's Brigade. It did good service in covering the retreat of our regiments after the battle of Ball's Bluff. Colonel Hinks had much experience in our militia service, and commanded the Eighth Regiment during the three months' service. Lieutenant Colonel Devereux was commander of the "Salem Zouaves" of the Eighth, which was one of the best drilled companies in the Commonwealth.

T W E N T I E T H R E G I M E N T .

FIELD AND STAFF.

<i>Colonel,</i> William Raymond Lee, Roxbury.
<i>Lieutenant-Colonel,</i> Francis W. Palfrey, Boston.
<i>Major,</i> Paul J. Revere, Boston.
<i>Adjutant,</i> Charles L. Pierson, Salem.
<i>Quartermaster,</i> Charles W. Folsom, Cambridge.
<i>Surgeon,</i> Nathan Hayward, Roxbury.
<i>Assistant-Surgeon,</i> Edward H. R. Revere, Boston.
<i>Sergeant-Major,</i> S. R. Harlow, Waltham.
<i>Quartermaster-Sergeant,</i> Frederick Sander, New York.
<i>Commissary-Sergeant,</i> Edward Hennessey, Boston.
<i>Hospital Steward,</i> Joseph Hennard, Boston.

Companies raised in Boston and vicinity.

Captains.

Henry M. Tremlett, Boston.	Allen Shepard, Boston.
Ferdinand Dreher, Boston.	Charles F. Cabot, Boston.
George A. Schmitt, Cambridge.	George N. Macy, Nantucket.
John C. Putnam, Boston.	A. W. Beckwith, Boston.
William F. Bartlett, Winthrop.	N. P. Hallowell, Cambridge.

First Lieutenants.

 Charles A. Whittier, Boston.

Second Lieutenants.

Nathaniel T. Messer, Boston.
 Arthur R. Curtis, Boston.
 James Murphy, Roxbury.
 William R. Riddle, Boston.
 Herbert C. Mason, Boston.
 Henry L. Patten, Cambridge.
 Henry F. Sander, Boston.
 Henry Ropes, Boston.

This regiment was recruited at Camp Massasoit, Readville, and left for the seat of war September 4th. The Twentieth was engaged with our Fifteenth at the Ball's Bluff disaster, exhibited equal courage, and suffered a great loss of men and officers. Colonel Lee, Major Revere, and Adjutant Pierson are prisoners at Richmond, and confined in the cell. They are of the devoted band of hostages. In the battle, Captain Putnam lost an arm. Captains Dreher and Schmitt were severely wounded, and are now in the Massachusetts General Hospital. Lieutenant Putnam, "the young, the beautiful, and the brave," was killed. Colonel Lee is a graduate of West Point, and is an officer of whom any regiment might feel proud. The loss of his command, as near as can be ascertained, is about 208, in killed, wounded and missing.

 Joel W. Fletcher, Leominster.
 John B. Williams, Barre.
 William H. Valentine, Worcester.

This regiment, recruited at Camp Lincoln, Worcester, is made up of companies from the central and western portions of this Commonwealth. On the 22d of August it left for Annapolis, Md., where it has remained ever since, having in charge the railroad from that city to the Baltimore and Washington junction. Colonel Morse has long been prominent as an officer in the State militia. When appointed to the command of the Twenty-first, he was Major-General of the Third Division Massachusetts Volunteer Militia. By his appointment this office is rendered vacant, and can only be filled by the Legislature. Lieutenant-Colonel Maggi of New Bedford is an Italian by birth, and a thoroughly educated officer. He served under Colonel Wardrop in the Third Regiment, and took part in the destruction of the Norfolk Navy Yard.

TWENTY-SECOND REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	Jesse A. Gove, Concord, N. H.
<i>Lieutenant-Colonel,</i>	Charles E. Griswold, Boston.
<i>Major,</i>	William S. Tilton, Boston.

John P. Crane, Woburn.

Edwin F. Richardson, Cambridge.

Thomas F. Salter, Haverhill.

Joseph Nason, Boston.

George A. Batchelder, Boston.

Second Lieutenants.

Henry Clay Conner, Lynn.

William D. Morris, Boston.

Enos P. Hale, Taunton.

John H. Symonds, Boston.

Henry L. Orrok, Roxbury.

Walter S. Davis, Milton.

Gurden McKay, Melrose.

Alonzo M. Shute, Haverhill.

James P. Stearns, Brookline.

Horace S. Dunn, Boston.

The Twenty-second is well known as "Senator Wilson's Regiment." It was recruited by him, and he was its first Colonel. It was sent into camp at Lynnfield September 2d, and left the State for Washington, October 8th. To this regiment were attached the Second Company of Sharpshooters, Captain Wentworth, and the Third Battery of Light Artillery, which was organized by Captain Follett. Shortly after the arrival of the Twenty-second Regiment at Washington, Colonel Wilson, whose duties as Senator precluded the possibility of retaining command, resigned, and Colonel Gove, a West Point graduate, and an officer of the regular army, was commissioned in his place. The regiment is stationed in Virginia, about five miles from Washington.

TWENTY-THIRD REGIMENT.

FIELD AND STAFF.

Colonel, . . . John Kurtz, Boston.

Lieutenant-Colonel, . Henry Merritt, Boston.

Major, . . . Andrew Elwell, Gloucester.

Adjutant, . . . John G. Chambers, Medford.

Quartermaster, . . . Joseph A. Goldthwait, Salem.

<i>Chaplain,</i>	. . .	J. Bowen Clark, Swampscott.
<i>Surgeon,</i>	. . .	George Derby, Boston.
<i>Assistant-Surgeon,</i>	. . .	Silas E. Stone, Walpole.
<i>Sergeant-Major,</i>	. . .	Daniel H. Johnson, Jr., Salem.
<i>Quartermaster-Sergeant,</i>	. . .	Stephen P. Driver, Salem.

 William J. Creasey, Newburyport.
 John Littlefield, Foxborough.

Second Lieutenants.

George A. Fisher, Salem.
 John Goodwin, Jr., Marblehead.
 Fitz J. Babson, Gloucester.
 Anthony Lang, New Bedford.
 Thomas B. Atwood, Abington.
 George R. Emmerton, Salem.
 Daniel W. Hammond, Beverly.
 Peter H. Niles, Boston.
 David P. Muzzey, Cambridge.
 Benjamin F. Barnard, South Reading.

This fine regiment was recruited at Lynnfield, and left for Annapolis, November 11th. It forms a part of General Burnside's Division. Most of the officers have been prominent members of the Volunteer Militia. Colonel Kurtz was captain of one of the companies in the Thirteenth, and was ordered home to take command of this regiment. Lieutenant-Colonel Merritt was a member of Brigadier-General Andrews' staff, and Major Elwell was Lieutenant-Colonel of the Eighth Regiment Massachusetts Volunteer Militia, and served with it during the entire three months term of service. Adjutant Chambers served as lieutenant in the Massachusetts Fifth, and displayed much bravery at the battle of Bull Run.

 Daniel T. Sargent, Boston.
 Charles G. Ward, Boston.
 Thomas M. Sweet, Boston.
 James M. Barnard, Boston.
 Horatio D. Jarvis, Boston.
 Deming Jarves, Jr., Boston.

The Twenty-Fourth is known as the New England Guards Regiment. Colonel Stevenson, and most of the officers of the Twenty-Fourth, were members of the well-known Fourth, or New England Guard Battalion, Massachusetts Volunteer Militia. This regiment was recruited under the immediate supervision of Colonel Stevenson, at Camp Massasoit, Readville. It left the State for Annapolis, December 9th. The Twenty-Fourth forms part of General Burnside's command, and is as well officered, equipped, and disciplined, as any regiment that has left the State.

TWENTY-FIFTH REGIMENT.

FIELD AND STAFF.

<i>Colonel,</i>	Edwin Upton, Fitchburg.
<i>Lieutenant-Colonel,</i> . .	Augustus B. R. Sprague, Worcester.
<i>Major,</i>	Matthew J. McCafferty, Worcester.
<i>Adjutant,</i>	Elijah A. Harkness, Worcester.
<i>Quartermaster,</i>	William O. Brown, Fitchburg.
<i>Surgeon,</i>	J. Marcus Rice, Worcester.
<i>Assistant-Surgeon,</i> . .	Theron Temple, Belchertown.
<i>Chaplain,</i>	Horace James, Worcester.
<i>Sergeant-Major,</i> . . .	Charles H. Davis, Worcester.
<i>Quartermaster-Sergeant,</i> .	Edward A. Brown, Fitchburg.
<i>Commissary-Sergeant,</i> .	Elbridge G. Watkins, Worcester.
<i>Hospital Steward,</i> . . .	Samuel Flagg, Worcester.
<i>Drum-Major,</i>	J. H. Sampson, Worcester.
<i>Band Master,</i>	William E. Gilmore, Pawtucket.

Companies A, Worcester; B, Milford; C, Boston and Worcester; D, E, Worcester; F, Fitchburg; G, H, Worcester; I, Templeton; K, Worcester.

Captains.

Josiah Pickett, Worcester.	Charles H. Foss, Fitchburg.
Willard Clark, Milford.	Lewis Wagely, Worcester.
Cornelius G. Atwood, Boston.	Orson Moulton, Worcester.
Albert H. Foster, Worcester.	V. P. Parkhurst, Templeton.
Thomas O'Neil, Worcester.	J. Waldo Denny, Worcester.

First Lieutenants.

 William Emery, Milford.
 James Tucker, Boston.
 George S. Campbell, Worcester.
 William Daly, Worcester.
 Levi Lawrence, Fitchburg.
 Henry M. Ritcher, Worcester.
 David M. Woodward, Worcester.
 James B. Smith, Royalston.
 Samuel Harrington, Paxton.

Second Lieutenants.

Merritt B. Bessey, Worcester.
 William F. Draper, Milford.
 Merriek F. Prouty, Spencer.
 George H. Spaulding, Worcester.
 Henry McConville, Worcester.
 J. H. Richardson, Fitchburg.
 Frederic A. Wiegand, Worcester.
 N. H. Foster, N. Brookfield.
 Amos Buffum, Templeton.
 James M. Drennan, Worcester.

The Twenty-Fifth is essentially a Worcester County regiment. It was recruited at Camp Lincoln, and left Worcester for Annapolis, October 31st. It is attached to General Burnside's Division. The officers are, with scarcely an exception, gentlemen who have held high rank and been active in our Volunteer Militia. Lieutenant-Colonel Sprague commanded a company in the Rifle Battalion under Major Devens, during the three months term. Colonel Upton is a well-informed and capable officer.

 George E. Yarrington, Lawrence.
 John B. Campbell, Fall River.
 Ezekiel Eastman, Lowell.
 Algernon S. Badger, Milton.
 Henry K. Oliver, Malden.

The Colonel and many of the officers and men of this regiment were of the gallant Sixth, M. V. M. The Twenty-Sixth was recruited by Colonel Jones, at Camp Chase, Lowell, and is attached to Major-General Butler's Division. It sailed from Boston on the 21st of November in the transport steamer Constitution for Ship Island, Louisiana, where it is now stationed. It is therefore the most remote from the Commonwealth of any of the regiments which Massachusetts has sent forth. It will ever be near to us, however, in our affections.

W. C. Hunt, Springfield.
Henry C. Dwight, Northampton.

The Twenty-Seventh is known as the Second Western Regiment, having been recruited at Camp Reed, Springfield, from the four western counties. It left its camp for Annapolis, on the 2d of November. It is officered by gentlemen who have received their military education in the school of the Massachusetts Volunteer Militia. The Twenty-Seventh makes the fifth regiment of Massachusetts men attached to General Burnside's Division.

This regiment is composed chiefly of men of Irish birth. It is the only regiment raised under the State authority now remaining with us. It has been in camp at Cambridge since September 23d. It is ready now for service, and will doubtless receive marching orders early in January. Colonel Monteith is from New York. He served in one of the regiments of that State during the three months term. Lieutenant-Colonel Moore has been for many years connected with the militia of this State. He commanded a company in the Massachusetts Eleventh, and was ordered home for promotion in the Twenty-Eighth. The regiment is in good condition, and is anxious to be at the seat of war.

Companies raised in Boston, Sandwich, Lowell, Lynn, East Bridgewater, Plymouth, Charlestown, Freetown and Taunton.

Captains.

Israel N. Wilson, Billerica.	William D. Chamberlain, Lynn.
Samuel H. Doten, Plymouth.	Willard D. Tripp, Taunton.
Lebbeus Leach, East Bridgewater.	Charles T. Richardson, Pawtucket.
Thomas W. Clarke, Boston.	Henry R. Sibley, Charlestown.

First Lieutenants.

Charles Brady, Sandwich.
 John B. Collingwood, Plymouth.
 Abram A. Oliver, Lynn.
 James H. Osgood, Jr., Boston.
 N. D. Whitman, East Bridgewater.
 Ezra Ripley, Cambridge.
 Joshua Norton, 3d, Boston.
 John A. Sayles, Somerset.
 Freeman A. Taber, New Bedford.
 Daniel W. Lee, Charlestown.
 Alfred O. Brooks, Boston.

Second Lieutenants.

Henry A. Kern, Sandwich.
 Thomas A. Mayo, Plymouth.
 John E. Smith, Lynn.
 William T. Keen, Boston.
 Wm. B. Hathaway, E. Bridgewater.
 Thomas H. Adams, Boston.
 George H. Taylor, Cambridge.
 Thomas H. Husband, Taunton.
 William D. Corlew, Somerville.
 Charles D. Browne, Boston.

I have already spoken of this regiment and of its peculiar formation. Seven of the companies composing it have been at Fortress Monroe since the return of the Third and Fourth Regiments of three months men last May. They were formed into a battalion under command of Captain Barnes. The three new companies recently recruited which are to join the battalion, and thus make a regiment, to be known as the Twenty-Ninth Massachusetts, will leave for Fortress Monroe about the 6th of January.

F I R S T B A T T A L I O N O F I N F A N T R Y .

Stationed at Fort Warren, Boston Harbor.

FIELD AND STAFF.

<i>Major</i> ,	Francis J. Parker, Boston.
<i>Quartermaster</i> , . . .	George W. Pearson, Boston.
<i>Adjutant</i> ,	Charles K. Cobb, Boston.

Companies A, Hingham; B, Concord; C, Boston; D, Gloucester; E, Braintree.

Captains.

L. Stephenson, Jr., Hingham.
 George L. Prescott, Concord.
 Cephas C. Bumpus, Braintree.

Jonathan Pierce, Boston.
 James P. Draper, Boston.

First Lieutenants.

Charles A. Dearborn, Jr., Salem.
 Cyrus Tay, Woburn.
 Joseph Austin, Somerville.
 J. A. Cunningham, Gloucester.
 Josiah C. Fuller, Plymouth.

Second Lieutenants.

Nathaniel French, Jr., Hingham.
 Isaiah F. Hoyt, Beverly.
 Robert Hamilton, Boston.
 Stephen Rich, Gloucester.
 Lyman B. Whiton, Hingham.

This battalion was raised with special reference to garrison duty at Fort Warren, in Boston Harbor, and for guarding the political and war prisoners placed there. Captains Stephenson and Bumpus had command of companies in the Fourth Regiment M. V. M., at Fortress Monroe. Captain Prescott commanded the Concord company of three months men in the Fifth Regiment M. V. M., and was in the battle of Bull Run. The five companies comprising this battalion are of choice material. It is stationed at Fort Warren.

SPECIAL COMPANIES OF SHARPSHOOTERS.

FIRST COMPANY.

Captain, . . . John Saunders, Salem.
1st Lieutenant, . . . William Gleason, Lexington.
2d Lieutenant, . . . John C. Gray, Salem.

SECOND COMPANY.

Captain, . . . Lewis E. Wentworth, Salem.
1st Lieutenant, . . . Charles D. Stiles, Salem.
2d Lieutenant, . . . Alvan A. Evans, Salem.

The first company of Sharpshooters was recruited at Lynnfield. Most of the men have the telescopic rifle, and they are among the best practised shots in the State. The company is not attached to any regiment, but is stationed on the Upper Potomac, in General Lander's Brigade. It left for the seat of war September 3d. The second company was recruited also at Lynnfield, and attached to the Twenty-Second Regiment, with which it now remains. Is well officered and equipped. Much praise is due to Hon. Mr. Northend, of Salem, for his assistance in recruiting these two companies.

FIRST REGIMENT OF CAVALRY.

FIELD AND STAFF.

<i>Colonel</i> ,	Robert Williams, Virginia.
<i>Lieutenant-Colonel</i> , . .	Horace Binney Sargent, West Roxbury.
<i>Major</i> ,	Greeley S. Curtis, Boston.
<i>Major</i> ,	John H. Edson, Boston.
<i>Major</i> ,	William F. White, Somerville.
<i>Regimental-Adjutant</i> , .	— — — — —
<i>Regimental-Quartermaster</i> ,	Lucius W. Knight, Boston.
<i>Surgeon</i> ,	James Holland, Westfield.
<i>Assistant-Surgeon</i> , . .	Oscar C. De Wolf, Chester.
<i>Battalion Quartermasters</i> ,	{ Edward A. Brackett, Winchester.
	{ Milton R. Bowen, Dorchester.
<i>Chaplain</i> ,	William C. Patterson, Dedham.

Captains.

Marcus A. Moore, Waltham.	Samuel E. Chamberlain, Cambridge.
Henry L. Higginson, Boston.	David B. Keith, Boston.
Atherton H. Stevens, Cambridge.	Caspar Crowninshield, Boston.
William Gibbs, Waltham.	James H. Case, Bridgewater.
Lucius Richmond, North Bridgewater.	Lucius M. Sargent, Jr., W. Roxbury.
Oren R. Shaw, Boston.	T. Lawrence Motley, Roxbury.

First Lieutenants.

Charles E. Rice, Brighton.
Greenleaf W. Batchelder, Boston.
Walter Miles, Charlestown.
Charles F. Adams, Jr., Quincy.
Edward R. Merrill, Boston.
Moses F. Webster, Boston.
Rufus D. Hills, New Bedford.
Channing Clapp, Boston.
Freeman H. Shiverick, N. Bridgewater.
Benjamin W. Crowninshield, Boston.

Second Lieutenants.

Horace N. Weld, Boston.
Myron C. Pratt, Holyoke.
Arnold A. Rand, Boston.
John G. Thayer, Waltham.
George F. Jennings, Boston.
H. Pelham Curtis, Boston.

This splendid regiment was ordered to be raised September 3d, and was sent to Camp Brigham, Readville. The officers of cavalry companies in the militia took an active part in its formation. Colonel Williams, of the regular army, one of the most accomplished cavalry officers in the service, was detailed to command it. This regiment left for the seat of war by detachments; the first being sent forward December 25th, the second December 27th, and the third on Sunday, December 29th. Colonel Williams was ordered to proceed with his command to Annapolis, and he was to report for orders to the Adjutant-General of the United States. The ultimate destination of this regiment has not yet been made public.

ARTILLERY BATTERIES.

No. 1.

<i>Captain,</i>	.	.	.	Josiah Porter, Cambridge.
<i>Senior 1st Lieutenant,</i>	.	.	.	William Henry McCartney, Boston.

<i>Senior 2d Lieutenant</i> , . .	Robert A. Dillingham, New Bedford.
<i>Junior 2d Lieutenant</i> , . .	Charles A. Phillips, Salem.

The first, second and third batteries are commanded by men who were officers in the First Light Artillery, Major Cook, and performed three months service. They are probably as completely equipped and as well officered as any of the same arm in the volunteer service.

The First, Captain Porter, was recruited at Camp Cameron, and was sent to Washington October 3d. In the grand review of artillery which took place near the Capitol about the first of November, General McClellan complimented Captain Porter and his command very highly. This battery is stationed near Washington.

The Second Battery, Captain Nims, was recruited at Camp Wollaston, in Quincy, and was known as Cobb's Battery. It was ordered to the seat of war August 8th. It was stationed near Baltimore, and formed part of the brigade which did so much good service in Accomac and Northampton Counties in Eastern Virginia. On its return from the expedition, it went back to its old camp near Baltimore, where it now is.

The Third Battery was recruited at Lynnfield, by Captain Dexter H. Follett, and was attached to the Twenty-Second Regiment. It proceeded to Washington with that regiment, October 7th. It is stationed on the Virginia side of the Potomac, in close proximity to the regiment to which it is attached. Since its departure from the State, Captain Follett has resigned his command, and his successor has not yet been appointed.

The Fourth Battery is attached to General Butler's command. It was recruited at Camp Chase, Lowell. The Section of Artillery, of Salem, Captain Manning, formed its nucleus. The battery sailed from Boston in the Constitution, for Ship Island, La., November 21st.

The Fifth Battery was recruited at Lynnfield, and was afterwards ordered to Camp Massasoit, Readville, whence it was ordered to Washington on the 25th of December, to report for orders to General McClellan. This battery is the only one which has left the State without a full and complete equipment. Everything was furnished except the horses, which Quartermaster-General Meigs, U. S. A., preferred to supply at Washington. The company is well officered, and is composed of the very best material.

In giving this hasty sketch of our Regiments, Battalions, Batteries and Companies, enlisted for three years and now absent from the Commonwealth, I have doubtless omitted many important facts, and passed over many names which should properly have been made prominent. It was not my purpose, however, to enter into details. Were I to do so, with such a mass of facts as are accumulated in this office, this Report would be swelled into a large volume.

It is proper also to state in this connection, that there have been in most of these commands a great many changes of officers since they left the Commonwealth. The preceding rosters show, as far as corrections were possible, who are now in command. To give a full list of the changes would confuse rather than instruct. This will be readily admitted when I inform your Excellency that sixteen hundred and twelve commissions have been issued from this office since the 15th of April last.

While our troops have been organized and sent forth to the battle-field, I have given much care and attention to the

descriptive rolls of our companies and regiments, causing them to be made out carefully by the several commanders, and deposited in this office. We have, therefore, the name, residence, age, occupation, and date of muster of nearly every man from this State in the volunteer service. These rolls have already been of great value in furnishing evidence to the cities and towns, to enable them under the State law to distribute relief money to families of the soldiers, and they will be of still greater value hereafter.

The following tables, compiled from these rolls, show the number of men which each city and town in the Commonwealth has already furnished; also the number furnished by each county and by other States :

Residence not given,	—	647	647
	957	25,218	26,175

It appears by these tables that the whole number of three years volunteers in our several commands is 26,175. Some rolls of the cavalry regiment and lists of recruits not yet received would certainly increase the number to 27,000. To these add the number of three months volunteers as exhibited in preceding tables, and the aggregate shows that since the 16th of April last Massachusetts has armed, equipped and sent to the war 30,736 men, or twice the number of the entire army of the United States one year ago.

Nor does this include six Massachusetts companies organized in Newburyport, West Cambridge, Milford, Lawrence, Boston, and Cambridgeport, which, finding at the time no places in our regiments, received permission on the last of May to join the Mozart Regiment and Sickles Brigade of New York; nor does it include two bodies of men raised by Major-General Butler, in Massachusetts, and in camp at Lowell and Pittsfield; nor the three hundred men in the "Union Coast Guard Regiment" at Fortress Monroe, under command of Colonel Wardrop. These, although not properly Massachusetts organizations, contain about twenty-nine hundred Massachusetts men, and added to the number already given would make a total of 33,636.

Since the commencement of the war 11,000 Massachusetts men have enlisted in the navy, and are now doing service on the decks of our ships. If we add these to the land forces, the grand total of men furnished by this Commonwealth to suppress rebellion and maintain law, will be 44,636.

No allowance is made in the above enumeration for men who have been enlisted in Massachusetts by persons from other States, who opened recruiting stations in our chief cities and towns, and have drawn away many who would otherwise have enlisted in our own companies, and many who thought the persons enlisting them were authorized by this State. It is a low estimate to place at 2,000 the number of Massachusetts men who were thus recruited, and who now swell the quota of New York and other States, while they lessen our own. From obvious reasons of public policy I consider that this outside recruiting should be discouraged, as well by our own State within her borders, as it is by other States within theirs.

The Act passed last May at the extra session of our Legislature, for the relief of families of Massachusetts Volunteers, has proved eminently wise and benevolent. Through the zealous co-operation of the several cities and towns in carrying out its provisions, not only has recruiting been greatly stimulated, but mothers, wives and children have been saved from utter destitution; for there are times when a soldier's pay is delayed, or squandered by his extravagance, and an allowance of a few dollars at once is a greater blessing than ten times the sum in prospective. But it was not surprising that an Act so hastily prepared should have some defects; and as I have had abundant opportunity to observe its practical working, I may be allowed a suggestion to your Excellency. If the Act were so amended that the city or town where the *applicant* resides should furnish the money, much confusion would be saved. As the law is now construed, the city or town where the volunteer resided when enrolled provides for his family; and not only is this residence often hard to ascertain, but in many cases families are deprived of the State aid, because they live at a great distance, while in other cases it is to be feared that there is fraud practised. If a man enlists as a resident of Boston, leaving a wife or mother in Worcester, she must apply for relief to Boston, where she is not known, and she must be at the expense of a journey perhaps without success, for she cannot easily prove in a strange place her identity or the worthiness of her claim. Again, if a claimant has children in the service residing in different towns, to which town shall she apply for relief? or what is to prevent her from drawing from several towns at the same time? although the law only allows for one child. Such cases have frequently come to my notice, and no doubt many more to the State Auditor; so that the liberality of the State is without avail to some persons, and liable to be squandered upon others.

On the 1st of November, Lieutenant-Colonel Browne, Military Secretary, prepared by your Excellency's direction the following letter, of which a copy was forwarded to each of the Colonels commanding Massachusetts Regiments. I have reason to believe that the excellent advice it contains has been productive of much good.

EXECUTIVE DEPARTMENT, BOSTON, }
November 1, 1861. }

Colonel,—I am directed by His Excellency Governor Andrew, to explain to you the following principles by which he desires to be guided in performing the duty of making appointments to vacancies among the commissioned officers of the Massachusetts Volunteer Regiments, which duty is imposed upon him by section third of chapter fifty-seven of the Acts passed at the first session of the thirty-seventh Congress. You are already acquainted with his views upon this subject, but it is deemed advisable to place them in a form in which they may be preserved on record among the official papers of your regiment.

To encourage the enlistment of intelligent and ambitious young men, and to reward merit which has been displayed in active service, he desires that as a general rule all such appointments shall be made by promotion in the regiment in which the vacancies exist. Unless there is some definite reason for acting otherwise, it is desirable that such promotion shall be made according to the principle of seniority in rank; and the relative rank of the commissioned officers of all volunteer organizations in their respective grades is prescribed (by General Order No. 66 of the War Department of the United States,) to be according to the dates of muster into service.

His Excellency desires that the commanding officers of the various Massachusetts regiments shall co-operate with him, in order to enable these appointments to be justly and promptly made. For this purpose he requests that whenever a vacancy shall occur, the commanding officer of the regiment shall prepare a recommendation for filling such vacancy, as well as for filling any other vacancies which would be consequent upon the adoption of such recommendation. This recommendation His Excellency desires to be submitted to the General commanding the Brigade to which the regiment is attached, for his approval to be endorsed thereon, and when so endorsed, to be forwarded to this Department.

Immediate action will be taken upon such recommendations, at the earliest moment after official notice of the existence of the vacancies is received at this Department from the office of the Adjutant-General of the United States Army, from which office they are certified to the Governors of the States, after being reported by the commanding officers of the various regiments agreeably to section third of General Order No. 63 of the War Department of the United States.

In making these recommendations it is desirable that the commanding officer shall adhere to the principle above recited of promotion in the regiment according to seniority of rank, unless there are especial reasons to the contrary; and whenever such reasons exist, (and a recommendation not conformable to that principle is accordingly made,) it is requested

that they shall be fully and specifically stated. Among such reasons may be mentioned acts of extraordinary gallantry, which it is always desired to reward with public commendation, and if possible consistently with justice to others, also with promotion.

If in any instance, the General commanding the Brigade shall decline to endorse approval upon such recommendations, it is respectfully requested that the reasons may be stated why such approval is withheld.

His Excellency further requests that the commanding officers of all Massachusetts regiments in the field, shall, as they may have occasion, report to this Department the condition of their commands, with any suggestions which may occur to them by which the Executive of this Commonwealth may contribute to their comfort, discipline, or efficiency. Constant inquiries are made at this Department concerning our regiments, which can only be answered by instituting such a correspondence. Among the facts which it is particularly desired shall from time to time be stated as changes are made therein, are the names and ranks of the Generals commanding the Brigade and Division to which the regiment is attached, and the post office address of the regiment, and of any detachments from it. In event of the regiment or any portion of it being engaged in battle, it is of great importance that a report of the casualties shall be made immediately to this Department, with full details of the killed, wounded and missing. And generally in event of any death or discharge in the regiment, a report should be made here, in order that the rolls in the office of the Adjutant-General of this Commonwealth may be altered accordingly, and because the official certificate of the fact to this Department may affect the financial disbursements or liabilities of Massachusetts under the Act for the relief of the families of our soldiers, (chap. 222 of Mass. Stat. of 1861,) and otherwise.

In this connection His Excellency wishes to call attention to the applications for pecuniary aid which are made sometimes to the Assistant-Quartermaster of Massachusetts, in New York city, by soldiers of Massachusetts regiments. These applications are preferred by two classes of men—soldiers returning home after being discharged as incompetent for service by reason of sickness or wounds, and soldiers who are either going to or returning from the State on furlough. In the case of the first class His Excellency cannot doubt that in every instance the commanding officers of our regiments take care to secure to their discharged soldiers the pay and allowances provided by law, which are amply sufficient to enable the recipients to reach their homes with speed and comfort—unless they are improvident or careless. But as regards the second class, His Excellency respectfully requests all officers to impress upon Massachusetts soldiers, travelling on furlough, that they have no claim for such relief or support, other than as private citizens

travelling for their own private business, pleasure or convenience; and the same motives of personal pride which would restrain them from asking pecuniary aid if they were clad in civilians' clothing, ought to make them equally reluctant to seek it when they wear the uniform of a soldier. The Assistant-Quartermaster at New York has not, and there is no law authorizing him to have public funds applicable to such purposes. It may be well to bring this fact to the attention of some soldiers applying for furloughs for the purpose of returning to Massachusetts.

It is with much regret that His Excellency feels obliged to allude to this practice, for it detracts from the high reputation which the soldiers of Massachusetts so deservedly have gained, and which it should be a matter of individual pride with them to preserve and increase. It is for the same reason that allusion must be made to another subject. The provisions of chapter 222 of the Massachusetts statutes of 1861 (known as the Soldiers' Families' Relief Act) are too familiar to you to need repetition. That Act instituted a system of public charity towards the needy families of our troops, in dispensing which the municipal authorities of our towns and cities act as the agents of the Commonwealth. For the purpose of correctly auditing these municipal accounts, with a view to reimbursement from the State treasury, the State Auditor has recourse to the descriptive rolls of the various regiments, on deposit in the Adjutant-General's office, as *prima facie* evidence of the facts which they recite, viz.: the name, residence, civil occupation, &c., of the soldier, and the memorandum usually made under the heading of "Remarks," of the number, sex, and relationship of the individuals (if any) depending on him for support, who, according to the terms of the Act, may, in the discretion of the municipal authorities, be made beneficiaries under it. The municipal authorities also look to these rolls as *prima facie* evidence of the entry into United States service of the soldiers whose families apply to them for relief. For these and other reasons it is of the utmost importance that the descriptive rolls should be made out with scrupulous accuracy, and in every instance of recruiting for a regiment in the field, that additional rolls of the new recruits should be deposited, and that all changes whether by death, discharge, desertion, or otherwise, should be promptly notified here as well as to the Federal authorities.

It is with mortification that His Excellency has investigated one instance in which an attempt has been made by a Massachusetts soldier to abuse the benevolent provisions of this Relief Act, by falsifying the return upon his descriptive roll, and it is represented by the chairman of the Board of Alien Commissioners that similar instances, although rare, are yet sufficiently numerous to justify allusion to their occurrence. Detection is in almost every case inevitable, because a soldier's enlist-

ment, name, residence, and family connexions, are matters of fact of which the descriptive roll affords by no means *absolute* evidence. The attempt to deceive is, however, no less criminal, and detrimental to the credit of our service. In the instance to which reference is made, the soldier, being unmarried, was endorsed upon the descriptive roll as having a wife and two children, and was detected in an attempt to persuade a woman of bad character to apply to the municipal authorities of his city for relief under the Act, as being his wife. To her credit she appears to have indignantly rejected the proposal.

Happily such instances for censure are very rare, and it may well be doubted whether a more intelligent and moral body of citizens ever assumed arms, than the thirty thousand soldiers whom Massachusetts, since the 15th of April, has contributed to the armies of the United States. Their conduct in the field has confirmed public confidence in the excellence of the system of society under which they have been reared. They are regarded by the people of Massachusetts with feelings of unalloyed pride, and with a firm assurance that the name of no Massachusetts soldier will ever be reproached for cowardice or disloyalty.

I have the honor to be

Respectfully your obedient servant,

ALBERT G. BROWNE, Jr.,
Lieut.-Col. and Military Secretary.

By order of His Excellency GOVERNOR ANDREW.

The experience of this office shows that a large proportion of the discharged soldiers are sent on with scarcely sufficient money to pay their expenses home, and in this connection, I would respectfully call the attention of your Excellency to the importance of having some place of general rendezvous in this city for the accommodation of soldiers who are left behind by their regiments, and others who are constantly returning home, on furlough, sick, wounded or discharged. Soldiers thus situated call almost every day at this office, who require food, rest and transportation to their towns. They are generally penniless. They have no means of procuring lodging or food. Men belonging to Maine and New Hampshire regiments frequently apply for a meal and lodging. They have no money and have either to crave charity or wander about the streets all night hungry and footsore; or they have to apply at the Police Station houses of the city, where they are quartered with the vicious and degraded. A great deal of suffering has thus been caused to these worthy soldiers of the Union.

New York, Philadelphia and Baltimore have each a soldiers' home, where food and sleeping accommodations are furnished without charge to the weary, sick and suffering soldiers. A similar place of resort is required in Boston. The cost would not be great, and under judicious management its benefits would be incalculable. I regard such a place as an absolute necessity.

Before leaving this subject, I wish to express, in behalf of our poor and wounded men who have passed through New York to and from the seat of war, my thanks for the unceasing vigilance and untiring sympathy, kindness and liberality of Colonel Frank E. Howe, Assistant-Quartermaster in that city. He will long be remembered with gratitude by our Massachusetts soldiers.

I append tables exhibiting the present condition of the Volunteer Militia of this Commonwealth.

Roster of Massachusetts Volunteer Militia, January, 1862.

FIRST DIVISION.

Major-General, Samuel Andrews, Roxbury.—*Division Inspector*, P. Stearns Davis, Cambridge.—*Quartermaster*, Preston A. Ames, Boston.—*Engineer*, John R. Hall, Roxbury.—*Aide-de-Camp*, Henry C. Brooks, Boston.—*Aide-de-Camp*, Joseph L. Henshaw, Boston.—*Judge-Advocate*, Thornton K. Lothrop, Boston.

FIRST BRIGADE.

Brigadier-General, William W. Bullock, Cambridge.—*Brigade Inspector*, Solon Fisher, Boston.—*Aide-de-Camp*, John Federhen, 3d, Boston.—*Engineer*, William J. Faulkner, Boston.

FIRST REGIMENT OF INFANTRY.

Lieut.-Colonel Commanding, Isaac S. Burrell, Roxbury.—*Major*, Thomas L. D. Perkins, Roxbury.—*Adjutant*, George W. Beach, Boston.—*Quartermaster*, Sidney A. Stetson, Boston.—*Paymaster*, John S. Blair, Boston.

Company A, Boston. 4th Lieutenant Linus M. Child, Boston, commanding. 1 Sergeant, 34 Privates.

Company B, Boston. 4th Lieutenant James A. Cook, Boston, commanding. 2 Sergeants, 12 Privates.

Company C, Boston. 3d Lieutenant Thomas L. Wallwork, Boston, commanding.

2 Sergeants, 2 Corporals, 25 Privates.

Company D, Roxbury. 3d Lieutenant George W. Palmer, Roxbury, commanding.

1 Corporal, 35 Privates.

Company E, Boston. 3d Lieutenant Samuel C. Davis, Boston, commanding.
—4th Lieutenant, David Hale, Boston.
2 Sergeants, 29 Privates.

Company F, Boston. 1st Lieutenant William H. Russ, Boston, commanding.
—2d Lieutenant, William A. Clark, Boston.
1 Sergeant, 2 Corporals, 26 Privates.

Company G, Boston. 4th Lieutenant Charles C. Hathaway, Boston, commanding.
1 Sergeant, 2 Corporals, 37 Privates.

SECOND BATTALION OF INFANTRY.

Major, Ralph W. Newton, Boston.—*Adjutant,* Robert C. Nichols, Roxbury.

Company A, Boston. Captain, John C. Whiton, Boston.—1st Lieutenant, Joshua M. Cushing, Boston.—2d Lieutenant, John F. Peirce, Boston.—4th Lieutenant, James C. Laughton, Boston.
4 Sergeants, 2 Corporals, 75 Privates.

Company B, Boston. Captain, Charles O. Rogers, Boston.—1st Lieutenant, Andrew G. Smith, Boston.—2d Lieutenant, Charles H. Allen, Boston.—3d Lieutenant, Edward G. Quincy, Boston.
4 Sergeants, 1 Corporal, 33 Privates.

Company C, Boston. 1st Lieutenant Robert B. Brown, Dorchester, commanding.—3d Lieutenant, Samuel Hichborn, Boston.—4th Lieutenant, John L. Swift, Roxbury.
2 Sergeants, 3 Corporals, 40 Privates.

FOURTH BATTALION OF INFANTRY.

[No Field nor Staff Officers.]

Company A, Boston. 2d Lieutenant Edward M. Dennie, Boston, commanding.—4th Lieutenant, Stephen Cabot, Boston.
1 Sergeant, 2 Corporals, 53 Privates.

Company B, Boston. 1st Lieutenant James R. Gregerson, Boston, commanding.—2d Lieutenant, Isaac Butts, Boston.
1 Sergeant, 2 Corporals, 46 Privates.

FOURTH BATTALION OF RIFLEMEN.

[No Field Officers.]—*Surgeon,* Anthony Rupper, Boston.

Company A, Boston. [No commissioned officers.]
1 Sergeant, 1 Corporal, 21 Privates.

Company B, Boston. 4th Lieutenant Horace T. Rockwell, Boston, commanding.
21 Privates.

FIRST BATTALION OF LIGHT DRAGOONS.

Adjutant, Edmund Train, Cambridge.—*Quartermaster,* Erastus C. Bates, Cambridge.—*Surgeon,* Moses C. Greene, Boston.

Company A, Boston. Captain, Lucius Slade, Boston.—2d Lieutenant, Albert H. Sanborn, Somerville.—4th Lieutenant, George Souther, Boston.
3 Sergeants, 4 Corporals, 95 Privates.

Company B, Boston. Captain, Thomas J. Peirce, Woburn.—1st Lieutenant, Charles T. Stevens, Boston.—2d Lieutenant, John S. Leonard, Boston.
4 Sergeants, 4 Corporals, 103 Privates.

COMPANY OF LIGHT ARTILLERY.—FIRST BRIGADE.

[No Captain. No Lieutenants.]

Quartermaster, Thomas J. Foss, Boston.—*Surgeon*, John P. Ordway, Boston.
1 Sergeant, 3 Corporals, 54 Privates.

COMPANY OF CADETS.—FIRST DIVISION.

Captain, C. C. Holmes, Milton.—*Lieutenant*, A. C. Baldwin, Boston.—*Ensign*, John Jeffries, Jr., Boston.—*Adjutant*, Charles R. Codman, Boston.—*Quartermaster*, Curtis B. Raymond, Boston.—*Surgeon*, Ezra Palmer, Boston.—*First Lieutenants*, J. M. Churchill, Milton; Russell Sturgis, Jr., Boston; G. H. Blanchard, Boston; Charles O. Rich, Boston; Frank Hodgkinson, West Roxbury; William R. Paine, Brookline; George J. Fisher, Brookline.

15 Sergeants, 16 Corporals, 93 Privates.

SECOND BRIGADE.

Brigade Inspector, Richard A. Peirce, New Bedford.—*Brigade Quartermaster*, William C. Lovering, Taunton.—*Aide-de-Camp*, Silas P. Richmond, Freetown.

COMPANY OF DRAGOONS.

[No Return.]

THIRD REGIMENT OF INFANTRY.

[No Return.]

FOURTH REGIMENT OF INFANTRY.

Colonel, Abner B. Packard, Quincy.—*Major*, Horace O. Whittemore, Boston.—*Adjutant*, Henry Walker, Quincy.—*Quartermaster*, William W. Carruth, Boston.—*Paymaster*, William D. Atkinson, Boston.—*Surgeon*, Henry M. Saville, Quincy.—*Surgeon's Mate*, W. Lyman Faxon, Quincy.

Company A, Canton. Captain, Ira Drake, Stoughton.—1st Lieutenant, Henry U. Morse, Canton.—2d Lieutenant, Walter Cameron, Canton.
4 Sergeants, 4 Corporals, 68 Privates.

Company B, Easton. Captain, Milo M. Williams, Easton.—1st Lieutenant, Linton Waldron, Easton.—2d Lieutenant, William E. Bump, Jr., Easton.
2 Sergeants, 2 Corporals, 22 Privates.

Company C, Braintree. Captain, James T. Stevens, Braintree.—1st Lieutenant, Isaac P. Fuller, Braintree.—2d Lieutenant, William M. Richards, Braintree.

2 Sergeants, 4 Corporals, 31 Privates.

Company D, Randolph. Captain, Horace Niles, Randolph.—1st Lieutenant, Otis S. Wilbur, Randolph.—2d Lieutenant, Hiram F. Wales, Randolph.—3d Lieutenant, Charles Howland, Randolph.—4th Lieutenant, Nathan E. Buck, Randolph.

4 Sergeants, 3 Corporals, 1 Musician, 49 Privates.

Company E, Abington. Captain, Charles F. Allen, Abington.—1st Lieutenant, Lewis Soule, Abington.—2d Lieutenant, John W. Mitchell, Abington.—3d Lieutenant, Jerome Washburn, Abington.—4th Lieutenant, Joseph W. Caton, Abington.

3 Sergeants, 4 Corporals, 32 Privates.

Company F, Foxborough. Captain, David L. Shepard, Foxborough.—1st Lieutenant, Moses A. Richardson, Foxborough.—3d Lieutenant, Simeon G. Blandin, Taunton.

3 Sergeants, 3 Corporals, 32 Privates.

Company G, Taunton. Captain, Timothy Gordon, Taunton.—1st Lieutenant, Henry C. Perry, Taunton.—2d Lieutenant, Zaccheus Sherman, Taunton.—3d Lieutenant, Frederick A. Harrington, Taunton.—4th Lieutenant, William R. Black, Taunton.

2 Sergeants, 4 Corporals, 2 Musicians, 20 Privates.

Company H, Quincy. Captain, Edward A. Spear, Quincy.—1st Lieutenant, William S. Glover, Quincy.—2d Lieutenant, William G. Sheen, Quincy.

5 Sergeants, 4 Corporals, 12 Privates.

Company I, Hingham. 1st Lieutenant Charles Sprague, Hingham, commanding.

3 Sergeants, 2 Corporals, 27 Privates.

SECOND DIVISION.

Major-General, William Sutton, Salem.—*Division Inspector,* Daniel Perkins, Salem.—*Quartermaster,* William Saunders, Salem.—*Aid-de-Camp,* William C. Prescott, Salem.—*Aid-de-Camp,* Eben Sutton, Salem.—*Engineer,* Edward G. Parker, Boston.—*Judge-Advocate,* Alfred A. Abbott, South Danvers.

THIRD BRIGADE.

Brigade Inspector, William H. Clemence, Lowell.—*Quartermaster,* Thomas J. Porter, Woburn.—*Aid-de-Camp,* Samuel E. Convers, Lowell.

COMPANY OF LIGHT DRAGOONS, OF THIRD BRIGADE.

1st Lieutenant Frank E. Stanley, Waltham, commanding.—3d Lieutenant, Thomas Farnsworth, Waltham.—4th Lieutenant, Abel W. Sherman, Waltham.

3 Sergeants, 2 Corporals, 28 Privates.

FIFTH REGIMENT OF INFANTRY.

Colonel, Samuel C. Lawrence, Medford.—*Lieutenant-Colonel*, George H. Peirson, Salem.—*Major*, John T. Boyd, Charlestown.—*Quartermaster*, Joseph E. Billings, Boston.—*Surgeon*, Samuel H. Hurd, Charlestown.—*Assistant Surgeon*, William W. Keen, Jr., Philadelphia.

Company A, Concord. 1st Lieutenant Joseph Derby, Jr., Concord, commanding.—2d Lieutenant, Humphrey H. Buttrick, Concord.—3d Lieutenant, Charles Bowers, Concord.

4 Sergeants, 4 Corporals, 50 Privates.

Company B, Somerville. Captain, George O. Brastow, Somerville.—1st Lieutenant, William E. Robinson, Somerville.—2d Lieutenant, Frederick R. Kinsley, Somerville.

3 Sergeants, 4 Corporals, 40 Privates.

Company D, Charlestown. 1st Lieutenant Phineas H. Tibbetts, Charlestown, commanding.—2d Lieutenant, John W. Rose, Boston.—3d Lieutenant, Hannibal D. Norton, Chelsea.—4th Lieutenant, George H. Marden, Jr., Charlestown.

4 Sergeants, 4 Corporals, 31 Privates.

Company E, Medford. Captain, John Hutchins, Medford.—2d Lieutenant, Perry Coleman, Medford.—3d Lieutenant, William H. Patte, West Cambridge.

3 Sergeants, 1 Corporal, 52 Privates.

Company H, Charlestown. Captain, John B. Norton, Charlestown.—1st Lieutenant, Caleb Drew, Charlestown.—2d Lieutenant, Walter Everett, Charlestown.

4 Sergeants, 4 Corporals, 76 Privates.

SECOND BATTALION RIFLEMEN.

Adjutant, James T. Joslin, Marlborough.—*Quartermaster*, Luther H. Farnsworth, Marlborough.—*Surgeon*, William W. Claflin, Marlborough.

Company A, Marlborough. 4th Lieutenant Rufus H. Brigham.

No members.

Company C, Natick. 2d Lieutenant Aaron W. Pray, Natick, commanding.
2 Sergeants, 1 Musician, 13 Privates.

SIXTH REGIMENT OF INFANTRY.

Paymaster, Rufus L. Plaisted, Lowell.—*Surgeon*, Normon Smith, Groton.—*Surgeon's-Mate*, Jansen T. Paine, Charlestown.

Company A, Lowell. 2d Lieutenant Andrew C. Wright, Lowell, commanding.

3 Sergeants, 2 Corporals, 37 Privates.

Company B, Groton. 1st Lieutenant, George F. Shattuck, Groton.—2d Lieutenant, Samuel G. Blood, Groton.—4th Lieutenant, Rodney D. Cragin, Lowell.

3 Sergeants, 4 Corporals, 1 Musician, 37 Privates.

Company C, Lowell. Captain, Albert S. Follansbee, Lowell.—2d Lieutenant, John C. Jepson, Lowell.—3d Lieutenant, Henry H. Wilder, Lowell.

3 Sergeants, 3 Corporals, 33 Privates.

Company D, Lowell. 1st Lieutenant, Charles E. Jones, Lowell.—3d Lieutenant, Samuel C. Pinney, Lowell.—4th Lieutenant, Llewellyn L. Craig, Lowell.

5 Sergeants, 1 Corporal, 33 Privates.

Company E, Acton. 2d Lieutenant George W. Rand, Acton, commanding.—4th Lieutenant, Aaron S. Fletcher, Acton.

3 Sergeants, 3 Corporals, 2 Musicians, 26 Privates.

Company F, Lawrence. Captain, Melvin Beal, Lawrence.—2d Lieutenant, Jerome Cross, Methuen.—3d Lieutenant, Jesse C. Silver, Lawrence.

1 Sergeant, 1 Corporal, 2 Musicians, 23 Privates.

Company H, Lowell. Captain, John F. Noyes, Lowell.—2d Lieutenant, Andrew F. Jewett, Lowell.—3d Lieutenant, Benjamin Warren, Lowell.

2 Sergeants, 2 Corporals, 26 Privates.

Company I, Lawrence. 2d Lieutenant A. Lawrence Hamilton, Lawrence, commanding.—3d Lieutenant, Eben H. Ellenwood, Lawrence.—4th Lieutenant, Eugene J. Mason, Lawrence.

3 Sergeants, 3 Corporals, 20 Privates.

FOURTH BRIGADE.

Brigadier-General, Joseph Andrews, Salem.—*Engineer,* William A. Williams, Chelsea.—*Aid-de-Camp,* Charles H. Almy, Boston.

SECTION OF LIGHT ARTILLERY OF FOURTH BRIGADE, SALEM.

1st Lieutenant Edward Wilson, Salem, commanding.—2d Lieutenant, Stephen W. Mansfield, Salem.—*Surgeon,* Elisha H. Quimby, Salem.

2 Sergeants, 2 Corporals, 28 Privates.

SEVENTH REGIMENT OF INFANTRY.

Colonel, Lyman Dike, Stoneham.—*Lieutenant-Colonel,* Simeon Flint, Salem.—*Adjutant,* Charles M. Maudant, Lynn.—*Quartermaster,* Cyrus Hobbs, Chelsea.—*Paymaster,* Solon O. Richardson, Jr., South Reading.—*Surgeon,* William H. Heath, Stoneham.—*Surgeon's Mate,* John M. Grovesnor, Danvers.

Company A, Salem. Captain, George D. Putnam, Salem.—2d Lieutenant, Robert W. Reeves, Salem.

3 Sergeants, 1 Corporal, 35 Privates.

Company B, Salem. Captain, Edward H. Staten, Salem.—1st Lieutenant, Isaac S. Noyes, Salem.

3 Sergeants, 4 Corporals, 64 Privates.

Company C, Stoneham. Captain, John H. Dike, Stoneham.—1st Lieutenant, Leander F. Lynde, Stoneham.—2d Lieutenant, Darius N. Stevens, Stoneham.—3d Lieutenant, James F. Rowe, Stoneham.

4 Sergeants, 3 Corporals, 2 Musicians, 33 Privates.

Company E, South Reading. 1st Lieutenant Charles H. Shepard, South Reading, commanding.—2d Lieutenant, James D. Draper, South Reading.
4 Sergeants, 76 Privates.

Company G, Haverhill. Captain, Carlos P. Messer, Haverhill.—1st Lieutenant, George J. Dean, Haverhill.—3d Lieutenant, Charles H. P. Palmer, Haverhill.

3 Sergeants, 2, Corporals, 2 Musicians, 51 Privates.

Company H, Salem. Captain, Henry F. Danforth, Salem.—2d Lieutenant, William F. Sumner, South Danvers.—3d Lieutenant, George H. Wiley, South Danvers.—4th Lieutenant, John E. Stone, South Danvers.

2 Sergeants, 2 Corporals, 43 Privates.

EIGHTH REGIMENT OF INFANTRY.

Adjutant, George Creasey, Newburyport.—*Quartermaster*, Ephraim A. Ingalls, Lynn.—*Surgeon*, Bowman B. Breed, Lynn.—*Surgeon's Mate*, Warren Tapley, Lynn.—*Chaplain*, Gilbert Haven, Lynn.

Company A, Newburyport. Captain, Albert W. Bartlett, Newburyport.—1st Lieutenant, George Barker, Newburyport.—2d Lieutenant, Gamaliel Hodges, Newburyport.—3d Lieutenant, Nathan W. Collins, Newburyport.—4th Lieutenant, Edward L. Noyes, Newburyport.

1 Sergeant, 3 Corporals, 52 Privates.

Company B, Marblehead. Captain, Richard Phillips, Marblehead.—1st Lieutenant, Abiel S. Roads, Jr., Marblehead.—2d Lieutenant, Eli V. Bartlett, Marblehead.—3d Lieutenant, William S. Roads, Marblehead.—4th Lieutenant, William Cash, Marblehead.

5 Sergeants, 4 Corporals, 34 Privates.

Company C, Marblehead. 1st Lieutenant, Samuel C. Graves, Marblehead.—2d Lieutenant, Lorenzo F. Linnell, Marblehead.—3d Lieutenant, John Stevens, 2d, Marblehead.—4th Lieutenant, John H. Haskell, Marblehead.

4 Sergeants, 3 Corporals, 50 Privates.

Company D, Lynn. George T. Newhall, Lynn.—1st Lieutenant, Thomas H. Berry, Lynn.—2d Lieutenant, Elbridge Z. Saunderson, Lynn.

3 Sergeants, 4 Corporals, 2 Musicians, 52 Privates.

Company E, Beverly. Captain, Francis E. Porter, Beverly.—2d Lieutenant, Eleazer Giles, Beverly.—3d Lieutenant, Albert Wallis, Beverly.—4th Lieutenant, Moses S. Herrick, Beverly.

4 Sergeants, 4 Corporals, 36 Privates.

Company F, Lynn. Captain, James Hudson, Jr., Lynn.—1st Lieutenant, Edward A. Chandler, Lynn.—2d Lieutenant, Henry Stone, Lynn.—3d Lieutenant, Jeremiah O. Marshall, Lynn.—4th Lieutenant, Matthias N. Snodgrass, Lynn.

4 Sergeants, 3 Corporals, 1 Musician, 45 Privates.

Company G, Gloucester. 1st Lieutenant David W. Low, Gloucester, commanding.

4 Sergeants, 3 Corporals, 44 Privates.

Company H, Marblehead. Captain Francis Boardman, Marblehead.—2d Lieutenant, Thomas Cloon, Marblehead.—4th Lieutenant, Joseph S. Caswell, Marblehead.

4 Sergeants, 3 Corporals, 1 Musician, 34 Privates.

FIRST BATTALION OF RIFLEMEN.

Quartermaster, Samuel W. Haynes, Newburyport.—*Surgeon,* David L. Ambrose, West Newbury.

Company A, West Newbury. 2d Lieutenant Benjamin H. Wilson, West Newbury, commanding.

1 Sergeant, 4 Corporals, 56 Privates.

Company B, Newbury. Captain, T. Lyman Pearsons, Newbury.—1st Lieutenant, William H. Gould, Newbury.—2d Lieutenant, Thomas B. Robbins, Newbury.—3d Lieutenant, Jacob Rogers, Newbury.

1 Musician, 17 Privates.

Company C, Rowley. 1st Lieutenant Timothy W. Emerson, Rowley, commanding.

5 Sergeants, 4 Corporals, 2 Musicians, 40 Privates.

THIRD DIVISION.

Division Inspector, Charles H. Merriam, Leominster.—*Aid-de-Camp,* William B. Wood, Fitchburg.

[Major-General Morse, Brigadier-General Ward, and Colonels Decker and Rice, of this Division, having accepted commissions in the Massachusetts three years Volunteers, and Brigadier-General Richmond having died, the command of the Division devolves upon Lieutenant-Colonel Palmer, of Ninth Regiment Infantry.]

FIFTH BRIGADE.

Aid-de-Camp, Harvey B. Wilder, Worcester.—*Engineer,* Andrew McF. Davis, Worcester.

NINTH REGIMENT INFANTRY.

* No returns.

The foregoing returns of the Volunteer Militia of the State, made in obedience to a General Order, show, in the First and Second Divisions, an aggregate of about two-thirds the number of the active men reported at the several encampments last year. The companies in the western part of the Commonwealth, constituting the Third Division, in common with those of the other Divisions, contributed largely, of both officers and men, to the

number of Volunteers for the War ; and in consequence of the large extent of territory over which the officers at present commanding are spread, it has not been possible to obtain full returns from them in season for this Report. They will undoubtedly exhibit a proportion similar to those of the other Divisions.

Considering the great number of officers and men belonging to the militia who have entered the three years volunteer regiments, and are now in the service of the United States, the vitality remaining is remarkable. The arms and equipments which these companies had in their armories were taken from them for active use, and have not been replaced. I hope the Master of Ordnance will soon be able to furnish them with the usual equipment allowed by the law. When this is done, the companies will be recruited to the full standard and we shall have the Volunteer Militia in as good condition as ever.

I would suggest in this connection that our militia law be so amended as to allow ten companies of one hundred and one men each, to a regiment ; also that each company have two Lieutenants, instead of four, the present number. This is in conformity with the organization of the regular army and three years volunteers.

With these exceptions, I recommend that no change be made in our militia law. It is believed that Congress will soon pass a law for the organization and discipline of the militia of the several States. Every day we are gaining fresh experience, and it would be well to let our present system remain in operation until the close of the war, when a national system could be inaugurated which would make us in after years invincible in array against the world.

The returns of the assessors of the several cities and towns in the Commonwealth, made in compliance with section 2, chapter 13 of the General Statutes, show the number of *Enrolled Militia* in the State to be, for the year 1861, 157,496 men ; being an increase of 2,107 over the returns of 1860.

The usual militia encampments have been omitted during the past year ; but camps were formed, from time to time, for the discipline, instruction and organization of the volunteer forces previous to their departure from the State.

I respectfully call attention to the fact that many, who were regularly detailed for service at these camps and performed duty faithfully, have as yet received no compensation for their services. They labored hard and incurred considerable expense in drilling and recruiting companies which have since gone to the war, and of which they were acting commanders. For various reasons they were not subsequently commissioned, and not being mustered into the service of the United States, could receive no pay from the United States paymaster. I would suggest that these men be paid by the Commonwealth, and that a claim be hereafter made upon the General Government for reimbursement.

The principal duties performed by officers of the militia, since the outbreak of the rebellion, are as follows:—

April 24.—The Fourth Battalion of Infantry, Major Stevenson, was ordered to Fort Independence, and performed garrison duty until May 21.

April 27.—Brigadier-General W. W. Bullock was placed in temporary command of the Cambridge Arsenal. He was relieved May 2d by Lieutenant-Colonel Holmes, commanding the Cadets, and a guard of Harvard students performed service until May 30.

April 29.—The Second Battalion of Infantry, Major Newton, was ordered to Fort Warren, for garrison duty, and remained until May 21.

May 1.—Major-General Samuel Andrews was placed in command of Forts Warren and Independence; released from duty June 1.

May 11.—Brigadier-General Bullock was ordered to the command of Long Island, Boston Harbor, where the Thirteenth and Fourteenth Irish Regiments, which afterwards were consolidated and formed the Ninth, were stationed. The Camp was discontinued June 12.

May 13.—Brigadier-General E. W. Peirce was ordered to command the troops at Fort Warren, where he remained until May 27.

May 21.—The Fourth Battalion of Rifles, Major Leonard, was ordered to Fort Independence. Major Leonard assumed command of the Fort June 1.

May 27.—Brigadier-General Joseph Andrews was ordered to the command of Fort Warren, and remained until August 21, when he was released from duty.

June 25.—Brigadier-General George H. Ward was placed in command of the troops at the Brook Farm, Worcester. He was subsequently commissioned Lieutenant-Colonel of the Fifteenth Regiment Massachusetts Volunteers.

July 10.—Colonel Lyman Dike was ordered to command the troops in camp at Lynnfield: relieved August 22. He afterwards was placed in command, and performed duty from September 6 to 12.

July 16.—Major-General Augustus Morse was detailed to command the troops in camp at Worcester. He subsequently was appointed to the command of the Twenty-First Regiment Massachusetts Volunteers.

September 12.—Brigadier-General Joseph Andrews was placed in command of Fort Warren, where he remained until September 23. He immediately assumed command of Camp Cameron, Cambridge, where he remained until released from duty November 18.

November 18.—Brigadier-General Bullock assumed temporary command of the troops at Camp Cameron, and remained until November 27.

On the 25th of April, Major-Generals Sutton, Morse, and Andrews, with portions of their respective staffs, were appointed a Board to examine candidates for commissions. Their head-

quarters were at the State House. They were released from duty May 24, having examined during the time they were in session six hundred and forty-one men, thirty-nine of whom were rejected. They performed their delicate trust with fidelity, and their labor has been of much value to the Commonwealth.

On the 24th of July a General Recruiting Station was opened in Boston, and Brigadier-General Bullock was ordered to superintend the business of recruiting for our volunteer regiments, which duty he discharged with ability and success. He was released, and the Recruiting Office discontinued, on the 11th of December. The number of men enlisted by General Bullock and his agents in different cities and towns already returned, is six thousand nine hundred and thirty-six ; and it is believed that the number will be increased by two thousand when all the returns are received. The State is entitled to reimbursement by the General Government for the expenses of the Recruiting Station.

On several occasions during the year 1861, companies were detailed to perform escort duty.

The great increase of business in this department since the commencement of the war, has rendered necessary the employment of four additional clerks and a messenger, the salaries of whom amount in the aggregate to \$2,805.10. During the past year there have been twenty-eight general and six hundred and fifty-one special orders issued from this office, and eleven hundred and eighty-six letters written and recorded. The total number of general orders for the five previous years, is thirty-six, of special orders one hundred and fifty-nine, and of recorded letters six hundred and eleven. About twenty thousand certificates from the descriptive rolls have been written and furnished to families of volunteers and the authorities of cities and towns. The average number of persons visiting this office since the middle of April last is at least one hundred and fifty per day, and one day by actual count there were six hundred and fifty-three.

The appropriations and expenditures for the year 1861 are as follows :—

Appropriation for militia bounty, . . .	\$43,000 00
Drawn,	220 00
Balance,	<u>\$42,780 00</u>
Appropriation for Adj't and Q. M. Gen'l's Dep't, . . .	\$4,630 80
Drawn,	3,303 55
Balance,	<u>\$1,327 25</u>
Appropriation for military accounts, . . .	\$5,500 00
Drawn,	521 50
Balance,	<u>\$4,978 50</u>
Appropriation for office incidentals, . . .	\$350 00
Drawn,	196 73
Balance,	<u>\$153 27</u>
Appropriation for armory rents, . . .	\$11,000 00
[Accounts not yet rendered. Probably the whole appropriation will be required.]	
Appropriation for equipment of troops, . . .	\$25,000 00
Drawn,	24,360 98
Balance,	<u>\$639 12</u>

In the performance of official duties I have frequently visited the different camps in the State, to aid in the recruiting, disciplining and organizing of the volunteer regiments, and also to settle disputes and difficulties arising in appointments and disappointments, and am proud to say that the conduct of officers and men has been on every occasion respectful and soldierlike. Good order, cleanliness and good health have prevailed in the camps, and no serious accidents have occurred.

Before closing this Report, I deem it proper to acknowledge publicly the kind and generous offers of assistance repeatedly made by gentlemen long connected with the militia of the Commonwealth, of whose services I have availed myself on several occasions; and particularly to express my sincere thank

to Colonel Newell A. Thompson and William W. Warren, Esq., of Boston, for their valuable aid in despatching the business of this department during the months of April and May.

To the brave men who have gone forth to meet the ordeal of death in defence of law and liberty, the Commonwealth will ever be grateful. I feel that the narrative of the foregoing pages illustrates but faintly the earnest and lofty spirit of patriotism, of honor, and of devotion to duty, which inspires the citizen soldiers of Massachusetts. They have all shown me kindness and attention which I shall never forget, and which I have endeavored in part to repay by a faithful discharge of my duty to them and theirs.

With much respect, I have the honor to be,
Your Excellency's obedient servant,

WILLIAM CHOULER,
Adjutant-General.

R E P O R T

OF THE

QUARTERMASTER-GENERAL.

FEBRUARY 1ST, 1862.

Commonwealth of Massachusetts.

QUARTERMASTER-GENERAL'S OFFICE, BOSTON, February 1, 1862.

Brigadier-General WILLIAM SCHOULER, *Adjutant-General of the Commonwealth of Massachusetts.*

Sir,—I have the honor to transmit, through you, a Report of the transactions of this Department, to date, for the information of His Excellency the Governor and Commander-in-Chief.

I am, Sir, very respectfully, your obedient servant,

JOHN H. REED,
Quartermaster-General of Massachusetts.

Commonwealth of Massachusetts.

QUARTERMASTER-GENERAL'S OFFICE, BOSTON, }
February 1, 1862. }

To His Excellency JOHN A. ANDREW, *Governor and Commander-in-Chief of the Commonwealth of Massachusetts.*

Sir,—On the 20th of April last I had the honor to receive from your hands the commission of Quartermaster-General of this Commonwealth.

I now beg to report the doings of my office to date.

As soon after the receipt of my commission as practicable, the Military Committee of the Executive Council provided a store-house and store-keeper, for the charge of property belonging to the State appertaining to my department.

From that date, as far as possible, a correct account of all property issued has been kept, a condensed statement of which is annexed, marked [A.]

There are also annexed statements of serviceable property in the State store-house, marked [B.]

Of unserviceable property in said store-house, marked [C.]

Of serviceable property in Cambridge Arsenal, belonging to this department, marked [D.]

Of unserviceable property in said arsenal, marked [E.]

I also append an account of all moneys received, and deposited with the State treasurer by me, for property sold under authority of the Governor and Council, marked [F.]

An account of all warrants drawn in my favor for special purposes, marked [G.]

An account of the disbursement of thirty thousand dollars placed in my hands by order of the Governor and Council, for the payment of various incidental expenses, marked [H.]

The statements [F.], [G.], and [H.], present a detailed account of all the cash transactions which have passed through my hands.

All other expenditures or disbursements have been upon the order or approval of your Excellency and the Council, and the warrants for the same not having passed through my hands, I have no knowledge of the amounts so paid. The report of the Auditor of the Commonwealth will doubtless furnish all the details.

I have the honor to remain, with great respect,
Your Excellency's obedient servant,

JOHN H. REED, *Quartermaster-General.*

REPORT
OF THE
SURGEON-GENERAL.

DECEMBER 1ST, 1861.

Commonwealth of Massachusetts.

OFFICE OF SURGEON-GENERAL, BOSTON, {
December 1, 1861. }

To His Excellency JOHN A. ANDREW, *Governor and Commander-in-Chief.*

SIR,—In obedience to an order, received through the Secretary of the Commonwealth, for a full statement of all contracts, expenses, and disbursements in this Department, I have the honor to report, as follows :

The duties of this office were assumed by me on the 16th day of June last. Prior to that time, from the 16th day of April, the medical supervision of the volunteer regiments was under the direction of an informal medical board, assisted by an advisory commission of physicians and surgeons who represented the State as a board of examining surgeons.

No contracts have been made by this Department, as the orders for the construction of ambulances, tents, mess chests, and other supplies for a movable hospital, were made prior to the date of my commission.

The three months volunteers were furnished with their supplies on the order of your Excellency, through the Adjutant-General.

The regiments mustered into the service of the United States were supplied by the order of the Military Committee of the honorable Council, the regulation supply of the army for three months' field service being the standard, with such variations as the Medical Department thought advisable.

The three months volunteers were furnished with the regular army supply of opium and quinine; but our troops, in the opinion of the commissioner appointed by yourself, needing a much less quantity, a part was delivered to the United States by your order, and receipts taken, which are on file.

The regiments enlisted for the full term of service were supplied with half the quantity of opium and quinine, with the exception of the Twentieth, the Surgeon of that regiment making full requisitions for these and other supplies.

In some of the regiments, the amount for field service is below the standard supply of the army regulation—in no case has it ever exceeded. The medicines and surgical instruments of the three months volunteers, not delivered to the United States, have been returned to this Department, and made over to the regiments for three years, as appears by schedule accompanying this Report. All the supplies for hospital use have been of the best quality, and were delivered with a commendable promptness.

The accompanying papers exhibit the amounts supplied whilst in camp, in this State, and for field service for three months.

It is believed, whilst the medicines, instruments, surgical dressings, and hospital stores have been of the best quality, they have been furnished to the Commonwealth at as cheap a rate as if furnished by the United States, and at a less cost, than charged the general government by other States.

Herewith is submitted a schedule of every article for hospital use, delivered to the three months volunteers and to the regiments enlisted for the war.

The whole cost for medicines and hospital stores for all the regiments while in camp in this State, to November 7th, amounts to \$1,862.07.

The cost of the same for three months' outfit, \$8,719.25.

The outfit for surgical instruments, dressings, and furniture, \$12,102.40.

Making for medicines, hospital stores, surgical instruments, dressings, and furniture, the sum total of \$22,441.60, after deducting \$241.92, the amount returned in part by the three months volunteers.

I herewith submit the names of all connected with the service who have reported to this Department for medical aid, and have been transferred to the Massachusetts General Hospital; their names, the date of admission, time of discharge, result, and cost of board.

The amounts generously remitted to the State by the Trustees of this noble institution, to the 7th of November, is \$553.57. A large number, besides those admitted to the hospital, have received at their own homes a gratuitous and ready attendance from medical men of their own selection; and others, able to report here, have received advice, and medicines gratuitously furnished by the State apothecary.

I acknowledge, with gratitude, on behalf of the State, the valuable and ready coöperation of the Resident Physician of the Massachusetts General Hospital with this Department, and the devoted attention of the medical staff of the institution in the care of the sick and of those wounded in the service of their country.

The city of Boston, through the city Physician, has responded in the most prompt and liberal manner to all requisitions for vaccine matter, made by the State, for the use of our regiments.

Prior to the 1st of July, with the exception of a special detail made by the order of your Excellency for the county of Worcester, the services of the inspecting surgeons in the examination of recruits through the State, were a gratuitous and patriotic offering, and no class have made a more cheerful and generous sacrifice than the medical profession of this Commonwealth.

The whole amount, to the 1st of November, paid for examination of recruits and medical attendance, is \$1,732.05.

The Medical Commission of this State, instituted by your Excellency on the order of the honorable Secretary of War, for the examination of candidates for the medical staff, have given a voluntary service to the State. In addition to their labors in the examination of candidates, they have been called together, from time to time, for consultation in matters pertaining to the welfare of the troops; and I have availed myself of their experience and advice as exigencies have occurred; and I make, in

behalf of the State, this public recognition of their important and valuable services.

They are now engaged in the preparation of medical papers for the use and assistance of the medical staff attached to the volunteer force.

All the contributions sent to this Department for hospital use have been faithfully placed in the charge of the surgeons of the different regiments leaving for the seat of war.

The volunteers about leaving will have a generous supply of every thing necessary for the comfort of the sick, and the surplus remaining will be sent to the regiments most in need.

Amid all the distresses incident to the war, it is a cause for thankfulness that our regiments in camp at home, and at the seat of war, have been so generally exempt from the diseases incident to armies.

This result is owing somewhat to the general healthy character of the season—the prudent oversight in the selection of camps—the faithfulness and efficiency of the commissariat—the general intelligence which characterizes the material of our volunteer force; but mainly to the untiring watchfulness and fidelity of the regimental surgeons, and their care and vigilance in all matters pertaining to the hygienic and sanitary condition of the camps.

The attention of all inspecting surgeons was particularly called to the importance of vaccination, and the necessity of thorough protection by re-vaccination in all doubtful cases; and printed forms for the manner of examining recruits have been forwarded to all recruiting stations from this Department.

There has been no prevalent form of epidemic disease in the camps located in our own State, although isolated cases of contagious sickness have sometimes occurred, upon the appearance of which the subjects were removed to a distance from the camps and placed in commodious well-ventilated hospital tents.

The number of cases of acute disease has been unprecedentedly small, and all of a mild type; in fact, there has been a remarkable exemption from all sickness, excepting that resulting from sudden atmospheric change or personal imprudence.

In all suggestions tending to elevate the character of the service and improve the moral and physical welfare of the troops, and in all the recommendations whereby the dread circumstances of war could be alleviated, I have had the cordial coöperation of your Excellency, and beg to remain,

With high consideration and respect,

Your obedient servant,

WM. J. DALE, *Surgeon-General*.

REPORT
OF THE
MASTER OF ORDNANCE.

DECEMBER 26TH, 1861.

Commonwealth of Massachusetts.

ORDNANCE DEPARTMENT, BOSTON, }
December 26, 1861. }

General WILLIAM SCHOULER, *Adjutant-General of the Commonwealth of Massachusetts :*

SIR,—Herewith I have the honor to present tabular statements, marked from E to N, inclusive, exhibiting the doings of this department from January 1 to December 24, 1861, as nearly as the absence of any very reliable records or accounts permit.

Of the United States rifled and smooth bore muskets on hand, January 1, as per report of that date, and those received from the general government since, amounting together to 19,636, it appears that 18,443 have been issued to troops, sold, or now remain on hand, leaving a deficiency of 1,193 unaccounted for. Many of these have undoubtedly been destroyed, lost and stolen in the various camps in the Commonwealth, and some perhaps are still in the hands of home guards or volunteer companies, notwithstanding orders were issued for the return of them all in June last.

Of rifles there appears to be a surplus of 40, without allowing for a few known to have been lost. This discrepancy can only be accounted for on the supposition that the number reported as loaned to companies in January was incorrect; or perhaps more have been drawn from general government than are credited to them.

Of Enfield rifled muskets 14,700 have been purchased. Of these, 13,185 were issued to troops, and of the balance, all but two are accounted for.

During the past year there have been about 1,200,000 cartridges made at the arsenal, which, with the stock on hand, and those received from the general government, give a total of 1,722,000; of these, 1,084,000 have been issued, leaving now on hand, at the magazine, 638,188.

All of which is respectfully submitted by

CHARLES AMORY,
Master of Ordnance.

[E.]

REPORT
OF THE
COMMISSARY-GENERAL.

DECEMBER 31ST, 1861.

Commonwealth of Massachusetts.

SUBSISTENCE DEPARTMENT, STATE HOUSE, }
December 31, 1861. }

GENERAL,

In compliance with your orders I have the honor to Report:

At the Session of the Legislature held in May last, His Excellency the Governor was authorized to appoint a Commissary-General, and on the 13th day of June last I was honored with the appointment to that service.

Regarding the duties pertaining to the office as mercantile, in a great degree, the organization of the Subsistence Department of the Commonwealth was begun with doubt and hesitation on my part, arising from a total ignorance of Military matters. By the aid of those in the military departments of the State, together with the ready assent of the Governor and Council to suggestions which were made to give efficiency to the operations of the office, and with but little delay, an organized plan for the subsisting of the Massachusetts Volunteers, raised for the service of the United States, took the place of the more expensive mode of commuting their rations.

Contracts for subsistence stores were made on terms advantageous to the State, and when consistent with those contracts, the patronage of the Department has been extended to the districts where encampments have been established.

Fifteen regiments of infantry, one regiment of cavalry, and three companies of artillery, together with numerous companies and squads of troops, raised to fill regiments, before and after their departure from the State, have been subsisted under the operations of this Department; and since its organization, commutation of rations has only been made in cases where it

was entirely impracticable, or would have been more expensive to issue rations in kind.

The efforts of those connected with this Department have been directed to the promotion of the health, comfort and satisfaction of the soldier, without neglecting the interests of the Commonwealth. The aim has been to provide stores of the best quality, to instruct as far as possible in the best and most economical use and preservation of them, and to require a strict accountability in the distribution of the supplies.

Every cause of complaint has been removed as promptly as was practicable, and it is believed that no more dissatisfaction with the operations of the Department has occurred than was to be expected, when it is considered that its chief officer and the most of those subsisted under its rules, were alike inexperienced in their duties.

The volunteer troops in this State are now subsisted by the General Government, through its officers detailed for that duty in this State; and until some new exigency arises, the duties of Commissary-General will be limited to the few cases where troops may be raised in modes not covered by the rules regulating the duties of the United States officers.

The total expenditures in this department have been,	\$103,146 25
The estimated liabilities are,	10,000 00
There remains of the last appropriation, in Bank,		
applicable to the above estimated liabilities,	1,853 75

I have the honor to be,
 Very respectfully,
 Your obedient servant,

E. D. BRIGHAM,
Colonel, and Commissary-General.

Brig. Gen. WM. SCHOULER,
Adjutant-General of Mass.

R E P O R T

OF THE

MILITARY COMMITTEE OF THE COUNCIL.

DECEMBER 27, 1861.

Commonwealth of Massachusetts.

EXECUTIVE DEPARTMENT, COUNCIL CHAMBER, }
BOSTON, December 27, 1861. }

The Committee on the Militia, in response to an Order in Council of November 7, 1861, submit herewith a schedule of their purchases of supplies for Massachusetts troops, made up under their direction, and with such supervision as they have been able to bestow upon it. Although necessarily imperfect, it is believed to be substantially correct—enough so, at least, for all practical purposes, as showing the amount and character of their purchases.

The inspection and acceptance of the articles purchased having been very properly entrusted to other hands, the Committee have only a general knowledge of the manner in which the venders have fulfilled their engagements. In their opinion, however, (based upon their best means of judging,) their contracts and purchases have been faithfully answered, with, perhaps, a few trifling exceptions, leaving no just ground for complaint on the part of the Commonwealth.

HUGH W. GREENE,
OAKES AMES,
JOHN I. BAKER,
Military Committee.

S T A T E M E N T

*Of Purchases made by the Military Committee of the Council
of Supplies for Massachusetts Troops.*

Commonwealth of Massachusetts.

ANNUAL REPORT

OF THE

BANK COMMISSIONERS,

SEPTEMBER 30, 1861.

BOSTON:

WILLIAM WHITE, PRINTER TO THE STATE.

1861.

ANNUAL REPORT

OF THE

BANK COMMISSIONERS.

To HON. OLIVER WARNER, *Secretary of the Commonwealth:*

The Bank Commissioners respectfully submit their Eleventh Annual Report.

The number of banks in the Commonwealth is one hundred and eighty-one, with an aggregate capital of \$67,319,200. Three new banks have gone into operation since the date of our last Annual Report, viz.: the Mount Vernon Bank and the Continental Bank, in Boston, and the Harvard Bank, in Cambridge, all organized under general laws. The two former commenced business in November, 1860; the latter in March, 1861.

At the date of our last Report, the bank capital

in this Commonwealth amounted to . . . \$66,057,962 00

The increase during the year has been, . . . 1,261,238 00

Total at the present time, . . . \$67,319,200 00

The additions made during the past year to the bank capital have been the following:

Tremont Bank, (increase,)	\$250,000 00
Columbian Bank, (increase,)	150,000 00
Mount Vernon Bank, (new,)	200,000 00
Continental Bank, (new,)	300,000 00
Harvard Bank, (new,)	200,000 00
Berkshire Bank, (balance,)	36,238 00
Bristol County Bank, (increase,)	125,000 00
	\$1,261,238 00

The Essex Bank, in Haverhill, was also authorized by the legislature of 1861 to increase its capital stock in the sum of one hundred thousand dollars, but has not yet availed itself of the permission.

Of the whole amount of bank capital in this Commonwealth,—

44 banks in Boston have	\$38,631,700 00
137 other banks have	28,687,500 00
					<hr/>
					\$67,319,200 00

When this Commission was established, (in May, 1851,) the bank capital in the Commonwealth amounted to \$38,265,000, and the number of banks in operation was one hundred and thirty—thirty in Boston, one hundred out of Boston. This appears from the “Abstracts” for that year, prepared by the Secretary of the Commonwealth, and exhibiting the condition of the banks on the first Saturday of May, 1851. Since that time, fifty additional banks have been incorporated by special enactment of the legislature, and seven have been organized under general laws. Sixteen were incorporated at a single session, in 1853, and twenty at the next session, in 1854. Of the latter number, (chartered in 1854,) one, the Blackstone River Bank, never went into operation, and another, the Bass River Bank, was discontinued by injunction of court. Of the banks which were in operation in 1851, four have been discontinued, viz.: the Manufacturers’ Bank, in Georgetown, by expiration of charter, the Cochituate Bank and the Grocers’ Bank, in Boston, and the Western Bank, in Springfield, by injunction. So that the actual increase in the number of banks for the ten years, from May, 1851, to May, 1861, has been fifty-one,—fourteen in Boston, thirty-seven out of Boston. The increase of capital during the same period has been \$29,054,200.

Besides the addition of fifty-one banks to the number in operation in May, 1851, there are also forty-eight more savings banks than were then in existence, (as the whole number is now ninety-three,) making in all ninety-nine more institutions than came under the cognizance of our predecessors when they entered upon their duties in 1851, and constituting a total of 274 banks and saving banks, which are to be visited and examined once at least, and in some cases oftener, in every two

years. The increase of deposits during this period has been more than \$29,000,000.*

The gross amount of capital, held both by the banks and the savings banks, at the present time, is upwards of one hundred and twelve millions of dollars—being more than twice as large as it was in 1851. The difference which ten years have made in the amount of money controlled by these two classes of institutions, will be apparent from the figures presented in another part of this Report.

During the year ending September 30, 1861, the Commissioners have examined ninety-eight banks and fifty-one savings institutions. The following list exhibits the names of the banks examined; and the date attached to each refers to the day on which the examinations were commenced:

Banks Examined—1860-61.

NAME.	Place.	First day of Examination.
Adams,	Adams,	July 15, 1861.
Atlantic,	Boston,	Jan. 31, “
Attleborough,	Attleborough,	May 16, “
Bedford Commercial,	New Bedford,	May 31, “
Berkshire,	Adams,	July 13, “
Blackstone,	Uxbridge,	Nov. 15, 1860.
Blue Hill,	Dorchester,	Aug. 13, 1861.
Boston,	Boston,	Dec. 19, 1860.
Boylston,	Boston,	Mar. 5, 1861.
Broadway,	Boston,	June 19, “

No Loans to or from other Banks during the last year.

* Including Public Stocks, \$59,265.

† This bank commenced business March 4, 1861.

SAVINGS BANKS.

Six savings banks were incorporated by the legislature of the present year, namely :—

The Boston Penny Savings Bank, in Boston ;
Franklin Savings Bank, in Boston ;
Mercantile Savings Institution, in Boston ;
Bank of Petty Loans and Savings, in Boston ;
Mechanics' Savings Bank, in Lowell ;
Brighton Five Cents Saving Bank, in Brighton.

Three of the above named institutions, the Franklin Savings Bank, in Boston, the Mechanics' Saving Bank, in Lowell, and the Brighton Five Cents Saving Bank, have gone into operation. The Attleborough Savings Bank, incorporated in 1860, has also commenced business during the present year. Adding these four to the ninety which were stated in our last Annual Report to be in operation, and omitting the People's Five Cents Saving Bank, (which was then included in our statement,) we have ninety-three as the number of savings institutions now in operation in this Commonwealth.

Of the Penny Savings Bank, the Mercantile Savings Institution and the Bank of Petty Loans and Savings, we have received no information, and presume they have not yet commenced business under their charters.

During the ten years which have elapsed since the establishment of this Board, the number of savings banks in Massachusetts has more than doubled. Referring to the "Abstracts," we find that forty-five savings institutions made returns to the Secretary of the Commonwealth of their condition on the last Saturday of May, 1851 ; and it is presumed that these are all that were then in operation. The amount of deposits was then \$15,554,088. On the last Saturday of October, 1860, the amount returned was \$45,054,235.

The institutions examined by the Commissioners during the past year are named in the following list :—

Savings Institutions Examined—1860-61.

NAME.	Place.	Date of Examination.
Attleborough Savings Bank,	Attleborough,	May 16, 1861.

THE PAWNERS' BANK.

In the Act of April 5, 1859, incorporating the Pawners' Bank, in Boston, it is provided that "the president and directors of said bank shall annually report to the Bank Commissioners full and accurate statistics of the operations and condition of said bank, in the month of October in each year."

In conformity with this provision of law, the Commissioners have received the following statement of the condition of the Pawners' Bank, "on the second Saturday of October, 1861, at 7 o'clock, P. M."

Capital stock called in,	\$100,700 00
Unclaimed dividends,	681 34
Reserve account,	264 60
Notes payable,	12,850 00
Net profits, (estimated,)	2,372 72
Estimated expenses, due but not paid,	184 00

Total Liabilities,	\$117,052 66
------------------------------	--------------

Amount of outstanding loans on pledge of goods,	\$91,599 60
Interest accrued on loans, and not paid in, (estimated,)	7,197 53
Deposits in a Boston bank, bearing interest,	10,818 32
Money on hand, in the bank,	2,157 78
Vault, safes, furniture, fixtures, &c.,	5,279 43

Total resources,	\$117,052 66
----------------------------	--------------

(Signed,)

E. B. FOSTER, *Cashier*.

The truth of the preceding statement was confirmed by the oath of the cashier, and also by the annexed certificate, which was likewise given under oath:—

The undersigned, a majority of the Directors of the Pawners' Bank, hereby certify that the books of the bank indicate the state of facts as returned above by the cashier, and that they have full confidence in the truth of said return.

(Signed,)

JOSEPH S. ROPES.

DANIEL J. COBURN.

JOHN BIGELOW.

SAMUEL JOHNSON, Jr.

Accompanying the statement were the following interesting statistics, exhibiting some of the more important workings of the institution :—

Total amount of loans to date, viz., one year, nine months and twelve days,*	\$332,566 42
Total amount paid in on loans, for the same time, . . .	241,632 84
Dividends declared for 1860,	7 per cent.
Dividend declared in July last,	3 per cent.
Amount of interest paid in on loans,	\$11,045 44
Interest earned, but not paid in,	5,484 82
Total amount of interest earned,	16,530 26
Average amount loaned to each person,	29 46
Estimated number of articles loaned on,	168,947.

66 out of every 100 loans made by the bank are \$10 and under.

On 36 of every 100 loans the interest is less than 21 cents.

On 27 of every 100 loans the interest is less than 11 cents.

On 20 of every 100 loans the interest is less than 6 cents.

On 7 of every 100 loans the interest is one cent only.

The average amount of interest received on each loan is one dollar, seventy-six cents, seven mills.

The average length of credit actually taken by pledgers is three months and twelve days. Six months' credit is usually given, and loans can be renewed on payment of the interest due.

No bills are issued by the bank ; and it has no deposit accounts.

Loans are made on pledge of goods and chattels only. The bank has no loans that are considered doubtful.

*The bank went into operation on Monday, January 2, 1860.

PUBLIC STOCKS

Deposited with the Auditor of the Commonwealth by "banks organized under general laws," as security for their circulating notes.

On the 30th of September, 1861, the Commissioners examined "the certificates of stocks held by the Auditor, and the amount of circulating notes issued on account thereof," in compliance with section 28, chapter 57, of the General Statutes. The result is given in the statements annexed:—

GENERAL REMARKS.

In reviewing the condition of the banks of this Commonwealth, for the year ending September 30, 1861, we consider it proper to advert to some of the principal events which have occurred during that period, and briefly to notice the causes to which they may properly be ascribed. Influences of an extraordinary character have, throughout the year, severely operated upon our banks. The interference of political causes with financial matters, both in the State and the Nation, has occasioned very considerable losses to our business and banking community. For the same general reason, the demand for money has very materially lessened, and our moneyed institutions and capitalists have found it quite impossible to obtain desirable and satisfactory business paper upon which to make advances. The same cause must also be adduced for the diminished amount of average circulation and deposit, both of which items are sources of much profit to the banks.

It became apparent in October and November, 1860, that the banks were entering upon a period of much difficulty and trial, and that a suspension of specie payments was imminent. It was well known that we had not greatly over-traded with Europe, and that foreign exchange was ruling but slightly against us, with continued improvement in our favor. To understand the causes for the unusual disturbance at this time existing among the banks, it is only necessary to observe the commercial and political transactions of our own people, and the attitude in which they were standing towards the banking interests of the country.

We notice, then, that immediately following the national election in November, 1860, the confidence of the bank managers, in this and other States, became much shaken in the worth of southern mercantile paper, in consequence of the occasional repudiation which had occurred, from time to time, on the part of southern promissors, and the obvious indications, then existing, that a great and unusual disturbance of the whole industry of the country was at hand. Previous to the election, however,

the great depreciation of the currency in some of western States had rendered exchange between those States and Massachusetts unusually high. Business paper maturing at the West was very generally thrown out by the banks, in consequence of the great cost attending the recovery of their balances; while southern maturities, to the time of the election, were more freely discounted, but with more than usual discrimination. In very properly declining this large class of the business paper of merchants trading South and West, an accommodation loan was created sufficiently large to enable them to carry and collect their own bills receivable. With this unusual demand for loans of an accommodation nature,—which it should be remembered are not of a character to assist a bank in meeting its immediate liabilities,—we find another and powerful cause actively operating against the banks. We refer to the action of the cotton manufacturers and capitalists of this State, who, in view of advancing prices, had, immediately after the election, made heavy investments in cotton. Accordingly, sight and short time drafts in large amounts came home for payment, and were at once drawn in specie from the New York and Boston banks, serving not only to diminish the amount of coin, but also to decrease the deposits and circulation, or still further add to an amount of long loan already too large. In this connection, we observe that the deposits of the Boston banks decreased from \$20,811,889, on the 8th of October, 1860, to \$17,176,778, on the 10th of December, being a decline of a little more than $17\frac{1}{2}$ per cent. during about two months, while the circulation from the 8th October to the 31st December, 1860, had diminished in the sum of \$1,581,213, or more than 19 per cent. The effect upon the country banks was not so sudden; nevertheless, they suffered to a still greater extent, having lost, during four months from November 3d, 1860, a little more than 19 per cent. of their deposits, and about $21\frac{2}{3}$ per cent. of their circulation. The banks were also obliged to meet a still further demand for specie for outstanding balances and demand loans—mostly in the form of special deposits in the banks of the city of New York, standing to the credit of southern banking houses and capitalists, the withdrawal of which indirectly affected the Boston banks.

These different causes, with others of less importance, but all acting *simultaneously* upon the banks, are sufficient to account satisfactorily for the condition they were in at the close of the year. No one can doubt that they should and might have been better protected with specie at that time. The unwise policy of maintaining an excessive loan in times of an easy money market, here manifests itself. The loans and discounts of the banks, as returned on the first week in February, 1860, amounted to \$107,795,572, and were steadily increased until October 1st of the same year, when they had reached the sum of \$115,101,965, an increase of \$7,306,393. At the end of the year, or during a period of three months, they were diminished in the sum of \$5,650,988, a reduction forced upon the banks as a measure necessary for their own safety. It is much to be regretted that the amount of loan which may be carried, and of paper money which may be issued, not only by the banks of this State, but of the United States, is not more directly regulated by the laws of trade. Certain it is, that our business transactions with other countries should be more closely observed by all bank managers, and if it is found that a balance of indebtedness is being created against us, an immediate reduction of loans and discounts should be made, while, at the same time, if possible, the specie should be increased. The effect of this would be not only to put the banks in a better state of preparation to satisfy all foreign claims, but, while increasing the rates of money, to moderately withhold the means with which our people might again be led to over-trade. Had it not been for the active co-operation which existed among the banks, they would, about the middle of December, have been obliged to decline specie payments. As it was, however, we find them gradually recovering from an aggregate of specie on the 17th December, 1860, of \$3,491,348, to \$5,601,871, in March, 1861.

During the winter and spring of 1861, the non-payment and repudiation of paper maturing at the South had become general. The most intelligent merchants in New York and Boston had estimated the whole amount of southern indebtedness to the North, at the round sum of \$200,000,000. By far the largest part of such indebtedness to citizens of this State, was for account of the early autumn sales of manufactured cotton and woollen cloths and boots and shoes; consequently, in the months

of August and September, 1860, the banks were freely discounting southern promises, running for maturity into the following spring. To meet such wholesale violation of southern honor, our banking institutions were not wholly unprepared; indeed, the system pursued by them for many years, of making an annual reservation of a portion of their yearly earnings, had in some measure protected them against unusual amounts of dishonored and worthless paper. By the bank returns on the last Saturday of October, 1860, the net profits then on hand amounted to \$6,360,539.11, or $9\frac{9}{16}$ per cent. of the aggregate banking capital of the Commonwealth. And we do not hesitate to express the opinion, based upon the examinations we have made during the past year, and from information specially obtained from other banks, principally in Boston, that, notwithstanding the losses which some banks must inevitably sustain, the whole amount of final loss growing out of our difficulties with the South, will be more than covered by the general surplus, thus leaving the aggregate bank capital free and unimpaired.

The able and patriotic management of our banks is to be highly commended. If we except the aggregate specie fund usually held by them, (although it may be amply sufficient for present purposes,) we think, with much satisfaction, that they are as well and safely administered as those of any State in the Union. It has been a matter of surprise to many how the banks of New York, Philadelphia, and Boston, with so small a representation of specie, have been able to assume such large amounts of the National Loan. An easy explanation is found in the fact that the balance of foreign trade having been providentially in our favor, they were not obliged in consequence to destroy their equilibrium of specie. It is estimated that the imports of foreign manufactures since the 1st of January last, have been at least 50 per cent. less than during the same time last year, while the exports for the above period have been nearly one-third more. This large decrease in the amount of our importations has undoubtedly been mainly occasioned by the existing war, and we may well assume that, for at least some months to come, the demand for foreign goods cannot be largely increased; while, on the other hand, the latest foreign advices indicate that a greatly increased demand—mostly for breadstuffs—must necessarily be made upon this country. We are thus led to

believe, in following the laws of trade, that the banks can continue to carry a heavy amount of National indebtedness, and yet retain in their vaults the amount of specie required by the laws of their several States.

In view of the large amount of losses made by the banks, we think the subject of making dividends claims especial attention at the present time. There is perhaps nothing so distasteful to the directors of a bank as the withholding from the stockholders of their ordinary twice-yearly dividends. Nevertheless, it is wrong to set a nominal value upon past due paper, and to continue to class it as among the assets of a bank, under the assumption that its final payment is possible. No bank should undertake to make a division of its earnings without having first charged off *all* its worthless paper, which should immediately be followed by a fair and impartial estimate of the probable losses which have occurred, not only upon overdue, but upon failed unmaturing paper. If, after having made such reduction, the capital of a bank is found to have been seriously impaired, and the directors desire to continue its dividends, but one course is open to them, and that is to promptly petition the legislature for a reduction of its capital stock. In cases where a bank's stock has been but little impaired, the passing of its dividends is absolutely necessary, until reparation has been fully and completely made. Our especial care and attention will be exercised that the banks duly observe the laws of the Commonwealth in this respect.

We regret to have discovered during the past year a most reprehensible practice existing among a few of the country banks. We refer to the habit of assuming that a certain percentage of their issued bank notes has been lost or destroyed, and accordingly deducting it from the bank's liabilities. While it is undoubtedly true that many of the bank notes of the earlier emissions made by our oldest institutions will never be presented for redemption, yet, in the absence of any statute law upon the subject, we think it is entirely beyond the prerogative of bank managers to say what portion of their bills, once given to the public, will never be returned. In all cases coming under our observation, we have directed that such amounts be re-charged to circulation. We trust that in future no board of bank directors in this State will so far forget their duty to their stockholders,

the public, or themselves, as to return to the Secretary of the Commonwealth, an incorrect condition of their affairs.

Of the rates of exchange we would gladly forbear to speak, but they are found to be, in many instances, so excessive, as really to render nugatory the law which fixes a uniform rate of interest within the State. In certain towns, it would seem to be the practice for the entire business community to make their notes payable in Boston, for the sake of giving to their banks an excuse for taking extra interest. We have labored resolutely and unceasingly to reduce these anomalies, and to bring the rates of discount within the limits of the law, but with what effect, we can only determine upon revisiting the institutions censured.

Upon the recommendation of the governor, in his annual address of last year, a bill for modifying the usury law by exempting short business paper, discounted by the banks, from its operation, was introduced and passed through the senate. It failed, however, of a passage through the house of representatives, and the subject is still open for legislative consideration. The issue of large government loans at a higher rate of interest than six per cent. will make the statute price of money more than usually important, and will encourage a desire now widely prevalent among business men for either freedom or uniformity in the rate of interest.

During last winter our attention was drawn to the statute regulating the form and amount of cashiers' bonds. A practice was found to exist in Boston and in some other localities, to divide the liability of the sureties, so that their aggregate amount only equalled the requirement of the statute, (\$20,000,) furnishing, in effect, only one surety to the bond, instead of two, which the statute requires. We have never doubted that the true construction of section fifty-one requires that there shall be at least two sureties, each liable in the full amount of the bond; or that an equivalent to such security shall be furnished by subdividing the amount among a greater number of sureties. A formal application having been made to us by a board of bank directors, we thought it proper to lay the question before the attorney-general, who fully concurred in the opinion above expressed. The correspondence between that officer and ourselves will be found in the Appendix. Another question was

also propounded to him in the same connection; namely, whether, upon the renewal of a bank's charter, new bonds should be required. To this inquiry, an affirmative answer was also returned. A question of still greater practical consequence has been since decided by the supreme court.* The decision is to the effect, that upon an increase of the capital of a bank, the bonds of a cashier must be renewed. The reason for this decision is obvious, since the care of a greater capital, and the handling of larger sums of money than was contemplated when the first bonds were given, entails a heavier responsibility, and involves greater danger of loss than the sureties have engaged to assume. We considered the opinion of the attorney-general of sufficient importance, at the time, to make it the subject of a circular letter to the banks of the Commonwealth, and we shall hereafter act upon this opinion, and the more recent one given by the supreme court, in passing upon the bonds submitted to us in our visits of examination.

The law of 1860 (ch. 209) respecting the plates from which bank notes are printed, will go into full operation on the fourth day of April next. This statute requires all banks which now issue bills from what are called "general plates," to procure new special plates for the denominations heretofore so issued, or have such denominations withdrawn from circulation before said date, and the designs of the new plates must be copyrighted. The same statute requires all banks procuring new plates to have them specially engraved and copyrighted, in like manner.

SPECIE RESERVES.

In our Report for 1860, we gave unusual prominence to the subject of specie reserves; and we demonstrated by a survey of the condition of the Massachusetts banks from 1815 to 1860 inclusive, that the years of greatest commercial disturbance

* *Grocers' Bank vs. Kingman*, October Term, Suffolk, 1859. This case also indirectly supports the opinion of the Attorney-General, already cited. An objection to the bond was urged by defendant's counsel, that it did not conform to the statute, there being only an aggregate *single* liability of the sureties for \$20,000, but the court held that whether a good statute bond or not, it was good at common law, and having been given voluntarily, must be held to be valid.

have been those in which the reserve of specie was the smallest as compared with the bank currency, which consists of the circulation and deposits.

We are enabled, in the present Report, to furnish a remarkable confirmation of this principle, drawn from the condition of the banks of all the States of the Union, from 1811 to 1859 inclusive. The table and accompanying diagram, which present this history, was prepared by J. V. Yatman, Esq., of New York, who has kindly offered them to us for publication, and they will be found in the Appendix, (No. 2.) The table gives in separate columns, the specie in bank in each of the years indicated in the margin, the amount of specie to each person of the population, the bank currency, or circulation and deposits, and the amount of that currency to each person of the population. To these we have added, for greater convenience of reference, another column showing the percentage of specie to bank currency. The diagram presents to the eye the devious currents of specie and of currency, in separate, zig-zag lines, in a manner more striking, and more easy of apprehension than even the table; and it is accurate to the nearest dime. The perpendicular columns represent the years which are printed at their foot. The *heavy* horizontal lines represent, each, a dollar, and the finer ones twenty cents. For convenience, the dollars are printed in the margin against the heavy lines, beginning at the bottom and counting upwards.

A glance at this table will show what have been the weakest, and what the strongest years in the banking history of the United States. We naturally turn to 1837 and 1857, years memorable for their disasters, and we find a striking resemblance between them, in the lowness of the specie reserve. In 1837 the proportion of specie to currency was $13\frac{1}{2}$ per cent.; in 1857 it was 13 per cent. In 1837 the volume of the currency was proportionally the greatest, being \$17.61 to each person of the population, while of specie there was \$2.41; in 1857 the currency was \$15.50 *per capita*, and the specie only \$2.03.

We invite a comparison between these figures and those given in our Report for 1860, showing the condition of the Massachusetts banks at corresponding periods. To facilitate this comparison, we have reproduced and combined (with some alterations) the table published by the Secretary of the Commonwealth, in

the Bank Abstract for 1851, and that contained in the Appendix to our last year's Report. (Appendix, No. 3.)

We think it will excite some surprise, when it is discovered that the reserves of specie in the banks of our State have, of late years, been much lower than those of the whole country taken together. That we have suffered grievously as a nation, from an inflated paper currency, is a fact now universally conceded; and if this is an acknowledged truth respecting the whole country, what shall we say of the currency of our own State, and of the basis on which it has rested? While the specie reserves of the Union have never fallen below 13 per cent., those of Massachusetts fell in 1835 to $7\frac{1}{5}$ per cent.

We could wish that this important truth was more fully realized by the bank officers of the Commonwealth. Nothing but a little patient study of the history and statistics of the currency, in our own and other countries, is wanting to produce that full conviction of it which has impressed our own minds. Bankers, of all men, should be the readiest to accept the truths of figures. We are sorry, however, to observe, that there are few among them who act resolutely upon this principle. Specie is kept reluctantly, as though it were a drug, and is regarded generally as unproductive capital. If the experience of institutions which keep large reserves, is regarded, nothing would appear more untrue. We recall the statements of two banks out of Boston, one in the vicinity of that city, and the other in the interior, both of which have long acted upon the principle of keeping large specie reserves. The first of these had, during the last year, an average of 15 per cent. in specie, and the second of $17\frac{2}{3}$ per cent., each with large city balances. They were able to maintain a large loan and circulation. The paper discounted by them was of a very high order, for they could always accommodate customers and select paper, and thus attract valuable deposits. They have maintained an equable business, have suffered very slight losses, and *have realized large dividends*.

The legislature of 1858 enacted a law requiring a reserve of 15 per cent. in specie to be kept by the Boston banks. From defects in the structure of this statute, it was very early evaded, and we took occasion in our last Report to recommend alterations in its provisions, which, we believed, would carry into

effect the intention of its framers. The principal method of evading it has been, by the borrowing of specie to make up the weekly average. This compels the stronger banks to share the weakness of their neighbors, and reduces the aggregate reserves of the Commonwealth. We recommended that this practice should be prohibited by legislation, and, as the simplest method, suggested that when a bank permitted its specie to fall below the legal limit, the privilege of discounting should be withheld from it for a period of seven days after it had resumed, and during which it should maintain, the required percentage. We also recommended that the borrowing of specie, or specie funds or balances, should be declared illegal. Neither of these recommendations was adopted, and no legislation was had on the subject of specie reserves.

To show how well founded were our strictures upon the present law, and how much it needs to be made more stringent to secure the requisite reserve, we give in a table, in the Appendix, (No. 4,) the number of times each of the Boston banks has, within the last year, shown by its weekly returns, an average of specie less than 15 per cent. Forasmuch as a peculiar state of the country has been urged to justify these deficiencies during a part of last winter, we state the months in which they have occurred. It will be seen from this table, that one bank, (Metropolis) has been below the legal average of specie for 34, out of the 52 weeks of the year, while six others have, each, been below the line for twenty weeks or more. Notwithstanding this unfortunate showing, all these institutions, we believe, claim always to have had the requisite amount of specie *on discount days*, except at the period of last winter to which we have referred. Some of them, we are assured, have seldom borrowed specie, but have suspended discounts until the percentage was naturally recovered; but we apprehend that by many of them no efforts have been made to keep up the average, and that borrowing seasonably for discount days, and returning immediately afterwards, has been a practice systematically resorted to.

We have adverted to a period last winter when the specie law was more than usually disregarded. This was during the months of December and January. Owing to causes which we have fully explained in the preceding pages, the banks were in imminent danger of having to suspend specie payments, and

this step was only avoided in Boston, as well as in New York, by co-operative measures between the banks, and by the adoption of a method of settling exchanges at the clearing-house, by which the use of specie was measurably dispensed with. We have seen that the specie average had declined, on the 17th December, to \$3,491,348, and on certain days it stood at a still lower point. When so large a number of banks had fallen below the specie line, and were without the ability immediately to recover their position, it became a question whether they should suspend discounts in obedience to the law, or, yielding to the extraordinary exigency of the case, should continue to extend accommodations to their customers, to avoid a greater danger. They chose the latter alternative, and though this procedure did not receive the sanction of the Commissioners, they did not feel called upon to interfere. The exigency was of the gravest character; it had been brought unexpectedly upon the country by political, and not commercial causes; the subversion of the government was threatened; the whole current of business was arrested; and the Commissioners did not feel willing to assume the responsibility of forbidding the necessary bank accommodations, when they foresaw clearly that that measure would involve the bankruptcy of many innocent merchants, and result in very heavy losses to the banks themselves. A precedent for inaction is to be found in the history of 1857, when an entire suspension of specie payments took place. In New York that suspension was a constitutional forfeiture of the bank charters; and it was only by the necessary and prudent forbearance of the officers of the government, that their continuance in business was not interrupted.

We cannot, however, pass over an event of this character, without earnestly inviting attention to the weakness of a system, which so easily gives way under extraordinary pressure. With a proper reserve of specie, a suspension of cash payments would never be necessary. The banks of New Orleans have never suspended since they were re-organized upon their present specie basis. They passed successfully through the crisis of 1857, and in March, 1861, when the present rebellion broke out, they held more than \$16,000,000 of specie to a capital of \$20,000,000, and with their other cash funds they were able to meet every present liability, dollar for dollar, in coin.

They afterwards, on the 16th of September, suspended, at the request of the Confederate Government, and not in consequence of their own inability, holding then upwards of \$14,000,000 in coin. Why should not our position be equally strong? It needs only a wise and cordial co-operation between the banks and the legislature to make it so. It is popularly supposed that a suspension of specie payments involves no injury to the country, because of the immediate ease which follows it; but not to speak of the great evils of a depreciated currency, the terrible stringency of the money market which *usually* precedes a suspension, must not be forgotten. How many men are driven to the wall by this stringency, and how many more are compelled to make great sacrifices of property, to avoid bankruptcy, needs not to be detailed to those who have once passed through, or over, such a gulf.

Notwithstanding the failure of the Boston banks to maintain their average, in the numerous instances we have pointed out, there has been some improvement in the specie reserves of the Commonwealth during the past year. The average of the country banks for the year has been $7\frac{1}{2}$ per cent., of the Boston banks, 21 per cent., and of the whole State, $14\frac{3}{4}$ per cent.* We have deduced these facts from a careful comparison of the weekly and monthly returns; and as a useful body of statistics, which have not hitherto been condensed or preserved in any public document, we have prepared three tables, showing (1st) the average condition of the country banks for each month during the year, as shown by their monthly returns; (2d) the average monthly condition of the Boston banks, condensed from their weekly returns; and (3d) the average monthly condition of all the banks of the Commonwealth, compiled from the two preceding tables. (See Appendix, No. 5.)

In concluding this branch of our subject, we commend the facts and figures which we have presented, to the thoughtful attention of the legislature. We do not deem it necessary to offer any new recommendations respecting legislation. If the principle of strengthening our currency by a greater infusion of the precious metals, is kept steadily in view, we may safely

* December 18, 1861, the specie in the Boston banks amounted to \$10,180,000, the highest point which it has ever attained. December 6, 1858, it stood at \$9,564,716.

trust to the legislature to devise specific measures to accomplish that result.

STATE AND NATIONAL LOANS.

The patriotism of the banks of our Commonwealth in coming to the aid of the State and National governments in the time of trouble, cannot be too highly commended. Immediately after the despatch of the first troops by the governor, in response to the call of the president, the banks made most liberal offers of assistance to the executive. Between the 16th and 29th of April all but two of the Boston banks, and sixty-nine out of one hundred and thirty-eight country banks, had offered the State loans amounting to \$5,672,000, the greatest part of these offers having been made before the 19th of April.

The governor and council availed themselves of these offers to the amount of \$1,817,000, all of which has been paid (except \$50,000, where the treasurer has consented to keep the money at five per cent.) out of the proceeds of sale of State bonds, the issue of which was authorized by the legislature at its extra session in May last. At the same session of the legislature, an Act was passed, authorizing banks to hold the notes, or public securities of the State, or United States, taken directly from said governments, beyond or outside of the legal limit of the loans, as restricted by the twenty-fifth section of the Bank Act. Very few banks, however, have been obliged to avail themselves of the privileges of this law, the line of mercantile discounts having been greatly reduced by the war.

Animated by a like spirit of patriotism, the banks of Boston, on the 19th of August, united with those of New York and Philadelphia in making to the general government a loan of \$50,000,000, of which amount the sum of \$10,000,000 was assumed by the Boston banks, with whom were associated a few of the country banks, and two or three moneyed corporations of a different description. The loan thus assumed, was nearly all sold on account of the associated banks, to corporations and individuals scattered throughout the loyal States. On the first day of October, another loan of \$50,000,000 was made to the National government upon the same terms as the preceding, and was assumed by the banks of the three cities, and their associates, in the same proportions as the first. While this Report is in prep-

aration, a third loan, nominally for the same amount, has been made by the same institutions, but upon securities of a different character. While the first and second loans were made upon the security of the bonds of the United States, bearing interest at 7.30 per cent., and maturing in two years from date of issue, at which time they are convertible into six per cent. bonds having twenty years to run, at the option of the government, the third loan was upon bonds of the latter description only, which were taken by the banks at a price (about 90) which should afford an interest of seven per cent. on the investment. Neither the second nor third loans are as yet fully paid in, but by an arrangement with the secretary of the treasury, interest is received upon each of them from the date of negotiation. The crediting of these large sums to the government as depositors, and adding an equivalent amount to the item of loans and discounts, has very much increased those items in the weekly statements of the banks; and it is mainly to this cause that the unusual deficiency in specie averages, appearing in the month of September, is attributable.

In thus promptly and liberally coming to the support of the government in its emergency, the banks are entitled to the highest praise. Without their aid the wants of the treasury could not have been supplied with coin, and we should have been subjected, at the very outset of the war, to the humiliating alternative of suing to foreign capitalists for loans—only to be obtained on greatly disadvantageous terms,—or of resorting at once to the issue of irredeemable paper promises, a contingency which, in seasons of public calamity, is to be avoided as long as possible.

Fortunately for the banks, they had the ability to render this assistance. The prostration of business robbed them of their usual customers, and the operations of the government, which have given rise to a new activity exerted in the public service, have caused the making of very little business paper, such as banks are in the habit of discounting. Public contractors are usually paid in cash at intervals shorter than the average length of bank accommodations, and they have little occasion to borrow money. The United States have, in fact, occupied the position of a great business corporation, borrowing from the banks large sums of money, which they have distributed among the people

through a thousand agencies. So long as the war maintains its present character, and the ratio of imports and exports remains unchanged, there will be a scarcity of good business paper, and the banks can afford to lend freely to the State and Nation.

Though the number of the banks which were associated in taking the national loans was limited, and included few institutions out of Boston, there are several of the country banks which have taken large sums, in two instances within our knowledge, amounting severally to half their capital, and nearly all the institutions in the State have, to a greater or less degree, invested their funds in public securities. We have not hesitated to advise, on all occasions, that these public calls should be liberally responded to. The incorporated banks of America occupy the place which, in Europe, is filled by great private bankers. They hold nearly all the available money of the country, and it is through their agency, in great measure, that the people are able to come to the support of the State.

What of financial vicissitudes the future may have in store for us, before we again enjoy the blessings of peace, the wisest among us dare not predict; but one thing is certain, that in the maintenance of the public credit is involved all private credit. Without the protection of a stable government no value can be affixed to private property, and none can be realized upon its conversion, while the event of a national disaster would expose us all to a common ruin.

SAVINGS BANKS.

The interval of ten years which has elapsed since these institutions first came under the supervision of a permanent commission, seems to render the present a suitable time for reviewing the system as it exists in this Commonwealth, and for marking the progress which has been made by our people in industrial savings, more especially in the decade which has just expired.

In making this review, we do not expect materially to add to the valuable suggestions which have been made, from year to year, by our predecessors, in reference to the management and reform of these institutions; but as these suggestions are scattered through a series of reports, some of which are not easy to be obtained, and as legislators are usually content to act upon

recommendations made to themselves, without taking pains to inquire into what has been recommended to their predecessors, we have thought it desirable to embody in the present Report such of those suggestions as are still pertinent, and have hitherto passed unheeded.

We desire, also, to bring together and to collate more fully than has been done in any previous Report, the results which have been wrought out, here and elsewhere, by the establishment and growth of savings banks, especially as they affect public wealth, and the material condition of the laboring classes. No general reasoning upon these subjects, no "*a priori*" arguments can equal, in weight, those conclusions which rest on the unerring truth of figures. In the well-ascertained and carefully-arranged statistics of a people are embodied the best materials for its history. In the silent array of figures there lie truths which are imperishable, and which no partisan zeal can wrest from their true meaning.

The early history of savings banks in Massachusetts is to be found in the first Report of this commission made in 1851. From that Report we learn that the first institution in the Commonwealth was the "Provident Institution for Savings in the town of Boston, incorporated December 13, 1816." It was also the earliest in the United States, and it was not till March 26, 1819, that a charter for such an institution was first granted in the State of New York to the "Bank for Savings in the city of New York." The Provident Institution is by far the largest, and it is also one of the best regulated institutions in the State. Its deposits in 1860 were little short of \$7,000,000, while its depositors numbered more than 32,000, or nearly as many as the whole population of Boston when it was chartered.* The Salem Savings Bank was incorporated January 29, 1818, and gradually others were established in the principal towns of the Commonwealth.

It was not till 1834, (Act of 1834, ch. 190,) that our savings banks were required by law to make regular and uniform returns to the secretary of the Commonwealth. There were at that time, twenty-two institutions, holding \$3,407,773 of deposits, from 24,256 depositors. In 1851, when the board of Bank

* The population of Boston in 1810 was 33,250, and in 1820, 42,298.

Commissioners was re-established, the number of savings banks had increased to forty-five, the deposits to \$15,554,088, and the depositors to 86,537. In 1860, the deposits had grown to the vast sum of \$45,054,235,—nearly three times their amount in 1851,—while the number of institutions had increased to eighty-nine, and of depositors to 230,068. We have prepared a table which will be found in the Appendix, (No. 6,) showing the number of depositors and amount of deposits in each of the years 1834 to 1860, inclusive. Former Reports have contained tables which gave these items up to the date of their publication, but to render the present one more complete, and with a view to presenting on a single page many elements of progress and of comparison, we have added, in separate columns, the number of banks, the yearly increase in depositors and deposits, with the ratios of increase, the average amount to each depositor, the aggregate annual expenses of management, with the average of those expenses for periods of about five years, the average dividend for similar periods, the population of the State as shown by each census return, the average amount in savings banks to each person of the population when the census was taken, and the percentage of the whole population, in the same years, who were depositors.

A careful study of these figures will well repay those who are interested in the condition of the poorer classes, or the material welfare of the State. No more striking evidence of the prosperity of the people of our Commonwealth could be adduced, than that which this table affords. The savings of the industrial classes are a fair index of the prosperity, and indeed of the moral condition of any people. The periodical valuation of estates shows the increase of realized wealth among those who control the capital, and direct the business energies of the Commonwealth, and in great measure support the burden of its taxes; but it gives no token of the condition of the poor. It has been claimed to be the tendency of modern civilization to make the rich richer and the poor poorer. However true this may be in countries governed on a different system from our own, it does not seem to be the character of our material development. Whatever of wealth and of the comfort and even luxury which wealth brings, is enjoyed by our people in the aggregate, is shared to a degree which is unknown elsewhere, by all classes of the population.

Before we proceed to explain in detail the facts presented by our first table, we would call attention to two other tables, also to be found in the Appendix, which we have prepared for the purpose of further comparison and illustration. The first of these, (No. 7,) shows the progress of savings banks and friendly societies in Great Britain from 1829 to 1857, inclusive. We have taken it from the appendix to the valuable report of the select committee of the House of Commons on savings banks, in 1858. We have not been able to learn the number of depositors later than 1857, but the amount of deposits in 1860 will be hereafter stated.

The third table (No. 8,) shows the progress and condition of savings banks in the State of New York, from 1858 to 1861, inclusive. Prior to 1858, no general and uniform returns were required by law, but each institution reported its condition annually either to the comptroller or to the legislature. Those reports have never been collected or collated, and are not easily accessible. It is to be hoped that the legislature of New York will soon supply this deficiency in its statistical history—a history to which its liberality has heretofore so richly contributed. We are unable, with our present materials, to compare the progress of industrial savings in New York with those in Massachusetts and Great Britain, as fully as we could wish, but we shall endeavor in a measure to supply the deficiency, by stating the history of the two largest institutions in the State, which hold more than twenty-one millions of the seventy millions deposited.

Referring now to our first table, it will be observed that the number of savings banks has increased from twenty-two in 1834 to eighty-nine in 1860, or more than fourfold; the number of depositors from 24,256 to 230,068, or 858 per cent.; the deposits from \$3,407,774, to \$45,054,236, or 1,222 per cent.; the average to each depositor from \$140.49 to \$195.83, or 39½ per cent.; the average of the deposits to each person of the population from \$5.58 to \$36.59, or 555 per cent.; the percentage of the population who are depositors from 4 per cent., or one person in 25, to 18⅔ per cent., or one person in 5⅙. The average expense of management for six years from 1834 to 1839, was ⅓ of one per cent. on the deposits; while for six years from 1855 to 1860 it was only ⅔ of one per cent. In 1860, it had fallen to ¼. The average of dividends for the five years from

1840 to 1844, inclusive, was about $5\frac{1}{4}$ per cent. In the six years, from 1855 to 1860, inclusive, it was a little less than $6\frac{3}{4}$ per cent.

Taking the ten years from 1850 to 1860, the deposits increased from \$13,660,024 to \$45,054,235, or 231 per cent. In the same period the population of the Commonwealth increased from 994,512 to 1,231,065, or about 24 per cent.; the valuation from \$597,936,992 to \$897,795,326, or about 50 per cent.; and the bank capital, (the means required to carry on the business of the Commonwealth,) from \$36,925,050 to \$64,519,200, or nearly 75 per cent. This comparison shows how greatly the accumulation of industrial savings has exceeded the other ratios of development in the State.

Let us now examine the progress of savings banks in Great Britain and Ireland (the United Kingdom). As we have not all the items necessary to a full comparison down to 1860, we will take the period from 1831 to 1857 inclusive, which covers the same number of years as that embraced in the Massachusetts returns. From 1831 to 1857 the deposits in the whole United Kingdom increased from £14,575,165, to £37,090,558, or 154 per cent.; the depositors from 436,670, to 1,366,560, or 213 per cent., while the average to each depositor declined from £33 7s., or about \$161.47, to £27 1s. 6d., or about \$131.05. The population of the United Kingdom in 1831 was 24,419,429, and in 1857 it is estimated to have been nearly 29,000,000; an increase of about 18 per cent. The wealth of that country is not so easily ascertained, there being no valuation of all property, real and personal, for taxation. The total value of British property can only, therefore, be estimated by a complicated process, and we have not seen any such estimate for 1831. Prof. Levi, in his recent and valuable treatise on Taxation, estimates it in 1841 at £4,000,000,000, and in 1858 at £6,000,000,000, an increase of 50 per cent. in seventeen years. The proportion of the population who were depositors in 1857 was $\frac{4\frac{7}{10}}{21}$, or one person in 21, and the average of deposits about £1 5s., or \$6.25 to each person of the population. Mr. Scratchley,* estimates

*Practical Treatise on Savings Banks. London, 1860. We desire to express our obligations to this author for giving to the world the first systematic treatise in the language on these important institutions. While many of the discussions relate to what is peculiar to the English system, there is much in the work, both in the way of history and suggestion, which is equally valuable to the American reader.

that in England and Wales alone the proportion in 1858 was about £1 12s., or \$8 to each person of the population, and that one person in 16 was a depositor. We learn from the same author, that, at the same date, the depositors in savings banks stood in the following proportion to the population in other countries: In France, one in 37; in Belgium, one in $8\frac{1}{2}$; in Germany, one in 42. The expense of management in Great Britain averages a little more than $\frac{1}{3}$ of one per cent., while in France it rather exceeds that fraction.

In New York the first general return of savings banks was made January 1, 1858, in pursuance of statute 1857, chapter 136. The increase in the several items from that date to the last return, 1861, was as follows: The number of institutions increased from 54 to 71; the depositors from 203,804 to 300,693, or $47\frac{1}{2}$ per cent.; the deposits from \$41,472,672 to \$67,440,397, or $62\frac{1}{2}$ per cent.; the average to each depositor from \$203.24 to \$224.28; the percentage of the population who are depositors from 5.88, or one in 17, to 7.16, or one in 14; and the average of deposits to each person of the population from \$12.66 to \$15.79. Besides the amount specifically due to depositors, the institutions of New York hold a considerable surplus to cover depreciation of assets. We shall speak of this surplus fund in another connection. In 1861 it amounted to \$2,949,260, or $4\frac{3}{8}$ per cent. on the whole deposits. Of the average rate of dividends in that State we have no definite information. The rate of interest paid to depositors is one per cent. less on sums of \$500 and upwards than on smaller sums.

In the absence of early returns of the condition of all the banks of the State of New York, we have thought it not uninteresting to state the history and progress of two institutions located in the city of New York, which are the largest in that State, and in America. We refer to the "Bank for Savings in the City of New York," and the "Bowery Savings Bank." The first named of these institutions was incorporated, as we have already stated, March 26, 1819. On the first of January, 1861, it had been in operation forty-one and one-half years. During that period it had received from 833,838 depositors, the sum of \$56,490,599, and had paid out upon withdrawals \$54,300,200. The balance undrawn, with the accumulations of interest, amounted to \$10,062,616, besides which it had a surplus fund of

\$609,845. Its number of depositors at the same date (open accounts) was 52,480. The Bowery Savings Bank, which is the larger institution of the two, was incorporated in 1834, and it is a remarkable illustration of the inadequacy of any past experience to foreshadow the proportions which this class of industrial savings was destined to assume, that the projectors of this bank only asked to be allowed to receive \$500,000 in deposits, and such was the limit in their original charter. January, 1, 1861, after an existence of twenty-six and one-half years, its deposits amounted to \$10,294,995, its surplus fund to \$549,108, and the number of its open accounts with depositors to 44,003.

Having now stated the condition and progress of the savings institutions of our own State, and also of those of Great Britain and New York, separately, let us, for a moment, place the results side by side, and state the conclusions to which they lead. We have selected the two States named for illustration, because they may be taken as the best types, the one of European, and the other (if we except our own State) of American advancement; yet a comparison will show, that the savings of the poorer classes, as represented by deposits in savings banks, have grown to a greater volume, relatively, in our own State than in either of the others. While in Massachusetts one person in a little more than five of the population, is a depositor, in Great Britain the proportion is not more than one in twenty. In the most favored part of that kingdom, England and Wales, it is one in sixteen; in New York it is one in fourteen. Again, the average deposit to each person of the population is in Massachusetts \$36.59, while in Great Britain it is only \$6.25, in England and Wales alone, \$8, and in New York, \$15.75. Looking again at the rapidity of accumulation, we find that while in Massachusetts the increase in deposits in a period of twenty-seven years was 1,222 per cent., in Great Britain in a like period it was only 154 per cent. It is but just to mention that the increase of deposits in New York has been more rapid in the four years covered by its returns, than in our own State. This is partly due to a more rapid increase in the number of depositors, but it is also measurably attributable to the compounding of the interest upon a greater capital, the *ratio* of growth increasing, year by year, with the magnitude of the principal upon which the interest is cast.

We may be justly proud of this comparison. It shows a superior and an improving condition of the laboring classes, and it reflects the highest honor upon that educational system, which, while it involves a heavy annual outlay to the State, brings back to it a far richer return, in the intelligence, the virtue, and the material condition of her people.

But there are other lessons yet to be learned from the study of these figures. They are an "annual register" of the business condition of the country. Their periods of rapid growth, or of stagnation or decline, indicate a corresponding prosperity or depression in commercial affairs affecting the whole people. Let us examine some of these periods. The most rapid increase in deposits took place in the years 1852 to 1853, 1858 to 1859, and 1859 to 1860. In the first of these years it was \$4,968,794; in the second \$5,509,448, and in the third \$5,629,817. The greatest actual amount of money deposited was doubtless in 1852-3, since in the later years the accumulation from compound interest has largely swelled the aggregates. To illustrate this proposition: The total deposits in 1852 were \$18,401,307. If we may suppose the whole of this to remain undrawn and productive for a year, the interest upon it at six per cent. would be \$1,004,078; while upon the deposits of 1858, \$33,914,791, the interest would be \$2,034,888, and on \$39,424,418, the deposits of 1859, it would be \$2,365,465. Deducting these sums severally from the increase stated for the years in question, and the net increase from money deposited, would be \$3,964,716 in 1853; \$3,474,560 in 1859; and \$3,264,352 in 1860. Such are the fluctuations which always attend a general tide of progress. The waves of the sea do not encroach upon the shore with equal footsteps, and the irregular circles in the oak's trunk, indicate a growth, now rapid, now slow, as it has been stimulated or retarded by external influences.

We have noticed the periods of progress; those of depression are no less remarkable. Thus, if we go back to the disastrous year 1837, we find that the increase of deposits to 1838 was only \$87,966, and of depositors 499, while from 1836 to 1837 the increase of deposits was \$406,847, and of depositors, 2,778, and from 1838 to 1839 the increase of deposits was \$738,766, and of depositors 3,623. Still more striking is the following contrast:

From 1842 to 1843, the increase of deposits was only \$35,095, and of depositors only 630; while from 1843 to 1844 was witnessed the hitherto unparalleled addition of \$1,325,798 to the deposits, and 6,482 to the depositors.

Equally noticeable is the fluctuation in the average amount held by each depositor. A decline in the ratio of increase shows a general depression of the industry of the State, which stops accumulation; a decline in the average deposit shows how far this depression has compelled those who have already begun to husband their earnings, to fall back upon these reserves for subsistence. While in Great Britain, we have seen a steady decline in the average, between 1831 and 1857, from \$161 to \$131, or \$30, in Massachusetts, in a like period, we witness the gratifying increase from \$140 to \$195, or \$55. This upward progress has, however, been marked by occasional pauses, and even retrogressions. The largest average was in 1853, when it reached \$199.05, having increased nearly \$20 in two years, but in the following year, 1854, the decline was equally rapid, for the average fell to \$189.88. At no time (until the present exceptional year) has there been an actual decline, either in the deposits or number of depositors. In Great Britain and Ireland the fact has been far otherwise. In Ireland, famine and emigration wrought such a change in the aggregate resources of the poor, that between 1846 and 1849, the deposits had declined from £2,924,910 to £1,223,851, and the depositors from 96,650, to 45,839. The decline had indeed brought the industrial savings to a lower point than where they had stood sixteen years before, the figures having stood in 1833—deposits, £1,327,122, depositors, 49,170.* A similar, though less marked decline, occurred in Great Britain. In England, between 1846 and 1848, the deposits fell from £26,759,817 to £24,985,730, and the depositors from 900,933 to 899,606. In Scotland, the decline was from £1,383,866 to £1,081,110, and in the number of depositors from 90,301 to 86,056. In Wales,

* It is true that the population of Ireland, at this period, actually declined; but the ratio of its decline bears no comparison to the decline of savings bank deposits. These, it will be seen, fell more than 100 per cent., while the decline in population between 1841 and 1851 was 1,622,000, or less than 20 per cent. In England, Wales, and Scotland, and in the whole United Kingdom taken together, the population considerably increased.

the decline in amount was slight, while the number of depositors experienced a slight increase. In the whole United Kingdom, the deposits declined, between 1846 and 1848, from £33,694,642 to £30,117,771, and it was not till 1852, after an interval of six years, that they recovered their former volume.

The history of the withdrawal of deposits in Great Britain is also valuable, as illustrating the important service which savings banks render to the laboring classes in periods of idleness or distress. In the seventeen years from 1841 to 1857 inclusive, the amount withdrawn by depositors exceeded the amount deposited by £3,114,136; yet, in spite of this, by the cumulative power of compound interest, the aggregate deposits increased, in the same period, £10,718,751. In nine out of the seventeen years, the withdrawals exceeded the deposits, and in the years 1847 and 1848, which were marked by great commercial distress in England, the excess of withdrawals over deposits was more than five millions of pounds sterling. These figures show how much more frequently in Great Britain than in our own State, the annual earnings of the poor prove inadequate to their subsistence, and how much oftener they are forced to rely on their accumulated savings. Our own returns do not state the amount of withdrawals, but there is no doubt that with us, even, they sometimes exceed the deposits. This was probably the case in 1857, when the yearly gain was only \$899,215, a sum considerably less than the interest upon the deposits of 1856. Nearly a million of dollars must have been withdrawn more than was deposited, in that disastrous year. In New York, the excess of withdrawals was more than \$1,700,000.

It is to be regretted that the annual withdrawals, as well as deposits, have not hitherto been stated in our savings bank returns. They are given both in England and New York, and we recommend that hereafter these returns be required to specify the amounts deposited and withdrawn during the year. We also recommend that savings banks be required, either at stated intervals, or at the special call of the legislature, to make return of their depositors by classes, according to the amounts standing to their credit. A special return might also give much other useful information, as to sex, age, (whether minors or adults) nationality, and occupation. Such information has always a high statistical value.

In this connection we would also repeat a recommendation made by this Board in their Report for 1856, that savings banks be required to furnish to the secretary, for publication, a statement of their condition at intervals of not more than three months. Such a statement need not be as full as the annual return now made on the call of the governor, but it should be so framed as to give substantial information to the public, as to the progress and standing of these most important moneyed institutions. They are the banks which hold the capital of the poorer classes, and publicity in all their operations, which is the best safeguard against fraud or imprudent management, is certainly not less important, than with respect to the management and condition of banks of discount, which hold the capital of the rich, and in all their dealings are subjected to the scrutiny of intelligent customers and stockholders. New York already requires two returns a year, and the subject of more frequent statements is beginning to be discussed in England.*

The investment of savings bank funds is a subject of some embarrassment, and complaints are frequently made by managers, that they cannot always find a use for their money in the investments authorized by law. As we have shown by reference to bank capital, the funds have accumulated faster than the channels for their employment, and the difficulty has hitherto seemed of a serious and growing character. The course of legislation has been, in some respects to enlarge, and in others to restrain the liberty of investment. The public stocks of the New England States, other than Massachusetts, have recently been added to the list of authorized securities, and we see no reason why this list might not, with equal safety and advantage, be enlarged by adding the public debt of the cities of Portland, Hartford, Providence, New York, Albany, and Brooklyn. All these cities possess an ample municipal property, and enjoy a high credit. The unhappy events which have plunged our country in a civil war, may, however, furnish the savings banks with abundant securities of a high order, without opening to them a wider choice than now exists by law. It is not probable that deposits will increase rapidly during the pendency of this struggle, but as the industry of the State returns to its wonted

* See London Economist for July 13, 1861.

channels, or finds new ones opened to it, as is now rapidly being done, the accumulations will again commence, and savings banks will be in the receipt of moneys both from deposits, and interest, and the payment of loans. It is to be hoped, that, both from motives of patriotism and of pecuniary advantage, large investments will be made in the debt of our own and the neighboring States, which have, with such alacrity, come forward, in the time of their country's peril, to pledge the wealth and the creative energies of their people, to sustain our national existence. These debts are based upon an ample property, upon a State credit which has never been tarnished, and upon the promises and faith of a people whose productive capacity, and habits of economy, could not be more forcibly illustrated than in the history of those very institutions whose aid they will now invoke. In urgently commending these State stocks to the attention of savings bank trustees, we do not, by any means, exclude from their favorable regard, the public stocks of the United States, of which we have elsewhere spoken. The pledge of the nation's faith and resources comprehends those of each and all the States, but in the creation of great local debts in every State, it will be necessary hereafter, more than ever before, to find a market for them among their own citizens, and the institutions which garner up the savings of those who individually possess too little to invest it for themselves.

We would also recommend, as has been done in a former Report, that savings banks be authorized to loan directly to the Commonwealth, as well as to invest in its public securities.

Notwithstanding the present and prospective prominence of public stocks, other investments will absorb a considerable portion of the funds of these institutions, and the character of each of those authorized by law, demands from us a passing notice. It is to be borne in mind, in the first place, that *safety* and not *profit* is the consideration mainly to be regarded in the investment of trust funds. There must be no ambition to make large dividends; no alluring of depositors by promise of extraordinary interest; no trenching on the ground reserved for banks of discount; and above all, no rivalry between savings banks themselves. All have not equal advantages of locality or association, and some will necessarily be more profitable than others. The location of a savings bank is not selected with

reference to the opportunities for investment, but solely with a view to facilitate and encourage the saving of those earnings, which might otherwise be wasted. A great diversity does, and must, on this account, exist, in the kinds of investment most favored by trustees in different parts of the Commonwealth.

Next to safety, *convertibility** is of the highest consequence. The funds of depositors are subject to withdrawal on short notice, and a considerable part of them must be so invested as to be readily turned into cash at any moment. It is not deemed wise to keep a large amount of cash on hand, and to obviate the necessity of it, deposits on interest in banks of discount are authorized by law. Formerly, the amount of these deposits was not restricted, but it is now limited to seven per cent. of the total deposits in the savings institution. We think the limit might safely be extended to ten per cent., provided the whole deposit should not exceed a certain amount. In New York, the limit for such deposits is twenty per cent., and not exceeding \$100,000, in any one bank.

The public stocks of which we have spoken, possess the element of convertibility in the highest degree. Next to these stand bank stocks. In ordinary times these can be readily sold, and without any considerable sacrifice on their fair value. This is especially true of the stocks of Boston banks, for which the daily sales at the brokers' board, and the weekly sales by auction, afford a constant market. Country bank stocks are only less convertible, because the circuit within which their value is known is more limited, and contains fewer buyers, but they seldom fail to bring a fair price, when required to be parted with. The present depression of bank stocks will probably lead savings banks to invest more guardedly in them in future, but as the causes of this depression are altogether temporary and exceptional, and the extent of their depreciation in value is greatly overestimated in the popular mind, we believe that they will speedily regain their place in public favor.

* "Convertibility requires two concurrent circumstances: first, that the securities should be sufficiently extensive to *have a recognized place in the market*, so as to be familiarly known, and be constantly before the mind of buyers;—the second requirement is capability of *realization* without loss, or with as little as possible; and it is well known that, in this respect, convertibility is lessened, by placing too much of the investments on one particular security."—*Scratchley*.

Loans on stock collaterals stand next in order. If the securities are judiciously selected, and taken with a sufficient margin, such loans can usually be realized in a very short time ; but it is, unfortunately, too often true, that borrowers expect the greatest indulgence in the time of payment, so long as the security remains good, and managers are slow to press them, or to force the sale of their collaterals.

Loans upon the credit of individual names will, perhaps, be regarded as next in the rank of convertibility. This class of investments is somewhat peculiar to our State. In New York* it is prohibited altogether, and in England and France it is not included in the authorized classes, and even in our own Commonwealth it is permitted to be resorted to only when the deposits "*cannot be conveniently invested in any or all the modes*" otherwise specified. The language of the statute indicates that the legislature preferred other modes of investment, and permitted this to be availed of only when those previously enumerated should prove inadequate conveniently to absorb the accumulating funds. There have no doubt been periods when other investments could be less conveniently found than at present, and certain localities where it was not deemed prudent to lend on mortgage of a generally declining property, but we think that in the increasing abundance of public stocks, there will be less inducement hereafter than heretofore to invest on merely personal security, and that the limit, now fixed at fifty per cent. of the total deposits, might with propriety be restricted within narrower limits. Such would seem to be the prevailing sentiment in the Commonwealth, the average of personal loans in the whole State being less than 20 per cent. of the whole deposits. While there are many personal loans of a very high character, and upon which there is very small risk of loss, and also great readiness of convertibility, there are many others which are very slow and practically inconvertible. We think it highly desirable that such loans should be made upon a definite time, when they should be required to be paid ; but we do not, in making this suggestion, wish to be understood as sanctioning a

* Act of April 15, 1853, section 6. "Savings banks, or institutions for savings, are hereby prohibited from loaning the moneys deposited with them, or any part thereof, upon notes, bills of exchange, drafts, or any other personal securities whatever."

considerable class of loans upon personal security, which have obtained favor in certain localities, and which, if within the letter of the statute, are certainly foreign to its intention. We refer to loans upon what is essentially business paper. The form of these loans is according to the statute, the notes being signed by three parties, and they are usually written on a time which would fall within the limits of ordinary bank accommodation; but the makers are sometimes all partners of one house, and exposed to the same business risks; and to show that they themselves regard such notes as single name paper, they pledge their regular business paper for its security. We have observed often, that the class of paper so pledged is of an inferior character, being either too long, too remote, or too little known to meet with favor at the discount banks. We recall an instance last summer, when exchange in western cities ruled at ten per cent. and upwards, where all the collaterals held by a certain savings bank near Boston, for the notes of a respectable mercantile house, were payable in Illinois, Wisconsin and other western States, of which not a single piece could then have been discounted at a bank in State Street. It is true that they were taken at a margin, and this is usually the case; but they ought not to have been taken by a savings bank at all.

The operation of such loans is precisely this, that a merchant, having culled out of his "bills receivable" all such notes as he can get discounted at bank, carries the balance, which are either too long, or too poor, to be negotiated in the regular way, to a savings bank, where he gets a considerable loan upon them. He is enabled, by this process, not only to expand his own credit to an unwarrantable degree, but also to indulge his customers in longer credits than it is either well for them to have, or for him to give. The injury to the public and to the mercantile system is great and immediate. Long credits have done more than any other instrumentality (unless it be an unsound currency) to injure American trade. There is a growing conviction of this truth, and the spirit of legislation should promote, rather than impede, the introduction of a better system. We see no more simple method of preventing such a misuse of savings bank funds as we have pointed out, than by further restricting the amount which may be loaned on personal security.

Loans to cities, counties, and towns have not the element of convertibility, but they are usually a very safe kind of investment. We cannot but think, however, that the facility with which loans have been of late years procured by municipal corporations, both from savings banks and the free banks, (which are allowed to deposit such securities with the Auditor as a basis for their circulation,) has tempted them to increase their indebtedness to an unwise degree. There is great laxity in the manner of taking municipal loans, and legal questions have already arisen as to the authority of a town treasurer to bind the corporation he represented. The strictest formality should be required by the lender, both as to the manner of authorizing the loan, and as to the execution of that authority. Authority to make a specific loan, of a specified institution, is altogether preferable to a general authority to borrow not exceeding a certain sum; and when notes are given by a treasurer, some other authority should certify upon them, that they are duly given, and a certified copy of any vote authorizing the loan should invariably be required, and should be kept on file with the note. We desire to impress this caution earnestly upon bank managers, because we have had frequent occasion to object to the manner in which loans of this character have been authenticated.

The only investments remaining to be considered, are loans on mortgage. These in the form usually adopted—with a power of sale—are securities of the highest order. They are, however, among the slowest and least convertible of investments, and they need, therefore, to be selected with great caution, and with an eye to future contingencies. It is not prudent to loan on real estate which is declining in value, unproductive, or slow of sale as compared with other property. Property which yields an income is always safest, because it provides for the interest for which it is pledged. We highly approve the plan adopted by some institutions, which requires a certain percentage of the loan to be paid annually. Although it adds somewhat to the labors of the officers of the bank, it is a great safeguard against depreciation in the security, and it encourages thrift and economy in the borrower; and if the property is not of a kind to emancipate itself gradually from debt, it is not such as a savings bank ought to loan upon. There are now localities

within the Commonwealth, where, from a general depreciation in the value of real estate, the mortgages held by the local savings banks cannot be made to pay the debts for which they are held. The statute limit for mortgage investments is seventy-five per cent. of the deposits. We think it will be rarely found expedient, in practice, to approach this limit. The president of the largest savings bank in this country, after an experience of more than a quarter of a century, in a communication to a member of this Board, expresses the opinion, that "real estate securities may be safely taken to the extent of about one-third of the entire deposits."

The propriety of keeping a surplus fund to cover depreciation, has been discussed in former reports. We have seen that such a fund is maintained by the savings banks of the State of New York. It now amounts to nearly five per cent. on the total deposits. The statute (Act of May 6, 1839, section 3) authorizes it to be reserved to the extent of ten per cent. We think such a measure extremely judicious, and would recommend the adoption of a law in this Commonwealth permitting, and perhaps requiring, such a reserve.*

The present condition of the industry of the country will not encourage petitions for the incorporation of new savings banks, nor, in our opinion, would it justify the legislature in granting such petitions if presented. The facilities for depositing savings are already everywhere ample, and the number of small and languishing institutions is quite too large.

We would again remind the legislature that no notice is now required to be given to the Secretary of the Commonwealth of the organization of new savings banks. Such a notice is required of all other corporations chartered by the State, and it should be made obligatory also upon savings banks to give it. We recommend that a law be passed for that purpose.

* In contrast with the reserve of nearly \$3,000,000 held in New York, may be mentioned a deficiency of more than £4,500,000, which exists in Great Britain, being more than ten per cent. upon the deposits. This deficiency has arisen from allowing to depositors a greater interest than investments have realized. As the faith of the government, which holds the deposits, is usually considered to be pledged to the depositors, it is not supposed that they will suffer any eventual loss.

The separation of savings banks from banks of discount, which has been frequently advocated by our predecessors, needs to be again urged. There are at present twenty-seven such institutions, which are located in the same rooms with banks of discount, and managed by the same officers. The evils resulting from this practice are manifold. There is danger of relations growing up between the two institutions more intimate than the law allows, and it is almost certain that the interests of one or the other will be, sooner or later, neglected. The experienced manager whose opinions we have already once quoted, lays it down as an axiom, that savings bank officers "should be free from entanglements with other moneyed institutions." In our examinations we have often found the books of a savings bank sadly in arrear, because the treasurer had been too much occupied with his duties as cashier, to keep them written up. Nothing is of more dangerous tendency than a neglect to keep the transactions of a moneyed corporation properly entered and posted.

While we have thus endeavored to point out the principles by which we believe institutions for savings should be governed, and have not hesitated to indicate some grave departures from them, we are satisfied that, in the main, the savings banks of the Commonwealth are well and prudently conducted. The managers of them seem, in general, to realize the high responsibilities which rest upon them as the trustees and guardians of the poor, and we are glad to observe that the manner of conducting their business is becoming every year more systematic and uniform.

They need also the vigilant eye and the fostering hand of the legislature, not to embarrass their progress by too many enactments, but to watch the successive steps of their development, and to help it onward.

Before the foregoing pages had left the printer's hands, the returns of savings banks for 1861 had been received. We were not unprepared to learn that a decline had been experienced, both in the amount of deposits, and the number of depositors, and such we find the fact to be. The deposits on the day of the return—October 26, 1861—amounted to \$44,785,438.56, a decline since 1860 of \$268,797.25, and the number of depositors was 225,058, a decline of 5,010.

When we consider the momentous nature of the struggle in which we are engaged, growing out of an attempt to destroy the whole fabric of the government, and thereby involve in a common ruin all public and private credit, it is only to be wondered at that the decline has been so small. Want of employment among the laboring classes has, no doubt, contributed, in some degree, to bring about this result. It has prevented the making of new deposits, and it has caused those of former years to be withdrawn; but this period of idleness is passing by, and either in the military service of the country, or in those channels of industry which the war itself has opened, an average amount of occupation will be found. But we incline to believe that two other causes have contributed to the decrease of deposits more potently than this—apprehension of loss, and withdrawals for investment in the national loans. Throughout the year there has been a continual drain upon the banks, occasioned by fear of loss from their failure, or through the interference of the government. When we consider how large a proportion of depositors are foreigners, strangers to the country, and only partially acquainted with its institutions, that they have been educated to look upon governments with suspicion, and *that in their own country, all the funds of savings banks are in the custody and control of the government, and invested in its securities*,* it is not surprising that they should have taken alarm, and believed their hard-earned savings to be in peril. To a large extent it is known that the moneys withdrawn from this cause have been hoarded. These apprehensions also will pass away, and it is gratifying to record that the influence of those whom our adopted citizens are wont most highly to respect, and upon whose counsels they are accustomed to rely, has been uniformly exerted to allay these fears, and to prove them groundless. We cannot doubt, also, that to a considerable extent withdrawals have taken place for investment in the national loans. The rate of interest on these securities being higher than that paid by savings banks, has doubtless

* In Great Britain the funds of savings banks and friendly societies are all placed in the hands of the Commissioners for the reduction of the national debt, and by them invested in public stocks. We have already mentioned in a note to page 169, that a serious loss of assets has resulted from this management.

attracted a large number of those who usually deposit in considerable sums, and it was specially to attract this class, that the government bonds have been issued in denominations so much smaller than has been customary heretofore.

GEORGE WALKER.

J. FREDERIC MARSH.

The undersigned cannot agree with his colleagues in the opinion expressed in this Report that it is desirable to restrict within narrower limits the amount which the savings institutions may now loan upon personal security. The legislature wisely extended to them such privileges as would best enable them to manage the funds intrusted to their care ; and I am aware of no sufficient reason for “embarrassing their progress” by abridging any of the modes of investment now permitted. With this exception, I most heartily subscribe to the preceding Report.

W. D. FORBES.

[See p. 144.]

BANK COMMISSIONERS' OFFICE, BOSTON, }
February 9, 1861. }

DEAR SIR,—Application has been made to this Board to give a practical construction to section 51 of chapter 57 of the General Statutes, relating to cashiers' bonds. A question has arisen, whether each bond must have two sureties liable in its full amount, making an aggregate liability, under all the bonds, of a principal and two sureties for at least twenty thousand dollars; or, whether the liability of sureties may not be so divided as to equal that of one surety only in that sum. The latter practice prevails to a considerable extent, and doubts have arisen in the minds of bank officers and of this Board, whether it is in conformity with the statute.

It has also been made a question, whether, upon the renewal of a bank charter, the bonds of its officers must be renewed.

Deeming it proper that, upon important legal questions, we should be guided by the advice of the law officer of the government, we request your opinion upon the questions propounded, in such form that it may be communicated to the bank officers of the Commonwealth.

We have the honor to be, very respectfully, your ob't servants,

J. FREDERIC MARSH,

W. D. FORBES,

GEORGE WALKER,

*Bank Commissioners.**The Attorney-General.*ATTORNEY-GENERAL'S OFFICE, }
February 12, 1861. }

TO J. FREDERIC MARSH, W. D. FORBES, GEORGE WALKER, Esqs.,
Bank Commissioners :

GENTLEMEN,—I have the honor to acknowledge the receipt of your favor of 9th current, requesting my opinion upon the construction of the following section of the General Statutes :

Chap. 57, Sect. 51. "The cashier, before he enters on the duties of his office, shall give a bond or bonds, with two or more sureties to the satisfaction of the directors, conditioned for the faithful performance of the duties of his office; and in no case shall bonds be taken for a less sum than twenty thousand dollars."

Under the provisions of this section, if one bond only is given for the whole amount, two sureties are necessary; and if several bonds are taken, the aggregate of which is twenty thousand dollars, each of them must be executed by at least two sureties.

It is the plain intent of the statute that the fidelity of every cashier shall be secured by the names of two sureties, and that the whole amount of security shall not be less than twenty thousand dollars. The permission to divide this amount into several bonds, each of less magnitude, was intended for the convenience of cashiers and their sureties, but not to deprive the banks of the security of at least two names for the whole and every part of the sum required.

The second question proposed is, "Whether upon the renewal of a bank charter, the bonds of its officers must also be renewed."

In my opinion, whenever a bank charter is renewed, new bonds ought to be given by all its officers. The expiration of the charter is the natural termination of the existence of the corporation; and persons who have assumed the liabilities of sureties for bank officers, have the right to claim that their engagement is then terminated, and cannot be extended over another term of years by a renewal of the charter being granted by the legislature, a contingent event over which they can exercise no control.

Very respectfully, your obedient servant,

DWIGHT FOSTER, *Attorney-General.*

OFFICE OF THE BANK COMMISSIONERS, BOSTON, }
February 15, 1861. }

To the *President and Directors of the Bank:*

GENTLEMEN,—The subjoined opinion of the Attorney-General of the Commonwealth, with reference to the law regulating the bonds of cashiers, seems to us of such importance as to require it to be specially communicated to bank managers throughout the Commonwealth. We trust that no change may be required in the cashier's bonds held by your institution, to make them conform to the statute as thus expounded by the Attorney-General; but, if it should prove otherwise, you will see the necessity of having them so made at the earliest possible moment.

Very respectfully, your obedient servants,

J. FREDERIC MARSH,

W. D. FORBES,

GEORGE WALKER,

Bank Commissioners.

ABSTRACTS

OF THE

RETURNS FROM THE BANKS,

AND FROM THE

INSTITUTIONS FOR SAVINGS

IN

MASSACHUSETTS.

1861.

PREPARED FROM OFFICIAL RETURNS

BY OLIVER WARNER,

SECRETARY OF THE COMMONWEALTH.

BOSTON:

WILLIAM WHITE, PRINTER TO THE STATE.

1861.

Commonwealth of Massachusetts.

SECRETARY'S DEPARTMENT, BOSTON, January 1, 1862.

To the Honorable, the Senate and the House of Representatives :

I have the honor to submit for the information of the Legislature, the Abstract of the Annual Returns of the several Banks and Savings Institutions in the Commonwealth, exhibiting their condition on Saturday the twenty-sixth day of October, 1861, in compliance with a requisition issued by His Excellency the Governor, on the ninth day of November.

Very respectfully,

OLIVER WARNER, *Secretary.*

CONDITION
OF THE
BANKS IN MASSACHUSETTS,

SEVENTH
ANNUAL REPORT
OF THE
INSURANCE COMMISSIONERS,

OF THE
Commonwealth of Massachusetts,

JANUARY 1, 1862.

Part I.
MARINE AND FIRE INSURANCE.

BOSTON:
WILLIAM WHITE, PRINTER TO THE STATE.
1862.

SEVENTH ANNUAL REPORT
OF THE
INSURANCE COMMISSIONERS.

*To the Honorable Senate and House of Representatives, in
General Court assembled.*

The undersigned, Insurance Commissioners, have the honor to submit to you their Seventh Annual Report, in regard to the Insurance Companies doing business in Massachusetts. The convenience of dividing this Report into two distinct parts was found so great in the experiment of last year, that we resort to it the more readily this year, and are thus enabled to give the statistics of the Fire and Marine Insurance companies considerably earlier than it is possible to complete all the desirable calculations on the returns of the Life Insurance companies. These calculations are in such a state of forwardness that we hope to submit the part on Life Insurance earlier than in former years.

There is, however, one topic relating to all classes of insurance, and especially to Life Insurance, to which it seems proper to allude at the earliest opportunity. It is taxation. In the best of times, when legislators look about them for ways and means, moneyed institutions are tempting subjects of taxation. In times of war, when self-preservation calls aloud for the utmost exertion and every resource, the temptation not to neglect institutions so profitable as Insurance Companies are commonly supposed to be, and so full of available funds, is multiplied manifold. But we think a little careful reflection will show that Insurance Companies can never be wisely taxed

for the general purposes of government, and that it is better not to tax them even for the purpose of supervising their own operations, beyond the benefit which they themselves, as institutions, derive from such supervision. So far as individuals have money invested in those institutions, let them be taxed, no more and no less than if it were invested elsewhere. This does not operate to discourage, depress or embarrass the institution. But a tax laid upon the institution itself, in its corporate capacity, is only so much penalty on its corporate existence. The worst possible time to exact such a penalty is war time. Then every institution specially adapted to times of peace is put to a strain. Its ordinary resources are impaired, and its hold on public confidence diminished. And one of the very great evils of war is that it deranges and cripples those great social organisms on which peace depends for its prosperity, and to the healthy action of which war itself must look for the means of persevering when victory has a disposition to keep retreating. The more troublous the times, the more tenderly let us cherish the institutions which knit into one whole the structure of our industry. If a man had to sacrifice ten or twenty per cent. of his weight within a given time to save his existence, it might not be wise for him, if nature left the assessment to his choice, to extract at that rate, or at any rate, from the tendons, ligaments, or glands, that hold his frame together, or effect its vital secretions. He would do better to take the required pounds as equitably as possible out of the flesh, at some little distance from the vital machinery, and leave that in the best condition to produce more. To dismiss all figures of speech, there seems in regard to Insurance Companies of all kinds, no valid reason why every person who is in any way connected with them should not be taxed for the support of the government, according to his ability, as an individual, and any tax on the company, after that, is in fact taxing him beyond his share, and if he is a policy-holder, exacting a penalty on his prudence.

It is often argued that Insurance Companies should be taxed as well as Banks. The cases differ remarkably in this. The Banks have derived from the legislature, as corporations, the privilege of furnishing to some extent a paper currency beyond the amount of specie in idle reserve behind it, that is to say,

the privilege of borrowing to a certain extent on their promises, without paying interest. If the community represented by the legislature lends the banks some millions of dollars without interest, it certainly establishes a special claim to call upon them to contribute something to the expenses of the State, and it is obvious enough that this tax can be paid as conveniently by the corporations as by the stockholders. In the case of Insurance Companies, no special privileges of this nature have been granted. On the contrary, the State holds the companies bound to give to the full all the insurance that has been paid for, and throws the burden of proof upon them in case of dispute as to loss.

When applied to Life Insurance companies, the foregoing arguments hold good with manifold force. These institutions are built up almost entirely of contracts extending over the entire life of the policy-holders, or the largest part of it, and requiring small annual payments to be accumulated at compound interest, in order to pay large sums at the close of life, or at a very advanced age. These annual premiums are carefully calculated on certain assumptions as to future interest, the average vitality or chances of after life at given ages, and the probable expenses of managing the business. Neither the certainty nor the probability of taxation entered into these assumptions at all, and the premiums are unalterable. When money is invested to accumulate at compound interest, the effect of taking a little out at an early stage, or establishing a regular leak even of small dimensions, becomes very surprising when we contemplate the ultimate result. It is like inflicting a little wound on a sapling. Thirty or forty years after you see a hollow, rotten trunk, with sapless limbs, tottering to its fall, instead of a sound, vigorous candidate for the keel of a clipper ship.

Suppose the accumulation of a mutual life insurance company is one million of dollars, and instead of being contented with taxing individual members according to their means, the State taxes the funds of the company one per cent. for five years, thus obtaining for the public use fifty thousand dollars. The managers of the company, afraid to drive away business by asking more of new comers or withholding from old policy-holders the usual facilities for keeping up their

policies, very naturally proceed as if nothing had happened, their accumulation still being ample for all proximate calls. At the end of thirty years from the first imposition of this small temporary tax, their fund then called into its full play to meet the thickening losses which belong to the mature age of the company, will at the ordinary rate of interest be the worse for the tax by the important sum of \$241,930. The deficiency may then be found irreparable, causing the premature death of the company, and the saddest havoc and ruin among the multitude of precious hopes clustered around it. War makes widows and orphans enough as it goes; it ought not to lay in store needless woes for the widows and orphans of a future generation.

No State which values its future, or has any sense of the bearing upon it of these great social and prudential institutions, can willingly inflict any such injury on any life insurance company within its jurisdiction, nor will it by exercising any power of partial taxation upon the companies of other States, provoke retaliation upon its own.

Considering the agitated condition of the country during nearly the whole period covered by this Report, the insurance companies of all classes have shown a marvellous steadiness and vitality. All the companies existing in this Commonwealth on the 1st of November, promptly made the required returns, and similar returns were received from all foreign companies having agencies in this State. The usual abstracts of these returns are appended. The Fire and Marine risks of the home companies outstanding on the 1st of November, 1861, and the losses paid during the year ending at that date, compared with the previous year, will be seen on the next page.

RISK AND LOSSES.	1860.	1861.
<i>Marine Risks.</i>		
In 18 Stock Companies,	\$52,154,961 50	\$39,265,893 00
In 13 Mutual Marine and Mutual Fire and Marine,	62,195,601 50	54,758,808 50

<i>Fire, Risks.</i>		
In 30 Stock Companies,	\$146,710,128 70	\$126,101,635 37
In 5 Mutual Fire and Marine, . . .	10,932,414 00	11,327,310 00
In 61 Mutual Fire Companies, . . .	221,982,165 12	218,558,361 00
Total Fire,	\$379,624,707 82	\$355,987,306 37
Total Risks, Fire and Marine, . . .	\$493,975,270 82	\$450,012,007 87
<i>Marine Losses.</i>		
In 19 Stock Companies,	\$1,834,893 06	\$1,500,605 80
In 13 Mutual Marine and Mutual Fire and Marine,	1,879,200 25	1,950,914 43
Total Marine Loss,	\$3,714,093 31	\$3,451,520 23
<i>Fire Losses.</i>		
In 27 Stock Companies,	\$927,831 96	\$963,266 02
In 3 Mutual Fire and Marine, . . .	9,433 75	27,528 10
In 56 Mutual Fire,	456,676 05	349,265 85
Total Fire Loss,	\$1,493,941 76	\$1,340,059 97
Total Loss, Fire and Marine, . . .	\$5,208,035 07	\$4,791,580 20

It would be interesting to infer the average cost to policy-holders and profit to the companies of each branch of insurance, but the returns lack the completeness and distinctness necessary to give a proper basis of facts. In the marine business we have no means of knowing the whole or the average amount of risk borne or business done during the year, and in a year of disturbance like the past, the amount of risk outstanding at the close is hardly an indication of it. As to average profits, a question which really pertains only to stock companies, nothing can be determined, because the companies are chiefly mixed, insuring both fire and marine risks, while the expenses of each are not distinguished. In regard to the average cost to the policy-holder of the dollar of indemnity for loss by fire, it is possible more nearly to approach it, in regard to the two classes

of Stock and Mutual Fire companies. In the Stock companies the cash received for fire risks during the year, and in the Mutual Fire companies the cash received less the cash dividend returned during the year, represents very nearly the whole premium for the risks borne during the year on which the losses paid have occurred. From this we can easily infer how much the policy-holder has on the average had to pay in each year, in each class of companies, for every dollar of indemnity he has received.

	Premium.	Loss.	Cost of each dollar of indemnity.
In 1860.			
Stock Companies, . . .	\$1,345,045 00	\$927,832 00	\$144 97
Mutual Fire Companies, .	538,780 00	456,676 00	117 98
Total, . . .	\$1,883,825 00	\$1,384,508 00	136 06
In 1861.			
Stock Companies, . . .	\$1,283,326 00	\$963,266 00	\$133 22
Mutual Fire Companies, .	454,446 00	349,265 00	130 11
Total, . . .	\$1,737,772 00	\$1,312,531 00	132 40

The whole number of home companies reported in this year compared with last is as follows :—

	1860.	1861.
Stock Companies,	35	34
Mutual Marine and Fire and Marine Companies, .	14	13
Mutual Fire Companies,	65	61
Total,	114	108

Of the four Fire Insurance companies chartered by the previous legislature, one on the Stock and three on the Mutual plan, none have gone into operation. Of the companies that appeared in our Report of January, 1861, the Warren Insurance Company of Boston had nearly closed its business by its own

vote, and it does not appear in the present Report. The Boston Inland Mutual, a Mutual Fire and Marine Company, during the year voted to close its business and re-insure its risks. The Home, Fayette, Traders' and Hamilton, all mutual companies, have been closed by injunction of the Supreme Judicial Court, on petition of this Commission. In all of these cases but one the cash premium advanced on the risks had become entirely exhausted, and the companies had no means but assessment of meeting outstanding losses, and probable losses on the outstanding risks. Two of them, the Fayette and the Traders', had made and endeavored to collect assessments, but without success, the assessment being only partially collected, after months of delay, and at an expense of from 10 to 25 per cent. on the amount collected. In the Home Company, which had not made an assessment, there were no available cash funds on hand to carry through risks which had dwindled in amount to less than that required by the general statute for a new company to start with. In neither of these cases did it seem just that the company should go forward to take new risks and receive cash upon them, while the risks already on hand had no cash to carry them through, but only promises on which nothing could be certainly or seasonably realized. The Hamilton Mutual Insurance Company of Salem was in somewhat different circumstances, and its history and fate should be a warning to all members of Mutual Fire Insurance Companies to look into their affairs themselves and not trust to Officers, Directors, Agents or even the Insurance Commissioners. The doings of that company were a mystery to us for three years. It seemed to have identified itself with the history of the Bar of this Commonwealth, having furnished far more than its share of the knottiest cases. It was also familiarly known in the courts of other States. Its zeal in resisting claims that were apparently fraudulent was certainly commendable. But why was it persecuted with so many such? On one side it seemed to be the favorite prey of rogues who were never discouraged in pursuing it, however small their success. On the other side, it almost as frequently retreated behind clouds of verbiage in the policy, and defied honest claimants who had not lived up to conditions of which they had not suspected the existence, who, in short, had neglected to read the policy, which would have

informed them that though they had paid the premium, it was not their property, but some imaginary possession, that was insured. The same armor which thus shielded it against honest claimants was good against roguish ones too dull to discover it. Thus it could take all sorts of risks at all sorts of premiums. We were unwilling to believe at first that it purposely and extensively practiced such a game as this. It had a fair show of cash assets to meet losses, and in two of its four classes, the losses which were very moderate were promptly settled without litigation. These classes consisted chiefly of the less hazardous risks in the vicinity of the office. The classes in which the litigation had become so notorious were mostly filled with risks picked up in other States or by itinerant agencies in this. The current accounts of these classes seemed to be kept distinctly, and though it did not clearly appear to us in what proportions the cash assets belonged to each of them, neither class seemed destitute of funds, and no suspicion of insolvency arose till last July, when a payment which had been twice voted by the Directors, seemed unreasonably delayed. On looking at the history of the company as it appears in the Reports of this Commission for the last five years, we found the following singular state of facts and figures.

On the 1st November, 1856, the cash assets returned were as follows:—

Railroad stocks and bonds,	\$15,876 08
Mortgage on real estate,	2,000 00
Cash in bank,	3,940 53
Cash in hands of agents,	13,730 83

Total Assets,	\$35,547 44
-------------------------	-------------

Add to this cash for premiums received in the next four years, ending Nov. 1, 1860,	\$99,452 18
Cash received for interest to that date,	1,569 00
Money borrowed,	5,467 00

Total Cash Resources,	\$142,035 62
---------------------------------	--------------

Deduct Losses paid in four years,	\$75,196 10	
Expenses, &c.,	32,000 35	
Cash dividends,	6,867 45	
Depreciation of the above stocks and bonds still held,	4,681 08	
	<hr/>	\$118,744 98
Balance in 1860,		\$23,290 64

As no considerable receipt of cash could have been omitted, it was difficult to see how the company, which could have made nothing by banking or speculating in stocks or real estate, should show in 1860 cash assets larger than this balance. It did, however, (Sixth Annual Report, page 127,) show assets as follows:—

Railroad stocks and bonds,	\$11,195 00
Mortgages of real estate,	9,946 00
Notes secured by personal and collateral security,	2,083 21
Personal property,	700 00
Cash on hand,	1,940 37
Due from agents,	5,168 00
	<hr/>
Total,	\$31,032 58

Here was an overplus of assets of \$7,742.12. In other words, the company seemed to have paid within that four years nearly \$8,000 more than it had had means to pay with. This set us upon examining more closely whether assets which were to such an extent unaccountable could be real. We found by an examination on the 2d of July, 1861, that the nomina, amount of assets on the 1st November previous had been as returned, but had been reduced by subsequent transactions to \$26,277.66. These assets, counting them good, were not sufficient to meet the claims for losses and reinsure the balance of the risks, supposing it to cost fifty per cent. of the cash premium originally received on them, by \$10,471.74. But the railroad stocks were pledged for \$6,028 of borrowed money, leaving available only \$4,327. The mortgages on real estate had been represented to us as being given on property worth nearly double their amount, the title of which in every case had been examined

by two highly respectable lawyers of Boston, and pronounced by them beyond question. It appeared, however, on further investigation, that they had, all but the smallest of less than \$500, been given by two Boston agents to settle arrearages of account; that one of \$4,322.56 was on an undivided third of a lot of land which *might* have belonged to the wife of one of these agents, if it had not long ago been in possession of another party, who had sold it to the city of Cambridge as the site of one of its magnificent school-houses, on a title which the Supreme Court, when appealed to, pronounced perfectly valid. Another mortgage of \$2,100 was on a house and lot worth not more than \$1,600; and another of \$2,000 was on an undivided third of an estate taxed for \$6,000. We could not consider the mortgages in the aggregate worth more than \$3,500. The other assets, being chiefly notes and accounts of agents, did not seem likely to yield more than \$3,000 in cash, and the less likely the longer the collection should be delayed. The net assets having thus dwindled to \$10,827, while the losses claimed were \$11,530, besides a dubious amount for expenses of litigation, the propriety of closing the company seemed no longer doubtful, and our petition to that effect was not resisted. We had, therefore, no occasion to solve the mystery of the apparent excess of payments over the means of payment. Whether the cash book would have verified or falsified the returns in our office is as much a problem to us as ever. Whether proper vouchers could have been produced for all these reported payments we do not know, but we know the secretary and clerk confessed *they* could not do it, that the president usually settled the losses himself, and such sums as he reported paid were placed on the books and voted by the directors. The president was in fact the company; the knowledge of its business was confined to his brains, and the minutes of the directors' meetings were carried in his pocket till such time as he saw fit to have them engrossed by the secretary. Mutual Insurance companies must of course be worse than a farce when the members and directors allow a single officer such irresponsible control; when they have no means of knowing whether he pays what he professes to pay, or frightens the claimants to take less, and then credits himself on the books with having paid the whole. We do not say that the president of the Hamilton took a single dollar

to himself which was due to and reported as paid to claimants, but under the system of accounts pursued in the office we think he might have done so without much danger of discovery. He, or the agent who made the company so confiding a mortgagee, certainly sanctioned advertisements to the public in which the word "mutual" was dropped out of the name of the company, and it was stated to have a "capital" of "\$200,000," or sometimes "\$300,000." Such an instance has cost the public already too much not to be thoroughly used as a warning for the future.

Besides the closing of the before-mentioned companies, two, the Citizens' Mutual, of Brighton, and the Mutual Safety, of South Reading, have been obliged by losses and the difficulty of collecting assessments, to close their second classes. There is now no company having more than two classes, and the impolicy of classifying at all, for the purpose of insuring the more hazardous risks by themselves, seems thoroughly demonstrated. A mutual company having only one or two millions of dollars insured, though the risks are all first class, cannot be at all sure of not having once in a while to assess for premiums beyond the usual stock rates, much less can a class of more hazardous property of the same amount, in which single risks run as high as \$2,000 or \$3,000. And when in case of ill luck in such classes the insured are assessed for not more than twice the usual stock rates, they think themselves terribly abused, though the occurrence is perfectly natural and inevitable. They quietly forget when this happens, that such classes sometimes get through a year and return half the premium, which is also a natural if not inevitable occurrence under the law of chance, or what is the same thing, human ignorance. It is only when risks of such magnitude as these companies take are multiplied by tens of thousands, instead of by thousands, that there is any reasonable probability that the losses will be about the same in one year as another. If we could place in one mutual company the whole \$218,000,000 insured by all our mutual companies, it is plain from this series of Reports for years past that the company would never have to assess; for the aggregate of cash dividends is always from five to ten times as much as that of assessments. It might also insure the hazardous classes of property as safely as the largest stock companies,

charging of course rates sufficiently high in proportion to the risk. But out of more than forty of our mutual companies whose amounts at risk fall below \$5,000,000, and which take single risks frequently exceeding a tenth of the cash premiums received in a year, it is almost certain that some will every year be driven to make assessments to pay losses, although their policy-holders have all paid in cash at the outset a premium ample on the average to carry the risk through. If, as is now usually the case, the assessment is deferred till the company is out of funds and in debt, it will be collected with great difficulty, and will stop the increase of business. If the assessment could be judicially fortified before making the attempt to collect, it would doubtless give the company a better chance of surviving, and the creditors a better chance of receiving the sums due them. But we think that in all cases where a company is brought to the necessity of assessment, unless an assessment can be made and collected large enough not only to pay the losses but to reinsure the risks, and all policies are cancelled which do not promptly pay it, the true interest of the policy-holders is to pay the assessment, have their policies cancelled, and get insured in some other company where the average premium is more sure to carry the risk through. In other words, to get insured in the strongest company that will insure at a fair rate, is always the best policy.

Whether any permissive or suggestive legislation would avail to consolidate all the mutual companies, or, what would be perhaps equally beneficial, the forty or fifty which are not strong enough to stand securely alone, into one company, with local branches, so that our enterprising manufacturers could enjoy the cheapest as well as best insurance, may be worthy of some consideration. Some such comprehensive measure must be resorted to, or the community must for many years suffer from the tedious process of legally winding up inadequate and unsuccessful companies—even if the legislature should henceforth have the wisdom not to add to the evil by creating new ones.

It should always be remembered that Fire Insurance, however important as a balance-wheel to civilized industry, is a very costly institution to the public as a whole. Though the aggregate of wealth would not probably be so great without it, yet it takes away as well as adds. It not only consumes in the

expense of management, but makes the aggregate destruction of property by fire considerably larger, perhaps double. And much of this extra loss falls on the uninsured. Weak, experimental companies, by their want of experience, system and skill, are much more productive of this extra loss than strong, well-established ones. They insure more uninsurable people. Or they are tempted to play the game of the Hamilton. A horde of insurance companies, with itinerant agents at a high commission, are almost as dangerous as Sampson's foxes with torches tied to their tails among the standing corn. It is absolutely necessary to the safe management of a company that its officers should know whom they insure as well as what. And it is consequently important to the Commonwealth that it should know who insures. If too many companies have been already chartered for this business, there is nothing to be done but to encourage consolidation, so that the best tried judgment and skill may control the whole system.

The existence of Fire Insurance companies also makes it more important that there should be stringent State or municipal laws and regulations for the prevention of fires and the detection and punishment of incendiaries. Among us, as the costly experience of the last summer proves, there is need of laws more effectually to control the manufacture, sale and use of fireworks, not excluding that omnipresent little pyrotechnic, the friction-match—a thing which sometimes seems to fulfil its destiny even without friction. In France, which understands chemistry, the amorphous or uncertain kind of phosphorus is not permitted to be used in the manufacture of lucifers. If patriotism does not consist in burning up our country, it seems to us that the whole trade in Chinese fireworks should be prohibited, and amusements should be provided for our children which will not tend so strongly to take the roofs from over their heads, to say nothing of a better effect on the brains within.

Fire and Marine Insurance companies, like those for insurance on Life, are founded on the mathematical doctrine of chance, or what is sometimes called the law of average. By this law, however incalculable any particular event may be, the aggregate of the whole number of such events, when they occur in large numbers and no new general cause interferes to control

them, will be very nearly the same in equal times. If you own a ship or a house nothing can well be more uncertain in itself than whether one will be wrecked or the other burned in the next year. But of all the ships and houses owned in Massachusetts nothing can well be more certain than that the loss by water and fire next year will not exceed ten per cent. of their value, or that the loss by fire on all the property exposed to damage from that element will not exceed two per cent. of its value. It is nearly equally certain, however, that the damage from fire to stores, stables, carpenters' shops, mills, and manufacturing establishments generally, will bear a much greater ratio to the whole value of such property, than the damage to inhabited dwellings will bear to their whole value. It may be one and a half, two, three or four times as great, for each of several classes into which such property may be divided. The prosperity of all Fire Insurance companies depends very much on a knowledge of what is the average value of the risk of each species or class of property, and this can only be approximated by the widest and most careful statistical inquiry. No such inquiry has ever been instituted in any country to our knowledge. In this country it is certain that it has not been. Our countrymen must have gone into the business with no better light than the experience of companies in other countries, and a sort of dim instinct teaching them that a carpenter's shop or a livery stable exposed to ignited cigar stumps and other incendiary missiles must be several times more hazardous than a well-kept dwelling-house. Working at first by mere presumption instead of the results of statistical inquiry, some companies amassed enormous profits, while others left themselves beacon-wrecks to warn succeeding companies against the low rates that ruined them—supposing they were not ruined by high expenses. This high-priced experience of former insurance is of course of some value, just as it is, but of very little value compared with what it would have been, if every company had carefully classified its risks, and ascertained exactly what was the ratio of loss for the year to the amount insured through the year in each class. If the same classification could have been adopted by all the companies, by combining the results of the experience of all, or of such a number that in each class we should have an amount insured through a year ten thousand times greater than the

greatest single risk in that class, we should have an average value of the risk in each class which would be a sure starting point for judgment as to the proper rate to be charged for any particular risk. A few of the larger companies, we believe, do make a classification of risks with a view to their own future guidance by the results. But they are not likely to impart to the public the knowledge they may thus gain, without some equivalent to themselves. The smaller companies seldom make any such classification or keep their records in such a way that the fate of their various classes of hazards can be ascertained, and the results would perhaps only misguide them, if they did. Having insured a dozen planing-mills at ten per cent. for a year and lost nothing, one might decide to take them in future at five per cent.; or having insured one and lost the whole amount, it might decide never to write at all on another, at any rate. To give an example, one of our Mutual Fire Insurance companies with about seven or eight millions then at risk, classified and watched the losses on its policies for six years ending in 1846, and the result was as follows:—

CLASSES OF RISKS.	Amount Insured.	Amount of Losses.	Loss per \$100 insured per annum.
1. Dwelling-houses and contents, barns and contents, . . .	\$6,785,672 00	\$23,038 00	.057
2. Stores, merchandise, shops and contents, (wood and blacksmiths' shops excluded,) . . .	662,362 00	17,782 00	.447
3. Taverns and contents, stables and contents,	164,524 00	18,498 00	1.874
4. Cabinet, carpenters', and wood shops and contents,	118,996 00	12,893 00	1.806
5. Blacksmith and machine shops and contents,	69,304 00	1,218 00	.293
6. Grist-mills, saw-mills, spice-mills, steam-mills and contents,	24,218 00	5,994 00	4.125
Aggregates of all classes, . .	\$7,825,076 00	\$79,423 00	.169

Here the more hazardous classes are manifestly too small to give any trustworthy indication of the average value of such

risks, and it can by no means be safely inferred from the first and second classes that stores are seven times as hazardous as dwelling-houses. Yet on these statistics, showing that the sixth class had suffered seventy-two times as much loss in proportion to the amount insured as the first, the directors refused to insure the more hazardous risks from that time. The loss of the same company without such hazards has been for the last three years respectively, .086, .188, .233 per \$100, or on the average more than it was when it bore them. The truth is that any company large enough to furnish real insurance on any risk could take the more hazardous risks as safely as the less hazardous, if it could only ascertain their true average value by which to regulate its premiums, but this can only be done by combining the experience of many companies for a series of years.

With a view to inaugurate some system by which the value of different classes of fire risks may be ascertained, we last summer issued a circular to the Fire Insurance companies doing business in Massachusetts, inviting them to place us in possession of statistics in regard to their experience similar to those above, only comprising all risks in three classes, one of inhabited dwellings, supposed to be the minimum of hazard, one of "shaving risks," all establishments that produce wooden shavings, from carpenters' shops to steam-planing mills, supposed to be the maximum of hazard, and a third class including all other risks. Replies were received from a large number of companies, but in most cases, as was to be expected, while the plan was approved for future years, the labor of classifying and ascertaining the loss on past risks was declined for want of force in the office. However, twelve companies, chiefly of the smaller mutuals, which all with trifling exceptions decline "shaving risks," gave returns of policies and losses divided into two classes, which are in the aggregate as follows:—

	Policies.	Amount insured one year.	Loss per annum.	No. of Losses.	
				Total.	Partial.
Inhabited dwellings, .	6,155	\$6,059,664 00	\$9,800 00	10	47
Other risks, . . .	7,409	17,505,957 00	50,413 00	69	19

From this it appears, that the loss on inhabited dwellings was .162 per \$100, and that on the other risks .288 per \$100. The attention of the companies having thus been called to the subject, it is very probable that many of them will hereafter keep their records in such a way as to be able easily to furnish us with the classification we desire, or even one more subdivided. By a little concert of action among themselves, they could probably agree upon a more useful classification than that which we have suggested, and we should be happy to give any aid in our power to combine the results and present them in a grand average. It is important that there should be not only a substantial identity in the classification, but that the amount at risk, and the *time* for which it is at risk, should be exactly stated. The secretary of one company writes to us that on examining its records back for ten years, he finds that its losses on occupied houses, during that time, have numbered 173, amounting to \$37,175; and its losses on unoccupied houses have been 29, amounting to \$19,023. But the value of the risk cannot be ascertained in case of either of these classes, without knowing to what amount and how long inhabited dwellings were insured, and to what amount and how long uninhabited ones were. The number of risks in proportion to the value is also a circumstance which has a bearing on the final inference. Thus in the present case the average loss, when the fire occurred in an occupied dwelling, was \$214.89; and when it occurred in a vacant one, \$655.97—tending to show that when a fire occurs in an unoccupied house it is likely to be about three times as destructive as if the house were inhabited. As to the amount of risks borne by this company on uninhabited, compared with that on inhabited dwellings, the secretary says: "Probably not exceeding one-hundredth part of the dwelling-houses insured by this company are unoccupied, as the directors have long declined to insure unoccupied houses, except under special circumstances, which exempted them from the ordinary degree of hazard attached to such risks." Assuming it to be true, that the number of risks on vacant houses, their amount and duration, were respectively one per cent. of those on the inhabited, the facts above cited go to show that a vacant house, as taken by that company, is a little more than fifty times as hazardous as an

inhabited one, being more than sixteen times as likely to take fire, and more than three times as likely not to be extinguished when it does.

It was doubtless the design of the legislature, in preparing the schedules appended to chapter 58 of the General Statutes, to call forth from every insurance company not only the exact amount and condition of its assets on the 1st of November of each year, but so complete a history of its cash transactions during the year previous to that date, that it might be seen *how* its assets had come to be what they were on the 1st of November, from being what they were one year before. It was not intended to omit any item of income or expenditure. Schedule A, applicable to companies having specific capitals, probably comes the nearest to calling forth the full history of the company. No expenditure can fairly escape it, and no gain or loss is left out of sight, except what may occur on securities both bought and sold during the year, and these will affect the balance of profit and loss account which is called for. By comparing the aggregates of the returns of the thirty-three home stock companies which were in operation and made returns in November, 1860, and allowing for the slight change of capital, it will be seen that their business was not less prosperous in the year ending November 1, 1861, than it had been in the previous year; and that after paying about the same amount of dividends, they had \$221,190 to carry to the increase of assets. Supposing there had been no depreciation in the value of their securities during the year, this would have made the total of their assets, on the 1st of November, 1861, \$12,342,331. But as nearly as we have been able to ascertain the market value of the securities at that date, the whole amount of their assets was then \$11,167,576, showing a shrinkage in the course of the year of \$1,174,755, or about 9 7-10 per cent.

Any want of exhaustiveness in the interrogatories addressed to the stock companies, where the officers are acting constantly under the vigilant eyes of capitalists, would be of slight consequence. We think it is otherwise in regard to those addressed to the purely Mutual Fire companies. As their cash resources, compared with their liabilities or risks, are generally very small, and there is no supervision of stockholders, the safety

of the policy-holders and the public depends very much on having a clear and complete statement of their transactions, as well as condition, annually. Though it would seem easy enough for any of these companies to show all their receipts and expenditures, income and outgo, in answer to Schedule C, it is in fact seldom done. In our Fifth Report, page vi, we called attention to this subject, and exhibited distinctly the extent to which the cash accounts, derivable from the returns, failed to account for the condition of the cash assets. It appeared that there were then twenty-six companies that must have received during the year at least \$49,000 not revealed in the returns, and thirty-eight companies which had expended at least \$80,000 in some way not noticed in the returns. We have continued the same comparison of the balance of cash receipts and expenditures with the amount of cash assets returned on the 1st of November, in the Sixth and present Report. This year the returns of seven companies make the above balance exactly agree with the assets. Twenty-two show an excess of assets over the balance, amounting to \$18,345.14, and thirty show a deficiency of \$42,539.15. This is after making such allowance as we are able to for the change in the value of securities. This discrepancy and confusion might probably be remedied by introducing into Schedule C interrogatories calling for—1. The balance to credit or debit of investment account during the year, that is, the gain or loss relative to market value assigned in the previous return, or to cost if purchased since; 2. Amount collected on assessments; 3. Amount received for interest, including dividends on stocks and all other revenue on investments, or on premium notes; 4. Amount paid for interest; 5. Amount of cash premium returned on policies cancelled, or not put in force.

For the purpose of showing the various companies doing business in this State together, we have not only prepared the usual abstract of the returns, but the same synopses as last year, which must be taken with the same grains of allowance as then. It is impossible to make such a comparison of companies, young and old, large and small, pursuing very different systems of business, and resorting to diverse modes of security, without doing injustice to some, or rather, giving occasion for such injustice to be done by others. In many cases, both of

Synopsis for the Year ending November 1, 1861, of Sixty-one Home Mutual Fire Insurance Companies.

stock and mutual companies, where the ratio of expenses to cash receipts is large, the item, "expenses," which in the returns is made to cover all disbursements except for losses and dividends, probably includes more or less of expenditure to prevent loss on the policies, or to save property exposed. It would be well if such expenditures could be distinguished from the other expenses of conducting the office, because, if judiciously made, they are in fact so much money returned to the policy-holder. But, after making all due allowances on this account, and making exceptions of those few mutual companies which receive little or no cash premium in advance, in regard to which the ratio of expenses to receipts proves nothing, there may be derived from a careful study of the columns of this ratio, a most conclusive argument against the multiplication of companies. It is the expenses that mainly eat away the profits of insurance capital and the security of the insured, and they are aggravated everywhere, rather than alleviated anywhere, by adding new companies.

The returns received from three of the English Fire Insurance companies were not made up at the date required by the statute, which is the 1st of June, 1861. For reasons heretofore stated, it would be very difficult for these companies, having business in all parts of the world, to make such a statement applicable to any other date than the close of their fiscal year. A statement applicable to any other date must necessarily consist largely of estimates rather than facts. On this account we have this year, as heretofore, accepted statements made up to the latest close of a fiscal year. In case of the Unity Fire Association, of London, and the Northern Assurance Company, of Aberdeen, London, and elsewhere, the date was December 31, 1860, and in case of the Royal Insurance Company, of Liverpool, it was January 31, 1861. The constitution and modes of procedure of these companies are so different from those among us, that their stability cannot be judged of by exactly the same rules. They all have very large subscribed capitals, with but a very small proportion of it paid in. The personal property of the shareholders is responsible for the residue on call of the directors or at the suit of any claimant. This may be very good security where the shareholders are known and easily accessible, but till put to the test, cannot be much relied on by our own

citizens. The facts adapted to inspire confidence in these companies here are the large amount of their business, yielding an income from premiums so large as to leave no considerable probability of any necessity of resorting to the capital for the payment of losses, in any quarter, and a fair self-supporting business in our own country. Such facts, we believe, all these English companies present, besides another source of security in the case of three of them, that they have considerable reserves for their Life business, while they make no insurance of that sort with us. The Unity is not included in the latter remark. Its Life business is entirely distinct from its Fire. There are in fact two legally distinct corporations for these two branches of business, though singularly enough they happen to have the same name and same board of officers. Again, its capital has been largely called upon, and the return from the home office shows a balance against the company of \$786,139. Though the company some time ago met with an extraordinary loss in Valparaiso, we do not understand that its losses by fire have compelled a resort to the capital. Investment in the stocks of corporations which were held responsible for unfortunate or fraudulent banks, appears to have much more seriously tested the responsibility of the shareholders. The fact that they have responded so largely, and that the business is still immense and increasing at home and abroad, serves to show us, what is not so patent in the case of the other companies, that the large residue of capital, \$8,759,257, subscribed and not paid, is worthy of some respect. It is a proof of strength as well as honesty to have had losses, if the losses have been paid.

From the Liverpool and London Insurance Company no statement has ever been received at this office except of the business of the United States branch, located in New York. An examination of the Acts of Parliament and Deed of Settlement under which this company does business, convinces us that it is not anywhere an incorporated company, or in the sense of chapter 58, section 75 of the General Statutes, "chartered beyond the limits of the United States." It is in Liverpool simply a partnership of underwriters, who are held jointly as well as severally responsible, to the whole amount of their private property, for the contracts of their managing agents. The New York

directors and stockholders are under the same responsibility, and their large private property seems a good guarantee that they will always reserve on this side of the water, as they always have done, ample funds to secure themselves as well as their policy-holders.

The following foreign companies have been admitted to do business in this State, at the dates given:—

Columbia Fire, New York,	Oct. 10, 1861
Atlantic Fire, Brooklyn,	Oct. 29, 1861
Ins. Company of North America, Philadelphia,	Dec. 16, 1861
Republic Fire, New York,	Jan. 29, 1862

Their statements, except that of the Republic, may be found in the Abstract. The Park Fire Insurance Company of New York withdrew its agency soon after our last Annual Report.

The State Fire Insurance Company, of New Haven, Connecticut, has also ceased to do business in this or any other Commonwealth. The history of this company affords mortifying proof that fair statements and high names cannot be relied on to secure honorable dealing in an insurance company, and has taught us never to take such evidence as conclusive when a company applies for the privilege of doing business under our laws. It entered Massachusetts by a deliberate fraud, which should subject to the penalties of criminal law every member of the corporation who participated in or connived at it.

The charter of this company was granted by the legislature of Connecticut, in 1855, to John B. Robertson, Benjamin Noyes, George D. English, Henry Peck, and other gentlemen of New Haven, but it was not organized for business for several years, and the first time we heard of it was on the 9th of April, 1860, when A. O. Brewster, Esq., one of our predecessors in this office, left with us, on its behalf, all the papers which the law requires to entitle it to do business here, with the assurance that it had a capital of \$200,000 paid in and well invested, that he had personally examined all the assets and found them reliable, and that the mortgages, of which it had \$138,100, were on city property in New Haven and New York. Being fully satisfied that the company had more than the amount of funds required by law, invested in the best of securities, we permitted its agents to issue policies. The statement filed in this office on the 9th

April, 1860, was sworn to by the president of the company, John B. Robertson, and the secretary, G. Farnham Stevens, before a notary, and contained in answer to the interrogatories of Schedule A, the following, among other unqualified averments. That the amount of "capital actually paid in" was \$200,000. That it had invested in

	Market value.
United States bonds,	\$1,000 00
State and city bonds,	6,880 00
Bank stocks,	21,492 00
Railroad bonds,	40,590 00
Railroad stocks,	14,020 00
Manufacturing and gas stocks,	8,230 00
Cash on hand,	4,440 00
Cash in hands of agents,	4,943 00
Loaned on mortgage of real estate,	138,100 00
Loaned without collateral,	8,980 00
All other investments,	2,120 00
Amounting in all to	\$250,795 00

The losses unpaid, and all other claims against the company were stated at \$20,033. The whole amount at risk was \$3,322,648, on which the cash received had been \$45,362.23. Allowing fifty per cent. of this for re-insurance, the company had a surplus of \$8,081. This solemnly attested statement, was in itself sufficiently fair, and considering the high respectability of the list of officers inscribed on the back of the document, seemed even more than credible. This list is as follows:—

JOHN B. ROBERTSON, *President.*

G. FARNHAM STEVENS, *Secretary.*

Directors.

JOHN B. ROBERTSON, New Haven.	WM. B. BALDWIN, New Haven.
LUCIUS A. THOMAS, " "	ELI WHITNEY, " "
N. D. SPERRY, " "	ENOS FOOTE, " "
HENRY C. KINGSLEY, " "	A. D. OSBORNE, " "
C. M. INGERSOLL, " "	BENJAMIN NOYES, " "
GEO. D. ENGLISH, " "	HENRY PECK, " "
JAMES M. TOWNSEND, " "	PHILO CHATFIELD, " "
C. S. BUSHNELL, " "	OLIVER MITCHELL, Southbury.
HENRY MUNSON, " "	HENRY I. CAMPBELL, New York.
DANIEL TROWBRIDGE, " "	MYRON H. CLARK, " "

The annual statement of the company on the 1st November, 1860, was to the same effect, and equally indicative of the soundness and prosperity of the company. On the faith of these statements it obtained a considerable business in this Commonwealth. They were substantially false, and the bubble suddenly collapsed in June, 1861, the secretary, Mr. G. Farnham Stevens, unexpectedly disappearing from the scene of his labors, which fact became known here in something less than a month. The directors were left by that event in much greater perplexity than astonishment, though they professed a larger share of the latter feeling. We felt bound by the interests of our citizens as policy-holders, and especially to those of them who had suffered losses, which in several instances would be ruinous to them if not paid, to lose no time in securing for them any thing that could be saved by promptly urging their claims. On visiting the office in July, we learned from the acting president and several of the directors, who gave us access to the books and such vouchers of assets as were on hand, that an extraordinary series of losses in the State of New York had drawn heavily on the company, and absorbed the most available of the assets. What was left we found consisted of the \$138,100 of mortgages, nearly all *not on city property*, but on twenty-four thousand acres of land lying in the mountainous wilderness of Northern New York, of little other than historical value, as holding the body of that honored patriot whose soul is now marching on, and will triumph as soon as the present war ceases to be waged wrong end foremost, and some \$30,000 of stockholders' notes, which the directors pretended *had been* secured by collaterals of stock, but only the absent secretary knew what had become of those collaterals, or indeed of other stocks and bonds which should have been on hand, if the statements filed in our office had ever been true. The blame of the unaccountable condition of the company's assets was emphatically laid on the absconding secretary, and two or three New York stockholders, who, it seemed, owned a majority of the stock. But as the notes were said to be good, and the highly respectable directors promised to see to their immediate collection, to settle with the Massachusetts claimants promptly, to cancel outstanding policies and give scrip for

return premium which would be paid as soon as the affairs of the company could be wound up, we took their word for it, and in the card which we published giving the results of our inquiry, awarded to the New Haven directors an innocence to which we found afterwards they had very little claim. The losses were not settled; on the contrary, letters were received by our claimants from persons employed by New Haven stockholders who owed the company, telling them the concern was hopelessly bankrupt, and offering to pay one hundred dollars for a good claim of two thousand dollars, or at about that rate. Resolved fully to understand this new game, we visited New Haven again, and then, outside of the office, by inquiry of corporations whose stocks the State Fire Insurance Company had professed to own, we discovered what the directors had carefully concealed from us on the former occasion, as well as from Mr. Brewster when he examined the office, and from the public at large, though it is hardly possible that any one of their own number could have been ignorant of it, that at least fifty thousand dollars of the stocks never belonged to the State Fire Insurance Company at all.* They were merely hired for a single year to swear by! During that year they were sworn by twice, at least, for the special satisfaction of the simple-hearted people of Massachusetts, and the use of them cost the company about two thousand dollars, or a thousand dollars for each oath. The lenders, who got four per cent. for allowing their stocks, to be so used for a single year, without any risk whatever, were told that they were wanted as a “temporary guarantee” or “preferred stock;” for the shrewdest financiers in entering into little arrangements of this sort need to be amused and quieted with some kind of euphemism. Before the 1st of April, 1861, every dollar of those that had most dazzled us among the sworn assets of the State Fire Insurance Company was safe home again where it belonged, having answered

* Certificates of most of these stocks were made directly to the company for the sake of appearances, but in some cases this precaution was neglected. And in one or two cases which arrested the attention of Mr. Brewster, the explanation was given that some gentlemen who were not quite ready to pay for their stock in cash had left these certificates with the company till they were so.

the whole purpose for which it was hired. The company, without these fifty thousand dollars, might have gone on prosperously if it had had extraordinarily good luck. The painstaking directors were disappointed in this respect, and we think they richly deserved to be.

Believing that if criminal law has any duty to perform, it must be towards men who thus abuse chartered privileges and high position to attract business by perjured statements, we brought the matter before the Hon. E. K. Foster, State's Attorney for New Haven County, and urged such criminal prosecution of the officers as he might think the law and the evidence would warrant. He was clearly of opinion that the law had been violated and that the evidence we produced showed good cause of action, but was doubtful whether a conviction could be obtained against any of the resident officers, as nobody could be made to believe they intended any wrong. Could Stevens be got hold of, it might be otherwise in his case. He was willing however to commence proceedings against John B. Robertson, after first letting him know what was about to be done, being confident that the directors, when they saw the nature of the case, would at once step forward and, by way of vindicating their president's and their own innocence, settle at least all the Massachusetts claims. After waiting some six weeks and seeing no results, we wrote to Mr. Foster to learn the progress of the matter, and received the following reply.

NEW HAVEN, 15th November, 1861.

Dear Sir,—Yours of the 12th is before me. I have not instituted proceedings against any one connected with the State Fire Insurance Company as yet, nor am I altogether satisfied that I can do so at any time successfully. There is enough, however, to justify action should it be thought advisable to proceed at any time. I have made the late officers aware of the fact that the matter has been placed in my hands and they are quite disturbed at the fact. It is my full belief that if I had the claims they would make a satisfactory adjustment of them without much delay.

I am, very respectfully, yours,

E. K. FOSTER.

Hon. ELIZUR WRIGHT, Boston.

It is not to be understood from this that Mr. Foster sought the business of collecting these claims, or was willing to use his position as public prosecutor to serve such a purpose, but that it was his opinion that the directors were personally liable for claims arising from such false statements as had been filed in Massachusetts, and that they might be recovered of them by civil process. Still urging a criminal prosecution against the president, we took measures to have the personal responsibility of the directors tested by a civil suit, on which there is nothing yet to report. On a further examination of the criminal laws of Connecticut, Mr. Foster came to a conclusion which he thus states, in a note addressed to one of us.

NEW HAVEN, 9th December, 1861.

Dear Sir,—An examination of our law by no means satisfies me that I can successfully prosecute the officers of the State Fire Insurance Company; and indeed it determines my mind quite otherwise except as to the Secretary, Farnham Stevens, who has gone to parts unknown. The reasons for this conclusion I will state to you the first time I meet you.

Respectfully yours,

E. K. FOSTER.

On a subsequent interview with Mr. Foster the reasons he stated did not seem to us materially different from those which have been above referred to. They arose rather from the practical difficulty of convincing a jury of fraudulent intention, than from any want of the evidence legally requisite to produce such a conviction. And we think we succeeded in convincing him that as the president and secretary both swore the same oath, there could not well be *law* to punish the latter, which would not equally apply to the former. He promised to act on that theory.

An apology may seem due from us for dwelling so long and earnestly on this matter, but we regard the case as vital to the system on which Massachusetts and all other civilized communities must rely for safety against swindling corporations. That is, a system of annual statements for the guidance of the public. If the directors of corporations are not held personally liable to make such statements good, they can be of very little value. We are strongly of opinion that if there is not in any State law to that effect already, its legislature should lose no

time in enacting a statute which shall make every director of a corporation personally liable to pay any claim which may arise against it through any false statement which any officer or authorized agent may swear to, or cause to be printed and published. Let us have only facts, and directors who know that their companies are operating only on facts.

All of which is respectfully submitted.

ELIZUR WRIGHT.
GEO. W. SARGENT.

Boston, January 30, 1862.

NATIONAL INSURANCE COMPANY, BOSTON.

[Incorporated, June 18, 1825—Charter expires, 1865.]

A. H. BEAN, *President*.*Secretary*, GEORGE W. KUHN.

NOTE.—By an Act of the legislature, passed February 20, 1861, the capital of this Company was reduced from \$500,000 to \$300,000. The Act having been accepted by the Stockholders, the Directors *voted* that the amount of reduction should be returned to the Stockholders on the 15th of November, 1861. Since April 1, 1861, the business of the Company has been based upon \$300,000 capital.

GLOUCESTER MUTUAL FISHING INSURANCE COMPANY, GLOUCESTER.

[Incorporated, March 3, 1847—Charter expires, 1867.]

SIMEON BURNHAM, *President.*

Secretary, JOSHUA P. TRASK.

NOTE.—All risks terminate on the thirtieth day of November each year, and all business is closed before any risks are taken for another year. The stock is subscribed annually in January, in shares of \$1,000 each, for which a stock note for two hundred dollars is taken, upon which all assessments are made. Each subscriber is required to insure at least seven-eighths of the amount he subscribes. No one risk to exceed thirty-five hundred dollars. No vessels are insured except Gloucester fishing vessels. Assessments are made from time to time as needed, upon the stock notes, to pay losses. Premiums commence in January, at 7 per cent., and decrease as the season advances, to $3\frac{1}{2}$ per cent., which is the lowest premium.

Assets of the Company, November 1, 1861:—

Cash on hand,		\$300 00	
Stock notes not overdue,		206,600 00	
Premium notes on risks terminated,		1,748 69

HINGHAM AND COHASSET MUTUAL FISHING INSURANCE COMPANY, COHASSET.

[Incorporated, February 11, 1852—Charter expires, 1872.]

ABRAHAM H. TOWER, *President*.

Secretary, ABRAHAM H. TOWER, Jr.

NOTE.—This Company insures on fishing vessels exclusively, and its business is fully closed up in December of each year. The stock is composed of shares of one thousand dollars each, and every member gives as guaranty to the Company his note of two hundred dollars for every share his certificate entitles him to. Each member is required to insure seven-eighths of his stock. No one risk can exceed thirty-five hundred dollars. Premiums commence in April at 4 per cent., and decrease as the season advances to $2\frac{1}{2}$ per cent., which is the lowest, and all risks that may not have been previously cancelled, expire on the thirteenth day of November. Assessments for losses, &c., are made upon the stock notes, and each member is entitled to his proportion of the Company's earnings.

Assets of the Company, November 1, 1861:—

Stock notes not overdue,	\$16,250 00	
Premium notes on risks not terminated,	2,473 00

NOTE.—In the printed blank, the thirty-first interrogatory requires the “highest rate of interest received.” The question is answered in some of the returns, “six per cent., except on bank stocks,” and “eight per cent., including bank stocks,” &c. The question being imperfectly answered, the percentage is put down in the tables, as given, without regard to stocks owned.

* The General Class have issued no policies since the first of last August, and by a vote of the Directors all risks in that class were terminated on the 25th of October, 1861. At a meeting of the Directors, November 13, it was voted to levy an assessment, amounting to \$14,033.66, for the purpose of closing up and paying all the liabilities of that class.

Balance against the Company, . . \$1,266 65

NOTE.—The business of this Company is confined to Saugus, Lynn, Lynnfield, Swampscott and Nahant. No cash premiums are taken. Its dependence for the payment of losses is upon the lien on the property insured. The expenses of the Company, except for stationery and printing, are met by the collection of one dollar on each policy. The Directors have made but one

assessment since its organization, viz., in May, 1856, which extinguished the entire debt. Since that time the debt of the Company has been slowly accumulating, so that now the indebtedness of the policies range from $\frac{1}{4}$ to $3\frac{3}{4}$ per cent. upon the deposit notes. As the policies expire, or are surrendered, this indebtedness is promptly paid.

SOUTH DANVERS MUTUAL FIRE INSURANCE COMPANY, SOUTH DANVERS.

FIRE AND FIRE AND MARINE
(F O R E I G N)
INSURANCE COMPANIES

AUTHORIZED TO DO BUSINESS IN THIS STATE, WITH THE AGENTS
ACTING FOR THE SAME, AND THE AMOUNT OF BUSINESS DONE
BY EACH FOR THE YEAR ENDING OCTOBER 31, 1861.

In the following Tables are given the Names and Location of all Foreign Fire, and Fire and Marine Insurance Companies which have complied with our laws and are therefore authorized to do business in this State, together with the Names and Residences of all Agents legally acting for such Companies.

As a means of protection against the impositions of fraudulent Companies and Agents, the Commissioners deem it proper to advise that parties solicited to insure in Foreign Companies, *should refer to this list, and decline to enter into any engagements with parties not herein named.*

SEVENTH ANNUAL REPORT
OF THE
INSURANCE COMMISSIONERS.

*To the Honorable Senate and House of Representatives, in
General Court assembled :*

In submitting the second part of their Seventh Annual Report, devoted to the subject of Life Insurance, the undersigned, Insurance Commissioners, feel that some further apology is due from them to the legislature, not only for the liberty they have taken of dividing the report into two parts, but for the delay in presenting this part. The division seemed not only a matter of economy of both money and time, as has already been explained, but absolutely necessary to the usefulness of the life insurance report. For by the last of January, while the most important part of the labor bestowed on the life insurance returns was still far from being complete, the calls at the office occasioned by the demand for the report on fire and marine insurance had become so frequent as seriously to interfere with its labors. Comparative quiet was restored by the supply of that demand.

In regard to the delay, so much beyond our own expectations and the period allowed by law, though not beyond the practice of our predecessors in office, we ask leave to say a few words in regard to the difficulty and importance of one of the duties first imposed upon this office by chapter 177 of the Acts of 1858, continued in force by chapter 58, section 10, of the General Statutes ; we mean the valuation of policies of insurance on life. Such valuation must rest entirely on two assumptions ; one as to the rate of mortality, and the other as to the rate of interest that may be expected to prevail in the future. The statute leaves the Commissioners entirely at liberty to select

their own standard of valuation as to both these assumptions. As the utility of the valuation depends on the correctness of the standard, we have felt it our duty, though it is not expressly enjoined by law, to embody in this Report all the light that can be obtained on this point from the mortuary experience of the companies doing business in this State, so far as it can be gathered from the returns of the last three years. The additional labor involved in this undertaking has been nearly if not quite equal to that of the valuation itself. The legislature will be able to judge whether its results are worth the delay of the Report, which is all that it will have cost the Commonwealth.

As to the ordinary labor of the annual valuation, it may be proper to remark, that it now requires some seventy thousand distinct arithmetical operations, and, after that, the footing of some ten thousand pretty tall columns of figures, to get at the aggregate results. Such is the liability to error, especially in the footings and combination of results in tabular form—which is always done under the urgency of a desire not to violate the statute, or abuse the forbearance of the legislature unnecessarily—that we have always presented these Reports with great diffidence, and had to suffer afterwards the mortification of seeing errors, which a little more opportunity of quiet revision might have eliminated. With the enlarged task of the present year, and the command of only a single room, where assistants have had to labor subject to the distraction of calls for conversation with the Commissioners, far more numerous than ever occurred before, we must bespeak in advance the pardon of the legislature, and of the insurance companies concerned, for the imperfection of our work and the errors that have doubtless escaped our attention. We attribute at least two weeks of the delay, as well as a considerable part of the probable inaccuracies, to the want of suitable office accommodations.

Yet, with all these misgivings, we are confident of the general correctness as well as utility of the results we have obtained. They are of the deepest significance as affecting the personal interests of thousands of people for the present and future, and the duty of those who are rightfully looked to to prevent the abuse of public confidence, not only by dishonest men, but by honest men unconsciously working dishonest schemes.

Life Insurance, in this country, is in its infancy. In England it dates back more than a century and a half, and was put on a scientific basis there just one hundred years ago. The number of life insurance companies in the United Kingdom exceeds one hundred and sixty, and the amount insured is supposed to exceed \$1,000,000,000. Besides the above number of companies, a London almanac for 1862 gives a list of fifty-two insurance companies, nearly all of which are in whole or in part life insurance companies, which are at present "winding up under the court of chancery." And at no time within the last twenty years, perhaps, has the English court of chancery been without a score of life insurance companies undergoing the slow and painful process of "winding up." The wreck of savings and of hopes involved in this always increasing and never-ending "winding up" could only be atoned for by immense blessings flowing from the sound offices. Indeed it became sufficiently apparent in Great Britain more than twenty years ago that life insurance, successful, popular and beneficent as it had proved itself to be, was also the most available, convenient and permanent *nidus* for rogues which civilization had ever presented. To our minds it seems probable that all the other thieves in England have not transferred so much value from other people's possession to their own, as has been dishonestly absorbed in the same time by the life insurance companies which have been wound up and are now winding up in chancery. The English Joint Stock Registration Act, passed in 1844, was mainly intended to cure this evil. It was found, however, to have the contrary effect. The rogues managed through it to obtain a sort of governmental endorsement, without making public their real character or that of their schemes. This caused the raising of a parliamentary committee in 1853 to consider specially the question of governmental supervision of life insurance. The committee sat twenty-two days, examined the most eminent actuaries and experts in the kingdom, and produced a blue-book, chiefly minutes of testimony, of about 470 folio pages. The result was so discouraging that nothing came of it and nothing was even recommended essentially different from what had already proved a failure. The plan of investigation or valuation of policies by government officers, which had been suggested,

was pronounced by the actuaries impracticable on account of the magnitude of the labor, as well as too intrusive to be tolerated by the old and powerful corporations. Subsequent attempts to establish a more effective government supervision have also failed, for reasons which may be seen in an interesting article on life insurance in the *Edinburgh Review* for January, 1859, and the robbery and demoralization are going on now as prosperously and rapidly as ever.

Had the legislative opponents of the Massachusetts Act of 1858 known of the existence of the blue-book above referred to, and its presence in this city, they would undoubtedly have defeated its passage with ease. This is perhaps one of the few cases in which the ignorance of legislators has been beneficial to the statute book and the people.

It is worth mentioning that the *Assurance Magazine*, the organ of the British Institute of Actuaries, the highest scientific authority on life insurance, has editorially noticed the Massachusetts legislation on life insurance with respect, and extracted largely from our last Report. What is perhaps still more indicative of English opinion in favor of this mode of public supervision, the weekly English journals devoted to the subject of insurance, which at first treated with considerable scorn our report on the International, a London office which was then, if not now, considered at home as standing respectably well, now hold up the example of the legislature of Massachusetts as one to be followed by the British Parliament. We refer to these favorable opinions as significant and valuable not merely because they come from the principal focus of civilization, across three thousand miles of water, but because they come from the chief experts in a country which has had more experience than any other of both the good and evil of life insurance. They would fain adopt, even at this advanced stage of the disease which infects the business with them, a system of supervision like our own, though it can perhaps be successfully applied only where life insurance is, as with us, still in its gristle and healthy.

Notwithstanding the violent disruption of political and social ties, and the suspension of amicable relations between the two great sections of the country, which characterized the year embraced in this Report, the business of life insurance advanced, though not so rapidly as during the previous year. The aggre-

gate amount insured by the nineteen companies doing business here was \$152,937,587 on the 1st November, 1861, against \$151,321,229 in 1860. Thus the new business has on the whole a little more than filled the chasm caused by the war, which at once swept away large numbers of Southern policies from the older companies. The values of these Southern policies were not wholly forfeited to the companies, many of the holders having taken care to surrender before hostilities commenced, and large amounts were paid by some of the companies even afterwards. The analysis of the risks of each company which follows, will show the progress of the business and the standing of the various companies. As in former years, we have classed the whole-life and temporary policies separately. The former are also arranged and aggregated according to the dates of their issue in each company, giving the net value of the outstanding policies issued by each, in each year of its existence, and the ratio of that value to the amount insured that year. In all but two cases, any reversionary additions which may have been made to the policies are valued with them. Additions returned this year by the State Mutual Life Insurance Company of Worcester, and by the Manhattan of New York, have been valued, and appear separately.

Some of the more recent organizations have expressed dissatisfaction with the synopsis of the standing of the companies which we have reported from year to year, because it has not given prominence to the element of guarantee capital. It has been no part of our design, in dealing with any of these companies, to conceal any feature adapted to inspire public confidence, any more than to allow them to conceal what should justly have the opposite effect. And we have endeavored to explain the function of capital, as well as the reason for large expenses and a small show of reserve from premiums, in the case of new companies. It would be very difficult, however, to frame a report, so expressing every thing in every paragraph and table, that sharp rivals should not be able to abuse each other by quoting some passages and neglecting others. In order to leave as little occasion for complaint on this score as possible, we this year present the results of our valuation compared with the assets, and receipts, and expenses of the year, in two forms: see tables marked [A.] and [B.]. Table [A.] is a synopsis of

the standing of the companies viewed as purely mutual, or answering the questions, What is the actual premium reserve after keeping the capital whole? and What are the expenses, including what is paid for capital beyond the interest received from it? This is designed to show the policy-holder where his interest lies, and to enable the public seeking insurance to judge between companies wholly mutual and stock companies returning to the policy-holder more or less of his surplus premium. Holders of guarantee stock cannot reasonably complain of this showing, unless they are willing to consider the capital as bound to keep the actual premium reserve equal to the computed; in other words, unless they consider the expenses as going, after exhausting the *loading*, to impair the capital, and that the capital is to continue impaired till such time as it can be made good from the loading or surplus of future premiums. But so far as we can understand those charters which authorize capital stock, whether or not called guarantee, they do not in any case allow the capital to be considered as impaired till expenses or losses, or both, have exhausted the whole of the premium fund and interest. Till that time, the capital stock is to receive full legal interest annually or semi-annually, and in many cases one or two per cent. more. We therefore think it just, in showing what the policy-holders, regarded simply as mutual insurers, have laid up, to exclude the entire capital. Viewing the matter in this light also, the interest or dividend paid on capital, beyond what is received from it, is as much an expense of management as any other. Hence, in giving the expenses of the year in table [A.], we have aimed to include the balance of outgo for the capital; and to make the ratio true to the business, considered as mutual insurance, we have aimed to exclude from both receipts and expenses the amount of interest received on the capital as an investment. If we have been frustrated in any case, it has been from want of clearness in the answers to questions 23 and 24 in schedule [D.], (see General Statutes, chap. 58,) which we think were intended to call forth this information.

In getting at the net assets in table [A.] our rule has been, as heretofore, not only to exclude capital, but all claims against the company, whether acknowledged by it or not; to change the returned value of securities whenever it differed on the 1st

November, 1861, from what we consider good authority for market value at that date, and to set aside a reserve for the present value of outstanding annuities bearing the same ratio to that value as the balance of the net assets would to the present value of the insurance policies.

In table [B.] we have given a synopsis embracing all the companies again, with a view to do full justice to the security afforded by capital. In this case the column of net assets is made to differ from that in table [A.] only by first adding the capital, which is given distinct in the next column, and then reserving for the present value of outstanding annuities on the principle above explained. The column of receipts of the year, in this table, includes all that was received for premiums and interest, and that of expenses only those returned as such by the company.

It is proper to mention that in table [A.] the ratio of actual to computed premium reserve placed against the Manhattan Company of New York, under the head of 1860, is different from and much lower than it was given last year. The ratio last year was made erroneous, first, by two misapprehensions of the meaning of the return, one of them slightly compensating the other ; second, by an unintentional and unaccountable inclusion of the capital with the net assets. In the present table we give the ratio as it would have stood last year but for these errors.

Whole-Life Policies of Nineteen Life Insurance Companies doing business in Massachusetts, outstanding November 1, 1861, arranged according to the years in which they were issued, each year ending November 1.

After carefully perusing these tables, taking for granted that the two assumptions at the basis of our valuation are reasonable and safe, and the securities of the companies sound, which we see no reason to doubt, any one can perceive that all the companies at the date of the returns were far above the verge of insolvency, with no tendency in that direction, in any case, which cannot easily be retrieved if thought desirable. For the safety of the policy-holder there is in fact in every case even a surplus of security. To him, however, it is an interesting and important question, whether the security of pledged capital is as good in all respects as that of actual premium reserve, belonging wholly to himself and fellow policy-holders; and this question seems worthy of some attention in this Report.

If we are to be governed by the authority of experts, the testimony taken by the English parliamentary committee of 1853 leaves no room to doubt that the only use of capital is in the incipient stage of a company, during which it may fairly be said to earn something beyond the ordinary rate of interest. But after the number of policies and the amount of reserve from premiums become large enough to remove any probability of loss that will prevent the steady annual increase of the said premium reserve, there is no longer any use for guarantee capital. When this is true the best policy for the policy-holders, if at liberty under the charter to pursue it, must be to pay the capital equitably for its past services and dismiss it.

But waiving authority entirely, an inspection of table [A.] with a reference to the similar tables in our former Reports, must be sufficient to show—conceding the trustworthiness of our valuation of policies, and the soundness of the assets—that of the nineteen companies doing business in this Commonwealth last November, only three have any need of a guarantee capital. To twelve companies, which have from \$43,000 to \$200,000 of it, it is simply a present and prospective burden so far as the policy-holders are concerned. Of course, to the stockholders it is quite otherwise. There can hardly be a happier set of capitalists on earth than one which has obtained a right by perpetual charter to insure lives, receiving from the proceeds, first legal interest semi-annually on stock as a sure thing, and secondly, 20 per cent. of what are called profits, that is premiums proving to be surplus, forever, if it can once get over the

preliminary expenses and difficulties of securing a flourishing business. Had the Mutual Life Insurance Company of New York, which was chartered in 1842 without a guarantee capital even to begin with, been organized with a perpetual capital, like the seven companies that have come into existence in the same State under its General Act of 1853, most of them giving the capital seven per cent. interest, and twenty per cent. of the profits, and could it in that case have obtained the same amount of business, its stockholders would have realized by this time, over and above their semi-annual three and one-half per cent., the snug little sum of \$800,000, as their share of the profits! As \$100,000 would have been abundantly ample for the capital, just as good for the policy-holders as more, its interest would have proved equivalent to twenty per cent. per annum, with a prospect of continual increase! And with all that, it must be confessed, they could boast of furnishing insurance on more advantageous terms to the policy-holder than the average of that which is furnished in England, where it is said there is only one company which does not profess to be managed on the "mutual plan."

It is not, however, to be supposed that the Mutual Life, organized subject to a guarantee capital drawing twenty per cent. of the surplus in addition to its interest, could have attained its present magnitude in eighteen years. Though schemes of this sort are not unlikely to obtain the sanction of State legislatures, and to escape the scrutiny of the public while in their incipient stage, they cannot ripen into decided success without awakening public attention and discussion, first attracting the competition of other capitalists, and next causing policy-holders to see how much they may lose by not thinking for themselves, instead of imbibing for the whole truth the eloquence of insurance agents. These causes will doubtless operate to check the mischief done by the improvident legislation of New York in 1853. Had it produced only two or three stock companies, their stockholders might have managed to derive large revenues from policy-holders, without any risk to their capital, perhaps for two or three generations to come. But as these companies seem likely to multiply themselves by scores, they must provoke a public inquiry, which will result in preventing the success of many of them,

and compel those that do succeed to grant such concessions to policy-holders as will reduce the profits of their insurance capital very nearly to the infinitesimal value of its risk as such.

The amount of capital stock, or guarantee capital, held by the several life insurance companies doing business in the Commonwealth, is given in table [B.] The following is, in brief, what information we are able to gather from the charters and returns, as to the terms on which it is held. The Massachusetts Hospital Life Insurance Company has a perpetual charter, given in 1818, and since modified so as to allow it to do other business than life insurance. By its charter it is obliged to give a share of the profits of its life insurance business, but not of its other business, to the Massachusetts Hospital. We are not informed whether or not this is the cause of its doing so little life insurance. It is purely a stock company, we believe, in that part of its business. All the other life insurance companies chartered in this State have had guarantee capitals, the stockholders being allowed to choose half the directors and to receive seven per cent. per annum interest, the capital to be returned when one-quarter, in some cases, and others, one-third, of the surplus from premiums, with its interest, should amount to a sum sufficient to reimburse it, and the company should then become strictly mutual. The New England Company returned its capital in full some time since. It still remains a burden on three other companies, costing, so far as we can learn from the returns, at least one per cent. of its amount per annum; and in the case of the Massachusetts Mutual Life Insurance Company, of Springfield, it costs seven per cent. (\$7,000) per annum, since its investment yields the company nothing whatever, though said in the last return to be: "In cash invested in mortgages on real estate, unincumbered, \$95,000; and United States treasury bonds, \$5,000." Much to our surprise, we have recently learned, from the president of the company, that this amount is in reality loaned to the stockholders themselves, without interest. By the charter, half the guarantee stock was to be paid in money, before the company went into operation, and the other half whenever the directors should deem it expedient to call for it. It is hardly necessary for us to say that investment without interest seems to us a complete evasion of the requirement of the law, that

the stock shall be paid in money. We cannot believe the legislature of 1851 intended to provide for the owners of this capital further than to guarantee its integrity and seven per cent. interest per annum, provided the business should prove sufficiently successful. By the indulgence of the company, they now receive in effect thirteen per cent., and by thus getting at least six per cent. more than the charter allows, they are postponing the day when the capital can be reimbursed and discharged.

As to Foreign Life Insurance Companies having capitals, the facts seem to be as follows: The National, of Vermont, is chartered as a purely mutual company, but its directors are authorized to raise and employ a "safety fund." The rate of interest is not mentioned in the charter, and its continuance appears to be optional with the Directors. The same appears to be true of the Union Mutual, of Maine, except that the interest prescribed is not to exceed six per cent. In point of fact, the company derives no interest from the \$100,000 of guarantee which it holds, and pays for it, as appears by the last yearly returns, \$3,300. The Charter Oak, of Connecticut, is a purely stock company, authorized to do business on the "mutual plan," with a capital of \$200,000, the profits of which are limited by the charter to eight per cent. per annum. The Phoenix has a capital of \$100,000, limited to a profit of seven per cent. The capital of the Manhattan, of New York, receives seven per cent. and one-eighth of the profits. The Knickerbocker, the first of the New York Life Insurance Companies, chartered under the General Act of 1853, appears to limit the capital to seven per cent. per annum, without any participation in profits, which are all divided among the mutual policy-holders, or reserved for their benefit. The Equitable Life Assurance Society, of New York, is essentially a perpetual stock company, though by its constitution, under the General Act aforesaid, its Directors *may*, by a three-fourths vote, authorize policy-holders insured for life to the amount of \$5,000, to vote personally, (not by proxy,) in the election of Directors—owners of five shares or more of capital stock only being eligible. The annual interest of capital is limited to seven per cent., and once in five years each policy-holder is to be credited with an "equitable share" of the surplus. The rest appears to be left to the

stockholders. The Guardian, Washington, Home and Germania, all provide in their charters, for a perpetual interest of seven per cent., or whatever may be the legal rate of interest, on their capital, and 20 per cent. of the surplus, whenever that may from time to time be determined.

The ambition of stock-subscribers and stockholders—doubly holders, it seems, in some cases—to manage life-insurance may be fair and proper, but it will become no less so by being better understood. To us it does not seem wise for any legislature to farm out to capitalists the business of collecting and managing the funds provided by the people for their widows and orphans. Whenever and wherever life-insurance offices are needed they can easily and safely be organized by a sufficient number subscribing to be insured.

Though the returns required of life insurance companies do not enable us to determine the exact number of years of life exposed to mortality, or the actual deaths that take place among the insured in any year, in giving us the whole number of policies outstanding and the number terminated by death each year, they give the means of arriving very nearly at the ratio of mortality experienced by the lives insured in these companies. Policies do not exactly represent lives, because the same life may be insured in several companies, or by several policies in the same company. But this multifold insurance is comparatively rare, and as likely to take place at one age as another, so that the errors arising from it do not materially affect the general result. Moreover, the standard of mortality adopted by us was based upon the policies, not lives, of seventeen English offices, so that this source of error cannot render our experience of policies particularly objectionable as a test of the probable correctness of that standard. We have, however, counted as single policies, or lives, those duplicate or triplicate policies that have been returned by several of the companies as such. This cause, and the correction of errors, such as returning the same death twice, or returning deaths as within the past three years which had taken place earlier, somewhat diminishes the number of deaths—or rather termination of policies by death—which are noticed in the following, and the two similar tables published in our two previous Reports.

Claims by Death against Nineteen Life Insurance Companies doing business in Massachusetts, for the year ending November 1, 1861.

COMPANIES.	No. of Claims.	Amount.	Ratio of Loss to Amount Insured.	Ratio of No. of Claims to No. of Policies.

Collating the returns of the last and two previous years, and correcting as mentioned above, we find the death terminations of policies in all the companies for the three years from November 1, 1858, to November 1, 1861, to be 1,364, and the years of life exposed to death on all policies in force during those years, counting the policies of the deceased as having been in force half a year, to be 154,761.05. The tables I., II. and III. give the amounts of life exposed and the deaths at all the different ages, aggregately, in classes, and by the years of the policy, tending to show the effect of selection, and the risk of short term insurance compared with insurance on the whole life. It will be seen that, as far as this observation goes, it tends to show that in no part of the scale of life, unless it be on the earlier years, where the amount exposed is too small to warrant any conclusion, is the mortality to be expected quite as high as that of the standard adopted for our valuation. The difference, indeed, is rather astonishing, and such as we can hardly expect

TABLE I.

The Combined Mortuary Experience of all the Life Insurance Companies doing business in Massachusetts for the three years ending November 1, 1861, compared with what was to be expected from the rate of Mortality, adopted by the Insurance Commissioners, derived from the experience of Seventeen English Offices.

TABLE II.

The Mortuary Experience of the Policies included in TABLE I., divided into three classes, each class being compared with the mortality to have been expected by the Combined Experience of the English Offices.

AGE.	Years of Life exposed at each age on Policies which had existed long enough to pay four or more annual premiums.	Actual Deaths on the same at each age.	Probable Deaths at each age, on the same, by Eng. Com. Ex. Table.	Years of Life exposed at each age on Policies which had not existed long enough to pay more than three annual premiums.	Actual Deaths on the same at each age.	Probable Deaths at each age, on the same, by Eng. Com. Ex. Table.	Years of Life exposed at each age on short terms, including endowment Policies.	Actual Deaths at each age, on the same.	Probable Deaths at each age on the same by Eng. Com. Ex. Table.

Total excluding first three yrs.,	89,428.19	1,001	1.1193	5,671	6.34
Grand Total,	142,339.19	1,251*	.8810	11,750	8.25

* There will be noticed a deficiency of five deaths in this table, as compared with tables I. and II. Four of these are accounted for by the omission from this table of the experience of the Massachusetts Hospital Company, which included four deaths occurring in the 19th, 22d, 25th and 34th years of the policy respectively. The other probably proves an error in tables I. and II., which there has not been time to correct by going over the voluminous tallies employed to classify more than 150,000 years of policy by the ages. It will be noticed by comparison of footings that a rigid exactness of multiplication and division has not been obtained, but great confidence is felt that no inaccuracy has been committed sufficient to impair the practical value of the results. It is to be remarked that in this table the life exposed is grouped in "years of policy" as they stand on our Registry, from November to November. Hence a policy may be counted in its second year which has existed but a day, and all the policies of the first year average only six months from entry, of the second year eighteen months, and so on.

to be maintained in the future, as the grand average. In fact, we can hardly help considering it an ebb tide. But there is room for a considerable flood in the next three years without reaching the line of the English experience.

From tables I. and II. it is apparent that the mortality in our own companies has pressed more heavily, compared with that of the English, on the ages below 40 than on those above it. For example, the average age of the whole 154,761 years of life exposed was 41.51 years, and the average age of those dying from it was 45.27 years, while the average age of the 2,019 that should have died from the same amount of life exposed at the same ages by the English Combined Experience table would have been 46.20 years, or about one year older. Again, in table II., the life policies from which the first three years are excluded give the average age of the living 44 years, and the average age of the dying 47.98 years, while the average age of the dying by the Combined Experience table on the same life at the same ages would have been 50.06 years. It is quite remarkable that this amount of 89,428 years of exposed life, from which we must suppose the favorable influence of selection to have nearly, if not quite, ceased, gives a mortality which is, to that of the English Experience table, which included the benefit of selection—though of course not to so great a degree, because their business was not increasing so fast—as 100 to 131.74.

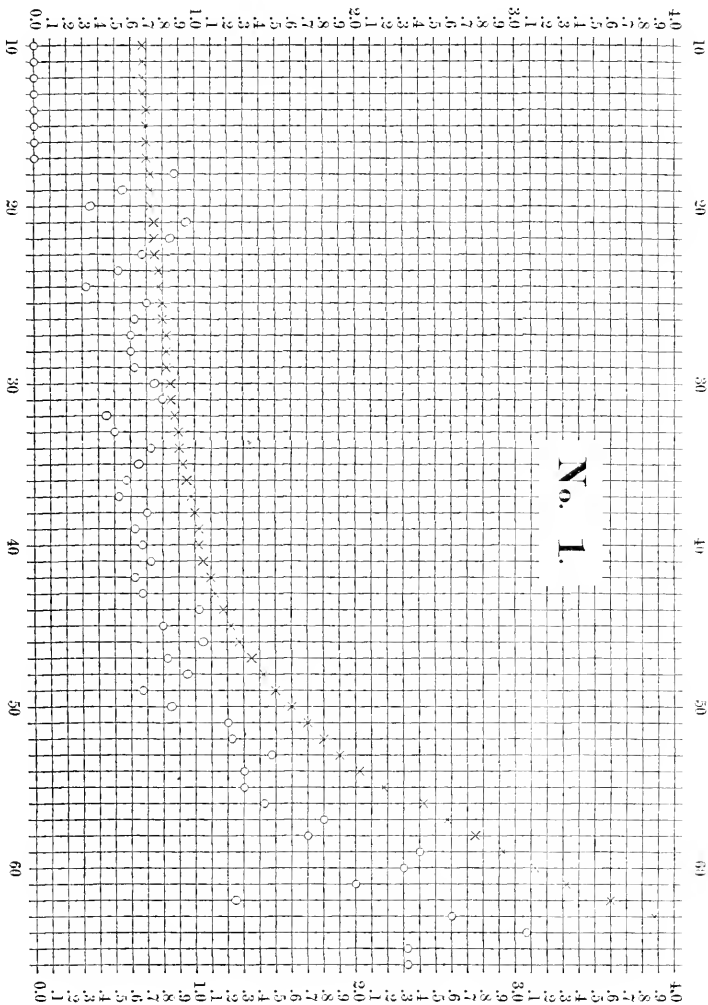

Tables II. and III. tend to show that the benefit of selection is of considerable importance to the company, making the mortality of the first year, or rather by average half year, after the issue of the policy only a little more than one-fifth what it would be on life of the same age three or four years after selection, of the second year, averaging a year and a half from selection, a little more than one-half, and of the third year averaging two years and a half from selection, after which the benefit of selection seems to disappear, only a little more than two-thirds what it becomes afterwards. Again, the discontinuances, for other reasons than death, nearly half of which take place after three premiums have been paid, do not seem to indicate that the selection exercised by the insured against the company produces any deterioration of the residual life. Of course this observation, though it were two or three times as extensive in point of amount of life exposed, being limited

to the earlier ages, would not be sufficient to prove that the premiums now paid and reserve required are too high, for policies that are to cover periods of life not embraced in it.* It only goes to show that the present rates are safe for temporary insurance, or such as does not extend beyond what is usually covered by endowment policies, or that for which the companies may become bound by chapter 186 of the Acts of 1861, to regulate the forfeiture of policies. It would be very difficult, in face of these figures, to show that any injustice would be done to any life insurance company in this State by allowing any member or insured party at any time to convert his whole life policy into a temporary insurance for the same amount, according to the provisions of that Act. And nothing can be plainer than that no additional premium can be requisite from any new member to enable the company to meet the responsibility imposed by that law.

In order to make the range of this experience, from which it is worthy of remark that the experience of none of the individual companies differs materially, more striking to the eye, we have prepared diagrams to illustrate the respective percentages of mortality, or probability of dying within a year, by the actual experience of the last three years and by the combined experience of the English companies. Of these diagrams, No. 1 shows the actual percentage of deaths as observed, and No. 2 the same as they would be if adjusted to a curve or average. The horizontal spaces denote age, and are marked with the age at bottom and top once in ten years, and the perpendicular spaces denote the percentage of death, each interval representing .1 (one-tenth of one per cent.), the figures being marked on the sides. The percentage of the Combined Experi-

* There seems to be no great wisdom in attempting to cover with insurance that advanced period of life which, if it needs any thing, needs endowment or annuity. On this subject, see our former Reports, particularly the Fifth, page xxxviii. It will be noticed in the tables we give this year, that while short term policies are decreasing, temporary insurance coupled with endowment is increasing. It is also worth mentioning that the largest company embraced in our report has, since the commencement of the present year, put forth an admirable plan of granting deferred contingent, or survivorship annuities, an example which cannot fail to be followed by other companies when the public becomes awakened to the fitness and advantages of such provision for the future. The wisdom of allowing whole-life policies to be converted into such annuities, or into temporary insurance with deferred annuities, or endowments, on the lives insured, we think is unquestionable.

ence of the English offices is represented by stars or crosses on the perpendicular lines, and that of the American offices by small circles, both of which are set at the nearest quarter of one per cent., to represent the ratios of deaths to the lives exposed at these ages in table I.

We cannot but indulge the hope that this view of the mortu-
ary experience of the nineteen companies doing business in this
State—including the mortality of policies by discontinuance as
e

well as by death,—will considerably relieve the apprehension and despondency with which at least three of our home companies have viewed the legislation of last year. If they could be fairly reconciled to it as prudent and safe as well as equitable, they would no doubt use it with great effect, both at home and abroad, to increase their business. The advantage of policies which are legally secured against any forfeiture of their net value, is too great to be thrown away for any very slight apprehension. It might easily be made to attract business far more than sufficient to compensate for the loss of any profit that could accrue to residual members from the forfeiture of policies. Yet three companies, the New England, State Mutual, and Massachusetts Mutual, have completely thrown away this advantage during the last year, and ventured upon a rather dubious evasion of chapter 186 of the Acts of 1861, by inserting in their Applications the following condition :

“ In case said company shall not charge the applicant any extra premium on account of any Act passed, or that shall be passed, for a continuance of the risk after forfeiture of the policy by non-payment of premium ; and, should a policy be issued hereon, shall admit him to participate in the net proceeds of such forfeitures of policies, of a date prior to May 10, 1861, upon equal terms and conditions with the parties to such policies, said applicant acknowledges such privilege and benefit to be an equivalent substitute for all right to such con-

tinuance, and accordingly agrees to indemnify said company against any claim therefor; and that any policy issued on this application shall be subject to and stand pledged as security for this agreement; the applicant being desirous to be thus upon an equal footing with such prior members."

This proceeds on the assumption that the legislature has no right or power to forbid a corporation's making any contract to which it can persuade an individual to become a party, a question which will probably have to be decided by the judicial department of the government when a case arises. Leaving that question to the courts, we have to say that the authors of this ingenious mode of defeating the statute seem to have forgotten the arguments with which they opposed its enactment. They contended strenuously before the law was passed, that there was no profit from forfeited policies. Now they promise a participation in the proceeds of such forfeiture—of policies of a date prior to the law, and why not of others too?—as a consideration for relinquishing the benefits the law was intended to secure, and indemnifying the company for any damage it may incur in its attempts to violate it. If we are to believe them sincere in what they said against the passage of the law, how can we acquit them of now enticing people to drop a substance for a shadow? We will not say that they were insincere in telling the three legislatures of 1859, 1860 and 1861 that they made nothing, or nothing to speak of, from forfeited policies. But we believe they are quite sincere now in thinking that they do not offer a shadow, but a valuable substance, when they offer a participation in the future forfeiture of policies. By the same token, the law has a valuable object, which should not be lightly surrendered by those who are the guardians of the rights of individuals and minorities as well as of the majorities of flourishing and powerful corporations. There is no doubt at all that the majority of a mutual life insurance company may make a considerable profit from the forfeiture of whole-life or endowment policies by a minority of unfortunate members. In another country, indeed, this has been a large source of profit, and a favorite one to the managers, because it has enabled them, better than any thing else, to cover up bad management and extravagant expenditure. But in a country presenting so wide a field for life insurance as ours, and so full of intelligence to distinguish between fair play and the reverse, it is a very short

sighted policy—even in a mercenary view—to seize such a profit. It is far better, and more likely to pay the company in the long run, that every man insured, whenever and for whatever reason he discontinues, should be sure to get as near as may be all the insurance which he has actually paid for. He can in no case get more by the Act of 1861.

By recurring to the Synopsis marked [A.] in this Report, the reader will find the net assets, exclusive of capital, of each company in one column, and the net value of its outstanding policies in another. The net assets generally considerably exceed the net value of the policies. To these net assets each member of a mutual company has a right just in proportion as the excesses of his premiums with their interest, over the annual risk of his life, or in other words, over paying his share of losses and expenses, have contributed to produce the amount. But the moment any one fails to pay his periodical premium when due, he forfeits his right, even under the Act of 1861, to any share in that portion of the net assets which is in excess of the net value of the policies. That is, in the New England Company as it now stands, he would forfeit more than one-third of his whole interest in the company. All that the law intends to or can secure to him—provided the company should have the condescension to submit to it—is his share in that part of the net assets which stands cent per cent. against the net value of its policies, to wit, precisely the net value of his own policy, or what he has paid the company in cash *beyond* the average cost of insuring his life thus far. The law does not compel the repayment of this in cash, but requires the company to continue the insurance of the same amount for a certain length of time, for which the net value of the policy is ample premium. Thus the law only aims, so far as an insurance company has a premium reserve above par, to secure to the policy-holder a *part* of his equitable right. It is not easy to see why any company, while it has assets sufficient either from premiums or capital, should be allowed to give any man less insurance than he pays for, or to entice people into contracts of the nature of bets, which they cannot be expected in the majority of cases fully to understand. There is not a company in this Commonwealth which cannot to-day with perfect safety award to *all* its policy-holders the full security which the Act of 1861 intends to

secure for the future, and which would not be the stronger and grow the faster for it, without at all raising its premiums. Such at least is our thorough conviction.

So gravely and persistently was it argued last year against the law to regulate the forfeiture of policies, that it imposed an intolerable burden upon the companies, in the shape of clerical and mathematical labor, to ascertain and keep on the books their liability under it, that we have deemed it our duty this year to furnish some further light on that point. Appended to our fifth annual report was a table giving the term of insurance due on lapsed whole-life policies when the premiums had been paid in cash. But cases may arise under the law where the premium may have been partly paid in notes, or the forfeited policy may have been for a shorter term than life, or have included an endowment, or the premiums may have been payable for a limited number of years. The net value of any such policy at the time of forfeiture being ascertained, and any notes due the company deducted, the law regards the balance, after throwing off one-fifth as "loading,"—compensation to the company for doing the business—as a net single premium of temporary insurance; and the question is, how long it will pay for insuring the same sum considering the present age of the party? As a ready means of answering this question in all possible cases we have computed and annexed to this report a table of single premiums at all ages, for any number of years within the limits of the Combined Experience table of mortality. The following case will illustrate the use of this table. A person at the age of 45 forfeits a policy for \$2,000 of which the net value at the time of forfeiture is \$250. The company holds his premium-note for \$150, leaving \$100 net to his credit. Deducting one-fifth, \$80 remains as the net single premium. Dividing it by the number of hundreds in the sum insured there will be \$4 per cent. By entering the table at the age of 45 we find that \$4 will insure \$100 at that age, for more than three years and less than four. That is, not to regard extreme exactness here, \$3.52 will insure it for three years, and \$4.69 for four years. As the difference, \$1.17, is to 365, so is \$0.48 to 150 days, very nearly. Hence the policy will continue good against the company for three years and 150 days. If a company wishes to know how long it is liable

to pay in case of the death of any holder of a lapsed policy, it has only to "work this sum" whenever a policy lapses and enter the result on its books. The business seems about as easily managed as any case of temporary insurance, and seeing that the whole gross premium is already in the company's treasury well invested, and no commission is to be paid to any agent for collecting it, and no additional expense or delay incurred in investing it, \$20 would seem ample pay for doing the business.

After the Abstract of Returns and tables [A.] and [B.] were printed, we received notice from the President of the Manhattan Life Insurance Company of New York, that the following items had been omitted from its return of assets, November 1, 1861 :—

Interest accrued,	\$6,452 66
Rents accrued,	1,200 00
Premiums due and unpaid on policies returned as in force,	40,500 00
Total,	<u>\$48,152 66</u>

Correcting the net assets in table [A.] by the above would make them \$946,319.48, and their ratio to the computed premium reserve 110.82, instead of 105.19, as stated in that table. A similar correction of table [B.] would make the net assets therein \$1,045,812.09, and the ratio 122.47. It ought to be understood by the officers of all Life Insurance Companies, that for the purposes of this valuation at least, no item of assets is more genuine or returnable than income accrued on well invested capital, or than premiums due and not yet received on policies returned as in force. In many cases where we have seen reason to suspect the omission of these items, we have invited a correction of the return. In some cases, however, in which they are not specially named, we are inclined to be satisfied that they must be included, if they exist, in other items.

Since the 1st of November, 1861, the United States Life Insurance Company of New York has complied with our laws; and having satisfied ourselves, by a personal examination of its

office in New York, that it has the funds required by our law, and ample to meet all its liabilities, we have admitted it to do business in this Commonwealth. The preliminary statement of the company, as to its assets, is given in the abstract, and the data of its policies now in preparation will enable us to give their value in our next Report.

In regard to the Life Insurance Companies of New York, we are happy to be able to say that Mr. Barnes, the faithful and efficient Superintendent of the Insurance Department of that State, has taken measures to add to his elaborate annual investigation of their assets and securities a valuation of their policies on a plan similar to our own. Should this design be carried out, it will be very desirable that some arrangement may be made between the States, by which the companies may be saved the labor and expense of furnishing the data of their policies to more than one State, and a single annual valuation of each company may be made to suffice for all the States, as this is obviously a work which, if well done in any one State, need not be repeated the same year in other States.

All which is respectfully submitted.

ELIZUR WRIGHT.
GEO. W. SARGENT.

Boston, March 20, 1862.

FOREIGN LIFE INSURANCE COMPANIES

AUTHORIZED TO DO BUSINESS IN THIS STATE, WITH THE AGENTS
ACTING FOR THE SAME, AND THE AMOUNT OF BUSINESS DONE
BY EACH FOR THE YEAR ENDING OCTOBER 31, 1861.

In the following Tables are given the Names and Location of all Foreign Life Insurance Companies which have complied with our laws and are therefore authorized to do business in this State, together with the Names and Residences of all Agents legally acting for such Companies.

As a means of protection against the impositions of fraudulent Companies and Agents, the Commissioners deem it proper to advise that parties solicited to insure in Foreign Companies, *should refer to this list, and decline to enter into any engagements with parties not herein named.*

SIXTH ANNUAL REPORT

OF THE

LOAN FUND ASSOCIATIONS,

BY THE

INSURANCE COMMISSIONERS.

JANUARY 1, 1862.

BOSTON:
WILLIAM WHITE, PRINTER TO THE STATE.
1862.

Commonwealth of Massachusetts.

INSURANCE COMMISSIONERS' OFFICE, }
January 1, 1862. }

To the Honorable Senate and House of Representatives :

Agreeably to law, the Insurance Commissioners have the honor to submit their Sixth Annual Report in regard to the incorporated Loan Fund Associations. Thirty of these Associations, including the Columbian, which made no return last year, and was erroneously reported as being suspended, have made returns this year. Of these, two, the Blackstone and Boylston, report a final settlement of their affairs, by a division of the cash and mortgages among the holders of unredeemed shares. Their reports are as follows :—

STATEMENT OF THE BLACKSTONE LOAN AND FUND ASSOCIATION.

To the Insurance Commissioners for the State of Massachusetts :

Gentlemen :—The Blackstone Loan and Fund Association has successfully closed up its business, and with perfect satisfaction to all of its stockholders, and the President and Secretary take pleasure in stating to the Commissioners that the Association was most successful in all its transactions, never having met with any loss whatever. Below you will find statement of its affairs at the final closing up, and assignment of the balance of its assets, and the dividend to the holders of unredeemed shares.

CR.

By total amount of Assets in Mortgages and Cash, . . . \$70,817 41

DR.

To total amount of Dues received on 385 shares

unredeemed, or Liabilities, \$52,604 00

To net gain or Profits, 18,213 41

_____ \$70,817 41

Giving to each unredeemed share a dividend in addition to the amount of dues paid in of \$47.30, making the dividends 12 per cent. per annum, on an average of the time.

DANIEL FARRAR, *President.*

LYMAN S. HAPGOOD, *Secretary.*

COMMONWEALTH OF MASSACHUSETTS.

Suffolk, ss. September 1, 1861. Personally appeared Daniel Farrar, President, and Lyman S. Hapgood, Secretary of the above Company, and severally made oath to the truth of the foregoing statement, according to their best knowledge and belief. Before me,

B. W. DUNKLEE, *Justice of the Peace.*

STATEMENT OF THE BOYLSTON LOAN AND FUND ASSOCIATION.

To the Insurance Commissioners for the State of Massachusetts :

Gentlemen:—The Boylston Loan and Fund Association has successfully closed up its business, and with perfect satisfaction to all of its stockholders, and the President and Secretary take pleasure in stating to the Commissioners that the Association was most successful in all its transactions, never having met with any loss whatever. Below you will find statement of its affairs at the final closing up and assignment of the balance of its assets, and the dividend to the holders of unredeemed shares.

CR.

By total amount of Assets in Mortgages and Cash, . . . \$38,990 00

DR.

To total amount of Dues received on 262 shares

unredeemed, or Liabilities, \$31,130 00

To net gain or Profits, 7,860 00

 \$38,990 00

Giving to each unredeemed share a dividend, in addition to the amount of dues paid in, of \$30, making the dividends 10 per cent. per annum, on an average of the time.

A. B. POTTER, *President.*

LYMAN S. HAPGOOD, *Secretary.*

COMMONWEALTH OF MASSACHUSETTS.

Suffolk, ss. September 1, 1861. Personally appeared, Andrew B. Potter, President, and Lyman S. Hapgood, Secretary of the above Company, and severally made oath to the truth of the foregoing statement, according to their best knowledge and belief. Before me,

ANSON J. STONE, *Justice of the Peace.*

The appended tabular statement gives the information derived from the other returns. It will be noticed that the

loss that has thus far accrued from the sale of mortgaged property is only \$15,480 for these Associations. As the security is constantly growing better by the monthly payments on the loan, it is probable that the whole average loss on loans amounting to three and a half millions will not exceed one per cent. Considering the crudeness of the plan, the high rate of the actual interest, and the many discouragements operating on the borrowers from the want of public confidence in the honesty of the management, this loss is far less than might have been anticipated, and its smallness speaks forcibly in favor of the plan of repaying loans by small monthly instalments.

There seems at present no probability that the number of these organizations will increase. Most of those now existing will soon close by their own limitation, and perhaps the rest will also cease from the fact that their structure is not stable enough to stand the pressure of these times. In a few years they may be remembered by some only as a scheme by which sharpers absorbed the money of the simple, and by others as an unsuccessful if not an unfortunate experiment. Their closing, however, will be attended with considerable difficulties, because the law of incorporation adopted in 1854, and now embodied in the General Statutes, chapter 59, interferes materially with the original plan of the Associations, without clearly defining the terms on which loans shall be settled, or distinguishing between the nominal and the real loan. This difficulty was fully explained and illustrated in our Third Annual Report. There is room for too much litigation if the lenders insist on their rights under by-laws and terms of contract, and the borrowers, encouraged by the seeming protection of the statute, choose to resist. If, on the other hand, the lenders, or holders of what in the technical language of the Associations are called unredeemed shares, should be willing to discharge the mortgages of borrowers whenever the payments shall have replaced the money actually borrowed with an interest of six per cent. per annum thereon—that is, allowing annual rests for the diminution of the principal—which we believe to have been the real intent of the law of 1854, and allow five per cent. per annum interest on the borrower's own money for the time the Association had it before he borrowed, and six per cent. per annum afterwards, if it was charged to him as part of the

loan, then we think the Associations will be easily and in most cases happily closed. Whether this end can be secured by any further legislation, we are not clear. No efforts will be wanting on our part to persuade the managers of these Associations, or rather the lenders for whom they act, to offer the borrowers such terms of settlement as will leave them no chance of successful legal resistance. That this policy will give the greatest value of which it is capable to their investment, when we consider them as a body, there can be no manner of doubt. It is to be expected, however, that in many cases some of them will resist this policy, hoping that thus their fellow lenders will become discouraged and withdraw—that is, sell their shares to the Association at a discount, and thus the few who remain at last will divide the spoils and reap a large profit on their investment.

In this connection we cannot fail to remark, that in spite of the inherent defects of these Associations, and the abuses in practice, they have had a large degree of usefulness, and have demonstrated, perhaps even better than if they had been better constructed, the value of the principle of *repaying loans by small monthly instalments*. It has been impossible for us to ascertain with exactness, but we have no doubt that by means of them not less than one thousand families in Massachusetts now enjoy homes of their own, who would otherwise have been rolling about as tenants from one landlord or boarding-house to another, or have left the State in disgust to find a home in the wilderness. Though the machinery has not worked smoothly, it has turned out an article of inestimable value. The conclusion to which we were at first forced by a careful attention to this subject, has grown stronger in our minds by every year's observation. It is that under the authority of a well guarded law and proper State supervision, towns and cities should themselves receive, manage and guarantee the savings of the industrious of moderate means, and give every one, who can pledge a suitable amount of his own savings, an opportunity on terms as favorable as the ordinary and legal value of money will warrant, to *anticipate his future earnings* to an extent sufficient to put him at once in possession of a home. This we think may be done by any of our towns, and perhaps cities, easily, and with little risk, by adopting the

successful feature of the Loan Fund Associations, and excluding the features which have caused their failure. The plan suggested by us, in our last Report, which was referred to the Committee on Banks and Banking, secured their favorable regard to such an extent that they reported a Bill (House Doc. 259) which was printed and referred to this general court. As detailed explanations of the practical working of the plan were given in our last Report, we would respectfully refer the legislature to that document, (Pub. Doc. No. 13,) merely repeating here some of its leading features.

1. The town or city, on a vote to that effect, receives and guarantees deposits, being compensated for its risk by the increase of its taxable property—since deposits are received without regard to the locality of the depositors, while loans are to be invested in real estate within its own limits, if borrowers can be found who are willing so to invest.

2. The expenses are provided for by entry and transfer fees.

3. Deposits draw a semi-annual interest of three per cent., and a depositor, after his accumulation reaches a certain amount, may withdraw it with the addition of a loan, to be repaid with a semi-annual interest of three per cent. in equal monthly instalments.

4. The order of receiving loans is regulated by fixed and pre-arranged principles of rotation.

5. Any one who does not wish himself to use the right to borrow which he may have acquired, can by the right of transfer sell it at a premium, and thus whenever such loans are in demand, avail himself, without the intervention of a broker, of the difference between the market and the legal value of money.

6. As deposits acquire value by time, depositors who wish to withdraw their deposits, can by the right of transfer do so in all ordinary times without disturbing the fund or being subjected to delay or expense.

7. The labor of keeping the accounts, settling with any who wish at any time to pay at once the balance due, and reporting the condition and amount of the fund, is reduced to a minimum by merging the interest account, and using tables of present values of future payments and a system of coupon receipts.

It is believed that this plan, under the provisions set forth in the bill, will be found not only practicable, but easy of operation. The entire confidence of the people in the pecuniary good faith of our towns and cities, will call forth savings more rapidly than can be done by any corporation chartered expressly to take care of other people's money. The entire publicity of every thing connected with the fund may deter a few from depositing, but it will insure fidelity on the part of the managers and prevent loss.

We are well aware that there is a general and reasonable reluctance to extend the functions of government, or attempt to do for the people what they might do for themselves. As a general rule it may certainly be admitted that government should not attempt what the people as individuals, or by voluntary association, can do as well or better. On this principle, within the memory of some of the living, the State has relinquished the support of public worship, and left it wholly to voluntary association. It has not, however, relinquished the support of schools and colleges, but on the contrary, is more and more making the education of the young a public care. It even taxes those who educate their own children at private schools, for the support of public ones in which the children of the poor may be instructed gratuitously. Yet it may well be believed that voluntary and benevolent association would be as likely to provide for the education of all the people, as it would to provide the best system of calling forth the savings of the poor and investing them for their benefit. The voluntary benevolence of the wealthier class has never yet done this as well as it might be done. There is no lack in this Commonwealth of savings banks. But the growth of loan fund or building associations shows that savings banks by no means do all that is required in assisting depositors to convert their savings into homes. Of some forty millions loaned by the savings banks, probably not a million is loaned to people of the same class as the depositors. Very few young people can deposit enough to purchase a home before they have occasion to use one. Then if they cannot obtain a loan to purchase, they must either emigrate or occupy a tenement on rent, which will consume their entire earnings; and when expenses increase, and work fails, the deposit is consumed and they are left entirely at

the mercy of landlords. It may safely be assumed that for the artisan class generally, rent exceeds interest on the same property by four per cent. The government, through the State, city or town, ought to save this to the laborer, and it can do it without in the least degree damaging the interest of the landlord or any body else. For very little of the four per cent. ever goes into the pocket of the landlord. It is in reality so much wasted, because the tenant is not the owner of what he uses. This waste increases with the poverty of the tenant. For the want of institutions to make laborers the owners of their homes, a manufacturing community is always tending to divide into two classes the very rich and the very poor, the dwellers in palaces and parks, and the inmates of cellars and garrets hired by the week. The middle class slips away from between these. Massachusetts seems to need, more than any thing else, as a complement to her system of public education, a public guardianship of savings which shall make the utmost of them for the benefit of their owners, and give every young family the choice between a hired home, and an own home, to be paid for by the difference between rent and interest. To ask that the poorest may have the means of easily buying land, is not to ask for an agrarian law, but for a policy that will prevent one's ever being asked for.

If these arguments could have had any force in former years, they have manifold more now that a war has arisen which must deeply affect the destiny of Massachusetts. Whether that war shall result in making homes abroad more attractive to our citizens than they have hitherto been, or less so, if not blotted out as a State, we shall have more need than ever before to cultivate the intelligence, character and wealth of the bone-and-muscle class.

All which is respectfully submitted.

ELIZUR WRIGHT.

ABSTRACT OF RETURNS

OF

JOINT STOCK COMPANIES

IN

MASSACHUSETTS,

REQUIRED BY CHAPTER 61 OF GENERAL STATUTES.

JANUARY, 1862.

PREPARED FROM OFFICIAL RETURNS

BY OLIVER WARNER,

SECRETARY OF THE COMMONWEALTH.

BOSTON:

WILLIAM WHITE, PRINTER TO THE STATE.

1862.

Commonwealth of Massachusetts.

SECRETARY'S DEPARTMENT, BOSTON, January 1, 1862.

To the Honorable the Senate and the House of Representatives :

In compliance with the General Statutes, I have the honor to submit herewith, for the information of the Legislature, an Abstract prepared from the certificates of the several Joint Stock Companies in the Commonwealth which have been received at this Department.

Very respectfully,

OLIVER WARNER, *Secretary.*

A B S T R A C T .

NOTE.—Certificates of the dissolution of the "American Verd Antique Marble Company," dated April 8, and of the "North American Verd Antique Marble Company," dated April 24, were filed in this office, April 26, 1854; and of the "Boston Oil Refining Company," dated August 8, and filed August 9, 1856.

PUBLIC DOCUMENT No. 13.

FIRST ANNUAL REPORT

OF THE

COMMISSIONERS ON PUBLIC LANDS.

OFFICE OF COMMISSIONERS ON PUBLIC LANDS, STATE HOUSE, }
BOSTON, October 15, 1861. }

To His Excellency JOHN A. ANDREW, *Governor of the Commonwealth of Massachusetts :*

The undersigned herewith respectfully present their Annual Report, containing a review of the work entrusted to their charge for the year ending September 30, 1861. By an Act of the legislature, which took effect on the first day of April, 1861, the style of the Board formerly known as "Commissioners on the Back Bay," was changed to "Commissioners on Public Lands." The present is accordingly the first Annual Report presented under the latter name; it would have been the tenth Annual Report of the former commission.

Since our last Annual Report the work of filling in the Back Bay has been continued with industry and vigor. The former contract having expired, a new one has been made with Norman C. Munson, the party actually performing the work under the first, for the same materials and at the same rates of payment, namely: forty cents per cubic yard for earth deposited below the grade 12, (four feet below the level of the Mill-dam); forty-two cents per cubic yard for earth deposited in the streets,

avenues, and passage-ways, above grade 12, and one cent per superficial foot for levelling the surface. The quantity of "good solid earth and clean gravel" deposited in the lands belonging to the Commonwealth in the Back Bay, up to the first day of October, instant, was one million three hundred and ten thousand cubic yards, for which, and for other expenses of filling, there has been paid the sum of five hundred and ninety-two thousand and five dollars and twenty-one cents; of this filling, two hundred eighty-eight thousand five hundred and eighty-nine cubic yards has been deposited since our last Annual Report, and there has been paid therefor to the contractors the sum of one hundred sixteen thousand four hundred and sixty dollars $\frac{24}{100}$ in cash.

No sales have been made within the year embraced by this Report, with the exception of the large public sale of October 24, 1860, of which an account was given in our supplementary Report, under date of December 1, 1860, appended to the last Annual Report. This sale having yielded an aggregate amount of \$243,685.85, paid into the treasury in cash and notes, of which the moiety applicable to purposes of improvement was \$121,842.92, there have been sufficient funds at the disposal of the Commissioners to carry on the work throughout the past year, without resorting to sales; while the action of the legislature, in the passage of the Act, directing the reservation of a large quantity of the lands most available for sale, was in consonance with the policy which the Commissioners found it most advisable to pursue in view of the depressed condition of many industrial interests during the year, and the disinclination generally felt to investments in lands of the character of those owned by the Commonwealth in the Back Bay. The Commonwealth possesses at the present moment an area of nearly half a million square feet of salable lands, which are of unquestionable value, filled and ready for sale at the first moment when it shall be deemed advisable to offer them by a public sale. This is exclusive of the land reserved by the Act of 1861, chapter 183.

Since our last Annual Report, that portion of the main drain through Berkeley Street, emptying into Charles River, two hundred feet north of the Mill-dam, under which it passes, has been completed, together with the tide-gate and other necessary

fixtures, and it is now in successful operation. This main drain with the lateral drains emptying into it, form a complete and effective system of sewerage for the space between Arlington and Clarendon Streets, so far as is necessary at the present time.

In conformity with chapter 142 of the Acts of 1861, the Commissioners, with the assent of the governor and council, have offered to the city of Boston for acceptance, the westerly half of Arlington Street, upon the condition that it shall revert to the Commonwealth if its use as a street should at any time be discontinued.

The Act of 1861, chapter 85, transferred to this Commission all the powers and duties formerly attaching to the office of Land Agent. Such routine duties as have arisen under this head from time to time, during the year, have been performed by us, and are believed to require no particular mention in this Report. With regard to the very comprehensive field of duties imposed upon the Land Agent by the Resolves of 1859, chapter 103, "to have charge of all lands, flats, shores and rights in tide-waters belonging to the Commonwealth, as far as practicable; to ascertain the location, extent and description of such property, investigate the title of the Commonwealth thereto, ascertain what parts thereof have been granted away by the Commonwealth, the conditions on which such grants were made, and whether said conditions have been complied with; what portions have been encroached or trespassed on, and the rights and remedies of the Commonwealth in relation thereto, prevent further encroachments and trespasses, ascertain what remaining portions of such property may be leased, sold or improved with benefit to the Commonwealth, and without injury to navigation and the rights of riparian owners, and make report to the governor and council, and with the approval of the governor and council, to require the services of the attorney-general, and employ such surveyor or surveyors as may be necessary to accomplish, either in whole or in part, the objects aforesaid," little has been done, for the reason that no appropriation was made by law to meet the expense which would necessarily be incurred by an immediate and literal execution of the large powers thus conferred, nor does this seem to be necessary. The work can be prosecuted by degrees, from time

to time, with whatever rapidity the legislature may see fit to indicate.

In accordance with the Act of 1861, chapter 201, authorizing the Commissioners to make arrangements with the Boston and Roxbury Mill Corporation and other parties, respecting a continuance of the tolls upon the Mill-dam, negotiations have been opened with said corporation. This is necessarily the preliminary step in the business, and no further progress has been made at the date of this Report. As the toll franchise does not expire under existing arrangements, until May, 1863, it is believed that there is ample time to conclude an arrangement which shall preserve the rights and interests of the Commonwealth, and of all parties interested.

The Commissioners have appeared by request before the appraisers appointed under the Act of 1861, chapter 183, "to incorporate the Massachusetts Institute of Technology, and to grant aid to said Institute and to the Boston Society of Natural History." It is understood that the provisions of said Act have been accepted by the two societies, so far as they apply to them respectively. The award of the appraisers has not been announced at the date of this Report.

By the Resolve of 1861, chapter 87, the Commissioners "are authorized and instructed to negotiate with the Boston Water-Power Company, and with the riparian owners of territory lying west of the land of the Commonwealth, and east of the Cross-dam adjoining the Full Basin, so called, for an improvement of the lands of the said section, and of the lands of the Commonwealth contiguous thereto, by the reservation of a water-space therein." Under this law, negotiations have been opened, and a plan has been presented, to which, substantially, should it secure the approval of all the other parties interested, without encroaching unreasonably upon the premises of the Commonwealth, the Commissioners are prepared to assent. This plan is now in the hands of a special commission, appointed by the city of Boston, who are endeavoring to harmonize all interests, and to make a homogeneous plan for the laying out of streets, and for drainage of the whole territory included generally between Tremont Street, the Cross-dam and Mill-dam, without interfering in any substantial respect with the plan already

definitely adopted for that part of this territory which belongs to the Commonwealth.

The Commissioners have held several hearings under the Resolve of 1861, chapter 92, “providing for the adjustment of certain claims in South Bay and Mystic River,” and will be prepared to make their report in that matter to the general court, as is prescribed in said Resolve.

All of which is respectfully submitted.

CHARLES HALE,

Commissioners on Public Lands.

PUBLIC DOCUMENT No. 14.

Commonwealth of Massachusetts.

ANNUAL REPORT

OF THE

COMMISSIONERS OF PILOTS.

OFFICE OF THE COMMISSIONERS OF PILOTS, }
BOSTON, October 1, 1861. }

To the Hon. Secretary of the Commonwealth of Massachusetts :

In accordance with the requirements of the General Statutes, (chapter 52,) the Pilot Commissioners respectfully submit their Annual Report for the year ending 30th September, 1861.

As the present Board have but recently come into office, and being desirous of enforcing a rigid observance of the laws and regulations concerning pilots and pilotage, and at the same time to remedy, so far as in their power, all causes of complaint, on the part of merchants and masters, as well as of pilots, we have spent considerable time in investigating the alleged defects and abuses of the system in various parts of the State. For this purpose we have, during the past summer, visited most of the principal seaports of this Commonwealth ; and, by full inquiry and examination for ourselves, have endeavored to restore order and harmony, as well as to secure justice to all parties interested in navigation in Massachusetts waters.

Besides the daily attention required by the pilots of Boston, (numbering about forty, with six or seven pilot boats,) we have made special visits to Salem, Marblehead, Newburyport, and Gloucester, also New Bedford, and other ports in Buzzard's Bay, Holmes' Hole, Edgartown, and other harbors in the Vineyard Sound, and also to Nantucket and Cape Cod. The complaints which have heretofore been made from these places, have mostly been occasioned by a failure to observe the regulations strictly and impartially, and in some cases by inefficiency on the part of pilots. In the Vineyard Sound, especially, a set of irresponsible, self-constituted pilots have sprang up, who, by a system of bargaining and underbidding, have tended to restrict the operations of the commissioned pilots, and bring the regular system into confusion; but we hope to remedy this difficulty by revoking the commissions of such pilots as may be incompetent and careless, and giving place to those who are capable and active. To this end we have in several places reduced the number of pilots, leaving the most faithful at their posts.

We have, in view of the safety and convenience of vessels bound into Massachusetts or Boston Bay, and coming by Cape Cod, established regulations for the employment of a competent pilot boat at Cape Cod or Provincetown Harbor. We are satisfied that a boat is needed at that place, as heretofore valuable vessels and cargoes, as well as human life, have been greatly imperilled or wholly lost, for want of such a boat, with pilots on the spot authorized to take vessels to different ports in the bay, or till the pilots of those ports could be obtained. It is at this point, in stormy weather, that pilots are most needed, and when it is by no means certain that a regular Boston pilot can be obtained. By the new arrangement, vessels bound either into Cape Cod Harbor, or to Boston, or any where in the bay, will most always be sure of pilots competent to take them to any desired port, or to the Boston pilots, and without additional expense to the masters or owners of vessels bound to Boston, while at the same time the Boston pilots have full competitive privileges to cruise as far out as they may desire.

The returns for the year ending June 30, 1861, show a decrease in the number of ships arriving at and departing from the port of Boston, with the exception of national vessels, but the difference in the number of brigs and schooners is not

great; and on the whole, the difference up to that time, and since, is not to the extent generally anticipated upon the occurrence of the extraordinary disturbances in our national affairs.

The total number of all vessels arriving and departing, paying pilotage in Massachusetts in the year ending June 30, 1860, was 4,265; the total number the present year was 3,996.

The amount of pilotage received for the last year is shown by the table annexed. The sum is \$1,172.99 less than the amount received the year preceding.

The following pilots received commissions during the year:

William Burrows, Boston, commission restored.

The warrant of A. F. Hayden, Boston, was increased, and he was subsequently made a full branch pilot.

The warrant of F. B. Wellock and J. T. Ford, Boston, were increased to 12 feet.

The warrant of Jerod Hunt was restored to him, and the same was increased to 20 feet.

John Lambert was made a pilot for the port and harbor of Lynn.

B. B. Church was appointed a pilot for the port of Dartmouth.

Maxwell Reed, of Boston, commission restored.

John F. Plummer and James Plummer were appointed pilots for Danvers River, extending from Beverly Bridge to Danvers Port.

J. T. Hatheway, of Sandwich, was commissioned to act as pilot for Cohasset Narrows.

Daniel Foster, of Beverly, was made a pilot for the harbor of Beverly, above Beverly Bridge.

Jacob B. Chase was made a pilot for the harbor of Newburyport.

John C. Pease was made a pilot from sea to the harbor pilot limits of the ports bordering on Martha's Vineyard and Buzzard's Bay, and over Nantucket Shoals.

John B. Briggs was made a pilot for the harbor of Wareham. Warren M. Christie was also made a pilot for the port of Wareham.

G. B. Spencer was made a pilot for the port of Provincetown.

Christopher Gifford was made a pilot for the port of Westport.

Peter Wainwright was made a pilot over Nantucket Shoals.

Henry C. Hill was made a pilot for Merrimac River.

Norton W. Phillips was restored as a branch pilot for the port of Boston.

Massena P. Brown received a 12-feet warrant as pilot for Boston Harbor.

James S. West, of Tisbury, was commissioned as pilot for New Bedford, Fairhaven, Vineyard Sound, and over Nantucket Shoals. Timothy Daggett, of Tisbury, also received a like commission.

Augustus Hooper received a 12-feet warrant as pilot for the port of Boston.

David T. Robinson was re-instated as a branch pilot of Boston, commission subsequently revoked.

A number of commissions have been revoked, and for various reasons, some of the pilots having changed their residence, some having proved incompetent or inattentive to business, and some having been dismissed for violation of the regulations; all of which cases have engaged considerable of the time of the Commissioners, and occasioned a good deal of correspondence, which has been duly recorded, but which, in the opinion of the Commissioners, is not of sufficient general importance to report in this document.

Marine Disasters in Massachusetts Waters.

The Order passed by the legislature last winter, requiring the Pilot Commissioners to report the marine disasters and amount of property lost or damaged on our coast, we have endeavored to comply with, but have been unable, as yet, to obtain very accurate returns.

By another year, when the pilots shall have got more generally in the way of reporting such disasters to us, we hope to be able to give more ample information under this head, and also in a more systematic manner. Since the passage of that Order, but few disasters of importance have occurred in the waters of Massachusetts, and our information of the details of these have been necessarily imperfect. Such as we have received from the pilots and other sources, we here record.

1. Schooner *Envoy*, of Boston, from Newark, N. J., for Portsmouth, with cargo of poudrette, sprang aleak 17th July, in Vineyard Sound, and was run ashore on Cape Poge. About

1,125 bags saved out of 1,200. Hull and remains of cargo sold for \$23.50. Amount of loss not ascertained. Had no pilot on board.

2. Steamer *Potomska*, Capt. Nye, from Portland, for New York, went ashore on Bearce's Shoal, Vineyard Sound. Was subsequently got off, with slight damage. No pilot reported on board.

3. Haytien herm. brig *J. J. Rivire*, 149 tons, Le Clair, Master, in charge of Mr. Cutts, sailing master, from St. Marc, for Boston, got ashore on Chatham Bar, morning of 9th July. Had come through Vineyard Sound without a pilot, and had no pilot on board at time of going ashore. Got off same day, after discharging deck-load of logwood, which was landed at Chatham; received no material injury, but was subjected to the expense of having her deck-load conveyed to Boston in small vessels. At any time coming through the Vineyard Sound she might have received a pilot, and thus avoided this delay and expense, as she went ashore simply from want of a knowledge of the coast.

4. Schooner *Castiers*, 244 tons, Capt. Taylor, from Boston, for Philadelphia, went ashore at Rainsford Island, Boston Harbor, about July 24th, and bilged. A contract was made to get her off for \$600; towage was \$100; whole expenses, \$750. Expenses of repairs, \$1,000; value of vessel, \$10,000. No pilot on board at the time of the disaster.

5. Schooner *Benjamin S. Wright*, bound on a fishing cruise, was cut through a portion of her bends, July 19th, by collision with schooner *W. H. Atwood*, of Wellfleet, and put into Gloucester for repairs.

6. Schooner *George T. Jones*, of Dennis, Capt. Crowell, received slight damage, August 3d, by contact with schooner *Pallas*, of Rockland; the latter vessel was also damaged in sails and rigging.

7. Schooner *Emma L. Day*, 134 tons, of and from Philadelphia, with coal, for Hyannis, went ashore in Robinson's Hole, 13th August, in a fog; vessel filled with water, and was stripped; a contract was made to get her off for \$500. Supposed to have no pilot on board.

8. Bark *Good Hope*, 433 tons, Capt. Gordon, of and for Boston, from the Cape of Good Hope, got aground off Scituate,

August 15th; sustained no material damage; got off by discharging a part of cargo, and was towed up to Boston. No pilot on board.

9. Pilot-boat *America*, of Newburyport, was run down and sunk, 31st August, off Cape Ann, by schooner *Leander*, of Augusta, Me., bound to Boston. The crew was rescued and carried to Boston by the schooner, having barely time to escape. The pilot-boat was estimated worth \$1,500, only \$300 of which was insured.

10. Schooner *Wild Pigeon*, of Boston, collided, August 15th, with sloop *Ripple*, carrying away masts, and staving in side of the latter.

11. Schooner *Wild Pigeon*, got ashore off Truro, and had her keel knocked out, besides receiving other damage, costing \$500, for repairs. These and many other small craft are generally without pilots, being under no compulsion to take them.

12. Schooner *Odd-Fellow*, of Boston, 100 tons, Capt. Cole, from Point Lepreaux, N. B., for Boston, went ashore in August, near Newburyport, and was lost; value, \$1,000. No pilot on board.

13. Schooner *Alvarado*, of Stockton, Me., 130 tons, Shute, Master, from Rondout, for Boston, with 184 tons coal, sprang aleak off Nauset, 28th September, and sank same day off Cape Cod. Crew landed in safety at Provincetown. Value of vessel, about \$1,500; cargo, \$920—total loss. No pilot on board.

The Commissioners have had occasion to recognize the great importance of keeping a pilot-boat continually near the station limits of the Boston pilot ground, at all times when it is possible for such a vessel to live at sea; and this is the more necessary in the severe weather of our winter season, when the peril to both life and property is greatest. Generally our pilots have kept their posts faithfully at such times, but occasionally complaints have been made of a disposition to make a harbor when they were most needed. The Commissioners have had but one such instance brought to their notice the past year,—in February last,—when a ship from sea failed to get a pilot until she had anchored in Nantasket “Roads.” For this neglect of duty, the pilot in charge of the boat that should have been on

the station, was suspended from service, and strict attention to this important post has since been observed.

In closing their Report, the Commissioners have only to say that they have no changes in the Pilot Laws to suggest to the legislature at this time, as they are satisfied that more good will result from a strict observance of the laws as they now are, than by attempts to improve them.

Another year we shall have had a better opportunity of judging of the whole merits of the system, and may then suggest certain modifications.

JOHN WILLIAMS,
JOHN W. EMERY,
ALBERT G. BROWNE,

Commissioners.

LIST OF PILOTS

IN COMMISSION FOR PORTS IN MASSACHUSETTS.

Boston.—William G. Bailey, Stephen Burrows, Jonathan Bruce, Jr., Samuel Colby, John R. Cummings, P. H. Chandler, Charles G. Dolliver, James M. Eaton, W. W. McField, William C. Fowler, Matthew Hunt, Reuben S. Hunt, Henry O. Hunt, Abel F. Hayden, Asa H. Josselyn, Robert Kelley, William R. Lampe, John Low, Jacob K. Lunt, E. G. Martin, Samuel C. Martin, Horace A. Tewksbury, William F. Tewksbury, B. B. Tremere, John McField, George Williamson, Francis B. Wellock, Jerod Hunt, John T. Ford, Alfred Nash, Abel T. Hayden, Maxwell Reed, Massena P. Brown, Augustus Hooper, Norton W. Phillips, William Burrows.

Marblehead.—William Goodwin.

Beverly.—Daniel Foster.

Salem.—Joseph Perkins, Joseph Perkins, Jr., Francis F. Wallis, Ittai Perry, S. A. Powers.

Newburyport.—Mayo Gerrish, William F. Colby, Benjamin Lunt, William J. Lunt, Joseph Lunt, Michael Stephens, J. A. Somerby, Obadiah Hills, Henry C. Hills, Jacob B. Chase.

Gloucester.—David H. Ellery, George Sawyer, Daniel S. Webber.

Rockport.—William Stillman.

Wareham.—John B. Briggs, Warren M. Christie.

Taunton and Fall River.—H. Slade, D. Perry, M. Simmons.

Mattapoissett.—M. Snow, Stephen Nye.

Salisbury.—Thomas Young, Joseph Young.

Dorchester, Neponset, &c.—Charles Walker, John M. Cleverly, Samuel H. Sawyer.

Charles River.—David Cavanaugh, B. M. Lawry, H. A. Williams.

Lynn.—Francis D. Alley, John Lambert.

New Bedford.—Silas C. Sherman, John Hursell, Peleg Crowell, Ellery Manchester, Benjamin Aiken, J. Q. A. Cobb, Benjamin Cushman, F. A. Brownell, W. A. Almy, Caleb Church, Joseph Taber, John Flanders, Holden Allen, B. B. Church, George W. Slocum, N. W. Wood, Allen Pease, John C. Pease.

Holmes' Hole.—Peter Wainwright, James S. West, Timothy Daggett, Elijah Cleveland, Albert West, Shaw Norris, Truman Allen, George W. Smith, Leander Daggett, William E. Beetle, Alonzo Daggett.

Edgartown.—William B. Fisher, Francis Smith.

Nantucket.—Arvin Baker, D. G. Patterson, Watson Burgess, William Patterson, A. B. Dunham, J. D. Patterson, Heman Eldridge, A. H. Robinson, A. H. Gifford.

Cohasset Narrows.—J. T. Hatheway.

Danvers River.—John F. Plummer, James Plummer.

Provincetown.—The new regulations for the pilots of this port, will reduce the number of pilots from fourteen to six, and new commissions will be issued to this number.

NUMBER AND DESCRIPTION OF VESSELS piloted into and out of the several Harbors in the State, and over Nantucket Shoals, and also to Harbor Pilot Limits, showing the whole Amount of Pilotage in the several Ports, and the Amount of 6 per cent. Commissions, as per Returns of the Four Quarters ending June 30, 1861.

R E P O R T

OF THE

COMMISSIONERS

OF

ALIEN PASSENGERS

AND

FOREIGN PAUPERS.

1 8 6 1 .

B O S T O N :

WILLIAM WHITE, PRINTER TO THE STATE.

1 8 6 1 .

Commonwealth of Massachusetts.

To His Excellency the Governor, and the Honorable Council :

In compliance with the statutes, the Board of Commissioners of Alien Passengers and State Paupers herewith submit their Annual Report.

Under the operation of the present system, the number of State paupers, and the cost of their maintenance for the past few years, have been slowly but steadily decreasing. The same result was manifest in the present year, to the date of the outbreak of the rebellion. This was speedily followed by an increase in our inmates of some twenty-five per cent., owing directly to depression in the various departments of labor. But this increase was soon checked, and was in turn followed by a series of admissions from another source, which has caused the Commissioners much regret, as well as perplexity and anxious labor. The wives, children and dependent relatives of volunteers, for whom relief is otherwise provided by existing statutes, have been thrust into the State almshouses by the local authorities. Some they have committed on plausible pretexts, and others without the shadow of excuse; thus adding to an honorable poverty the sting of disgrace, and condemning the innocent children of our country's defenders to association with the outcasts of either hemisphere.

From these causes has arisen an increase of expenses, above the appropriation for the current year, but proportioned precisely to the larger number to be fed and clothed. But for these the cost of our institutions would have been less than in any year of their existence.

Experience shows that the average cost of the care and support of each inmate cannot, in justice to the recipients, fall

much short of one dollar per week. This minimum has been already reached. Any farther reduction in the outlay must result from the increasing productiveness of the farms, or the employment of the inmates in some species of labor, other than agricultural,—which would yield but little from their mental and physical disabilities,—or from a diminution of consumers.

Having then reached this minimum, the most effective method of reducing the aggregate of our pauper bills is to remove from the institutions all who are not justly chargeable to the State, which is the most arduous and responsible duty assigned to the Commissioners.

The State system has now been in operation more than seven years. During this period it has encountered a fearful financial convulsion, and the sudden shock of civil war. It has proved equal to either emergency, and under honest and capable supervision, the past is a guaranty for the future.

It is true that under the old system but forty-nine cents per week was allowed to the towns for the support of each person relieved, and hence the idea is still somewhat prevalent in the minds of many, that the present plan is needlessly expensive. But these persons overlook entirely certain *facts* which materially affect a comparison of the two systems.

1st. The actual cost to the towns for the maintenance of State paupers was considerably more than one dollar each per week, and the difference between that cost and the State allowance of forty-nine cents was made up by local taxation. Thus, though less was drawn from the State treasury, the people collectively paid much more for supporting an equal number of paupers than at present.

2d. The number of State paupers has decreased from 16,154, ten years ago, to 8,800 in the year just closed, although our population has increased in the same period some thirty per cent., and in that class whence paupers come, the percentage of increase has been much greater. Taking this increase into account, the State allowance alone, under the old system, for the number which would have been aided in 1861, would equal the present annual cost of our pauper establishments, leaving a yet larger amount to be made up by the towns.

3d. Many towns have been enabled to dispense altogether with their almshouses, and their pauper bills have been reduced to a sum merely nominal.

4th. The enormous medical bills of more than three hundred towns have been reduced to a comparative trifle, the labor being now performed by four physicians only, at a very moderate compensation. Some idea of the saving in this item alone may be gained by an estimate of the cost of treating medically 4,200 patients annually, scattered broadcast over the State, the weekly average being nearly 500. To this should be added the greatly increased cost of providing nurses and medicine, which, in the almshouses, is quite insignificant. Should any be disposed to cavil at this statement, they are referred to the bills on file in the auditor's office, and the annual claims presented by the towns for the medical treatment of persons too ill to be removed to the State institutions. They will find that within three years, more than two hundred dollars have been granted and paid to one town, for the expenses of a single family, ill but a few weeks. This heavy item of expenditure was not formerly appreciated, because so widely distributed.

5th. Under the old method, Massachusetts was the Elysium of beggars and vagabonds. No measures being taken to exclude or remove them, they flocked hither in such numbers, that in 1851 one person in every fifty-six was a State pauper. Roving from town to town, and yet seldom leaving the State, they were a perpetual nuisance, which no existing legislation could abate.

But the establishment of the State system wrought a wondrous change, and happy as wondrous. The unwelcome prospect of aiding in their own support created at once a tremendous stampede of vagrants across our borders. The remainder, being collected into the State institutions, were easily examined as to their history and place of settlement, and forthwith removed thither whenever practicable.

In this way the Commissioners have removed more than 8,000 paupers in the last four years, comparatively few of whom have ever appeared again within their jurisdiction. It is thus mainly that the average annual number has been reduced from 16,000 to less than 8,000, and *here* in this facility of examining and removing paupers thus aggregated, lies one of the greatest advantages of the new arrangement.

There are others we have no room to specify; but enough has been said, we trust, to show the superiority of the present plan to one under which dead paupers were summoned from their

graves to eke out a town's allowance, and a bushel of meal or a foot of wood bestowed on a large family was made the basis of charging the State with forty-nine cents per week for each of its members for a whole winter.

POWERS AND DUTIES OF THE COMMISSIONERS.

In the precise words of the statute, the general duty of this Board is to "superintend the execution of all laws in relation to the introduction of aliens into this Commonwealth, and the support of State paupers therein."

Their specific duties, defined by law, or arising from their relation to the almshouses and lunatic hospitals, are as follows:

1. They must "appoint persons to visit all the almshouses or other places, where State paupers are supported, and ascertain whether the laws in regard to such paupers are properly executed, and report any case of infraction to the commissioners." The expense attending such appointments requires them to perform most of this duty themselves.

2. They must "give such directions as will ensure correctness in the returns to be made in relation to paupers." Their personal supervision is again required here,—to remedy gross and inexcusable blunders.

3. They must "use the means necessary to collect all desired information as to their support."

4. They must "appoint one or more persons to ascertain the names of all foreigners brought into the State by any conveyance by land,—and by the regular lines of travel by water, within the limits of the United States,—and to procure the information necessary to indentify such foreigners, should they become a public charge."

5. They must "prescribe the form of the certificate, upon which paupers shall be sent to the State almshouses," and furnish blanks, when called for, to all the cities and towns.

6. They must bind out minor inmates of the hospital at Rainsford Island, and exercise the same powers over State paupers therein, or in any lunatic hospital in the Commonwealth, and their property, as are by law vested in towns and in overseers of the poor, over town paupers.

7. They must decide what cities or towns in the Commonwealth may send sick State paupers to Rainsford Island.

8. They are to designate, if necessary, the State almshouse to which any city or town shall send State paupers, and attend personally to the distribution and transfer of the inmates, when demanded by the crowded condition of an institution, or any other exigency.

9. They are to commute the bonds taken by superintendents of alien passengers, on such terms as in their judgment will best promote the interests of the Commonwealth.

10. They must visit frequently all the almshouses and hospitals, and examine each inmate, to ascertain his history and where he may belong.

11. If he has a settlement in any town in this Commonwealth, they must cause that town to be notified, and the pauper to be removed ;—or, in case of denial, they must collect all needful evidence, and commence and prosecute to final adjudication a suit for his support.

12. If his settlement is in any other State, they must remove him to his home as soon as practicable.

13. If he is a foreigner, they must ascertain where he landed, and paid his head-money ; and if that place should prove to be without the limits of Massachusetts, they must remove him thither forthwith.

14. If he has funds or other means of support, they must take measures to indemnify the State for all expenses incurred for him.

15. If he has friends able to aid or maintain him, they must remove him to said friends, or induce them to contribute to his support.

16. They must not only see that all paupers and lunatics are removed to the places “ where they belong,” or “ whence they came,” but must attend personally to the removal of all the feeble and the noisy or dangerous insane ; and make all contracts, and pay all bills incident to such removal.

17. They must answer letters from overseers of the poor, and others, in every part of the State, in respect to State paupers, giving such information and advice as they require.

18. In all cases of bastardy, where the mother is a State pauper, they must see that a complaint is made and prosecuted to final adjudication, and must take measures to secure the State against any expense for the support of the child.

19. They must investigate all applications for relief by parties who have been in the State less than one year, and send them to the "agents of railroad companies, or other means of conveyance, by which they were brought into the State," to be by them returned to the places whence they came, or otherwise provided for, in accordance with the law of 1851.

20. They must examine all applications under the law of 1860, and remove the parties if proper.

21. They must keep the records of the institutions, which are sent each week to their office, and answer all inquiries respecting the locality, health, and prospects of the inmates.

In addition to this miscellaneous catalogue of duties, they have been compelled for some months to look closely after the parties applying for aid, claiming to be dependent on volunteers in the national service, and warn the authorities against attempted impositions.

These duties, with many minor details, occupy the whole time of the active force of the Commission. They require a vast amount of labor and travel, and involve much personal exposure to climate, accident, and contagious disease. But great interests are at stake upon their faithful discharge, and not only the finances of the State, but the welfare of humanity would suffer from neglecting them.

EXAMINATIONS, SETTLEMENTS AND REMOVALS.

In previous Reports, the Commissioners have stated that it was their "practice to examine all the inmates of the several institutions, as soon as possible after their admission, to ascertain their birthplace and previous residence, their occupation, habits, and personal history; also the names and residences of their parents, grandparents and more remote ancestors in the direct line, the civil and pecuniary condition of all these parties, with such other facts as might throw any light upon the question of their settlement; and if foreigners, the time and mode of their immigration, the port where they landed, and the date of their entry into the State. This is a task of no small difficulty, owing to the stupidity and ignorance of some, and intentional concealment and wilful deceit on the part of others; but the utmost pains are taken to elicit the whole truth, and the parties put upon oath, when necessary. The facts thus secured are placed

on record in their office, and constitute a most valuable source of information and reference, whenever any of these parties or their kindred appear again in our institutions; indicating at once the disposal to be made of them, without incurring further cost for investigation. The possession of these facts saves the State a large sum annually, and the Commissioners deem their acquisition and preservation one of the most important, as well as laborious of their duties." The following table will show the number and place of these examinations for 1859, 1860 and 1861.

TABLE No. 1.

NUMBER OF CASES EXAMINED IN—	1861.	1860.	1859.
Alms-house at Tewksbury,	1,400	1,610	1,695
Alms-house at Bridgewater,	662		
Alms-house at Monson,	402		
Rainsford Hospital,	257		
Lunatic Hospitals,	300	275	451
Office of Commissioners,	1,424	1,466	1,115
Totals,	4,445	3,351	3,261
Increase for 1861, in cases examined, 1,094			

After the examinations are completed, each case is carefully reviewed, and those selected for immediate action, which indicate either a settlement within or without the State, and the existence of available means of support, or the propriety of removal.

In the former case, the Board proceed to verify the statements made to them by correspondence and travel, and cause the parties to be removed as soon as practicable. In this way, they have found, during the year, a settlement, or means of support for eight hundred and three persons, as appears in the following table, which gives the settlements &c., found for the past three years:

TABLE No. 2.

	1859.	1860.	1861.
Settlements within the State,	58	69	38
Settlements out of the State,	106	268	350
Cases of discovery of funds,	9	17	2
Cases where friends have paid or removed, .	27	186	413
	200	540	803
Increase over 1859,			603
“ “ 1860,			263
Total found for three years,			1,543

In this table will be found a gain of two hundred and sixty-three cases, or forty-nine per cent. for the present year, and more than three hundred per cent. as compared with 1859.

These parties are generally permanent paupers, or confirmed lunatics. Their health is excellent in a majority of cases, and their promise of life fully equal to the average. Some defect of body or mind renders them incapable of earning a living. They are consequently fastened upon the State for life, unless a reliable means of support is provided through the discovery of a settlement or otherwise. As it costs fifty dollars per annum to support each pauper, and one hundred and thirty dollars for each lunatic, some estimate may be formed of the great amount saved by relieving the State of the maintenance of more than 1,500 incapables, not for one year only, but for all the years they may live.

From different sources the Commissioners have collected for the benefit of the Commonwealth the sum of \$2,672.32, an account of which has been placed in the hands of the State Treasurer.

In previous Reports the Commissioners have felt obliged to defend the expediency of the policy of removals, and its absolute necessity to prevent Massachusetts from becoming the rendezvous and abiding place of the vagrants and criminals of

other States and other lands. But this course is no longer needful. From all parts of the State comes concurrent testimony to its beneficial results. It not only relieves the State, the towns and benevolent individuals from a wearisome and constant burden, but prevents the ingress of large numbers, by the fixed certainty that the action of this Board will promptly return them. So far from incurring the daily accusation of "inhumanity," as of old, the Commissioners have neither time nor means to remove the numerous applicants who insist on being sent to their friends and former homes.

Renewing their statement of the rules which guide them in the discharge of this most laborious and responsible duty, and to which they rigidly adhere, they refer to the figures which follow for the financial effect of the policy.

1. The parties shall have no settlement in the State. 2. They shall be inmates of a State institution. 3. They shall not be able-bodied. 4. They shall be permanent paupers, or certain to become such. 5. They shall consent to the removal. 6. Their friends, if any, shall consent. 7. Any funds that can be raised by themselves or friends shall go towards defraying the expense of removal. And lastly, as a general rule, the Commissioners have returned paupers only to the places bound, by their own statutes, to receive and support them, and have made every possible exertion, by their individual presence and aid, to guard against accidents and fulfil the requirements of humanity.

The whole number of removals under the statutes, from

October 1, 1860, to October 1, 1861, is	.	.	2,052
From October 1, 1857, to October 1, 1861, is.	.	.	8,033

A very large proportion of these consisted of life cases;—but supposing that each person had received support for six months only at an average cost of \$25,—(an estimate absurdly low,)—the outlay thus prevented would be counted by hundreds of thousands. But for these removals certainly one and probably two additional institutions of equal size with the present, would have been required. Different results cannot be obtained from the unerring figures.

The following table will show the number and general destination of the persons removed to the "places whence they came," from October 1, 1860, to October 1, 1861:

TABLE No. 3.

To places beyond sea,	301

	2,052

Being 622 more than were removed in 1860.

The expense of sending the above number has been \$8,405.61; the removal to places beyond the sea costing \$1,230.70, or an average of \$14.03½ for each person sent; to other places, \$4,046.19, or \$2.31 for each. The number of transfers for the year has been 86, at a cost of \$128.72, or an average of \$1.50 each.

LUNATIC HOSPITALS.

It is needless for the Commissioners to commend these institutions. Their works praise them. To the skill and patience of their superintendents, and the disinterestedness of those among their trustees, who, uncompensated, give their time, toil

and talents to these noble charities, the State owes a debt of lasting gratitude.

But in its connection with the hospitals, there is one unpleasant feature. The number of State lunatics is steadily increasing. It was 415 at the close of 1859,—rose to 547 in 1860, and in 1861 is 615. Two hospitals are uncomfortably crowded, as is also the female department of the third. As the inevitable consequence, the usefulness of the institutions is seriously impaired, and the most judicious efforts to restore health and vigor to body and mind are frustrated. Thus gross injustice is done to those made responsible for the well-being of the inmates, and the mission of the institutions cannot be fulfilled. There should be prompt action to remove this evil. A common humanity demands it. This can only be effected in two ways,—first, by sending the lunatics to the States or countries “whence they came,” or “where they belong,” or second, by providing further accommodations.

The obstacles to removal are increasing yearly; and it is impossible, in this way, to meet the increase. The building of another hospital would be strenuously opposed, and would only be an invitation to our neighbors to send us the remainder of their imbeciles and madmen. What then can be done? The Commissioners have but one suggestion to make, and they urge this upon the legislature, because while accomplishing the end proposed, it will result in a large annual saving to the Commonwealth.

The hospitals contain 615 State lunatics. Of these a large proportion are demented, harmless and incurable. They are past treatment, and need but care and kindness. They can be provided for in an almshouse quite as well as a hospital.

Now for each of these imbeciles \$130 per annum is paid from the treasury. At the almshouses they can be supported for \$55 each. Thus \$75 per annum would be saved in the case of each patient, and the transfer of a hundred would save \$7,000 a year for many years to come, besides relieving the hospitals and improving the health and prospects of those left behind. At the almshouses are excellent physicians always on the spot, good nurses, and ample attendance. Humanity and economy alike demand this transfer. The only obstacle is the want of suitable accommodations. Competent mechanics have examined the

premises at Tewksbury, and decided that a fire-proof brick building suitable for sixty persons of this class, and warmed by steam from the boilers now in use, can be erected for forty-five hundred dollars.

If these sixty persons should be retained at a hospital for the coming year, the amount drawn from the treasury for their support will be just \$7,800. If they are provided for in an almshouse, as above described, they would cost (at the average for each inmate in the institution) a little over \$3,000. But as nothing extra would be needed for fuel, medical attendance and officers' salaries, the expense of adding them to the present number would not probably be so much. Thus the mere difference in the cost of maintaining them would pay for the building in a single year, while the patients would be as comfortable as their forlorn condition will admit, the hospitals greatly relieved, and a future annual saving be effected of \$7,500 for every hundred patients transferred.

These considerations, and the absolute necessity of providing for the unfortunate beings of that class already confined in the almshouses in very unsuitable quarters, induce the Commissioners to advise the construction of two buildings for their accommodation,—one at Tewksbury, and one at Bridgewater.

The following table will show the number of State lunatics in the several hospitals on the 1st of December, 1856, and 1st of October, from 1857 to 1861 inclusive.

TABLE No. 4.

	Dec. 1, 1856.	Oct. 1, 1857.	Oct. 1, 1858.	Oct. 1, 1859.	Oct. 1, 1860.	Oct. 1, 1861.
Worcester Hospital, . . .	141	127	86	87	130	156
Taunton Hospital, . . .	139	165	139	175	196	243
South Boston Hospital, . .	125	119	—	—	—	—
Northampton Hospital, . .	—	—	176	153	221	216
Concord Jail,	1	—	—	—	—	—
	406	411	401	415	547	615
Increase since 1860,	68
Increase since 1859,	200!

Being an increase of nearly 50 per cent. in two years, with a yet gloomier prospect for the years to come, in view of the war and its attendant excitements, which have already commenced to swell these numbers.

The next table gives the number of persons removed from the lunatic hospitals by the Alien Commissioners to the State almshouses, or the places whence they came, during the period from 1854 to 1861 inclusive, which shows an average of 80 per year.

TABLE No. 5.

	No. sent to State Almshouses.	No. sent to their places of settlement.	Total.
1854,	35	14	49
1855,	122	40	162
1856,	81	28	109
1857,	44	18	62
1858,	14	102	116
1859,	28	45	73
1860,	9	21	30
1861,	3	35	38
Totals,	336	303	639

The next table exhibits the probable number of inmates in the lunatic hospitals at the close of each of the seven years past, provided that no removals had been made. The percentage of deaths allowed is much larger than the rate of mortality among those remaining in the hospitals.

TABLE No. 6.

Number remaining at the close of			Per ct. of Increase.
1855,	. . .	616	—
1856,	. . .	661	.07 $\frac{3}{10}$
1857,	. . .	703	.06 $\frac{4}{10}$
1858,	. . .	780	.11
1859,	. . .	830	.06 $\frac{4}{10}$
1860,	. . .	950	.14 $\frac{5}{10}$
1861,	. . .	1,016	.07

The above estimate, based on the best data within reach, shows that since January 1, 1855, 2,307 additional patients would have been supported, 52 weeks each, equal to 119,964 weeks, at an average cost of about \$2.75 per week; amounting to \$329,901. Deducting \$68,952 for the support of those sent to the almshouses during the same period, the remainder is \$260,949, all of which has been saved to the Commonwealth in seven years by the policy of removal. It is clear also that we should to-day be maintaining 1,016 lunatics at an annual cost of \$132,080 instead of 615 for about \$80,000.

It appears also that if this Board should cease to remove from the State as heretofore, the average accumulation of lunatics would be from 80 to 90 per annum, and affords additional proof of the expediency of the policy previously recommended in this Report.

The following tables will show the number of admissions, discharges and deaths of State lunatics for the present year, with the whole number supported, and the number remaining on the first of October, 1860 and 1861, respectively:

TABLE No. 7.

	No. remaining Oct. 1, 1860.	Number of Admissions.	Whole number Supported.
Worcester,	130	112	242
Taunton,	196	176	372
Northampton,	221	28	249
Totals,	547	316	863

TABLE No. 8.

	Number of Discharges.	Number of Deaths.	No. remaining Oct. 1, 1861.
Worcester,	88	14	156
Taunton,	94	35	243
Northampton,	11	20	216
Totals,	193	69	615

The number removed by this Board during the past year is 38, of which 3 have been transferred to the State almshouses.

STATE ALMSHOUSES.

In presenting the usual details from these institutions, the Commissioners can speak most favorably of their condition and management. Within the last three years the improvement has been very conspicuous. They were opened for the reception of inmates in 1854, under very discouraging circumstances. Incompleteness was visible everywhere. Many things indispensable to comfort were entirely wanting. The energy and perseverance of the present Superintendents have overcome these obstacles, and supplied most of the deficiencies without a serious draft on the treasury of the Commonwealth. Few institutions can be found in this country, which equal them in all that pertains to the physical comfort of their inmates, or in the provision for the education and discipline of the children. The Inspectors have given close attention to their duties; the medical officers have been remarkably successful in their treatment of diseases more complicated and perplexing than usually occur in private practice; and, with few exceptions, the subordinate officers have labored with zeal and efficiency in their several departments. After making suitable provision for the insane and idiotic inmates, the wants of these institutions will be limited to the ordinary repairs.

The Commissioners would again call the attention of the legislature to the great inconvenience to the Superintendents and expense to the State caused by the absence of some legal check upon the discharge of paupers. As a man's poverty should not make him a prisoner, it is presumed that an inmate has an abstract right to his discharge, whenever he chooses to ask it. But the exercise of this right gives rise to numberless troubles. The authorities of cities and towns complain bitterly, and with much reason, that persons unfit to take care of themselves, and just committed at their expense to an almshouse, are turned loose upon them to be supported or again committed. But if they demand to go, where is the right to detain them? It is a hard case for the towns, but harder yet for the institutions; for most of the parties thus unwillingly discharged return in a few days, bruised, drunken and filthy, in fact many times worse

than before, and by their language and example spread corruption all around them. Other troubles from the same source have been fully specified in previous Reports, and can only be remedied by definite legislation.

ALMSHOUSE AT TEWKSBURY.

HON. THOMAS J. MARSH, *Superintendent*. JONATHAN BROWN, M. D., *Physician*.

Located in a manufacturing district, under the shadow of Lowell and Lawrence, this almshouse is liable to greater fluctuation in its numbers than either of the others. A panic crowds it. Returning prosperity as speedily relieves it. The depression of the manufacturing interest for the past few months has driven so many to its shelter that the average weekly number for the entire year is nine hundred, being nearly forty per cent. larger than the average of last year. Of course the expense of food and clothing has increased in the same ratio as the number of inmates, and the appropriation, based on a weekly average of 660, is entirely inadequate for one of 900. The weekly cost per inmate is less than last year, the permanent items, such as salaries, fuel, &c., being divided among a larger number, and a considerable saving having been effected by good management in some of the departments. The farm is already a source of great profit. No milk and pork are purchased, and it furnishes an immense supply of potatoes and other vegetables. Not one of the almshouse farms ever bore a remarkable likeness to the "promised land." But this was peculiarly desolate. Even the hardy settlers of Essex and Middlesex seem to have shrunk in dismay from this appalling aggregation of rocks, swamps and sand banks. But the application of that much sneered at motive-power—pauper labor, intelligently guided—is making this "wilderness to blossom," and winning fruitful harvests from the reluctant soil. Indeed this site must have been selected on the principle that "like cures like," which here at least has won a signal triumph. It is true that very much remains to be done, but the skill and perseverance of the Superintendent will accomplish it with the means now at his disposal.

The internal economy of the house is excellent, and the life and example of its officers are not without their influence on the inmates.

The hospital department at Tewksbury is larger than in any other State institution. Eighteen hundred and nineteen cases have been treated during the year, and the average number of patients has been 197. The labors of the medical gentlemen, Doctors Brown and Hubbard, have been very arduous, and their results most gratifying. Most of the deaths have occurred from causes necessarily and under any circumstances fatal, and considering the condition in which many of the sick are removed to the almshouse by the town authorities, it is a wonder that more do not die. To Mrs. Marsh, the capable and judicious Matron, belongs the credit of important improvements in the sanitary condition of the department for females and young children.

ALMSHOUSE AT MONSON.

JOHN M. BREWSTER, M. D., *Superintendent*. JOSEPH D. NICHOLS, M. D., *Physician*.

Peculiar interest attaches to this almshouse, from the fact that here nearly five hundred homeless and friendless children find parental care, and are taught and trained with a fidelity rarely equalled.

Its location in an agricultural district affords unusual advantages for providing them with permanent and comfortable homes in good families, and, within three years, three hundred and forty-six have been thus disposed of.

In neatness, good order and economy, this is a model institution, and each year has witnessed a decreasing expenditure.

Under skilful management, the farm has increased in value and productiveness, and one hundred tons of good hay have been secured the present season, besides a very large amount of vegetables.

Its medical department has been conducted with skill and judgment, and apart from the foundlings sent in, in a dying condition, the mortality has been trifling.

The last legislature made appropriations for several improvements here, which have long been desired, but in view of the heavy draft upon the treasury, the Inspectors have considerably decided not to call for the money.

The Commissioners have witnessed, with great pleasure, the persevering and successful efforts of the Superintendent and Mrs. Brewster to introduce a wise economy into all the depart-

ments of this institution, and it is due to him to say publicly that the attempts of certain parties in the vicinity to impugn his management are utterly causeless. It is to be hoped that they result from want of knowledge rather than jealousy and malice.

To the faithful and accurate Clerk, Mr. Joseph H. Brewster, they acknowledge their indebtedness for valuable assistance in the discharge of their supervisory duties.

ALMSHOUSE AT BRIDGEWATER.

In previous Reports, the Alien Commissioners have invariably borne testimony to the superior qualifications, zeal and capacity shown by L. L. Goodspeed, Esq., the Superintendent of this institution. They can only reiterate these opinions. Its general condition, so far as relates to the neatness of the buildings, and good order and discipline of its inmates, is in the highest degree satisfactory.

The farm, which was formerly a bed of rocks, has been made very productive, and yields large crops of grass, vegetables and other products; and fields which were formerly barren wastes are now entirely cleared, and have this year yielded more than three tons of hay to the acre. It was a serious question with Capt. Goodspeed what to do with the rock, which seemed to be the chief product of the soil, and when it was found necessary to provide an additional building for the purposes of a bakery, wash-room and ironing-house, it was constructed from the rough stones found on the farm. Miles of stone wall have been built, some of it more than eight feet from its base in height, and some three to four feet in thickness. Hundreds of tons of stone have been broken up by inmates who mentally or physically have not been able to do much else, and this has been used for Macadamizing the roads and avenues near the almshouse. The past season, extensive drains in swampy portions of the farm have been constructed, and several acres of morass drained, cleared and made ready for culture another season.

The Board of Inspectors have caused extensive improvements to be made for supplying the house with water. This was a much needed addition to this institution, and will prove a great

benefit to the inmates, beside adding to the safety of the buildings in case of fire.

Most of the inmates of this institution are adults, as it is thought best by the officers of this house as well as by ourselves, that all such children as were likely to become permanent charges upon the State should be transferred to the almshouse at Monson, which is more especially intended as a home for orphan or destitute alien children. Under this policy the children of extremely dissolute parents, children deserted by their parents, orphans, and those who never knew a father or a mother, are transferred, and also mothers with large families who prefer to have their children at the Monson institution, and desire to be near them. The past season there has been a number so transferred from Bridgewater, and nearly one hundred more will shortly follow. Beside being greatly for the benefit of the children, this policy saves the expense of employing more than one teacher at Bridgewater, and gives room for such adult paupers as must be sent to this State almshouse.

It has always been the misfortune of this house to be obliged to have a large number of insane, or demented paupers. The number of this class at the present time reaches nearly one hundred, and in our judgment there is no department of the charitable system of this Commonwealth, that requires a more thorough examination and wise action on the part of the legislature. By reference to past Reports not only of this Board, the boards of trustees of the insane hospitals, and the inspectors of the almshouses, but also of committees of former legislatures upon charitable institutions,* it will be found that repeated recommendations have been made for the relief of this most unfortunate class of our citizens. The judgment of this Board upon this subject may be found embodied in a previous portion of this Report, but we feel that its importance is such that this further allusion to it in this connection is not out of place. The ability shown by the Superintendent of this institution in

* So long ago as 1854, the Committee on Charitable Institutions, in their report (House Doc. 167) say: "The suggestion has been made, and is worthy of consideration, whether a considerable number of those now in our hospitals and receptacles, who are harmless and incurable, or in a state of hopeless *dementia*, may not be as safely and comfortably provided for in our State almshouses."

managing this class of persons reflects great credit on him, and has attracted the attention of some of the ablest physicians who now have or who have had charge of some of the insane hospitals. In this as in other departments of his labors, he is peculiarly fortunate in the aid he receives from Mrs. Goodspeed, the Matron, whose kindness and active attention to her duties have made her a favorite with, and gives her great influence over those under her care.

The hospital department of this institution is in a highly satisfactory condition, and we think the statistics of mortality will compare favorably with any previous year in its history, or with those of any similar hospital in the country.

RAINSFORD ISLAND HOSPITAL.

The hospital at Rainsford Island is now under the charge of Dr. Frederick Winsor, whose whole attention and efforts are directed to rendering it useful to the unfortunate diseased aliens for whose benefit it was instituted. The appointment of Dr. Winsor was followed by the appointment of a new board of inspectors for this institution. By reference to the statutes, it will be observed that the powers and duties of the Alien Commissioners are much more numerous and responsible over this institution than the State almshouses, and it gives us pleasure to say, that in our efforts here in behalf of the Commonwealth we have been cordially aided by both the Superintendent and the Board of Inspectors.

The changes of officers have led to a number of repairs, alterations and improvements which, in our judgment, are of permanent value to the institution, and some of which were imperatively demanded if true economy was to be the rule of action on the part of the officers of the hospital.

We are of the opinion, if this hospital is continued, that some more suitable accommodations should be afforded the male patients. One of the buildings now used is wholly unfitted for the requirements of a hospital, and the main building should either be enlarged or torn down to give place to a more suitable structure.

This institution does not possess, and so far as we can learn there never has been a fire engine of any description on this Island; and the residence of the Superintendent, or any of

the other buildings, would inevitably be totally destroyed in case a fire should occur. Had the appropriation permitted, it was the intention of the officers to have purchased a suitable engine at once.

It is our intention to confine this institution strictly to the purposes of a hospital, and not allow paupers to accumulate there under any pretence whatever, and we have during the year transferred those cases which were incurable, several old people whose troubles were incident to poverty in old age, and also the children that have been sent there with their parents, to the almshouses. This institution was originally transferred from the city of Boston to the State, for the purpose of being used as a State quarantine station. The generally healthy immigration however, yielded so few cases of sickness, that the Commissioners have for some years past directed the sick aliens from this section of the State to be sent hither rather than to the almshouses. That some properly located hospital should be provided by the Commonwealth, where the cities and towns would have a right to send such of their paupers as may be infected with smallpox, ship fever, or other "sickness dangerous to the public health," is apparent, and that the hospital at Rainsford Island in an admirable manner meets this requirement, we have the testimony of the ablest physicians in the State, and such is our own opinion.

The following table will show the whole number supported in the several institutions for the past four years, with the weekly average of inmates, and the increase for the year ending October 1, 1861:

TABLE No. 9.

	WHOLE NUMBER SUPPORTED.				Increase from 1860.	WEEKLY AVERAGE.				Increase from 1860.
	1858.	1859.	1860.	1861.		1858.	1859.	1860.	1861.	
Tewksbury, .	3,586	3,026	2,411	3,528	1,117	952	779	665	900	235
Bridgewater,	2,209	1,768	1,854	1,992	138	762	604	551	623	72
Monson, .	2,938	1,943	1,909	2,604	695	823	581	549	580	31
Rainsford Isl.,	1,123	633	964	762	*202	246	171	169	159	*10
	9,856	7,370	7,138	8,886	1,748	2,783	2,135	1,932	2,262	328

* Decrease.

Allowing for 86 inmates transferred from one almshouse to another, and therefore counted twice, we have 8,800 as the actual number supported, and 1,662 as the true increase since October 1, 1860.

From the above table it appears that the whole number supported has increased $23\frac{81}{100}$ per cent., and the weekly average $16\frac{97}{100}$ per cent. during the past year.

In the next table will be found a statement of the admissions and discharges in the several institutions, for 1860 and 1861, respectively :

TABLE NO. 10.

	ADMISSIONS.		Increase for 1861.	DISCHARGES.		Increase for 1861.
	1860.	1861.		1860.	1861.	
Tewksbury,	1,776	2,900	1,124	1,636	2,335	699
Bridgewater,	1,360	1,512	152	1,200	1,099	101*
Monson,	1,414	2,085	671	1,345	1,955	610
Rainsford,	805	615	190*	725	542	183*
	5,355	7,112	1,757	4,906	5,931	1,025

* Decrease.

Allowing as above for 86 inmates transferred, we have an increase of 1,757 in the number of admissions, which number,—with the addition of 394 paupers removed directly from the State under the law of 1860,—undoubtedly represents, so far as the State is concerned, the effect of the present war in producing “pauperism” in Massachusetts. Only one person in 615 has been compelled to seek its aid, over and above the usual number of applicants.

BIRTHS AND DEATHS.

TABLE No. 11.

	BIRTHS.			Increase or Decrease.	DEATHS.			Increase or Decrease.
	1859.	1860.	1861.		1859.	1860.	1861.	
Tewksbury, .	58	62	61	1 Dec.	162	147	216	69 Inc.
Bridgewater, .	52	56	49	7 “	178	173	129	44 Dec.
Monson, .	19	16	17	1 Inc.	45	45	53	8 Inc.
Rainsford, .	17	24	19	5 Dec.	45	92	57	35 Dec.
	146	158	146	12 Dec.	430	457	455	2 Dec.

Thus in an aggregate of 8,800 supported, the mortality is actually less than last year with an aggregate of 6,979. At Tewksbury it is $6\frac{1}{10}$ per cent. of the whole number, being the same as last year. At Bridgewater, $6\frac{4}{10}$ per cent. The improvement at the latter institution has been very gratifying,—the rate last year having been $9\frac{3}{10}$ per cent. At Rainsford there is a similar improvement, the reduction in the rate being 2 per cent.

The next table will show the number remaining October 1, 1857, 1858, 1859, 1860, and 1861, respectively, with the rate of increase in each institution, since last year.

TABLE No. 12.

	NUMBER REMAINING, OCTOBER 1.					Increase from 1860.	Rate per cent.
	1857.	1858.	1859.	1860.	1861.		
Tewksbury, .	751	822	635	628	974	346	$55\frac{9}{100}$
Bridgewater, .	598	525	494	481	764	283	$58\frac{83}{100}$
Monson, .	638	565	495	519	596	77	$14\frac{84}{100}$
Rainsford, .	253	212	159	147	163	16	$10\frac{88}{100}$
	2,240	2,124	1,783	1,775	2,497	722	$*40\frac{67}{100}$

* Average per cent.

It will be seen that the number of paupers remaining October 1, 1861, is greater by 722, or about two-fifths, than at the corresponding date of 1860. It never was so large before.

The current expenses of the almshouses and pauper hospital, (by which we mean the sums actually expended for the care and support of inmates) for the past three years, are as follows:

TABLE No. 13.

	1859.	1860.	1861.
Tewksbury Almshouse, . . .	\$38,594 61	\$38,414 94	\$46,236 31
Bridgewater Almshouse, . . .	31,728 91	29,458 65	32,945 61
Monson Almshouse, . . .	32,137 66	29,376 84	31,187 52
Rainsford Island Hospital, . . .	22,190 27	23,002 14	24,614 15
	\$124,651 45	\$120,252 57	\$134,983 59

The increase in expenses over last year will be found to bear a very exact ratio to the increase of inmates.

The cost per week of maintaining each pauper appears to be as follows for the last two years:

TABLE No. 14.

	1860.	1861.
At Tewksbury,	1.11	.98 $\frac{8}{10}$
Bridgewater,	1.02 $\frac{8}{10}$	1.01 $\frac{7}{10}$
Monson,	1.03 $\frac{2}{10}$	1.03 $\frac{4}{10}$
Rainsford,	2.61 $\frac{7}{10}$	2.76

TABLE No. 15,

Showing the Expenses of the State Almshouses and Rainsford Island Hospital, from their opening to the present date.

Expenses to September 30, 1854, (part of a year,) . . .	\$61,762	34
Expenses from October 1, 1854, to September 30, 1855, . . .	167,197	79
“ “ “ 1855, “ 1856, . . .	177,985	69
“ “ “ 1856, “ 1857, . . .	160,786	49
“ “ “ 1857, “ 1858, . . .	171,543	44
“ “ “ 1858, “ 1859, . . .	124,651	45
“ “ “ 1859, “ 1860, . . .	120,252	57
“ “ “ 1860, “ 1861, . . .	134,983	59

Appended are some of the principal items of expense in the three almshouses for the last three years.

TABLE No. 16.

	1859.	1860.	1861.
Flour and Crackers, . . .	\$18,749 00	\$16,053 33	\$20,393 46
Grain, . . .	3,649 37	5,400 34	5,203 85
Fuel and Lights, . . .	7,616 18	8,746 13	8,983 88
Dry Goods, . . .	7,575 82	9,791 38	10,543 54
Milk, . . .	6,815 41	5,269 45	4,113 80
Hay, Straw and Pasture, . .	2,070 20	2,694 82	2,922 14
Eggs, Butter and Cheese, . .	1,455 60	1,376 28	1,576 77
Meats and Beef stock, . .	15,598 89	15,298 98	14,495 54
Fish, . . .	1,160 57	996 28	1,600 33
West India Goods, . . .	8,830 29	8,711 67	8,889 45
Beans and Potatoes, . . .	1,762 41	1,651 56	2,700 17
Soap and Soap stock, . .	1,565 98	808 15	1,504 23
Shoes, Leather, &c., . . .	2,762 10	2,377 44	2,306 49
Hats and Caps, . . .	367 45	306 29	398 83

The large reduction in the above table in the items of milk and meat, notwithstanding the great increase of consumers, is undoubtedly due to the advancing productiveness of the several farms.

TABLE NO. 17,

Shows the number of former inmates who have returned to the Institutions within the past two years, and the number of times each has been admitted.

	2 times.	3 times.	4 times.	5 times.	6 times.	7 times.	8 times.	11 times.	Total.
Tewksbury, . . .	539	173	67	32	14	3	4	1	833
Bridgewater, . .	287	30	9	—	2	1	—	—	329
Monson,	303	70	16	6	1	1	—	—	397
Rainsford, . . .	77	10	7	5	1	—	—	—	100
Totals,	1,206	283	99	43	18	5	4	1	1,659

Thus it appears that out of those admitted for 1860 and 1861, 1,659 persons have made 2,399 applications for re-admission, being nearly 20 per cent. of the whole number applying; and after excluding the deaths, the children indentured, and the removals from the State, they would constitute at least 30 per cent. of all applicants. If we reckon those who, after discharge from one almshouse have gone to the others, this percentage would be greatly increased.

In the next tables will be found the nativity of those persons admitted who were not born in Massachusetts.

TABLE No. 18.

	Tewksbury.	Bridgewater.	Monson.	Rainsford Island.	Total.
Ireland,	1,175	667	760	270	2,872
England,	162	81	265	35	543
Scotland,	45	25	72	13	155
Wales,	—	1	2	—	3
	1,382	774	1,099	318	3,573
Nova Scotia,	51	18	14	14	97
New Brunswick,	27	24	24	18	93
Canada,	40	14	72	4	130
Prince Edward Island,	4	2	—	3	9
Newfoundland,	3	3	1	—	7
	125	61	111	39	336
Total in Great Britain and Ireland,					3,573
Total in Provinces,					336
Total of British subjects,					3,909

The number of children of British subjects born in Massachusetts and admitted to the almshouses and Rainsford Hospital, will be found in

TABLE No. 19.

	Tewksbury.	Bridgewater.	Monson.	Rainsford Island.	Total.
Number born of Irish parents,	500	421	165	60	1,146
“ “ English parents,	19	12	4	1	36
“ “ Scotch parents,	11	1	3	—	15
“ “ Nova Scotian parents,	8	4	7	1	20
“ “ Canadian parents,	7	—	6	—	13
“ “ N. Brunswick parents,	6	1	4	—	11
Totals,	551	439	189	62	1,241

Thus it appears that out of 7,112 individuals admitted to our pauper asylums, in 1861, 5,150 were British subjects, or their children born in this State, and the bare cost of maintaining them has been \$95,000 at least. If lunatics were included some 300 more would be added to the number, and the expense would exceed \$140,000. Besides these, the Commissioners have sent away about 600 of this class within a year under the law of 1851, without allowing them to become further chargeable.

TABLE NO. 20,

Iowa,	1	2	1	—	4
District of Columbia, .	1	1	2	—	4
	264	132	245	100	741

The number of persons born in Massachusetts of American parents will not exceed 6 per cent. of the whole number admitted.

The following table, showing the number of persons entering the institutions in 1861, who have arrived in the State within two years, is suggestive of the expediency of the policy of removal.

TABLE No. 22.

	Arrived in 1860.	Arrived in 1861.	Total.
Tewksbury,	149	56	205
Brdgewater,	82	26	108
Monson,	228	368	596
Rainsford,	12	21	33
	471	471	942

There can be no better proof of the extent of the annual migration of paupers into Massachusetts, than the fact that within the last twelve months 942 persons who entered this State for the first time in 1860 and 1861, have become inmates of the State almshouses, notwithstanding the immense number sent away by town authorities and private charity, and the removal of nearly 1,700 by this Board, under the Acts of 1851 and 1860. None of the above number landed and paid head-money in Massachusetts, and for all details respecting those who did so land, reference is made to the Reports of the Superintendents of Alien Passengers.

The next table gives the number of persons sent from the several towns and cities which have contributed most largely to the institutions for the last four years.

TABLE No. 23.

	1858.	1859.	1860.	1861.
Boston,	2,719	2,176	2,225	2,484

	6,135	4,039	4,393	5,622
Nautical School Ship,				12
Gardner,				15
Millbury,				27

The number of children bound out or given in adoption, at the several almshouses, is as follows :

TABLE No. 24.

	1859.	1860.	1861.
Tewksbury,	69	28	28
Bridgewater,	52	12	20
Monson,	139	118	89
Totals,	260	158	137

This is a decrease of 21 for 1861, which is due to the condition of the country, and also to a lack of material,—the great mass of the children being yet too young to be apprenticed. In connection with this subject, the Commissioners would call attention to the following quotation from their last year's Report, and respectfully urge some legal preventive for the gross wrong inflicted both on the children and on society by their compulsory discharge, under the circumstances alluded to.

“Drunken and vicious parents, morally and physically unable to take care of their children, who are comfortably provided for in the almshouses, or furnished with a pleasant home in some respectable family, are constantly insisting on their discharge; having obtained them, they either return them in a short time half naked and filthy, and well stocked with those ‘evil communications which corrupt good manners,’ or dispose of them in such a way that their ruin is inevitable, and they become paupers and convicts, instead of honest and virtuous citizens. Young females, too, are sometimes demanded by their friends, when it is well known that they are to be doomed to a life of prostitution.”

BASTARDY CASES.

The Commissioners are glad to report a decided decrease in the number of illegitimate children born in the State institutions. This is doubtless due to the stringent provisions of the amended Bastardy Act, under which a sure retribution is meted out to the guilty, who can no longer use the almshouses as at once a convenience and a protection from exposure.

During the past year the Commissioners have commenced thirty prosecutions under this Act, of which five have been arranged by uniting the parties in marriage and payment of costs. Twelve others have been settled for the “benefit of the Commonwealth,” and the amount of \$2,122.35 has been thus received, an account of which has been duly rendered. One case has been abandoned for good cause, and the others remain unsettled.

APPROPRIATION AND EXPENSES OF THE COMMISSION.

The sum of \$7,500 was appropriated by the legislature for the maintenance of this department for the present financial year. In the three quarters ending September 30, 1861, \$5,123.67 has been expended, leaving for the remaining quarter a balance of \$2,376.33.

The expenses for the entire year will be about \$6,800, making a saving of some seven hundred dollars from the amount appropriated. After deducting the sums collected and accounted for to the treasurer, the net cost of the department for 1861 will but slightly exceed four thousand dollars.

APPENDIX.

[I.]

Faupers and Lunatics belonging to other Communities.

The undersigned herewith respectfully submits the following Supplementary Report, for the statements contained in which he is alone responsible.

Frequent allusion has been made in previous Reports to the gross imposition practiced upon Massachusetts by other communities in forcing her to support their paupers and lunatics.

The importance of this subject, as well in its effect upon their material interests, as in its most pernicious influence on the public morals, has never been duly realized by our people. Even the enormous cost has not aroused them to a proper sense of the wrong inflicted. They complain of their State tax, but fail to recognize its cause. In each succeeding year, Board after Board of Commissioners has raised in vain the voice of warning. Their honest attempts to execute the existing laws have been met with the cry of "inhumanity," and a direct interference with their functions. Their earnest entreaties for a remedy against existing and impending evils have been answered by threats to abolish the Supervising Board. With little aid and less sympathy, they have struggled against an increasing wrong till at last the astounding fact appears, that while the whole State has been agitated by the alleged misuse of a portion of the income of the school fund, the people have paid within seven or eight years a sum nearly equal to that entire fund—for what? For the support of persons *who have no claim whatever upon their charity*, but an undoubted and comfortable home in the communities which have repudiated them. This sum is large enough to found two or three colleges; or to establish and maintain forever six hundred State scholarships. Its mere annual interest is larger than the whole income of Harvard University, and would support all the paupers and lunatics for whom the State is properly chargeable. And yet vast as it is, it would have been doubled, but for the unremitted efforts of the State officers to remove the cause of the expense.

We propose, in this Appendix, to place before the public the evidence of the truth of the statements made on this subject by past and present Commissioners, giving names, facts and figures, taken from official records. We would answer, too, by these, the reckless and unfounded charges made by the authorities and presses of other States against our own officials—of “dropping” our paupers within their limits; when in fact these paupers were only a portion of their own—returned to them to receive that support they were legally and morally bound to furnish. Foremost in these accusations have been the press and some of the officials of New York, whose attention is especially invited to the facts which immediately follow.

1.—*Lunatics remaining in the Hospitals.*

Number remaining Oct. 1st, 1859,	415
“ “ “ “ 1860,	547

Increase of lunatics in <i>one year</i> ,	132
---	-----

Or half the number that one hospital is intended to accommodate.

The table following will show the places legally and in common justice bound to support these 547 lunatics, and the number belonging to each.

	Total.	In Worcester Hospital.	In Taunton Hospital.	In Northampton Hospital.
NEW YORK,	142	29	49	64
British Provinces,	88	22	36	30
Maine,	10	3	5	2
New Hampshire,	10	5	5	—
Vermont,	5	4	—	1
Rhode Island,	5	—	2	3
Connecticut,	4	2	1	1
Other States,	9	3	5	1
MASSACHUSETTS,	178	42	64	72

Besides these, there are 96 whose place of landing or settlement cannot be ascertained, almost the whole of whom came unquestionably from New York or the Provinces.

Thus it appears that out of these 547 lunatics, Massachusetts is *bound* to support but 178, and including the "*unknown*," but 274, all of whom might be accommodated in one institution with ease (after removing the harmless incurables to an almshouse,) at an expense not exceeding \$32,000 per annum. The other two hospitals might be given up to private patients, and prove a source of income, instead of expense, to the Commonwealth.

The fact that *three* hospitals are maintained instead of *one*, is due directly and entirely to the lunatics coming in or sent in from New York and the British Provinces.

2.—Lunatics Supported.

We have not room to give all the facts, but in evidence of the truth of the statements made above, we publish the following names of lunatics supported in our insane hospitals during the year 1860—all chargeable to New York—and *one hundred and eighty-five* in number and their several bills.

Amount paid by the Commonwealth for the Support of Lunatic Paupers in the Hospitals, from their admission to the present date, who were patients in the year ending October 1, 1860, who were born, or paid "head-money," in the State of New York, and had acquired no settlement in Massachusetts.

Arpe, Gottlieb, . . .	\$66 37	Coppitan, Henry, . . .	\$79 56
Ahearn, John, . . .	122 06	Carney, John, . . .	46 03
Anspegg, George, . . .	249 01	Conway, Ann, . . .	390 60

NOTE.—The names marked with an asterisk are those of the three lunatics whose removal to New York by the undersigned, in July, 1860, occasioned the virulent abuse of this State and its officers by certain New York journals. Two of them had landed there within three years, and their names were on record: the third had been brought thence into Massachusetts and “dropped” in our streets. They were not removed until these facts were ascertained, and the friends of the only party who had any were duly notified; nor until their bills had amounted to the comfortable sum of \$704.82. It is refreshing to know that the Commissioners of New York, always honorable and just, admit these persons to be their own paupers, and are accordingly now maintaining them. And that this “vile and devilish” transaction, this “piece of mean and nasty swindling,” this “inhuman and infamous trick”—according to the press—is—according to their own pauper managers—an honorable and just proceeding, which they imitate whenever necessary.

The lunatics from Canada and the other Provinces, though less numerous, have proved quite as costly.

3.—*Lunatics Removed.*

At the close of 1854 there were a little over 400 lunatics supported by the State.

At the close of 1860 there were 547, and yet during the last seven years more than 600 have been sent by the Commissioners to the places

where they belonged,—nearly all of them life cases. By removing about one hundred a year, it was found that their number could be kept nearly stationary, and in six years almost 600 were sent away, thus preventing demands for increased accommodations ;—but owing to the obstacles before alluded to, during the year 1860, only 30 have been removed, and the number has risen from 415 to 547—an increase in a single year of 132. The experience of all the past, and the results of the two months of the present year that have elapsed, prove that the same rate of increase is continuing.

Now to form an idea of the cost of these strangers, let the reader estimate the amount for 600 persons, for terms varying from one to six years, at \$140 per annum, being the average price paid in cash from the treasury for each patient ; let him add to this the cost of maintaining them for the rest of their lives ; and after putting down the long row of figures which form the answer to this sum, let him remember that this relates only to lunatics removed directly from the hospitals, and does not include the imbeciles, idiots, cripples, and other miscellaneous contents of the four pauper institutions, removed during the last six years, amounting to over 10,000.

And where, too, would this army of madmen have been kept ? At what outlay for buildings and land ? At what cost for furniture, bedding and salaries ? If 575 State lunatics (in addition to private and town patients) crowd our three hospitals to repletion, what would have been done with those removed, who were equal in number ?

A fair consideration of all these items will show the expenditure *prevented* by removal by the Alien Commissioners, for the past seven years ; and what must be the inevitable result, if, through a false philanthropy, we adhere to the fatal policy of bearing nearly all our neighbors' burdens, when they are even more able than we to fulfil their duties.

4.—*Paupers from other Places.*

In further proof of our statements, we submit the following returns from the almshouse at Monson, which is about an average of the four pauper institutions, in the nativity, &c., of its inmates :

For the year ending October 1, 1860, there were admitted,	. 1,413
Deducting transfers from other houses, 191

There remain, 1,222
---------------	-----------------

For whose support the following places are holden :

NEW YORK, 520
British Provinces, 164
Connecticut, 38

Pennsylvania,	31
Maine,	21
New Hampshire,	15
Rhode Island,	8
Vermont,	8
Other States,	28
Unknown,	68
MASSACHUSETTS,	321
	<hr/> 1,222

Somewhat astounded by this result—New York contributing almost half of the inmates, and Massachusetts but 16 more than one-fourth—we examined other years, and subjoin the results :

For the year ending October 1, 1857, there were admitted, .	704
Settlements unknown,	86
	<hr/>
Leaving,	618

For whose support the following places are holden :

NEW YORK,	270
British Provinces,	73
Vermont,	23
Connecticut,	21
Other States,	33
MASSACHUSETTS,	198
	<hr/> 618

For the year ending December 31, 1855, there were admitted, .	498
Settlements unknown,	96
	<hr/>
Leaving,	402

For whose support the following places are holden :

NEW YORK,	203
British Provinces,	55
New Hampshire,	9
Other States,	21
MASSACHUSETTS,	114
	<hr/> 402

For the time between May 1, 1854, and January 1, 1855, being the first eight months after the opening of the insti- tution, there were admitted,	445
Settlements unknown,	106
	<hr/>
Leaving,	339

Belonging as follows :

To NEW YORK,	123	
British Provinces,	50	
Connecticut,	31	
Rhode Island,	16	
Other States,	18	
MASSACHUSETTS,	101	
	<hr/>	339

By these indisputable data, it appears that New York and the Provinces, in these four periods, furnished 1,458 paupers, at Monson, and Massachusetts but 734.

More figures can be furnished, if wanted, but here surely are enough to show that but for these contributions from our neighbors, two of the four pauper institutions need not have been built, and the expense of maintaining them for six years and a half could have been saved.

5.—*Expenses incurred for the last seven years, in consequence of Lunatics and Paupers having settlements elsewhere.*

Cost of hospital at Northampton,	\$326,251	82
Expense of maintaining the same to January 1, 1861,	64,495	76
Expense of maintaining lunatics not chargeable properly to this State, at Worcester, Taunton, and elsewhere, from January 1, 1854, to January 1, 1861,	230,632	91
	<hr/>	
Total for lunatics,	\$621,380	49
Cost of two pauper institutions,	\$153,938	77
Expense of maintaining the same, from May, 1854, to January 1, 1861,	420,354	22
Expense of maintaining such paupers, from October, 1853, to May, 1854,	25,000	00
Expense of removing paupers for seven years,	21,000	00
Total for paupers,	<hr/>	620,292 99
Total expense for both,	<hr/>	\$1,241,673 48

We have taken great pains to verify this amount, and we feel confident that any necessary correction would only increase it.

A most searching investigation, instituted by the Superintendent of Alien Passengers, has proved beyond a doubt, that the "head-money," paid within the State for the past five years, will support all of those paying it, that have become a public charge, and leave a large surplus.

This has been the experience of the New York Commissioners of Emigration. Why should Massachusetts pay more?—a million of dollars more in seven years? Have the tax-payers nothing to say about it?

The remedy for this evil is simple enough. It is merely to apply to the hospitals the same system which has wrought such a reform in the three almshouses—reducing their current expenses to less than a hundred thousand dollars per annum, and bringing down their numbers to a point lower than ever before. It is to *purge the institutions*; gently, humanely, but firmly to remove every patient, capable of being removed, and justly chargeable to another place, to that place, and bar his return. There is no “barbarity” in this course. It is practiced rigorously by all the neighboring States, and if neglected by us, must inevitably result in filling up our hospitals, and loading us with a burden too heavy to be borne. The Commissioners are anxious to execute our own wholesome laws. They are willing to encounter fatigue, hardship and personal hazard abroad;—but they should be protected at home from vexatious law-suits, political assaults, and perpetual threats and persecutions. They are at once the protectors of the poor, and guardians of a weighty interest of the whole people. They must be sustained in all things lawful, as are their co-workers in other States, by the press, the government and public opinion. Thus aided, a heavy load can speedily be lifted from the finances of the State. Against these mighty agents, their efforts must be powerless.

H. B. WHEELWRIGHT.

[II.]

The following is a List of the Persons removed from the State under the law of 1860, and the Amount of Fare in each case.

Total expense, . . .			\$1,892 95

The whole number of persons removed from the State, under the law of 1860, during the year, is 394.

It must be recollected that, under the operation of the law of 1860, these 394 paupers have been intercepted, when about to enter the almshouses, and forthwith removed from the State. As very many of them were life cases, and all (by the terms of the statute) likely, in the opinion of the overseers, to be chargeable for at least one year, the economical effect of the law in question can be readily seen by a comparison of the above numbers. The expense of supporting the above number in the almshouses for one year would have exceeded \$15,000.
